

## **PREFACE**

This is the story of Alvarado. It is told through the use of newspaper clippings and short articles, from published histories and the Internet. It covers the period from 1850 to January 14, 1959 when Alvarado became a district of Union City. It is the story of every day events and people according to the time where they took place. None by themselves are particularly earth shattering or worthy of national attention. But they are the story of Alvarado and if you are *not* consumed with an overwhelming curiosity of Alvarado's history I would suspect that it would make for very dull reading.

I grew up in Alvarado in the 1940's and I was always filled with a curiosity about what Alvarado was like 100 years before I was born (1941). I was raised on a farm on the outskirts of town near the intersection of Santa Maria Drive and San Rafael Way in the Casa Verde tract. Back then San Rafael Way was known as Fair Ranch Road and it ran from Alvarado Boulevard east to Alameda Creek. But today the only portion of *old* Fair Ranch Road still so named is between Alvarado Boulevard east to the SP railroad tracks. Santa Susanna Way and San Rafael Way are strips of old Fair Ranch Road renamed.

I remember I could step outside our back door and look for miles in any direction. To the west I could see the strip of Poplar Lombardi trees T. P. Harvey planted along Alvarado-Centerville Road in front of his home. I could also see the Southern Pacific railroad tracks behind the Harvey home as it headed south and then disappeared into the distance at Hall Station as the tracks headed for Newark. I used to like to watch the little steam trains puff along pulling their load. One day I counted over 110 boxcars pulled by a single steam engine.

Looking south I could see the George Harvey home, now a park on Falcon Drive. When I was a young lad I used to look at the tall trees that surrounded the George Harvey home and they appeared about as near to me as the moon. Even when I was at the southern end of our property on what would be today's San Andreas Drive; the Harvey home still seemed far away.

Looking southeast I could see the always-present pall of smoke pouring from the stacks of the steel mill in Niles. In the early 50's smog was a new term to us. Not many people paid any attention to the environment in those days; the steel mill was an important industry in our area and offered good paying jobs.

To the east I could see the tree-lined Alameda Creek from the south near Lowry Road all the way around me northwest to Smith Street with the sugar mill in the background. Perched on a hill due east of me I could plainly see the Masonic Home in Decoto.

To northwest I could see the giant smoke stack of the Holly Sugar mill. I can remember that at about 3:00 pm, if the wind was blowing in the right direction and the sugar mill was working, it smelled like they were making Cracker Jacks. I would stop the tractor or lean on a hoe for a moment and just savor the smell.

In those days homes were sparse in Alvarado except for downtown. The same was true for the rest of Washington Township. Between Tennyson Road to the north of Alvarado south to Warm Springs, all was open farmland or marshes except for the eight towns that made up the township. Over the decades the towns may have grown to some extent, but the farmland density remained almost unchanged. Hence, until the early 1960's the change in population density went largely unnoticed.

Washington Township was comprised of eight sister towns: Alvarado, Decoto, Centerville, Niles, Mission San Jose, Warm Springs, Newark and Irvington. There was also the Alviso District, which

was really not a town but occupied a space roughly equivalent to any of the eight regular towns. As separate towns go we were quite close, tied together by two common threads. The first and most important was Washington Union High School where the ten or so elementary schools of the township all sent their graduates. The second reason was subtler; we were a confederation of farm towns in an ever-increasing sea of urbanization, with the metro-plexes of Oakland/Hayward to the north and San Jose/Santa Clara to the south.

The impact of the high school can be shown by its geographical footprint. Washington Union High School served the township south of Rosseau Street in Fairway Park in Hayward to the Milpitas City line and from the foothills to the bay. It did so through the graduating class of 1959 until the opening of James Logan High School in Union City in 1960.

Life was certainly different in the 40's, 50's and 60's (my era) than it is today. Back then Alvarado was lucky to have 1,300 souls. Alvarado grew in small town fashion, that is, if you lived in Alvarado in the 1890's and came back to visit in the 1940's there would be a few more people and some new buildings, but it was still recognizable as Alvarado. Even if the density of people doubled in 100 years, it would be scarcely noticeable because there was still so much open room.

Living on the farm outside of Alvarado brought traveling salesmen to our door. Since a large percentage of farmers were immigrants and their wives did not drive the salesmen were welcomed. Cloverdale Creamery in Centerville delivered milk to our door as did the Peter Wheat Bakery delivered bread and bakery products to our door. Household products were delivered by the Raleigh man or the Watkins man. We had a fish man, a meat man and a guy that brought clothes and miscellaneous goods to us in the back of his panel truck. From him I got the coveralls and high top shoes I wore to school until the fifth grade. Henry Miller Dry Cleaners used to pick up and deliver. Anyone else? Yes, Dr. Guy J. Romito, a young Doctor from Centerville once made a house call when I was very sick in the early 50's. As for groceries my father would drive my mother to Centerville to shop at the Safeway store behind the SP Train Depot on Peralta Boulevard once a week.

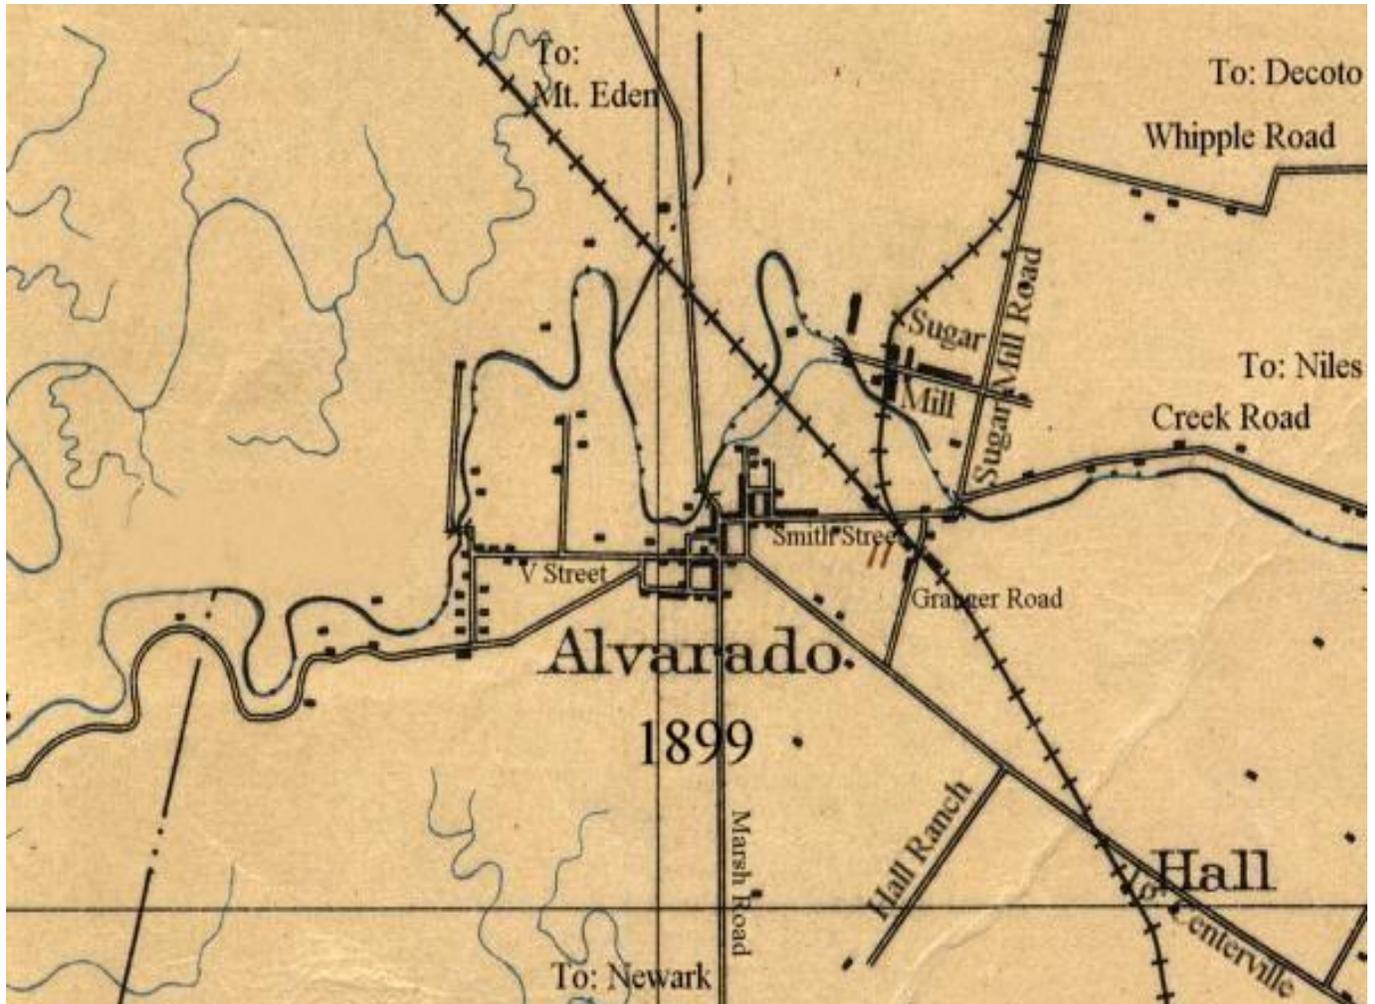

If one looks back at old maps of Alvarado you will notice that in a 60-year period up until 1959 only one new street was added to downtown Alvarado. That was Granger Avenue next to Alvarado Grammar School. On the outskirts of town Fair Ranch Road, Hall Ranch Road and Hop Ranch Road were either added to or completed in the 1900's. At the end this preface are two Alvarado Maps dated 1899 and 1959. During that 60 year period there are virtually no changes to downtown Alvarado streets.

As you read through this work you will find recurring themes. One is the sugar mill, the second is the grammar school, the third is water (too much, or too little), and fourth is socializing amongst the people in town. By the time I went to high school in the fifties Alvaradan's were referred to, good naturedly by the denizens of our sister cities, as the "mud hens" or "country hicks."

One final note: The term "Old Alvarado" is often heard in town. What does it mean? Is it a certain decade? After completing this work I have determined that "Old Alvarado" was the town you grew up with. It could be any decade from the 1850's to the 1960's.

See the following pages for early maps of Alvarado:

### Downtown Alvarado - 1899

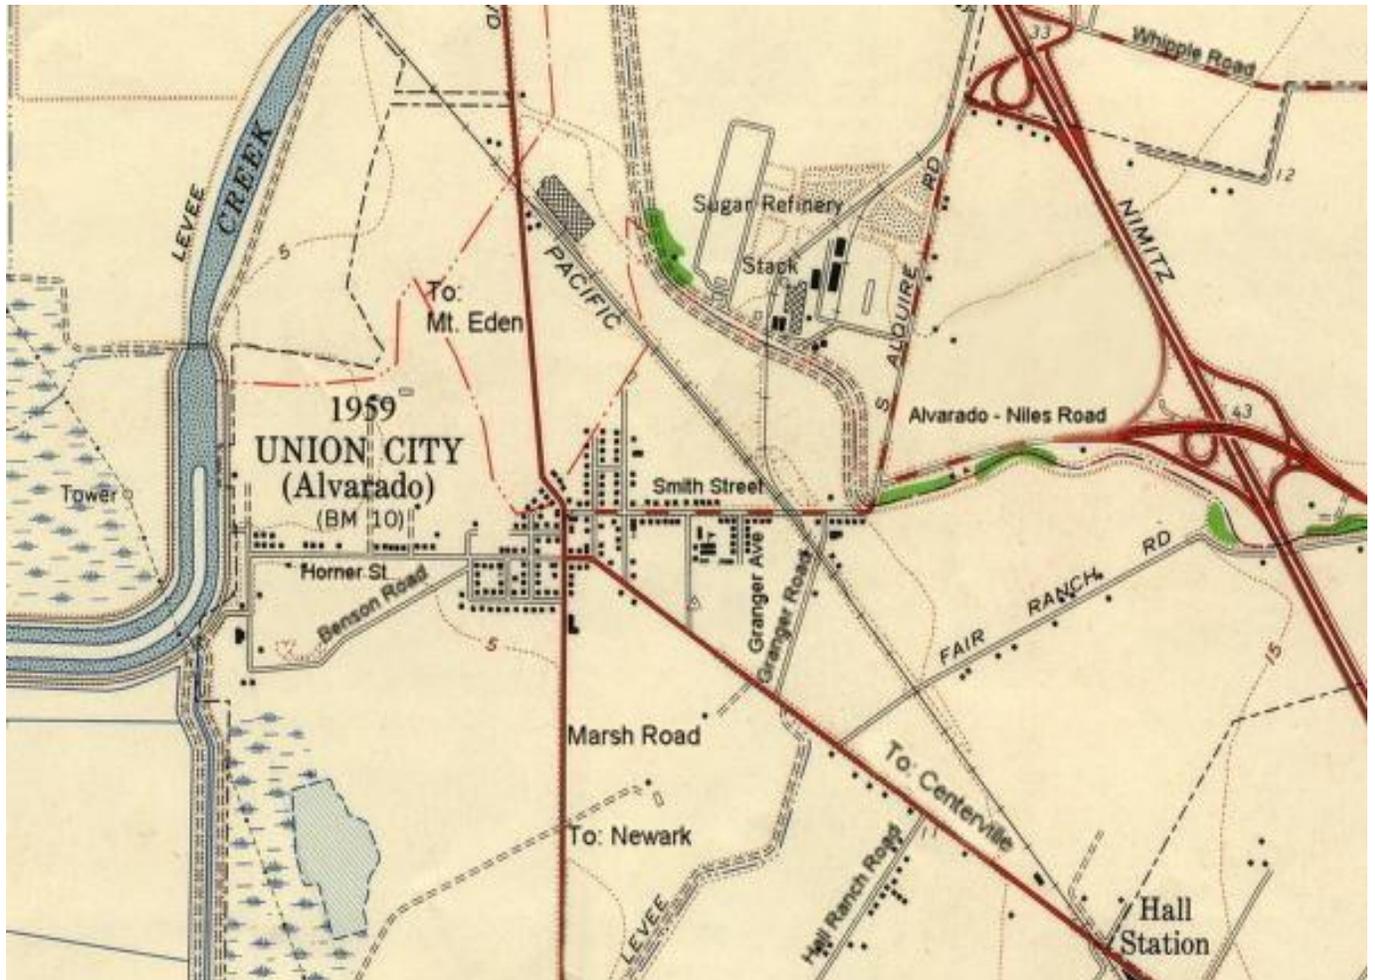

This is the basic configuration of downtown Alvarado. All the streets and roads seen here could still be found with the exception of: The two roads shown heading north from "V" Street (today's Horner Street) and the one road going west from the end of Benson Street.

The road above the label "V Street" eventually lost its status as a county road but may have continued as a gravel road for local residents.

The two heading off into the marshes lost their status as county roads and may have still existed in 1959 as Leslie Salt Company private roads.

## Downtown Alvarado - 1959

This is the configuration of Alvarado in 1959. There is virtually no change in the street layout with the exception of three roads mentioned in the previous map and the addition of the Hall Ranch Road and the addition of Fair Ranch Road and Granger Avenue near Alvarado School. The sugar mill is shown in greater detail. Note the change in the Alameda Creek, in 1899 the creek came within several yards of Maiden Lane, in 1959 it bypasses downtown altogether and is only seen at the west end of town.

Note that the map shows the addition of the I-880 Freeway (noted as the "Nimitz" on this map). The dogleg on Whipple Road has been straightened out as a freeway on ramp. South Alquire Road was closed at the freeway and picks up again as Industrial Avenue on the other side of I-880. At one time South Alquire Road ran from the west end of Smith Street outside of downtown Alvarado to Mission Boulevard in Hayward at the old Holiday Bowl.

## THE TOPOGRAPHY OF WASHINGTON TOWNSHIP

The first recorded sighting of San Francisco Bay comes on October 31, 1769 by Sergeant Jose Francisco Ortega from a hill overlooking present day San Mateo. He was part of the Gaspar de Portola party looking for Monterey. They overshot Monterey and made the first recorded sighting of San Francisco Bay.\*

He and his men were sent to forage for game in the hills. At the top of a ridge he stared at a vast shimmering inland sea and could clearly see the opposite coast of the bay. They gave the east side of the bay the name "Contra Costa." The term Contra Costa in Spanish means "opposite coast."

Several days later they crossed the bay between Alviso and San Jose and recorded their first impression of what they saw. They looked north at Washington Township and described the east bay as a "large featureless plain crossed by an *Alameda*." The term alameda in Spanish means, "a tree lined walk or promenade." Alameda's are a much-loved feature of Spain's finer homes and gardens.

In the coming decades the Spanish would give local area names that have lasted for 240 years. These names were not based only the names of the holy saints, or the explorers of the areas and the grantees of land; but also to the topography of the land. One, the alameda, would eventually become the Alameda Creek and the name of our county. This is fitting for this creek had much to do with the success of Washington Township for the 108-year period this work covers.

The old Alameda Creek that the Spaniards first saw ran from Niles Canyon to the east to the north of Alvarado. But the beginning of the creek is in the hills beyond the foothills you see to the east. The watershed of the Alameda Creek is over *630 square miles*. This includes Dublin-San Ramon, Livermore, Pleasanton and south all the way to the east slope of Mt. Hamilton in San Jose. When it rained Alameda Creek could become a raging torrent. Today the San Antonio and Calaveras Reservoirs and the flood control levees built in the late 50's and 60's control much of the power of the power of this watershed.

Throughout this history you will run across major floods, minor floods, and sometimes a drought. The Alameda regularly poured out its silt onto the alluvial plain known as Washington Township during flood season. Where there was regular flooding the soil was the richest. Where there were no floods the ground was hard and clay-like. A good example of this is the land between Whipple Road and Industrial Parkway.

Another feature of this massive movement of water is the Niles cone water basin and the Alvarado Artesian wells. For many decades (1870's – 1920's) the Artesian waters that flowed on the west end of Alvarado were thought to be inexhaustible. Mr. Dingee from Oakland bought up water rights in Alvarado and his 35 wells pumped over 5 million gallons of water daily to Oakland and its suburbs. Eventually the water table started to fall and local farmer's wells began to fail. The Township had to fight to get their water back, and then they realized that Alvarado was pumping away most of the Township water.

Decades ago the importance of the percolation ponds in Niles as a ground water recharging device began to be realized. Water is now limited and conserved to serve our large population base. Our largest users of water, the farmers, are gone.

For those of you who grew up in Washington Township, this next revelation is not surprising. Below is a table of elevations. A quick review of this table will show why most frequently Alvarado and Newark bore the brunt of the floods

<b><u>Location</u></b>	<b><u>Elevation (in Feet)</u></b>
The City of Niles	74
The City of Decoto	56
Fremont Blvd. & Thornton Ave.	52
Fremont Blvd. & Washington Blvd.	52
Hesperian Blvd. & Jackson St., Mt. Eden	36
Fremont Blvd. & Decoto Road	33
Alvarado Blvd. & Lowry Road	19
City of Newark	16
Alvarado Blvd. & Dyer Road	15
Union City Blvd. & Lowry Road	13
Union City Blvd. & Smith Street	13

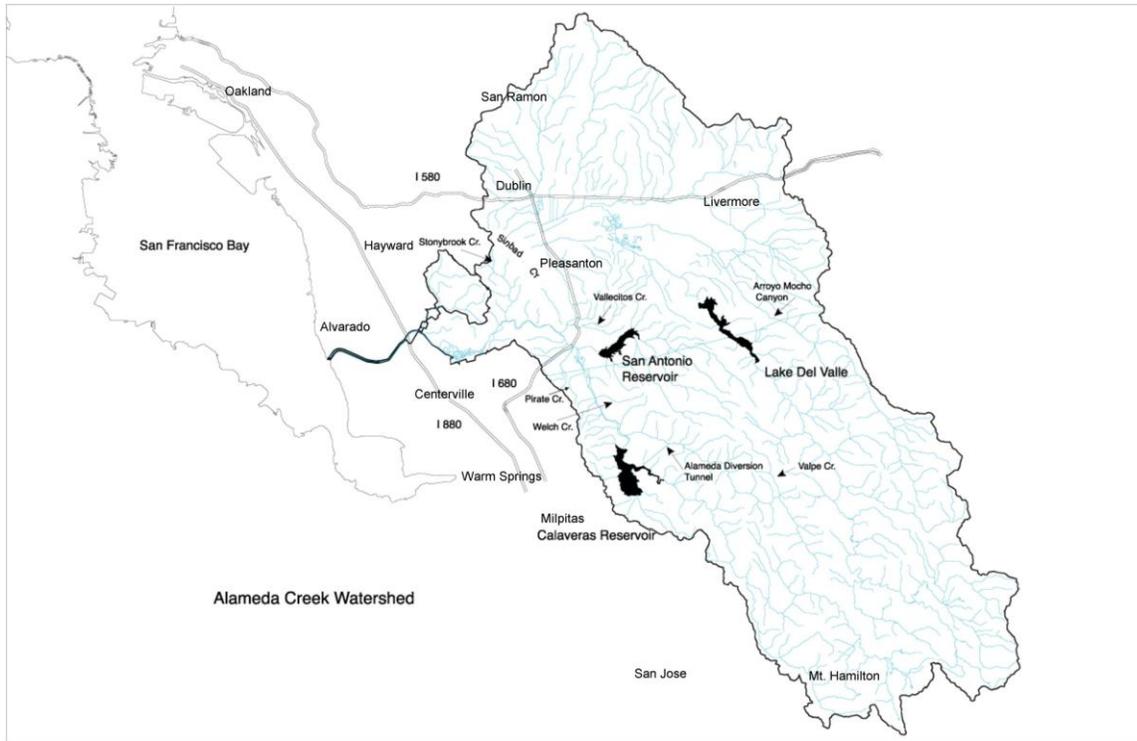

The course of the creek has changed and been changed since it was first recorded by the Spaniards. Remnants of the old Alameda Creek can still be seen at intersection of Dyer Road and Smith Street. The old creek runs south along Alvarado Niles Road, under I-880 and onwards towards Hop Ranch Road. Near the end of Hop Ranch Road the old creek bed ends and the Flood Control Channel takes over Alameda Creek.

The flood control channel runs west from Hop Ranch Road under the I-880 overpass, under the Alvarado Boulevard overpass, then along the south side of Lowry Road towards the bay.

South of Decoto Road (at the Bell Ranch Bridge) towards Niles the creek has been widened and straightened making its course quite tame. North of Decoto Road (at the Bell Ranch Bridge) towards Alvarado, the course of the creek has been straightened and at Hop Ranch Road the course has been entirely diverted into the Flood Control Channel west to the Bay.

On the next page you will a map showing the Alameda Creek watershed. The heavy black line crossing I-880 heading into San Francisco Bay is the new Flood Control Channel. The old creek bed snaked further north through Alvarado as shown on the map of Washington Township dated 1857 as shown in the next section.

\* In 1579 Sir Francis Drake discovered a wonderful bay while sailing along our Pacific Coast. He described it as a wonderful natural harbor. However, the coordinates he gave us for this harbor puts the location much further up the coast between San Francisco and Oregon. No definitive proof has ever been found that Drake ever entered San Francisco Bay.

## EARLY CALIFORNIA HISTORY

### **The Dedication of Mission San Jose, June 11, 1797:**

Father Fermin Lasuen dedicates the site of the new mission to St. Joseph, the foster father of Jesus, under the authority of the King of Spain. It is founded at the base of the foothills and becomes the first white settlement in Washington Township.

### **Mexican Independence from Spain, August 24, 1821:**

Mexico ends more than 300 years of rule under Spanish colonialism with the signing of the Treaty of Cordoba. The revolution started on September 16, 1810 and did not end until 1821, when the Spanish yoke was finally cast off. Mexicans (in Mexico) celebrate their independence day on September 16<sup>th</sup>, the day the revolution against Spain started, and not the "Cinco de Mayo" celebration we have here in the U.S.

This also ended Spanish rule in the U.S. and its territories in the west and southwest. With the exception of Texas, under which some colonialism under Stephen F. Austin was allowed, all other territory was under Mexican rule. Mexico undid the influence of the Spanish Missions and allowed land ownership to government favorites under the generous land grants of the era. Vast ranchos were established under the leadership of the grantees. Even non-Mexicans were allowed to own land if they swore allegiance to Mexico and converted to Catholicism. An excellent example of this was Robert Livermore who was given the Rancho Las Positas grant, which made him a contemporary of Bernal, Sunol, Vallejo, Estudillo, Alvarado, Alviso, Pacheco, Peralta and others.

The Mexican government did not fully recognize the importance and wealth of California, and the inhabitants (the Californio's) were treated as second class Mexican citizens.

### **The Bear Flag Revolt, June 14, 1846:**

On the morning of June 14, 1846, men from the Grigsby-Ide party of settlers awoke General Mariano Vallejo in Sonoma, California demanding his surrender. This was the start of the "The Bear Flag Revolt," the first step towards California independence. A flag was needed and it was reportedly designed by William L. Todd, nephew of Mary Lincoln Todd. The flag bore a single star to signify our solidarity with the Texas revolution, a grizzly bear to signify strength, a red stripe along the bottom to signify our allegiance with the U.S. and the words "California Republic."

General Vallejo recalls that after his surrender that day the flag was raised in Sonoma and he remembered the grizzly bear more resembled a pig. Although there are representations of this flag, the original flag was lost in the earthquake and fire of 1906.

In a show of support for the Bear Flag Revolt, Captain John C. Fremont and a troop of about 60 Topical Engineers joined the revolt and helped to drive the hostile Mexican forces out of Northern California (not all Mexicans were sad to see the Mexican Government driven out nor did all of them participate in defending California against the Bear Flag Revolt).

The Bear Flag Revolt ended before the Mexican-American War, but California Independence was not established officially until February 2, 1848, the end of the Mexican-American War.

**The Ship Brooklyn, July 31, 1846:**

On July 31, 1846 the Ship Brooklyn labored through the fog of the Golden Gate and docked at San Francisco). Aboard were a group of Mormons who had set sail from New Jersey six months before. This party had left Nauvoo, Illinois to sail around the Cape, leave a small landing party in Hawaii and then finish the passage to Northern California. Their leaving of Nauvoo coincided with Brigham Young's march from Nauvoo to Salt Lake City.

According to some local accounts of the time their coming was part of a "Mormon scheme" to colonize northern California as a Mormon settlement. However, they arrived just in time to see California claim independence from Mexico as a dependency of the United States, thus derailing their purported plans. They were, however, an industrious and hard working group of people and had brought with them a shipload of farm tools to help them prepare for their future.

Many walked to Salt Lake City to join Brigham Young. But some stayed and left behind them pioneer names that are still large throughout our township. John Horner is among the largest, he is known as the Father of Union City and "California's First Farmer." He was also instrumental in the beginnings of Centerville and Irvington.

Others that settled in the township area from the Ship Brooklyn were John Joyce, Earl Marshall, Simeon Stivers, and Barton and Origin Mowry.

**California Independence, February 2, 1848:**

Independence for California was intertwined with the fortunes of the Bear Flag Revolt and the much larger Mexican-American War. The Mexican-American War was fought over the issue of statehood for Texas and the U. S. policy of "Manifest Destiny." Regardless of the complicity we could find with Mexico to start a war; the aim of our government was to possess all the land to the Pacific.

California's independence was an opportunistic side battle to overthrow Mexican rule in Alta (Upper) California. Surprisingly, many Mexicans (Californios) were sympathetic to the Yankee cause, which made the Bear Flag Revolt easier than it should have been.

With the taking of Mexico City, the American Forces under General Winfield Scott effectively ended the issues between Mexico and the United States. The entire west under Mexican rule was ceded to the United States for a small payment of money. The conflict ended with the Treaty of Guadalupe Hidalgo in 1848.

### **Gold Discovered in California, January 24, 1848:**

On January 24, 1848, James W. Marshall discovered gold at Sutter's Mill in Sacramento. In March of 1848, Samuel Brannon (of the Ship Brooklyn) strode through the streets of San Francisco holding aloft a vial shouting, "Gold! Gold! Gold from the American River!"

On August 19, 1848, the New York Herald is the first eastern newspaper to report the gold strike.

On December 5, 1848, President Polk confirmed the discovery of gold to an address before congress. The Gold Rush is on!

Although there was some truth to the fact that you could pick up nuggets just laying in the streambeds without picks or panning, by the time the Easterners arrived the easy "pickings" were over.

### **California, the 31<sup>st</sup> State, September 9, 1850:**

On September 9, 1850 California is admitted into the union as the 31<sup>st</sup> state. At statehood Alameda County did not exist. It was split between Contra Costa and Santa Clara Counties at the Alameda Creek. All north of the Alameda Creek was Contra County and all south of the Alameda Creek was Santa Clara County.

### **Petition to Create Alameda County, March 10, 1853:**

On March 10, 1853, Henry C. Smith, assemblyman of the state senate from Santa Clara County petitioned the state legislature for the creation of Alameda County from the counties of Contra Costa and Santa Clara.

Since the time of California statehood, Alameda County did not exist. The Alameda Creek was the dividing line between Contra Costa and Santa Clara counties. Mr. Smith, a resident of New Haven (Alvarado), felt San Jose was too far away as a county seat and he felt the sympathies of the San Jose County seat did not coincide with those of Washington Township.

With the help of Horace W. Carpentier, assemblyman from Contra Costa and a resident of Oakland, they put through the legislature a bill to carve Alameda County from Contra Costa and Santa Clara Counties.

On March 25, 1853 Alameda County was created. A government was set up and a home needed to be found for the county seat. Mr. Smith favored his hometown, New Haven. Mr. Carpentier favored his hometown, Oakland. When put to a vote, Smith won 19 – 17. But the county seat was named after former Governor Juan Alvarado, not New Haven. The town of Alvarado was created.

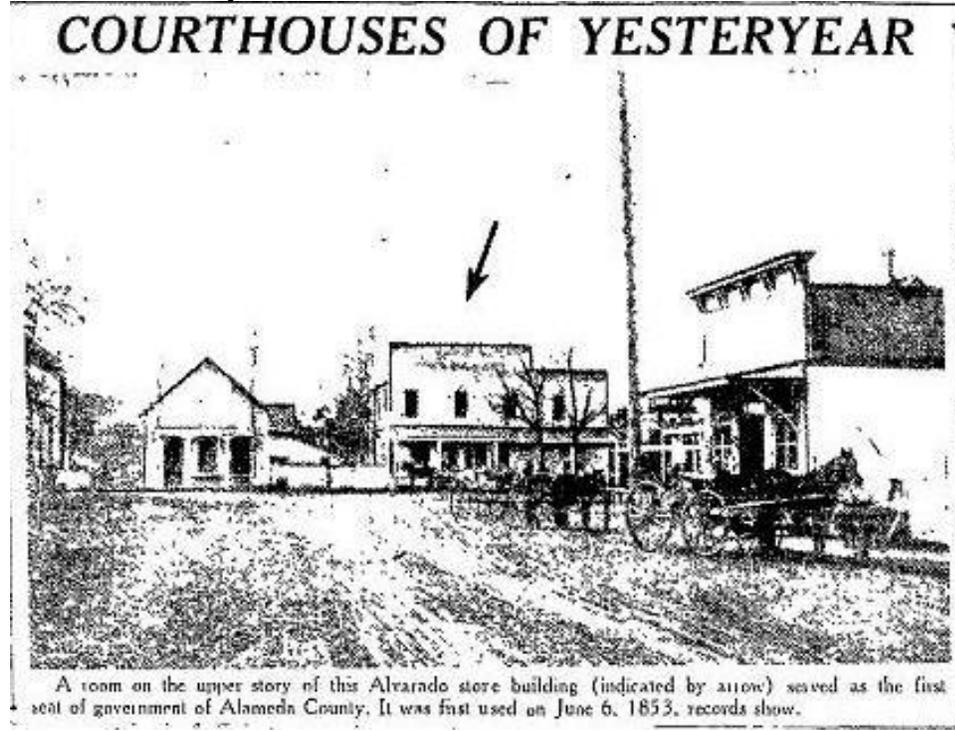

Alvarado won the county seat because at this time the bulk of the population in the county lay in the southern portion of Alameda County. Within a few years this advantage would disappear forever as Oakland, San Leandro, Alameda and other towns in the north of the county outgrew their southern counterparts.

**Alvarado Court House, June 6, 1853:**

Those that had the largest share in shaping affairs in the new county were, Henry C. Smith, Addison M. Crane, Augustus M. Church and Horace W. Carpentier. The southerly end of the county possessed the controlling influence, as it carried off the county seat and nearly, if not all, the offices.

The first regular term of the Court of Sessions of Alameda County was held in the court-room in the town of Alvarado, on Monday, the 6<sup>th</sup> day of June A.D. 1853, before the Honorable Addison M. Crane, County Judge; Augustus M. Church, Clerk, Andrew J. Broder, Sheriff, and William H. Coombs, Esq., District Attorney of said county.

## EARLY UNION CITY/NEW HAVEN/ALVARADO

The actual beginning of Alvarado is rather difficult to piece together. Most early dates given state a year rather than a specific date. In some cases I found conflicts in my mind as to the date when Union City and Alvarado were founded. Because of this I have decided to start the history with the biographies of John Horner, Henry Smith, and E. H. Dyer.

### **JOHN MEIRS HORNER:**

John Horner arrived in San Francisco on July 31, 1846 aboard the Ship Brooklyn, which had sailed around the horn from New Jersey. He had left Nauvoo, Illinois after the death of the Mormon prophet Joseph Smith and headed for Northern California with a group of Mormons under the leadership of Samuel Brannon. At the same time Brigham Young would lead the rest of the Mormon colony at Nauvoo to Salt Lake City.

John Horner farmed in and around the Mission San Jose and Centerville area. In 1847 he and his bride settled in Irvington, then known as "The Corners." In 1849 and 1850 he made good money raising vegetables and selling them in San Francisco and Mission San Jose to people on their way to the goldfields.

In his autobiography John Horner states: "...Thus ended our farming venture of **1850**. This year we purchased one hundred acres of land at the landing, on the Alameda River, and laid out the town of Union City upon it. We made extensive preparations for increasing our business in 1851. We started a commission house in San Francisco to sell our vegetables. We bought some excellent farm land near Union City, built upon and farmed it, in addition to improving our home farm, which was ten miles away."

"This year (**1851**) our crops were large, and a ready market was found for all we raised, though at reduced prices, since farmers had multiplied. We secured by purchase the steamer "Union" to carry our produce to market..."

"We extended our agricultural operation in **1852**, by purchasing more farmland..."

"The History of Washington Township" states that Horner started a stagecoach line in 1852 that ran between the Mission San Jose and the landing at Union City.

"...Flouring mills not being sufficient in California at this time, we built one at Union City (**1853**), with eight run of burrs, at a cost of eighty-five thousand dollars and ground our grain and that of others."

Apparently by the time Horner bought land in Union City a landing was already in existence. Whether it existed before 1850 and who owned it is not mentioned. He did however, begin farming in our area in 1851 and increased his operation in 1852. In 1851 he added the steamboat "Union" to ferry passengers and produce to San Francisco and whatever was needed to ferry back to Union City.

John Horner received several awards, one for being recognized as "California's First Farmer," and the second for having the finest ground flour in the state. Today he is known as the "Father of Union City."

John Horner died May 14, 1907 at his home in Kukaiau, Hawaii where he had spent over forty years managing a cane sugar plantation. He was born in Monmouth County, New Jersey on June 15, 1821.

John Horner was an industrious, hardworking man who was generous and trusting to a fault. His eventual failure in farming in California was largely brought about by having to pay twice for the same piece of property and the heavy debt he incurred in securing property to farm.

**Henry Clay Smith:**

Born in Fort Defiance, Ohio October 25, 1824 he eventually arrived in Sutter's Fort, California in 1845. He joined the Bear Flag Revolt in Sonoma in 1846 and served under Captain Fremont until the U. S. prevailed over Mexico. For his service General Riley, Military Governor of California, rewarded him with an appointment as Alcalde of Mission San Jose in the year of 1849.

Henry bought 800 acres of land on the Arroyo de Alameda where he later laid out the town of New Haven. In 1851 he took a trip back to Michigan to visit relatives. He returned with 19 people from Michigan and Indiana. While he was away he had a home built in New Haven.

In May 1852 Henry Smith partnered with A. M. Church in the operation of a general store on the banks of the Alameda Creek in New Haven and continued to prosper. He invested in heavily potatoes, as did many people in township. By the end of year potatoes were everywhere, the glut ruined many farmers and investors.

Friends encouraged Henry to go into politics; he did, and was elected to the state legislature for Santa Clara County in 1852.

Henry Smith became disenchanted with the representation Washington Township was given from the county seat at San Jose. He felt our needs were overlooked. In the state legislature he found a fellow representative who felt same way about his county, Contra Costa County just across the Alameda Creek from Santa Clara County. This large county included present day Oakland and its suburbs. But its representation came from Martinez. This gentleman's name was Horace Carpentier.

On March 10, 1853 Henry Smith petitioned the state legislature to create a new county to be carved out of Contra Costa and Santa Clara Counties to be called Alameda County. On March 25, 1853 the state legislature passed the bill to create Alameda County, although over the next several weeks slight revisions were made to the original bill.

Next came the task of locating the county seat. Horace Carpentier wanted the county seat in Oakland; Henry Smith wanted it in New Haven. At this time in history southern Alameda County held a larger population than northern Alameda County. The vote for the county seat went to New Haven 19 – 17.

However, the county seat was named in honor of the former governor of California, Juan B. Alvarado. The name New Haven was dropped and our town became known as Alvarado. The town name of Union City to the west eventually faded away and it just became a district of Alvarado.

The next piece of business for Alvarado was choosing the location of the county seat. The second floor of A. M. Church & Henry Smith's general store was chosen as the county seat. The store stood on Levee Street at the west end of today's Smith Street. On June 6, 1853 the first court of sessions was held in Alvarado.

Henry Smith was elected to the Board of Supervisor's for Alameda County in 1855 and was appointed as chairman of the board. In 1859 he lost in his bid for re-election. He eventually left for Nevada for a few years, returned to Alameda County to live in Livermore where he died on November 24, 1875 at the age of 51.

He will always be remembered for his service to Washington Township and the creation of Alameda County. He is known as the "Father of Alameda County."

**Ebenezer Herrick Dyer (E. H.):**

"Coming here in the infancy of the county, E. H. Dyer was quick to see her necessities and her possibilities, and with the push, energy, and determination of purpose that have always characterized him, he has stood in the face of, to ordinary men, insurmountable difficulties, and has succeeded in raising his own limited fortune to ample proportions and in establishing an industry in our midst the possibilities of which, not only to our country, but to the whole coast, no human foresight can today set the bound," wrote M. W. Wood in his History of Alameda County.

Ebenezer (E. H.) Dyer came to California at his brother, Ephraim Dyers, urging, to help him manage his farm business. Ebenezer was manager of the farms and Ephraim Dyer was to prepare leases of acreage.

E. H. was elected surveyor of Alameda County. The County Surveyor's job was to establish township maps and check out boundaries for title claims. In 1861 he was also appointed U.S. Deputy Surveyor for the State. His brother got a similar appointment covering the boundary from Lake Tahoe to the Oregon line.

A History by E. H. Dyer, grandson of the founder, gives us this story:

"About this time the agricultural press was featuring sugar beet culture to reduce the heavy importation of sugar from Germany and the Tropics. Only 25,000 tons of America's 450,000-ton consumption was produced at home in 1867. Every effort in America... had been a failure. As E. H. studied the subject he observed that every venture had been deficient in one or more of the essentials of beets, machinery, men, or money."

So E. H. sent for beet seed from Germany and started some test plots, expanding these to 150 acres of his Alvarado farm. He found that his stock thrived on the beets.

"It happened that in 1858 a small beet sugar factory was built in Fond-du-Lac, Wisconsin... two men had left their sugar house employment in Germany and came to America in 1867," wrote Dyer. The purpose was to build a pilot beet sugar factory. A. D. Bonesteel, instigator of the project, knew about the Alvarado experiments and decided to try California for his health and for the development of a "beet sugar estate."

The net result was that Bonesteel and his experts came to Alvarado. The Dyer brothers and their neighbors, General Hutchinson, B. P. Flint, W. B. Carr, J. N. Risdon, W. T. Garret, E. G. Rollins, and E. R. Carpentier (and others) formed the California Beet Sugar Company.

"The first spade full of earth was turned on May 9, 1870" on the Dyers farm. The first ton of sugar was delivered to the market in November 1870. "Glamorous barrels of polished black walnut staves bounded by resplendent brass hoops were filled with specially refined coarse grain sugar and dispatched to Washington for President Grant."

The method for refining sugar was to process 50 tons of beets daily, which resulted in 4 tons of sugar. The beets were mashed, rasped to mush and separated into pulp and juice. The juice was filtered several times and concentrated and filtered again, and finally boiled to crystals in a vacuum pan. The fill mass from the pan was centrifuged and the sugar was washed with steam and spread on the floor to dry. When it was dry enough it was put into barrels.

"Alameda Creek, 100 feet wide and 5 to 6 feet deep at the factory, provided the only means of transportation available to compete with horse drawn trucks and dusty roads. The creek reached salt water four miles below the factory at Union City. E. H., the seafarer, built a small side wheel steamer christened 'The Rosa,' having five-foot beam and thirty length," Dyer wrote.

Due to a falling out among the Dyers and the German technologists at the factory, the Germans moved on to Soquel to produce sugar at a new site ([taking with them the machinery but leaving the plant](#)). E. H. Dyer salvaged the Alvarado buildings and "determined to abide his time until the clan of Dyer boys could achieve stature and wisdom." "(The) career sugar craftsmen included three sons of E. H., three of Ephraim, one of B. F. Ingalls (brother of the wives of E. H. and Ephraim), and certain eager members of the boy's 'gang.'" Ephraim's sons were Henry S., Hubert, and Harold. Ingalls' son was Merrel. E. H.'s sons were Edward Franklin, and twins Hugh Thomas and Guy Sawyer. In 1879, with the help of outside stockholders, E. H. Dyer incorporated the Standard Sugar Manufacturing Company. "This company made a success of the business from the start," according to Historian Wood.

The following years brought success, followed by problems caused by a sugar war with San Francisco ([cane](#)) refiners. The price was low, but the factory continued to operate (1886-1887). Then a pair of boilers blew up, causing the death of a fireman. The works shut down. E. H. liquidated the warehouse stock. E. H., E. F. and H. P., as Dyer called them, began reconstruction plans.

The Pacific Coast Sugar Company was organized in February 1886, with new equipment on a new site across the road (State Historical Landmark #768).

The year 1888 brought enough results "to attract attention," Dyer wrote. Claus Spreckels and others came to see the plant.

Later, E. H. Dyer & Company built the pioneer Utah factory at Lehi, Utah. Part of Dyers stock was sold to E. C. Burr and John L. Howard, who organized the Alameda Sugar Company. "E. F. Dyer was under contract to direct operations for the 1889-90 campaign.

"The free sugar act brought discouragement to the domestic sugar producers. The Alvarado plant shut down in 1914. "When the war came Congress not only repealed the free sugar bill but urged and assisted the home industry to expand and produce. Alvarado's plant had been closed for a year and had lost its operating staff."

J. McCoy Williams, pioneer of an operation in Oxnard, was commissioned to reopen the factory. "He brought with him Charley Fleener as superintendent and W. E. Loranger as plant engineer. The old Factory at Alvarado satisfied war demand for sugar but the cost was high. Through J. McCoy's recommendation the chronicler (Dyer) was selected to serve in the place of the Consulting Engineer who had died. (To get the plant going, the crew dug into the 'graveyard' of parts from 1887 and had those rebuilt.)

"Williams revived the old custom under which the superintendent's house on the factory grounds was a center of social activities. The ceremony of lighting the kiln a few days before beet slicing began was conducted by Mrs. Williams in the presence of the factory staff. Some little girl of the neighborhood was usually selected to apply the match. The formal opening of the factory was accompanied by a half holiday of the public schools."

In 1925 the leafhopper destroyed much of Alvarado's beet crop. The plant was "now finally doomed," people said. But they were wrong. "Holly Sugar Corporation (Colorado Springs, Colorado) purchased the two factories (Tracy and Alvarado)." (Holly Sugar already had stock in the Alameda Sugar Company.)

The Alvarado plant was started up again in 1927. Walter Zeigler was named superintendent in 1928.

The old plant was reconstructed in the late 1930's. Dyer ([one of the younger no doubt](#)) wrote: "Some of the old timbers in the factory, harking back to 1870, carried their load year after year

by the grace of Providence, and 80 years later were still stored in the 'graveyard' behind the beet sheds, outwardly sound but mealy within. At every reconstruction of the plant there was always 'something new and something old;' but always the same old plant-as grandfathers knife, fitted from time to time with new blades and new handles, always remained grand-father's knife. The final achievement in 1937 was a modern 1800-ton factory of beauty and efficiency - a credit to the Holly staff and a monument to the redoubtable E. H. Dyer."

The company operated until 1969 under the direction of Clarence V. Lesser, field engineer,  
E. H. Dyer retired in the 1890's and lived until 1906.

## INTRODUCTION

### **The Town of Alvarado:**

In the beginning all was dark and then Governor Micheltorena, Governor of Alta California, created the "Potrero de Los Cerritos" Mexican land grant for Augustin Alviso and Tomas Pacheco. The date was March 23, 1844. They were given all the land between the Alameda Creek and the Sanjon de Los Alisos. This grant consisted of 3 leagues of property (some 10,610 acres), 4,000 head of cattle, 200 horses and mares, and 2,000 sheep.

The beginning of their property is at the point where the abandoned creek bed of the "Sanjon de Los Alisos" broke off from the Alameda Creek. The old creek bed, which is no longer visible today, originated from a point between the easterly projection of Thornton Avenue and Peralta Boulevard in today's Fremont California.

The northern boundary of their grant followed the Alameda Creek from the meeting point with the Sanjon de Los Alisos north to Alvarado and from Alvarado west to the Cerritos Hills. Hence the northern boundary was the Alameda Creek and everything south of Alameda Creek to point where Alameda Creek meets the old Sanjon de Los Alisos creek bed.

The southern boundary of the property is the origination point of the Sanjon de Los Alisos, an abandoned Alameda Creek bed still visible in 1844, but is almost totally obliterated today. The Sanjon de Los Alisos begins at a point just south of a straight-line extension due east of Thornton Avenue where it would meet the present Alameda Creek. From here it heads slightly south to a point almost touching Peralta Boulevard. Thence it meanders slightly northwest to a point where it crosses Fremont Boulevard just south of Thornton Avenue. It continues slightly west by northwest into Cabrillo Park to Gibraltar Drive (Near Coronado) and then darts south before crossing Coronado near LaSalle Street. It then continues southwest across I-880 just north of the Thornton Avenue Cloverleaf. Thence it makes a slightly northwest jaunt across Newark Boulevard near Cherry, across Cedar to a point on Lido Boulevard just south of Jarvis Avenue. From here it turns southwest and empties into the Jarvis/Beard Landing Slough. Everything north of this creek bed to the Alameda Creek was the Potrero de Los Cerritos land grant.

This grant encompassed the town of Alvarado (south of the Alameda Creek) and all of the Alviso District and small portions of northern Fremont and Newark.

On the following page is a landowners map showing the area of the Potrero de Los Cerritos grant highlighted in pink. I have entered the names of streets and roads within or near (in blue) the grant district. I have labeled the areas known as "Machado's Corner and the Bell Ranch Bridge also in blue. This will enable you to see most of the actual grant and Alvarado as they existed in 1878.

You will note that Alvarado straddles both sides of the Alameda Creek from its junction with Dry Creek north through Alvarado. Only the area south of Alameda Creek is within the grant of the Potrero de Los Cerritos.

Mr. Maffey's achievements as the Principal of Alvarado Grammar School included being a member of the Alvarado Chamber of Commerce, a member of the Alvarado PTA, and a member of the committee to incorporate Union City; he did all of this while he spent eight hours or more a day as Superintendent of the Alvarado School District. He then stayed after work to attend countless meetings, preparing analyses, budgets, and plans for a new school in 1958. But he wasn't a resident of Alvarado. As a matter of fact, when these meetings were over he had to drive home to Warm Springs and get prepared for the next day's work. Until 1957 there was no freeway to Warm Springs.

Raymond Cunha spent a lot of time in Alvarado, but he was a resident of Irvington. He was prominent in the Alvarado Eagles for many years in the 1950's. As a matter of fact some of the people mentioned are only Alvaradan's as far as their affiliation with Alvarado social organizations or their employment in Alvarado. I could not recognize them all, or even some of them, so I left most of them in.

The one exception is the Alvarado Farm Home Center. This organization apparently started out as an Alvarado group and somewhere along the line ended up being associated with Alvarado in name only.

#### **Cholera Epidemic in Santa Clara Valley:**

(Note: In 1850 Washington Township was part of Santa Clara County and was considered part of Santa Clara Valley)

(Originally Printed By: *The New York Sun*, November 15, 1850):

The Indians and Mexican population in Santa Clara valley have been the principal sufferers of a terrible cholera epidemic. Whole communities have been entirely swept off in the course of a few days, and the only evidence left of those who once inhabited the fertile plains and valleys, is the remains of their rancheros ([Indian settlements](#)) on the banks of the stream. In a few days ride over the plains and valley, I was myself an eyewitness to the distress of the poor Indians in consequence of this dread scourge of mankind.

Not a rancho was passed, we saw one or more bodies lying on the ground unburied, abandoned by relatives and their tribes. Sanchez, the wealthy Californian lost every Indian in his rancho in the course of four or five days, and he has collected together his cattle and taken them to the mountains near Santa Cruz.

The disease has been singularly fatal among the Indian and Mexican races, in consequence of their subsisting at this season of the year on melons and crude fruits, together with their unsanitary living conditions.

#### **Gold Digger Turned Farmer:**

(An account of the experiences of Mr. Doane, a subscriber to *The Sheboygan Mercury* of Wisconsin, who left home January of 1849 for California.)

"He dug some ([gold](#)) with some fair success for a raw hand, bought a drove of gaunt cattle from the states in the mines, took them down to Sacramento and sold them at satisfactory prices. He secured some very choice land in the in the delightful valley of San Jose, and will probably return in the spring to cultivate it. He has a good opinion of the agricultural expectancies of California, and thinks good farming there is a much better business than gold digging."

"He saw one man who had planted two acres of potatoes late in June, simply turning over the sward, dropping the seed in every fourth furrow, and never touching the ground afterward; and, though there has been no rain since planting, and no live thing but potatoes had started in the field, yet the owner laughed at an offer of \$1,200 for his crop just as it was. Mr. D. thinks the soil in the valleys abundantly moist without irrigation.

### **A Letter From Mission San Jose:**

Mission San Jose, November 30, 1850:

Dear Blossom:

We have now been in California for something over two months, and as yet I have written to no one in Fort Wayne, except T.J. Robinson, from whom alone I have received any thing from that quarter...

I have now been in California for some two months and a half, and I flatter myself that I am a good deal better calculated to judge properly of the real character and prospects of the country than any man can be after a residence of three days or a week in the abominable streets of San Francisco, and I think I am prepared to say that California is as good a country as it has ever been reported by a responsible writer. At all events my anticipations (they were perhaps never as great as others) are fully realized. Not that I have made money here, but I mean that the chances are fully as good for making a fortune as I ever hoped for.

My brother, as soon as possible after landing in San Francisco, procured a house to live in for a short time, and went to exploring the country adjoining the Bay of San Francisco, and finally determined on locating where we are now, at the Mission San Jose. A.G. Stewart, a man by the name of Dogan and myself are boarding with him. We have leased some farming land, and the ensuing season expect to farm extensively.

Harvey has put up his home in the midst of the richest and most magnificent plain I have ever known, and we are all as happy and contented as poor humanity ever was to be. We are located on the east side of the Bay, in sight of San Francisco and about thirty miles there from. This spot is undoubtedly the garden spot of California, and if the same society were here that we enjoy in the States, I would gladly fix myself here for life. With the exception of society, everything is here that the human heart can desire.

As for mountain and valley scenery, the most romantic eye is fully satisfied. Here is a high and beautiful range of mountains on all sides surrounding the finest Bay in the world, and a plain sixty miles long and from ten to fifteen miles wide, the soil of which, for depth and richness exceeds any of our western prairies or bottom lands. You can see at any and all times, ten thousand wild cattle and horses on this plain, besides the cattle on a thousand hills in the distance. There is an everlasting abundance of all kinds of wild game, such as deer, bear, (grizzly), geese, ducks, curlew, etc., etc.

As for climate I do not believe there is a more salubrious or delightful place on the face of the round world. O, you poor Hoosiers, how you are shivering with freezing, snowy weather. One day struggling through the mud and sleet, and the next froze up, cold as Greenland; while we Californians (in the valley of San Jose) with the exception of two or three warm rainy days in the week, are enjoying the finest May and June weather. There is no mistake about this being a delightful climate. If ever I leave this place I can assure you that I have learned better than to suffer out my life in so unpleasant a clime as northern Indiana.

You have doubtless heard much of the disagreeable weather in San Francisco. Well, you have probably heard the truth. But strange as it may seem, there is as much difference between San

Francisco and this valley as there is between Fort Wayne and Lexington Kentucky. I am not only speaking of what I have seen and experienced myself, but what good and responsible men who lived here for years have told me. I tell you the truth.

Tell Dr. Sturgis that Mrs. Coomb's children have never tasted medicine since they left home, and that he would hardly know Charley and Hugh Miller Sr., apart. In fact, we are all strong, stout, hearty, and healthy. I can lift twice as many pounds as I could a year ago.

As for the chances of making money here, I cannot speak as positively, yet I feel very much encouraged with the prospect. We have leased a piece of the San Jose Mission land from Mr. Beard of Lafayette, Indiana, who together with G.B. Tingley, Esq., of Indiana and a Mr. Horner own the whole mission, on very fair terms, and we are going to risk our labor for the coming season.

You may think I am stretching the yarn a little when I tell you that Mr. Horner has made an actual profit off of 100 acres, three thousand dollars, and other men have made in the same proportion off their grounds. There is plenty of money in this country, and anyone can get it that will work for it.

Since we have finished Harvey's house and dug his well, we have been working for Mr. Horner. We walk two miles to our work and make from ten to fifteen dollars per day each...

On Sunday next I will write to someone else in Fort Wayne. It is a common remark with us all, that if Blossom and Nelson were here on this plain, we would live perfectly contented and happy. As it is we are a thousand times better contented than we were in Fort Wayne. Write to me soon, and believe me as ever your friend.

T.M. Coombs

#### **A Visitor From Indiana:**

(Note: this is a gentlemen from Indiana who came to California and roamed through San Francisco, the gold country, the San Joaquin Valley, and finally the Santa Clara Valley. Here is his report on Washington Township.)

My trip from Livermore took me to Mission San Jose, which once was one of the richest missions in California, and is now owned by a Mr. Beard from La Fayette, Indiana. There is a fine orchard here and a vineyard. They raise an immense amount of vegetables. Here is where the big cabbages grow; I have been told they raise cabbages here measuring four feet across the head; or 12 feet around, this is a big cabbage, but I do not doubt it.

#### **Augustus M. Church:**

A. M. Church in partners with H. Cronkhite, George Fay and Riley Gragg hunted deer in the Alameda Hills, killing 15 to 20 a day and then from their base in New Haven ([Alvarado](#)) shipped the dressed meat to San Francisco.

#### **Early Union City/New Haven Resident:**

The first ([recorded](#)) dwelling in Union City was originally occupied by Capt. Bulmer. It stood where the buildings of the water works were once located. Capt. Bulmer ran Union City's first dry goods store. The second home in Union City is attributed to a Captain C. C. Scott in 1852. Shortly thereafter William M. Liston built the third home. Mr. Liston had come to Union City to run warehouses along the banks of the Alameda Creek for Henry Smith.

The first hotel built in Alvarado was established by A. M. Vesey, who afterwards gained prominence as county clerk of Alameda County. Contemporary with this hotel Mr. Andrew Forbes opened a second hotel, the building was added to by Joseph Ralph who later turned to farming in Alvarado.

### **The Clawiter Family:**

The first white child born in Union City was the daughter of Edward D. and Mary Gading Clawiter. The Clawiter's had emigrated to California from Bremen, Germany, coming around Cape Horn on the ship "Reform" and arrived in Union City in 1851. Their daughter was born on August 7, 1851. Her birth was a great event. People came from all directions to see the wee stranger, and many brought gifts. From John Horner she received a town lot (Union City), and by him was christened "Union." At twenty years of age Union Clawiter married Converse Howe of the well-known Drexler family of Southern California. She became the mother of four sons. Mrs. Howe passed away on January 19, 1890.

Also for sales 20 bales of gunnysacks.

### **Agricultural Depots:**

In passing through San Francisco we were surprised to find so many establishments devoted entirely to the sale of vegetables. Each farmer's locality seems to have its depot, and the sight presented daily of huge potatoes and other vegetables of superior quality, is most gratifying to the friend of California. At least ten stores are devoted to the sale of vegetables from San Jose and vicinity alone.

Mr. John M. Horner, the prince of California farmers, has a steamboat running from San Francisco to Union City, which is, as it were, the seaport of his ranchos, to transport his own produce alone. It is one of the finest little boats in the bay, and runs three times a week. We should judge that the vegetable stores in the city numbered at least twenty-five.

#### **The Formation of Alameda County:**

##### **New Haven Name Changed to Alvarado:**

LEGISLATIVE REPORT:

Benecia, California; March 16, 1853

Prayer by the Reverend Mr. Woodbridge.

Mr. Coffroth presented the petition of sundry residents of Contra Costa County, protesting against a division of said county for the purpose of forming the new county of Alameda; referred to Committee on Counties and County Boundaries.

...Then proceeded some miscellaneous legislative business...

Mr. Roach reported from the Committee on Counties and County Boundaries on the Assembly Bill to create the new County of Alameda, together with several petitions in favor of the new county, and also several new remonstrance's'. The committee recommended the passage of the bill without amendment.

The Senate then went into a long and exciting debate upon the bill.

Mr. Lind opposed the passage of the bill.

Mr. Crabb stated that Mr. Grewel, the absent Senator from this district, had expressed himself as in favor of the creation of the new county.

Mr. Lind moved to lay the bill on the table. Lost Aye – 7; Noes 11.

Mr. Sprague objected to the hurrying of the bill through the Senate. A petition signed by over 1,000 persons had been presented, but he was confident that a large portion of the signers were not residents of the county. He was in favor of postponement, and that the additional petition be read to the Senate.

Mr. Keene had heard no good reason alleged against granting the prayer of the petitioners of the two counties of Santa Clara and Contra Costa division. It had been said that the Senate should not act in hot haste upon this subject. This was the old story, but in this instance without any justice asserted now. The Assembly had given the matter due consideration, and passed the bill almost unanimously. He had before him 115 important bills, which were yet to be acted upon by the Senate, and it was absolutely imperative upon this body to act with dispatch. The Senator's remarks were forcible and convincing, and were listened to with great interest.

Mr. Wanbough stated that one of the largest petitions presented was signed by men high in office and influence. He was in favor of the immediate passage of the bill.

Mr. Hubbs was in favor of laying the bill on the table until Saturday next.

Mr. Smith (Henry C?) believed that if the Senators would stop talking the bill could be passed in fifteen minutes.

Mr. Hubbs moved that the Senate proceed to the special business of the day. On this the ayes and noes were demanded

Mr. Coffroth was opposed to delaying the matter, and hoped that the bill would now be considered. Motion lost.

On motion the Senate went into Committee of the Whole, Mr. Coffroth in the chair to consider the bill.

The bill was read by sections, when after a long discussion the committee rose and reported progress.

The bill was subsequently passed with an amendment changing the name of the seat from New Haven to Alvarado.

...After other legislative business the session closed.

#### **The Steamer "Union" Becomes Mercy Vessel:**

News of a dreadful accident on the San Francisco Bay has reached our shores. The steamer "Jenny Lind" making a run from Alviso ([Santa Clara County](#)) to San Francisco suffered a terrible boiler explosion, which instantly killed 18 of 130 passengers, seven from one family. Up to 40 persons were terribly scalded and most are expected to die. The explosion occurred opposite the bay from San Mateo.

Fortunately, the steamer "Union" berthed at Union City, under the command of Capt. James Marston, appeared from the mouth of the Alameda Creek and took the survivors and the remains of the unfortunate victims to San Francisco.

### **Fine Farmland:**

*The Santa Clara Register* says the fields of wheat and barley in this county look exceedingly fine. The best cultivated portion of the state, and that which denotes the highest and most refined agricultural condition of the people, lies between Mission San Jose and Union City, or, as we should call it by its new name, Alvarado. E. L. Beard, Esq., has here a beautiful residence ([Mission San Jose](#)), grounds, yards, orchards, flowers and fruits, cultivated with the purest taste and in the highest finish.

*The New York Daily Times, New York City New York, June 23, 1853*

### **Alameda County – 1853:**

A correspondent of the *San Francisco Herald* gives the public some interesting statistics of the new county created by the last Legislature, out of the counties of Santa Clara and Contra Costa. The soil is said to be inferior to none in the State. Three-fifths of the land under cultivation is in grain, the rest in potatoes, onions, etc. Of the grain crops at least three-fifths is wheat.

There is no political excitement.

Alvarado, the county seat, is situated on the Alameda River ([Creek](#)) about eight miles, by its meandering stream, from its junction with the Bay, and about thirty-five miles from San Francisco. It is a very pleasant place, and though small, is fast improving. As an inducement to settlers, Capt. H.C. Smith, who is largely interested in the place, generously offers to give them town lots, free of charge, if they will improve them.

Adjoining Alvarado is another small town called Union. This latter is also a flourishing place, and is considered as merely an extension of Alvarado. In Union a large steam gristmill is in process of erection. When completed it will probably be the largest and finest mill in California. It will have eight set of stones, requiring an engine of seventy-five horsepower. Its estimated cost is greatly over \$100,000. It will commence operations in about a month. The proprietor, Mr. J.M. Horner, possesses an immense fortune, which he has accumulated by untiring industry and perseverance, assisted by a moderate share of good luck. He is a man of much liberality and public spirit, and well deserves the exalted position he occupies in this community.

**Union City, March 9, 1854**

These are busy times and therefore I give you a short letter. Everybody is out breaking up ground, ploughing, putting in potatoes, and such other moral occupations as husbandmen have at this season. There will be twice as much wheat, only about half as many potatoes, and less barley. I will endeavor to inform you during the spring of the number of acres in the county sown and planted in all the more important fruits and grains.

There are many improvements made beside fencing and sowing grain and I can predict with confidence that this will be an earthly paradise in outward appearance in four or five years. The leading farmers are taking many steps, which return no immediate profit but aid to enrich and embellish the land in the course of time.

Horner is setting out shade trees, on both side of the strait in a level road of 10 miles from this place to the Mission of San Jose. Beard has set about 40 acres in fruit tress for an orchard, and Horner is engaged in setting out a large number of fruit trees. Indeed, nearly every farmer in the county is filling his yard with trees.

We learn with sorrow that our farmers are again threatened with misfortune. The potato crops are suffering terribly from the drought of the past winter, and the quantity will fall short at least one sixth. In Alameda County, although a few farmers may realize a rich yield, will not generally prove remunerative to her tillers. (*Alameda Express*)

**Alameda County Seat:**

MR. EDITOR:  
Having been present at the meeting held at Alameda on Saturday, November 25<sup>th</sup>, and having seen no report of the same, I herewith subjoin a synopsis.

There were six rival placed represented, each place being entitled to a committee of two persons, making the whole committee twelve, for Oakland, San Antonio, Alameda, San Leandro, San Lorenzo (or Hayward's) and Alvarado, which several places having been severally extolled by their respective and respectable Sachems and warriors, then and there assembled, in the grand pow-wow, a vote was taken for the purpose of uniting on some Northern and Southern points for the candidacy, and for an expression of the of the different tribes, resulting as follows:

First Ballot:

Alameda	4 Votes
San Antonio	2 Votes
San Leandro	2 Votes

San Lorenzo 2 Votes  
Oakland 2 Votes

Second Ballot:

Alameda 6 Votes  
San Antonio 1 Vote  
San Leandro 4 Votes  
San Lorenzo 1 Vote

From this, it would seem Alvarado and Alameda should be the two candidates for the honor of County Capitol. Now Mr. Editor, I decline toward Alameda. Please tell us how you decline?  
Signed: "One of 'Em"

[\(Letter placed in the Editorial Section of the Defiance Democrat, Defiance, Ohio\)](#)

California Letter, Union City, October 11, 1854

Dear Brother: Our mail of the first of the month has been in for some time but it brought no letters for us, how is this? If you only knew with what anxiety we await the arrival of each mail steamer from Panama you would most certainly not neglect to write us every mail, do not fear that we will tire of receiving yours letters, if you only know what satisfaction they afforded us you would like writing twice as often as you do.

[\(Then follows many paragraphs of San Francisco chicanery and a shipwreck, now the conclusion of the letter\).](#)

Our rainy season has not yet set in, although we have had two or three fine showers within the last week, we have beautiful weather now with a prospect for fine weather for four or five weeks to come, this is a busy time among farmers, they are hauling their wheat to market or to store, our little place is sending in her shares of supplies for San Francisco and the gold mines. We ship not less than 100 tons of produce independent of the flour which is manufactured here which is from 350 to 400 barrels a day, wheat is low here, it is only 1½¢ to 2¢ per pound, flour is selling at retail at \$10 per barrel, potatoes are 2¢ per pound, barley 1¼¢ per pound, beef 12 to 15¢ per pound, fresh pork from 10 to 14¢ per pound and other articles of provision are proportionately the same.

Clothing of all descriptions is very nearly as cheap here as they are with you. Yesterday we had a ride out to the old Mission San Jose, it is situated about ten miles from here along the foot of the hills; it is a small Mexican village of about 500 inhabitants. It was established about 80 years ago by the Moravian Missionaries and built like all Mexican towns of adobe or sun dried brick covered with tile. The land in this vicinity is mostly owned by E. L. Beard of La Fayette Indiana, who recently failed in the amount of \$700,000, but most of his land is secured to his wife and father.

**Robbery of the Treasury of Alameda County:**

Alvarado, Friday Evening, 10 o'clock  
February 16, 1855

Mr. Editor:

As some of your city editors seem to doubt whether any robbery of the Treasurer's Office of Alameda County has actually taken place, I deem it proper to submit the following statement of the facts connected with the transactions so far as they have transpired up to this hour. The Treasurer's books show that on the 13<sup>th</sup> there was on hand the following sums, viz.:

State Funds	1,621.48
County Funds	3,189.80
Building Funds	6,295.97
School Funds	422.27
Money due Santa Clara County	245.79
Making in all:	<u>11,775.31</u>

This money was last seen in the safe, near sundown, on Tuesday, the 13<sup>th</sup>. In addition, Sheriff Broder has \$200 in one purse and \$600 in another, deposited in the safe. Making the whole amount of money in the, \$12,555.31 ([\\$12,575.31 by my count of the individual sums](#)).

The next time the Acting Treasurer had occasion to open the safe was on Wednesday, at about 4 o'clock p.m., when he was made aware of the robbery. All the money had been taken except one purse belonging to the Sheriff, containing \$600, which was found on top of the safe, where it had doubtless been left by accident by the robber.

The writer of this resides about five miles from the county seat, and first learned of the robbery on Wednesday evening, at San Francisco, where I then was on business. Sheriff Broder and Dr. Travis had at once came over to the city for the purpose of arresting a young man who had left Alvarado the same morning, and against whom some circumstances of suspicion existed. We remained in your city until today, naturally supposing that the thief might avail himself of the *Golden Age* to escape. Having watched every arrival and departure on this morning, we observed

the embarkation of all the passengers, and Commodore Watkins lay by for us to make a thorough search, off Fort Point, which resulted, however, in no trace of the matter.

From all the circumstances, which had come to my knowledge, I strongly suspected that the money was yet concealed somewhere about Alvarado, and arriving here this evening after examining localities, etc., I ordered a search around and under the building used for a Court House. On the back of this building and some six feet under I saw an old boot, which upon drawing out with my cane, I found to contain a purse of \$1,578, mostly in \$20 pieces. Upon a search in and under the other side of the building, a small bag, made of doubled cotton cloth, was drawn out by a rake, in which were three purses, containing in all, \$2,840. So that up to this time \$4,410.00 (\$4,418.00 by my count) of the money that has been recovered. All this was found within three-fourths of an hour after my arrival. Night coming on the search has suspended until morning, and in the meantime a Sheriff's posse of a dozen men are on patrol to see that no one leaves. The amount still missing, including the \$200 of the Sheriff is \$7,545.31. Whether any portion of this will be found, tomorrow will determine.

Suspicion rests strongly upon certain persons here whose names, for the present, had better not be made public. No formal arrest has as yet been made, although the suspected persons are to all intents in custody. Should any further particulars transpire before the stage passes in the morning, I will add a postscript.

Very respectfully yours,  
A.M. Crane,  
County Judge

#### **Earthquake:**

Alvarado: About 5 o'clock this morning a very severe shock of an earthquake was felt here, preceded by a low whistling sound, which for severity and length of duration surpasses any shock felt here-to-fore in this vicinity. Slight shocks have been of frequent occurrence for the last two years; the one this morning lasted for a full fifteen seconds, and the earth vibrated from North to South; atmosphere clear and unclouded. A shock of equal severity in your city would test the firmness of your brick edifices.

**Alvarado to Mission San Jose Road:**

The road from Alvarado to the Mission, which is nearly a bee line, is 60 feet wide, and so raised in the center as to render it, in the rainy season, comparatively dry and pleasant traveling. Gentlemen owning farms and country seats bordering on this highway, have manifested much public spirit in planting ornamental shade trees along its margin, which will in a few years contribute greatly to the picturesque beauty of the valley and to the comfort of the noon-day traveler. There are many handsome residences on either side of this splendid thoroughfare, with grounds in a high state of cultivation, tastefully laid out and ornamented with trees, shrubs and flowers. This road passes through Centerville, one of the most attractive villages we have seen in the State, and if its enterprising citizens carry out their present design of bordering the streets with shade trees, it will be far the pleasantest point in the valley. They have already built two fine

churches, one of wood and the other of brick, a *bijou* of a church, just completed and beautifully furnished by the ladies of the place.

**Band of Thieves Captured:**

(From the pages of *The San Jose Telegraph*)

Sheriff Broder of Alameda County, accompanied by a strong posse, arrived in our city ([San Jose](#)) last night in search of some desperate villains, who have for a long time been preying upon the people of that county. We understand that a clue has been obtained to the existence of a large band of thieves and that some of the parties implicated in the thefts committed there are now in prison at Alvarado, and two more who had escaped, were pursued into the southern part of San Clara County, were arrested yesterday, not however, without the use of fire arms. Their names are Harris and Taylor, Harris refusing to surrender was shot in the eye, but we understand he is not dangerously hurt. The two men were brought to this city and lodged in jail last night.

### **Fifteen Men to be Hung:**

We learn that twelve or fifteen men have been arrested in Alameda County for stealing stock and were to be hung at Union City, after a trial by the people. A strong guard was placed over the prisoners and in all probability they will be summarily dealt with by the excited populace of that county. The county has suffered much from these cattle thieves, and has become somewhat famous for its prompt administration of justice by the people to these villains.

Two others, supposed to belong to the same gang were arrested near Stockton who, it is said, will share the same fate. An effort was made to bring the two from Stockton to Union City to dispatch them all together, but the citizens of the former place declined to surrender their prisoners, preferring to deal with them themselves.

The accused are all Spaniards, and if swung up at the same time and place, will be the most extraordinary lynching ever witnessed in this State. It almost makes the heart sick to contemplate such wholesale lynching.

*The Daily Alta California, San Francisco, November 28, 1855*

### **Fifteen Men to Be Hung:**

On Wednesday we published what proved to be an exaggerated account of the excitement, which prevailed at Union City, Alameda County, in relation to proceedings for lynching some ten or fifteen men who had been arrested for cattle stealing.

By a gentleman who arrived last evening from Union City, we learn that four cattle thieves had really been arrested, two American and two Mexicans, and lodged in prison for trial. On Wednesday night the Mexicans succeeded in breaking out of prison and making their escape, but the American prisoners were so closely secured that they could not get loose.

Yesterday morning, the people of Union City were greatly exasperated at the escape of the Mexican prisoners, and under the plea that the two Americans might soon escape if suffered to live, it was determined to give them no chance. At an early hour in the day the two prisoners were accordingly brought forth and hung, after the normal style of lynch proceedings in California. The Mexicans, who escaped, are being pursued, and if arrested they will be hung forthwith.

### **The Lynching at Alvarado:**

From the *Oakland Leader* of Saturday evening we learn the following particulars of the escape of two Mexicans, who were recently arrested on the charge of cattle stealing, and the Lynching for the same offense of two notorious individuals names John Hill and William Harris, both Americans.

These men, it appears, a day or two before their death, had an examination before Justice Millard, of Alvarado, on a charge of having stolen some eight head of cattle from a Mr. L. Gates, who resides about three miles from Union City, which resulted in their conviction. On the night of Wednesday last, about 12 o'clock, two Mexican prisoners, who occupied the same apartment (for the county has no jail) with Harris and Hill, succeeded, by some means, in effecting their escape. At the time when occurrence took place, the prisoners were entrusted to a special guard. Sheriff Broder and Under Sheriff Edmondson having become exhausted by watching and pursuing a band of cattle thieves which infest that part of the country, for several days and nights, without interruption, had retired but a short time previous for the purpose of availing themselves of a little temporary rest. Upon learning the result, the Sheriff and Under Sheriff started immediately in pursuit of the fugitives from justice.

In the meantime, the people, so long the victims of a gang of merciless pillagers, became greatly exasperated, and immediately resolved not to allow the American prisoners a similar opportunity to make good their escape. A Vigilance Committee was instantly organized; the prisoners, Hill and Harris, were quickly wrested from the guard and placed in a wagon, which was guarded by the committee, who proceeded to the ranch of Alviso, about four miles from Union City, on the San Jose Road, at which place, on the branch of a tree, at about 5 o'clock in the morning of 29<sup>th</sup>, both Harris and Hill were executed.

A Coroner's inquest was held the same day over the dead bodies, and a verdict rendered in accordance with foregoing facts. The bodies were then cut down and buried on the same spot where they were executed. Some important information was, we are informed, elicited from Hill, a few moments previous to his death, which may hereafter prove beneficial to the ends of justice.

At last accounts, the escaped Mexican prisoners had not been re-captured. The sheriff has offered a reward of \$500 for their arrest.

***The Sacramento Daily Union, Sacramento Calif., December 3, 1955***

### **The Lynching at Alvarado:**

We published some days since a brief account of the lynching of the horse thieves, Hill & Harris at Alvarado in Alameda County. The *San Jose Telegraph* contains the following items in a detailed account of the affair.

There are conflicting accounts as to Hill's former residence, some say he was from Springfield, Illinois, others say he was from Michigan and was known in Berrien County, he may have lived in both places. Harris was from Michigan and lived at Little Prairie Ronde, and also at St. Joseph's, Michigan, where he worked as a cooper, for Col. Lester Olds.

After the execution of Hill & Harris, a party went in search of Stephen Jacques, who also formerly lived at St. Joseph's, Michigan. Jacques had been twice examined, and, although there were many things against him, much to excite suspicion, yet he was discharged by the examining magistrate, the proof not being sufficiently clear. No one doubts that he was really privy to, if not deeply concerned in all the robberies committed by the band in Alameda County, with all of whom that are known, Jacques was on most intimate terms.

Sheriff Broder, who is still on the search for the Sonorians, was in this city ([San Jose](#)) on Saturday morning. And from him we learn that the party had found Jacques at the Mission San Jose, and that on condition of his life being spared, that he had promised to lead them to the rendezvous of the bandits in the mountains, and to find Thomas Gear, one of the leaders, who is still at large. The party, accompanied by Jacques, had gone on their mission.

Votes cast by Township in Alameda County in 1855:

Washington	535
Eden	388
Brooklyn (Oakland)	279
Alameda	85
Murray (Livermore)	63

### **Stolen Money:**

Early in 1855 the sum of \$7,156.44 was found to be missing from Mr. Marston's county treasury at Alvarado. Although no one was ever held accountable for the loss, it showed Alvarado in a bad light and the Board of Supervisor's to be lackadaisical in his or her safekeeping of county valuables.

### **Alvarado Lynching:**

Four individuals, two Americans and two Mexicans, had recently been arrested for cattle stealing by the sheriff of Alameda County, and were taken by him to Union City (Near Alvarado). He confined them in a house, but during the night the Mexicans escaped. When the fact of the escape of the Mexicans became generally known, the townspeople assembled together, took the two Americans, whose names were Hill and Harris, from the custody of the sheriff and hanged them. A good deal of excitement prevailed.

### **The Vigilance Committee (Vigilantes):**

San Leandro: June 14, 1856,

Pursuant to a call for representatives of that population of the County of Alameda, who have enrolled themselves as supporters of the Vigilance Committee of San Francisco, about sixty delegates representing 680 enrolled members made their appearance and took their seats. The meeting was called to order by A. H. Meyers, on whose motion, **Dr. Travis** of Alvarado, was called to the chair, upon taking which, he stated the object of the meeting, and ably addressed the convention upon the subject of the *crisis* in San Francisco. By the committee, the following people were nominated, and by the meeting elected as permanent officers of the convention: President, **Dr. Travis**, Alvarado; Vice Presidents: Messrs. A. Davis of Oakland and Robb of Alameda; Secretaries: Dr. J. N. McHose of Alameda and J. M. Reynolds of Alvarado. The following resolutions were adopted:

**Whereas**, the tragical events that have transpired in San Francisco within the past month, have brought about a *crisis*, in which is involved the dearest rights of freemen, and which, consequently, calls for the expression of an opinion by every true lover of his country, therefore, be it

**Resolved**, That as our government derives its powers from the *people*, and it is established for their well being; therefore, when the agents deputed to execute the enactments of Government so as to protect the citizens in their rights, *fail to do so*, the *people* from whom all authority emanates, have the right to resume the administration of justice, and to execute their own will.

**Resolved**, That we recognize the necessity which called into life and action the Vigilance Committee of San Francisco, and take this method of expressing our approval of its past course and conduct, and our conviction that its future action will be based upon the principles of right and justice, and we hereby pledge to said Committee our firm adherence, and should physical aid be required, it shall be promptly rendered.

**Resolved**, That from the developments already made, it is obvious that the administration of the municipal government of San Francisco is a usurpation, in part at least, and that we fully endorse their efforts to depose the usurpers, as well as to punish the agents and principals, through whom this usurpation was brought about, and we recommend to the Committee the punishment of the principals first, and that, if either class must escape, it be the agents.

**Resolved**, That when these developments came to the knowledge of Governor Johnson, it became his duty to aid the citizens of San Francisco by all legal means, in disposing and bringing the usurpers to punishment, and that the Governor's Proclamation and subsequent acts, were ill advised and wholly uncalled for, and which, if persisted in, a useless debt to the state will be incurred, which we citizens, feel bound to repudiate.

**Resolved**, That in as much as obedience to Governor J. N. Johnson's Proclamation involves a sacrifice of dearest rights, and a bowing at the footstool of power, unworthy the intelligence of American freemen, we will not obey it.

**Resolved**, That these preceding be published in the *Oakland Leader*, *Evening Bulletin*, *Alta California*, and *Evening Journal* and other papers friendly to our cause.

But a few days have been spent in enrolling and there is no doubt that 1,500 names could be enrolled in the county.

Respectfully yours,

J. N. McHose

**A Matter of Honor:**

A man named D.C. Fargo, the keeper of a billiard saloon in San Francisco, was up before Judge Coon this morning on a charge of sending threatening letters. It seems that some months since Fargo kept a public house at Alvarado, in Alameda County. During this time improper intimacy sprung up between the wife of Fargo and a man named H.P. Jones, who was an inmate of the house at the time. Smarting under a sense of the serious wrong done him, Fargo attempted to "get even" by blackmailing the destroyer of his domestic peace. The sum of \$3,000 was originally demanded as the price of his wounded honor. Failing to obtain this, he offered to compromise on \$1,500; this too was denied by the graceless Jones. Not to be baffled, Fargo finally concluded that

the presentation of a horse and buggy would wipe out the stain of his wife's dishonor. Yet still the incorrigible Jones failed to "come up and make the matter right." The only recourse left Fargo was to expose the villain and threaten vengeance. This he did, and for so doing he arraigned in the Police Court. Judge Coon not fancying this way of repairing a wife's dishonor, held Fargo to bail in the of \$1,000 to keep the peace.

### **Two Churches:**

Mrs. Charlotte Cornell and Mrs. Julia Thompson lobbied ceaselessly for religious direction for the twin towns. In 1860 each woman's dream was fulfilled when Methodists and the Presbyterians each completed separate churches. One was known as "Charlotte's Temple" and the other as "Julia's Chapel."

The Methodist Church, by removal and death of its members, lost nearly all its congregation, and twenty years since the church was being sold. The history of the Presbyterian Church is one of prosperity.

### **Alvarado Salt:**

The concerns of the inhabitants of Union City (Alvarado) after the Civil War were mostly the raising of stock, grain, and orchard products and the transportation of these cash crops to market. During the 1860 to 1870 decade, the first railroad crosses the area and the railroad town of Decoto was founded. Still, the use of the Union City wharves for hay schooners, salt barges, grain and vegetable shipments daily was very important to the area.

The Union City flood plain was considered by many to be the most fertile agricultural land in the state. An item in the *Alameda County Independent*, published at Irvington, relates to this. "Last week we paid a visit in the hospital home of one of the old settlers of the county, William Whidden, Esq., who owns 250 acres of land near Alvarado."

"The ground in that district is subject to overflow every winter, the effect of which is greatly to enrich the soil and preserve its fruitfulness. Land that has been tilled each year for 20 years is just as productive now as it was two decades since."

"This is the case with this farm. Last year 15,000 bushels of onions and 3,000 sacks of beans were raised on it, the sacks averaging about 65 pounds each, while the onions were so prolific that one single acre produced 600 bushels. Carrots to the amount of nearly 600 tons, 800 sacks of barley, 250 sacks of potatoes, and 50 tons of squashes, and 50 sacks of corn were also produced."

"Two years before, 27 acres of barley brought \$1,714 cash home. Onions are sold at from 1 cent to 5 cents per pound. Of fruit trees, there are not less than 500, consisting of apples, pears, plums, cherries, crab apples, quince and peaches. The varieties of berries cultivated are blackberry, raspberry and strawberry, chiefly for home consumption; and four acres of cherry currants, yielding 3 or 4 tons to the acre. The price of these runs at 6 cents a pound early in the season."

The livestock keep pace with other products in quality if not in quantity. There are nine families of tenants on the place, and 60 to 70 workmen are employed. The lessees get two-thirds of the produce of the land, giving one third for its use to the owner, each party furnishing its own sacks."

Mr. B. Benedict and J.B. Shirk commenced the cultivation of hops near Alvarado and up to the present, have prosecuted the industry with marked success. Mrs. Blacow produces wool from a fine flock of sheep which graze the bottoms of Alameda Creek."

A growing source of cash income for those Union City farmers who lived close to the Bayshore was salt harvesting from marsh ponds. Prior to 1862 the only commercial salt production in the South County came from "a salt works of Christian Bothsaw, located on the banks of Alameda Creek and those which came from the marshes of John Quigley, below the elbow at Union City."

In 1868, J.A. Plummer and his sons, J.A. Jr., and C.A. Plummer purchased from Lyman Beard a large tract east of Alvarado upon which was established their "Turk Island" Salt Works. This was the Plummer's second salt property as they had started in 1864 the property, which took the name of the "Crystal Salt Works," which was located in the lea of the Coyote Hills.

This property consisted of a large pond and salt march in its natural condition, the improvement of which was immediately commenced by Mr. Plummer, who built vats, erected windmills and pumps, subdividing the pond into compartments for holding salt water in its different degrees of strength, the weakest water would be that just received into the main pond from the Bay of San Francisco.

The partitions for subdividing these ponds are of pine boards and driven into the bottom of the pond, edge-to-edge, thereby making the compartments water tight. When the brine reaches one hundred and five degrees, it commences to crystallize in vats and ponds especially adapted for that purpose. After a certain period of crystallization has passed, the salt is ready to be taken up and carried ashore to be put into houses for protection or piled outside when the warehouses are full.

A tramway is laid to the landing on the slough leading into the Bay, where vessels come and receive the salt brought to the wharf by cars and take it to San Francisco.

The windmills and pumps are at work all the time, lifting water and transferring it from one pond to other ponds by means of flumes and ditches. There are large pans, under which fires are kept burning to dry the salt placed thereon; when dry it is ground for dairy purposes, a 15 horsepower engine drives the mills. These works produce from 1,500 to 2,000 per year in 1882.

The salt produced at these Alvarado works is of a superior quality, and better than any foreign salt imported into this country. Analysis shows these salt crystals to be 99.62 per cent chloride of sodium. This grade of salt is largely used by meat-packers in San Francisco, who prefer it to any other.

Another of the most famous salt work was the Union Pacific Salt Company, organized in 1868 by John Barton, a San Francisco capitalist who was also on the boards of Fireman's Fund Insurance and the Sutter Street Railroad. This property spread over 1,000 acres at the confluence of the Alameda Creek and Eden Creeks. This company owned Rack Island Salt and at its plant there in 1882 employed over 100 men, produced 7,000 tons of salt per year and had invested over \$100,000 in the venture. It shipped its salt to Pacific Coast consumers from Arizona and Baja California to British Columbia.

Salt making by 1880 was the fourth most important industry in South County, being exceeded in value only by fruit growing, grain and vegetable production and stock raising. Eventually the combined works of the Crystal Salt and Turk Island Salt companies were the foundations for Southern Alameda County operations of the Morton Salt Company.

Stock raising was the oldest industry and by 1880, the third largest producer of a cash crop. The embarcadero at the "The Elbow" had been used by the Mission padres and the Mexican rancheros as the transfer point from land to sea for hides and tallow from 1800.

As soon as the American occupation occurred the early American farmers used their grazing hill pastures to mature beef shipped to San Francisco butchers. Drovers regularly came through South County to buy beef on the hoof and drive the herds to the mining camps of the Mother Lode or around the peninsula to Butchertown in San Francisco's Potrero district.

Among the early stock raising families were that of August May Sr., Philip Hellwig, William Jung, Eph.H. Dyer, F.B. Granger Sr., and Fred Wiegman. As early as 1856 Philip Hellwig came to California from his native Germany (after a seven year apprenticeship as a baker in London) via the Horn to San Francisco. He tried mining in the Mother Lode country but not making more than wages from placers, joined a cousin in Alvarado who had already set up a retail meat market.

In 1865 Philip Hellwig bought out his cousin and operated the market under his own management. In 1874 the possibilities of expanding into other retail areas and starting a wholesale butcher business and slaughtering business attracted Hellwig and so he formed a large firm called P. Hellwig & Company, with partners F.D. Wiegman and William Jung.

**Exciting Time at Alvarado:**

In Alvarado, Alameda County, on the 8<sup>th</sup> of July, there was quite a concourse of people assembled, people who had come in from the neighboring ranchos for the purpose of jubilating over the fall of Vicksburg. Just as the enthusiasm was at its height (as we are informed) an individual, who proved to be a horse thief, rushed into town, hotly pursued by Harlow Wood, Constable of Eden Township. The excited people joined in the chase, captured the malefactor, and brought him to Judge Crane's Court in Alvarado, where an impromptu jury was impaneled, and the populace were about to hang the thief, when Judge Crane and a few other cool-headed citizens interposed and insisted that the man should not be punished except by due process of the law. Their interposition and arguments prevailed, and the horse fancier, saved yet awhile from stretching hemp, was committed to prison.

**Alvarado Guard:**

The loyal legislature of California, impressed with the necessity of placing the State in a better condition for defence in these days of treason and rebellion, considered, and wisely so, that the first step taken in that direction should be to foster the military spirit of the people, by encouraging the organized militia.

With this view, a law was passed last winter, authorizing the Governor to order a Camp of Instruction for the officers and non-commissioned officers throughout the State, to take place in the spring, and an Encampment for each Brigade within its own limits in the fall; each to last for ten days. The cost of these Encampments to be defrayed by levying a poll tax of two dollars on every male inhabitant of California.

*General Orders No. 7:*

I. The assignment to regiments of unattached companies during this Encampment will be as follows: The Vallejo Rifles, Capt. Barbour, to the First Regiment; The McClellan Guards, of Vallejo, to the Second Irish Regiment; the Watsonville Guards, Capt. Porter, and Butler Guards, Capt. Haslam, to the First Regiment of artillery; the Napa Guard, Capt. Allen, the San Jose Union Guard, Capt. Owen, the Alviso Rifles, Capt. Rowley and the Alvarado Guard, Lieutenant Johnson commanding, to the First Infantry Battalion, which will be designated during the Encampment as the Fourth Regiment.

**Mexican Hung:**

Alvarado was the scene of a dastardly outrage on the evening of November 23, when a party of Mexican desperadoes having entered the town and fired shots at buildings and individuals, and then left the place. Chase was given to them and one of the party was arrested and brought back to town. He was placed under guard, but the guard was overpowered and the prisoner was taken to the bridge crossing the Alameda Creek and hung. The gallows was not cheated out of a victim this time, but the lawyer complained the next morning that he had lost a client.

**Capt. Charles S. Eigenbrodt:**

The late Capt. Eigenbrodt:

On receipt of the telegram announcing the death of Capt. Charles S. Eigenbrodt, Company A, California Battalion, now serving in the Shenandoah Valley, a meeting of Crusade Lodge, No. 93, IOOF, at Alvarado, was called, at which time the following resolutions were unanimously adopted.

**Whereas**, it has pleased Divine Providence to take from us our beloved brother, Charles S. Eigenbrodt, while gallantly charging the enemy at the head of his brave men, in an engagement in the Shenandoah Valley, Virginia, on the 21<sup>st</sup> day of September, 1864; therefore, be it

*Resolved*, That while we humbly bow to the decrees of Providence, we can but deplore the loss of our self-sacrificing brother, who left his pleasant home and a large circle of warm friends, and nobly drew his sword in defence of his country.

*Resolved*, That in the death of Brother Eigenbrodt, the founder and first Noble Grand of our Lodge, we have not only lost one of our most active and efficient members, but the community a good neighbor, and our country a brave defender.

*Resolved*, That as a further mark of respect, this Lodge attend proper funeral services under the direction of our Chaplain; that our hall be draped in mourning, and our members wear the usual badge for thirty days.

*Resolved*, That a copy of these resolutions be sent to the relatives of Brother Eigenbrodt in New York, with assurances of our deepest sympathy.

*Resolved*, That copies of these resolutions be furnished to the *DAILY ALTA CALIFORNIA* and *Alameda County Gazette* for publication.

In accordance with the above resolutions, on Sunday, September 25<sup>th</sup>, at 11 o'clock A.M., the National colors being displayed at half-mast and bells tolling, the members of Crusade Lodge, No. 93, including many sisters, together with the members of Mission Peak Lodge, No. 114, each wearing the customary badge of mourning, and the I.G., carrying the insignia of rank of the deceased, moved in solemn procession from the Lodge Hall to the Presbyterian Church, where an appropriate and patriotic discourse was pronounced by Rev. Brother B.N. Seymour, after which the procession returned to the hall.

**Tragic Event:**

A subscriber to the *Alta* in Alvarado writes as follows:

“In the little town of Alvarado, over the Bay, on Friday last, occurred a serio-comic tragedy, resulting in the death, by shooting of one bad cur. The owner, a butcher, not unknown to fame of some kind, keeps a savage bulldog to watch his shop and to the no small danger to limb and life of his patrons.”

"On that day a customer approached the door with fear and trepidation, to make his purchase for the evening meal. The handle turned, as quick as thought the dog jumped on him and gnawed on him as well! The frau (be thanked) then interfered, and, with strength of a male, dragged "Bully" to his house."

"The customer, not daunted, procured a pistol, a very pepper-box, six shots he fired; the dog and Madame raved the while, but doggy failed to "spoil." Prudence and pain now forced a quick retreat, to the office of a disciple of Galen, who cupped the man and made him safe from harm. During this time the owner dragged "Bully" to a safe retreat."

"Angry citizens, perceiving which, after brief thought, armed *cap-a-pie*, with mien ferocious, marched *en masse* to where the bad cur was; demand for him was made, and such refused until after an hour or so of cavil, the frau agreeing, though not relenting. The dog was got and shot, and all was once more quiet on Alvarado Creek."

### **Flood:**

A dispatch, dated at San Leandro, December 21<sup>st</sup> says:

Last evening, at about seven o'clock, this town was visited by a terrible storm of thunder, lightning and rain, which lasted about an hour. The lightning darted through the heavens in a very careless manner indeed, and the thunder bellowed forth its dreadful notes in a manner truly alarming, frightening the old ladies nearly to death, and the children will not grow any more for a year to come. Such a storm has never been seen in this part of the country before, not even by the oldest inhabitant. The San Leandro Creek was running bank-full last night, the water being within two feet of the high water mark of the great flood of 1862. Any amount of drift came down the creek, such as wood, fencing, trees, wagons, horses, etc.

A resident of San Leandro says:

The Alameda Creek is very full, and overflowing its banks, and runs through the streets of Alvarado.

Nearly all of the grain sowed has been washed out, and completely so on the hill slopes. The lowland between Alameda and San Leandro are submerged. The storm throughout the county has not been equaled in intensity by any which has visited this coast since 1861 - 1862.

*The Sacramento Bee* asserts that in the Alameda and Santa Clara valleys the farmers have actually been driven by ground squirrels off of some of their best lands; that their settlements, like that of the prairie dogs extend for miles, each burrow sheltering between one to six inmates; and that would hardly be an exaggeration to say that they devour one fourth of the wheat crop.

#### **Alvarado Supports Union:**

In compliance with previously published notices there was held yesterday at Hayward's, in Alameda County, a Union Ratification Meeting, under the auspices of the Grant Central Club of that county. At 9:30 a.m. a delegation from San Francisco took passage on the steamer *Alameda*. Amongst the number the Grant Invincibles were on hand with their big and life like portrait of the Union Champion. The morning was clear and delightful, an invigorating but not uncomfortable

breeze from the ocean prevailing. Cars were in readiness at the Alameda wharf to carry the crowd to their destination, which was reached at half-past eleven o'clock. All along the road vehicles were passed filled with the bucolic citizens of our rich and prosperous county over the bay.

At the very moment that the passengers alighted at Hayward's their attention was attracted to a long line of coaches and carriages and buggies moving into the town from the southward. This procession, numbering some twenty-five vehicles, was composed entirely of the Union residents of Washington Township, the precincts represented being, Centreville, Alvarado and the Mission of San Jose. There were banners and flags flying, and as they passed through the street men and women joined in the patriotic air of "Sherman's March through Georgia," whilst the crowd afoot swelled the chorus.

### **Sugar:**

(From the *New York Tribune*, June 8<sup>th</sup>)

We are glad to hear that California proposes to engage earnestly in the production of beet sugar. Her valleys have a rich, immensely deep soil, her six months of hot, dry, cloudless summer insure a great growth of beets of exceedingly saccharine quality; she will have no weeds to fight after the first two of those months and we judge that very deep ploughing will obviate all necessity for irrigation. Beet sugar is the child of protection, but has outgrown the need of parental nourishment. It is destined to make the circuit of the globe, following its temperate zone and to increase largely the comfort and luxury of the poorer classes. Lower Illinois ("Egypt") will yet supply beet sugar cheaper than we can buy that condensed from the juice of the cane. Tea, silk, wine, sugar, raisins, these, with the olive, the fig, the peach, are destined to render California the Garden of the Pacific. Her valleys will yet be as populous as China.

### **Earthquake:**

A few minutes before 8 o'clock in the morning on October 21, 1868 a severe earthquake struck the east bay. From damage reports it appears that the center of the quake was near Haywards. Further south the Mission at Mission San Jose collapsed.

Haywood Items: A Haywood correspondent writes as follows:

The storm of the last few days has been very severe, and caused considerable damage in this vicinity. The San Lorenzo Creek overflowed, and carried away the bridge on a street leading to the Amador Road, so that all communication is cut off in that direction. Trees have been thrown down, and the banks along the stream have caved in, doing much damage to the landholders. Dr. Kimball's bridge, it is reported, is considerably injured. The culvert near the Castro station was partially carried away, preventing the railroad cars from reaching this side of the Castro station until today. The bridge near the Palmyra schoolhouse was also partially destroyed, and various culverts have been carried away in this neighborhood.

Communications between Haywood and Alvarado has been stopped; the flats in that direction present one sheet of water, and, by appearance, the overflow must exceed that of previous years. The damage to live stock has been heavy. From report received, most of those exposed to the weather were thin, as usual at this time of the year. Owing to the weather no cattle were gathered together in the Brighton Cattle Market pasture, consequently there were no sales.

**Sugar:**

Work in the new sugar company's mill, at Alvarado, commenced in 1870. The Mill was located about a half mile east of Alvarado, on the Alameda Creek on the Dyer Ranch. The building is two hundred by fifty, three stories high, with a large tower, and was built of wood at a cost of \$20,000. The following well-known gentlemen composed the company: General C. L. Hutchinson, Benjamin Flint, W. T. Garrett, T. G. Phelps, J. N. Risdon, P. Spreckels, E. R. Carpentier, E. H. Dyer and Bonesteel, Otto & Co., who are formerly of Wisconsin. The capital stock was \$250,000 all owned by the gentlemen above. The building and machinery cost \$150,000. The rest of the capital was kept for the purchase of more lands, and for the expenses of the plant. The factory will use up to fifty tons of beets every twenty-four hours and will employ about 150 hands. The company plans to have between 300 and 400 acres of beets growing in 1870. The species of beets, which will be used and produces the most saccharine and is called the white Silesian. They require a light loamy soil, with a clay subsoil to bring out the greatest capacity. The machinery in the establishment will be of the latest invention and most perfect construction. It will all be made in San Francisco at the Union Iron Works, except for the centrifugals, which will be imported from Germany, where every contrivance for making sugar from beets has been thoroughly tested by the most scientific experiments. The whole business is under the management of Messrs. Bonesteel, Otto & Co., who have had large experience in similar undertakings in Wisconsin.

From Alvarado:

The following is a short letter to the *San Leandro Gazette*, written July 25<sup>th</sup>:

The crops in this vicinity are turning out better than was expected. Several of the farmers have already finished thrashing. Most of them are storing their whole crop, and the grain is rolling into the warehouses very fast.

The sugar beet crop is looking very promising. The factory is almost completed, and will be ready to commence operations by the time the crop is harvested.

F.B. Granger has a fine crop of chickory again this year.

Our old well borer, W.B. Curren, has just finished boring a well for William Cashman on the Mariposa Farm. When the workmen first struck the stream, at a depth of 184 feet, the water flowed so fast that they feared an inundation; but, finally, after much difficulty, they succeeded in mastering the raging flood and now it is thought that this is the largest and best flowing well in the county.

### **Sugar:**

A group of businessmen from San Jose propose to form a company with \$200,000 in capital, for the purpose of entering into the business of making sugar from beets. They sent a committee to examine the Alvarado sugarie, and that committee reports that the beets delivered at the factory cost \$3.50 per ton, the exhausted pulp is worth \$1 a ton for cattle feed, and the company has stalled oxen to eat it up. There are seventy hands employed, half of whom are Chinamen. The Asians are paid 80¢ a day and the Europeans \$1.50 a day, both without board. The average yield of the beets was 15 ton to the acre, and the cost of seed, cultivation and rent on the land is \$6 per acre and raising and delivering the beets was \$80 per acre.

The sugar beet in California:

(From the *Illinois Farmer*, December 24<sup>th</sup>)

Most of our readers will remember an account of the sugar beet works near Fond du Lac, Wisconsin, that appeared early the present year. Successful as was the enterprise then, the proprietors, from experiments made upon beets sent them from the Pacific Coast, concluded that still better success awaited a similar enterprise in California. Consequently the Wisconsin concern was disposed of, and Messrs. Bonesteel, Otto and Kleinan, of Wisconsin, united with General D. J. Hutchinson; Flint, Bixby & Co.; T.G. Phelps; EB H. and Eph H. Dyer; E.R. Carpentier; W.T. Garratt; P. Spreckels; W.B. Carr; H.G. Rollins; and Risdon & Co., all of California and purchased 150 acres of rich land on the Alameda Creek near Alvarado, Alameda County. They also sent to Germany for choice sugar beet seed; sank an artesian well, and put up a sugar works, all at a cost of about \$125,000. They grown a crop of beets the past season and commenced working it up on the 17<sup>th</sup> of last month. The sugar produced is pronounced most excellent in quality, and is produced in a quantity that gives the highest promise to California as a beet sugar producing state.

### **Sugar:**

The beet sugar made at Alvarado is in such favor that the demand is four times as great as the supply. The mill will run until the middle of April on a supply of beets now on hand using fifty tons a day. Small orders for the sugar have come in from Oregon, Washington Territory, Nevada, Utah and Montana.

***The Morning Oregonian, Portland Oregon, January 12, 1871***

### **Sugar:**

The successful commencement of the manufacture of sugar in great quantities from beets, in California, is justly dwelt upon by the press of that state as fact of very great importance. It is not an experiment; it is an accomplished fact. The Alvarado mill is now turning out about four tons of sugar per day. It is not ascertained yet at precisely what rates this sugar can be produced; but it is believed it can be manufactured at a profit to labor and capital. Duties on foreign sugar have been somewhat reduced lately, but they are still high enough to discriminate in favor of the American product.

***The Morning Oregonian, Portland Oregon, January 16, 1871***

**Sugar:**

Whenever any new manufacturing interest is started in this city or vicinity, there is always a hard fight made by jobbers and importers to crush out the new industry. Of course, the Beet Sugar enterprise has been no exception. The first attack upon that was in a material reduction of the price of the class of sugar manufactured at Alvarado; but the people were greatly benefited by that move, and the Alvarado Company can well afford to manufacture at the reduced price.

The next attempt was to frighten capitalists from investing in the numerous projects for other manufactories, which were set on foot as soon as the success at Alvarado was made known. A statement in detail of the cost of manufacturing beet sugar was widely circulated in several of our leading papers; but its authors overdid their work by the extravagance of their figures, which were so arranged as to show an annual loss of about \$30,000 to an establishment of the capacity of the Alvarado works. The fallacy of the unfriendly figures has been fully shown; and thus that matter rests for the present.

The gentlemen who have initiated this business, in Alvarado, are perfectly conversant, not only with the manufacturing details thereof; but with its economical details and value as well. They have fully counted the cost, and are prepared to put their home grown article upon the market at as low, and, if necessary, at a lower figure than the same quality of sugar can be afforded by those who depend upon a foreign market for the raw product.

**Alvarado Fire:**

A gentleman arrived at San Leandro February 6<sup>th</sup> who stated that while on the road from Alvarado he noticed a dense smoke arising from the direction of the beet sugar factory and believed it to be on fire. A later arrival stated that it was not the factory but a large neat that town.

**Fire:**

On Sunday night, February 5<sup>th</sup>, a fire broke out in Louis Helbing's boarding house, located a few rods distant from the Sugar Factory at Alvarado, which speedily consumed the building and household furniture; loss \$800, insurance \$500. It is supposed that the fire was the work of an incendiary.

**Alvarado Drawbridge:**

Proceedings of the Board of Supervisors:

The Board met Monday at San Leandro. The President stated that, in accordance with the expressed intention of the members, they had visited and examined the Alvarado drawbridge Saturday last, having employed a gentleman competent to investigate the work thoroughly and report upon it. Mr. G.F. Allandt's report was then read.

He found that according to the plans, specification and contract, a number of sills, derrick-posts, chains and ring-bolts were wanting; pulleys in the derrick-posts and stringers were deficient in dimension; most of the flooring planks and diagonal braces (evidently being in use for years, and fastened in many places with spikes, which had been used before), were old and many of them quite rotten; as to the workmanship, it was simply execrable; the piles and the posts were out of plumb and out of place; and, to make the bridge passably safe, will cost \$440 by an approximate estimate. The report was adopted; the previous report of Captain Cady was rejected.

**Sugar:**

How to Raise Sugar Beets:

Deep ploughing is essential, but it involves certain other conditions, without which its benefits are perverted. The Alvarado Sugar Company has proved that it is necessary, after ploughing fifteen inches deep, to roll the land heavily, and, after seeding, to roll again. If this is not done, the young plant has not sufficient hold to resist a north wind. The company's agriculturist has had long experience in Germany, and he is carefully studying the peculiarities of our soil and climate. So far as his observation goes, it appears to him that compression gives to the loosened ground better retention of moisture, without impairing its penetrability by the growing plant, while the top crust made by a heavy roller acts as a mulcher, and also resists the windblast. If the soil is sandy and unrolled, the northers take up the loose sand, and, driving it over the field, it cuts off young plants like a mowing machine. A lamentable instance of this kind we witnessed at the Sacramento Beet Sugar Plantation on the American River. In an hour the sand drift mowed off 200 acres of beets, putting the crop beyond redemption!

So far as experience goes, you gain nothing by planting beets before April. Side by side at Alvarado may be seen wide stretches of beets planted in February and April. There is little difference in size on the 22<sup>nd</sup> of May, while the later planted show the greatest vigor and promise a better crop. It seems as if the early planted suffer from cold spells and make no compensating growth when Spring time comes, the root growth appears to be stunted, and probably no root stunted in its first growth ever recovers to healthy expansion.

It may be stated here that the scanty rainfall will shorten the crop of beets at Alvarado. In that rich, dark loam, bordering the Alameda Creek, such perfect cultivation should certainly give an average yield of 25 ton to the acre. In view of the drought, the Company has put in 500 acres. We saw their beet field at this date last year, and now we have seen them also, and we pronounce this year's superior. We estimate their beet crop of 1871, at an average of 15 tons to the acre, 7,500 tons at 8 per cent to 1,200,000 pounds of sugar; at 12½ per cent to \$150,000; at ½ per cent to \$50,000 net profit.

**Sugar:**

It is known that importers of foreign fabrics are not particularly friendly to the home industry. Instances are quoted where combined opposition has often broken up the domestic factory. Occasionally it is tried on parties who are too strong in the back to be broken; and then the enemy's guns are often turned against themselves. The enemy went after the Beet-Sugarie of California. By a show of artful figures it made public proclamation that it was a losing business, and many new companies were scared off. To return the compliment the Alvarado sugar men went after the refineries. When the stock of beets was worked up, they turned their raw sugar mill into a refinery, and with such success as to break up the ring, which has had a monopoly.

So far, they have made only granular sugar. But they have preparations for making also loaf sugar on a large scale. If the loaf sugar process proves successful, we may add a new sugar refinery to the list of our home industries. This new refinery, being on the tidewater, is as well located for economy of production as the sugar works in town. It will greatly cheapen the production of raw sugar, that the works, after the beets are converted, are no longer idle, but kept very profitably busy in refining; which is something not hitherto attempted.

There was an opposition of a different kind offered when Alvarado went into market for a stock of bone charcoal. It found that the refineries had corralled all there was, and all the bone-coalers make ahead. This was promptly met by Mr. Otto's establishment of a new bone-factory. Fifteen dollars a ton brought old bones from all quarters in unlooked for abundance; and we have seen no such bone charcoal before in this market. Thus we add another factory and other incentive to utilize the waste that has been so long neglected. To turn to use what was formerly wasted is more meritorious than to introduce a new cultivation. It is turning evil into good. Thus we have well illustrated that "opposition is the life of trade."

### **Ducks:**

A.W. Gregg of Alvarado has a brood of ducks now laying eggs, and it is just two and a half months since they came out of the shell. He also states, says the *Alvarado Advocate*, that the old hen, which hatched them, takes care of them and watches over them just the same as she did the first month they came out.

### **Prolific Oats:**

Mrs. Pierce Wiggins, of Alvarado, has presented us with a stool of oats numbering 136 stalks from one seed. The stalks are from three to four feet high, and grew as volunteers on a piece of 15 acres of uncultivated salt marsh land, which Mr. W. is reclaiming. His method is by means of floodgates placed in the ditches, which are closed during high tide. The tract is flooded with fresh water by an Artesian well, and drained at low water by opening the floodgates.

### **Mop Head Patent:**

Mop Head Holder: J. Brizee, Alvarado Cal. This invention consists in employing strong wires or rods, which are secured to the mop handle and bent so as to lock over one another and bind the mop cloth between them. Another wire is arranged to slide upon these so as to hold them tightly or to release them. The device is very simple, cheap and durable.

### **Marsh Reclamation:**

The *Haywood Advocate* has the following interesting paragraph upon the subject of marsh land reclamation: "About a year ago Pierce Wiggins came down from the mountains and purchased from N.L. Hastings a tract of salt land between Alvarado and Union City, upon which he bored an artesian well and erected a fish nursery. The well-furnished water for his nursery and at the same time is available for the overflow of the surrounding marsh. Wiggins adopted the theory that salt marsh could be easily reclaimed, and that when reclaimed it would be the most productive land in the world, and he immediately put his land in process of reclamation, and today he has growing upon it wheat and rye, and a variety of vegetables, all of which look healthy."

### **Frightful Runaway Accident:**

A frightful accident occurred last Tuesday to Miss Agnes Barron, daughter of Captain James Barron, of Union City. It appears that the young lady, who is about fifteen years of age, after returning from school, went riding on horseback, using a man's saddle. The horse became frightened at Alvarado, and ran to Union City, a distance of half a mile. The unfortunate young girl was thrown from the saddle, but her leg having caught in the stirrup she was dragged the full distance, her head striking against the road. When rescued, she found to have several severe cuts and bruises about the head and face. Physicians were at once called upon, who attended to her closely and did everything in their power for her, but she remained unconscious for two days. Although dangerously injured her physicians entertain hopes of her recovery.

### **Marshland Reclamation Scheme:**

How to make the large tracts of salt marsh lands, which abound in our State render an income to their owners and revenue to the State, is a question of considerable importance to us all. English capitalists have shown recently great interest in this matter, and some large establishments are report on the *tapis*.

One of the intelligent and enterprising of our land speculators located, under the provisions of the State laws, in 1868, twenty-one thousand acres of the marshlands in Alameda County, commencing near Alvarado and running south along the Bay to the Coyote Creek. He has adopted the plan of reclamation so successful in New Jersey. The Alameda Creek, which passes through the town of Alvarado, during period of heavy rain, empties into the Bay immense quantities of water heavily charged with earthy matter.

During the Christmas holidays of 1867, the flood was so great that water the stage roads and filled the streets in the town ([Alvarado](#)). The residents were obliged to go about in boats, and in that manner they attended the Christmas Ball. In some places, where an eddy was formed, many acres of new land were formed from the rich alluvial deposits.

The gentleman, of whom we are speaking, as soon as he had acquired a vested right in the marshlands, immediately commenced operations. Embankments were thrown up around the entire tract, and a method for flooding the low land from the waters of the Alameda and Coyote Creeks was devised. In this way it is expected that the still waters covering a great expanse of country will deposit their freight of rich soil, and the clear water will flow off over the embankments, or through floodgates.

Unfortunately the two past years have been so dry that the experiment could not be proved. Now, however, we hope to hear something different. The present rains will pour down from one to two hundred miles of drainage, and the low lands will be charged to their utmost capacity.

It is reported that in New Jersey lands reclaimed in this way are the most valuable in the State. The fresh water soaks up and washes out a great quantity of the salt and leaves a foot or more of virgin soil.

By sowing this in clover and turning in stock upon it, in three years the reclamation is complete. If this experiment proves a success in Alameda County, where adjoining lands are worth from seventy-five to two hundred and fifty dollars per acre, the fortune to the owner will be proportionately the wealth of the State in the product of increased taxable property.

***The Daily Alta California, San Francisco Calif., December 20, 1871***

### **Flood:**

The rains have thoroughly saturated the ground in every locality of the State. In many places the rainfall has far exceeded that of any preceding season during the same space of time within the memory of the "oldest inhabitant." The grass has sprung up in every part and is growing vigorously. If the usual frosts only keep off a short time until the tender shoots become strong with toughened fibre, the stock will fare well on the abundant herbage. It is, likewise, to be hoped that a season of sunshine may follow, so that the soil may be in fit condition for ploughing, which, at present, can only be done on rolling or hillside lands.

Across the Bay all that portion of Alameda County lying on the western slope of the Coast Range is peculiarly favored. Most of the county roads, which formerly, under similar conditions, used to be at this season of the year almost impassable by reason of the tenacious quality of the adobe mud, have been within late years macadamized with rock or gravel. Travel is thus but little impeded. The railroads, though somewhat damaged at present, also offer facilities for all the farmers for speedily commencing their work.

In the vicinity of Alvarado and Centreville the waters of the Alameda Creek have, in places, overflowed their banks and occasioned temporary inconvenience. The marshes have been successfully flooded under the system of dykes arranged to catch and spread the flood, and in consequence thereof the value of the speculations entered into in that direct have greatly been appreciated.

*The Daily Alta California, San Francisco Calif., December 26, 1871*

#### **Salt:**

We published yesterday a statement of damages occasioned by the recent floods to the salt works near Alvarado. We have since received further information on the subject. The loss of salt at the Plummer Works will not prove as great as reported, although it is indeed quite serious. The railroad of the company has been easily repaired and is now in good condition. That this information may not mislead the public as to the extent of the damage suffered by J.A. Plummer, Esq., we will give further facts.

The damage reported has only been sustained by him on the tract of land purchased about a year ago and in the vicinity of Alvarado. In this new branch of his enterprise he is only one-third owner. The Crystal Spring Salt Works, of which he is the sole owner, is situated about eight miles further south, and are perfectly secure against the encroaching floods. At the latter place he has stored in his magazine two thousand tons of prime salt, worth from ten to twelve dollars per ton. About twenty thousand dollars' worth of improvements have been made on the place and this business is in a flourishing condition.

The Alvarado Beet Sugar Company reports but a meager business, and declines giving a full report until the season is over. From the best data at our disposal we are inclined to believe that the Sugar Beet experiments upon this coast, at least at Alvarado, have not been altogether successful, and some disappointment is felt at the result. Go slow, but sure, should be the watchword.

#### **The Notorious Procopio:**

Last Saturday afternoon the notorious desperado, Tomaso Rondino, alias Procopio, alias Red Dick, was arrested in San Francisco by Sheriff Morse of Alameda County and other officers on a charge of Grand Larceny. As Procopio's name is prominent in the crime annals of our state, a brief account of his crimes will be read with interest.

He was born in Sonora, Lower California, in 1811 and, as his name indicates, is of Mexican parentage. His mother was a sister to the notorious Joaquin Murietta, who for year's kept California in terror, and who was finally shot by Harry Love. In 1853 Procopio's parents moved to Los Angeles County. Here, when a boy, he became initiated into crime, and in 1859, when but eighteen years of age, he murdered a man named John Raines on the Cucamonga Ranch.

Finding it convenient to leave, he came northward, and commenced operations in Alameda County. He organized a gang of bandits, whose residence was in the Livermore Valley, and of whom he was chosen Captain. This gang for a year or more were a terror to farmers, whose cattle they ran on and whose property they appropriated whenever opportunity offered.

It was about this time that the horrible murder of the Golden family was committed, an atrocity that sent a shudder over the whole coast. A Mexican cattle herder was suspected of this act, but he stoutly denied being the guilty man, and asserted to the last, that he saw Procopio commit the deed. Circumstantial evidence, however, was against him, and he was hung for a crime in which he was at most only a subordinate accomplice.

In 1863 Procopio and others ran off a drove of cattle from a farmer named Pope. Constable Wood of San Leandro started after him with a warrant and caught him in Alvarado. Knowing him to be a desperado, Wood covered him with his pistol and demanded his surrender. Procopio threw up his hands and said he would surrender, as he was unarmed. Wood put back his pistol, when quick as thought Procopio drew out a revolver and shot Wood through the arm and escaped in the excitement. He was followed by a posse of citizens, and his further escape across the bridge was cut off. But he was equal to the emergency, and taking his pistol into his mouth he plunged into the river ([Alameda Creek](#)) and swam across. He ran for the salt marsh, closely followed by the citizens. Finding that they were gaining on him he turned at bay and fired at them, wounding a constable. He was captured and tried at San Leandro for stealing Pope's cattle, convicted and sent to the State prison for nine years.

Procopio served out his sentence and was liberated last March. Since then he has returned to his larcenous ways until he was captured by Sheriff Morse and now sits in the San Leandro Jail.

#### **Sugar:**

The most successful experiment in manufacturing beet sugar in this country is reported at Alvarado California where a factory has been built capable of handling 60 tons of beets every twenty-four hours; 500,000 pounds of sugar were manufactured in 1870 at a fair margin of profit and it is thought the sugar produced of 1871 will double that of 1870.

**Sugar:**

It having been demonstrated that beets can be grown in many parts of the Pacific slope, of such good quality and in such quantity as to insure profit to both the grower and the sugar manufacturer, we are not surprised to learn that larger tracts of land are devoted to their culture this year than every before. At Alvarado, California a large sugar manufactory, capable of handling sixty tons of beets every twenty-four hours, has been built. Last year, the company owning it manufactured 600,000 pounds of pure sugar equal in all respects to cane sugar.

**Chicory:**

F. B. Granger of Alvarado, who has for some five years been engaged in raising chicory for the California Chicory Company, has just completed a new drying house, the one formerly used having been destroyed by fire last year. The present crop now ready to gather consists of fifteen acres, and will yield probably ten tons to the acre, which in drying will lose about three-fourths of its weight, and will furnish about thirty-seven tons of marketable product.

Mr. Granger planned for a much larger crop this year, having planted fifty-five acres, but time developed the unfortunate fact that forty acres had been planted with lettuce. The mistake was not discovered, however, until all the ground had been carefully weeded over twice, and then it was too late in the season to replant. The seed was furnished by the parties with whom he contracted to cultivate the chicory, and was procured by them part in New York and part in Europe. I believe it is not known where the mistake was made, the two seeds are identical in appearance.

The appearance of chicory in the field is similar to that of beets, although the leaf is not quite so broad and smooth, the root is white like parsnip, and on being broken or cut gives out a thick milky juice which is bitter to the taste. The plants penetrate to a great depth, many of them being from three to four feet in length.

It is too much labor to dig them out whole, so a plough is used that cuts them at a depth of about ten inches, when the top part is pulled out by hand, cleaned and chopped by machinery, and put into a hopper-shaped bin lined with brick, that will hold from three to four tons at a charge, and exposed to the heat of a furnace underneath till dry, when it is sacked and ready for market.

The further roasting, which is necessary before grinding, is done in the city where it is prepared for use. Horses and cattle are fond of chicory and fatten upon it more rapidly than when fed with either beets or carrots, but the milk of cows fed upon it has a bitter taste.

**State Fair:**

John Hall of Alvarado has many animals entered in this year's State fair, among which are some, which will be hard to beat. The leader of his drove is Woodburn, and in his stalls are Ironclad, Alic, two-year-old, out of Peggy Ringgold, and the mares Peggy Ringgold and Moss Rose, and others almost as noted as the one mentioned. Hall is going for every premium on the thoroughbred list, and, judging from his stock, will carry off as many as any one else.

**Letter to the Editor:**

Bleaching Almonds:  
Editors, Rural Press:

An article on this subject appeared in your paper which, conveyed erroneous directions. He who subjects his almonds to sulphur smoke for two or three hours will both ruin their appearance and flavor.

**How It is Done:**

Take a box or cask, cut a hole in the bottom large enough to admit the smoke from a stove of any size you have; insert the pipe, put a false bottom full of cracks or holes about six inches above the real bottom of the cask or box. Now put a layer of almonds, which are dried for market, one foot deep; take a small broom and sprinkle with water until they are quite wet, then another layer and sprinkle, until your box is nearly full. Cover the whole with a wet cloth and you are ready for the bleaching process.

This is accomplished in ten or fifteen minutes and requires close and constant attention. Put a quantity of burning coals into the stove, let it become quite warm so that steam appears at the top of the almonds. Now put into the stove a teaspoonful of sulphur at a time, every three minutes, so as to keep up the blue blaze. The smoke will go into the space between the two bottoms, and rise up among the almonds and bleach them.

Every few minutes remove the cover and examine the condition of the almonds. When they assume a bright straw color, pour them out at once, and let them dry one or two days and they are ready for market.

If the almonds are too much heated they will be spoiled, if they have the smoke of sulphur two or three minutes too long they assume a dark orange color and will taste of it.

Yours truly,

W.W. Brier

**Sugar:**

The beet sugar mill at Alvarado has attached pens for livestock fattening from sugar beet pulp refuse. Presently there are 350 oxen belonging to Miller & Lux in the fattening pens. There are two large cattle sheds, some 500 feet long, with a tramway through the center of each. On each side of these tramways stalls were arranged where the oxen are brought in and securely fastened with chain halters, and were usually kept for months, or until they were sufficiently fattened up.

**Disgraceful Disturbance:**

*The Haywood Advocate* of March 8<sup>th</sup> gives the following account of a disgraceful disturbance of the peace at Alvarado:

On Sunday night Joseph Bryan, bookkeeper at the foundry, was told to be on his guard, that his life was threatened by Joe Smithurst who had vowed to "shoot him on sight." Bryan, who is one of the most gentlemanly and peaceably disposed young men in the community, was very much surprised, and could not believe that his life was in danger from one with whom he had never exchanged an unpleasant word. But, upon inquiry, it appeared that Smithurst had borrowed a "six-shooter" of Ed Huff, and went to the residence of a Mrs. "S", flourishing a pistol and swearing that he would shoot Bryan. This Mrs. "S" is a poor but industrious woman, who supports herself and three children by washing and sewing. Among those for whom she has been doing washing is Bryan of whom Smithurst has become absurdly, but violently jealous. What right of his has been invaded by the unsuspecting Bryan does not so clearly appear.

Yesterday morning, as Bryan was going to the foundry, he met Smithurst and asked for an explanation of his conduct. Receiving no satisfaction he passed on. At noon they met again, and Smithurst demanded the name of his informant, which he declined to give. Smithurst then began to abuse Bryan, and said, "if you want anything of me you can have it; I'm ready for you." He then went back to the saloon, quarreled with his father, shoved his hand through a window and received several severe cuts from the broken glass.

In the evening Bryan went to Centerville and got a warrant for his arrest, and Constable Trefry came down and took the warlike Smithurst into custody; but not before he had returned to the house of Mrs. "S," called that lady some pretty hard names and was knocked down and roughly handled by her brother. This morning Justice Bond came down from Centerville to "establish justice," and restore the peace. The prisoner was arraigned on the charge of threatening the life of Bryan, was found guilty and was given the alternative of going to the county jail for six months, or give bonds in the sum of \$500 to keep the peace. Not finding any one willing to become his bondsman, he was taken to the county seat. The sentence is heavy, but perhaps, not too severe.

#### **Sugar:**

During the past year 83,000,000 pounds of sugar was imported to the Pacific Coast. Of this 65,000,000 pounds were consumed. There was only 1,500,000 pounds of beet sugar manufactured in the State, by the factories of Sacramento and Alvarado, so there is still room for eighty-six such factories, giving employment to 8,600 operatives for seven months of the year, from August until March, not to speak of the Chinese, numbering one hundred, on the Alvarado Company's farm, where they are employed in weeding, hoeing, etc. These Chinese are the only hands at present employed on the Alvarado farm, and are kept to cultivate the young beets.  
*The Pacific Rural Press, San Francisco, June 28, 1873*

#### **The New Improved Clothesline:**

Although clotheslines are among the necessities of housekeeping appurtenances, they are, like smoking stoves, often the unconscious cause of serious domestic troubles. They always hang in the back yard in a position accurately calculated to either strangle, or injure the nose of any individual passing, and carefully prepared statistics prove that the average number of persons of the female persuasion who remember to put the lines away after using is about one in one hundred. The domestic who systematically removes them at the proper time is to be cherished and an example to be quoted. When left outside, clotheslines become grimy and dusty and are apt to leave their marks on the line suspended from them. An addition to these very forcible objections is that of their tendency to stretch at one time and tighten at another, either breaking or sagging down so as to render progress in the rear regions extremely hazardous. Then they are always carelessly fastened to a rusty nail, and every housekeeper will bear testimony that this proceeding is a dangerous one and its results provocative of emphatic language in the kitchen.

In view of these self-evident facts many devices have been invented to overcome the difficulties and render the use of clotheslines less of a nuisance than formerly. Among them is a new patent recently obtained through our agency by John Brizee of Alvarado, Alameda County, Cal. As Mr. Brizee live in a country town where Chinese laundrymen are not so plenty as in San Francisco, he has had experience of the matter and fully relies on an appreciative community for his reward. The improvements consist of an arrangement by which a single shaft is employed for winding both clothesline and weight line, thus avoiding complication, expense and the liability of the lines becoming fouled. Another improvement is the upright box support inside of which the weight moves down, which forms a part of the reel box; and lastly of an arrangement by which the clothesline may be tightened at any desired length.

The California Beet Sugar Company at Alvarado has already begun their work. They have 500 to 700 acres of sugar beets to work from, which gives promise of good results by their excellent condition at this time. The company made 1,100,000 pounds (550 tons) of superior sugar last year, which sold readily as fast as it could be made, at good prices.

#### **Sugar:**

A visit made yesterday to the Sacramento Valley Beet Sugar Factory disclosed the fact that the works are in the full tide of operation, and we gained assurances that the work of the year will be crowned with success both financially and otherwise. It will be borne in mind that at the last State Fair the Sacramento beet sugar carried off the first prize, thereby establishing its excellence over the article made at Alvarado, in Alameda County. The processes by which sugar from beets is made in Sacramento and Alvarado are different, that of Sacramento being of the latest and most improved patent, as indorsed in Germany.

The new beet sugar mill at Soquel was completed last week, and much of the machinery is already in place. The last lot of it will be shipped from San Francisco in a few days. The capacity, like that of the Alvarado mill ([which this mill will replace](#)), from which the machinery has been taken, is to reduce fifty tons of beets per day. Nine hundred acres have been planted by farmers who are to deliver them at the factory at \$3.50 per ton. As soon as they are ripe enough, and that will be in September, the mill will commence to run. Nothing save experience can conclusively demonstrate the relative value of Alvarado and Soquel for sugar mills, but the company is confident that the transfer will be profitable to them.

#### **Sugar:**

We are informed that the Beet Sugar Company, which moved its works from Alvarado to Soquel (Monterey County), find that a mistake has been made. They can scarcely get four ton of beets to the acre, while twenty bushels to the acre at Alvarado was considered a poor crop. The only difficulty in the way of success at the latter place was the high price of coal, for which the company had to pay from \$15 to \$20 a ton.

**Sugar:**

The beet sugar mill at Soquel, transferred to that place last summer from Alvarado, commenced to run last week. The results so far are satisfactory in the proportion of saccharine matter, the flavor and crystallization, entirely disproving certain unfavorable rumors. It has been asserted that sugar cannot be made from beets grown near the ocean; that there is no beet sugar mill within five miles of the beach in Europe; that the beet leaves at Soquel are white with salt deposited by spray from the sea-water, which would obstruct crystallization and injure the flavor of the sugar. These ideas were probably first suggested in queries or surmises, and were next put forth as a matter of positive knowledge. The moisture in the air blown from the sea contains no salt (which is not volatile) and, although the beet fields are near Monterey Bay, yet the breezes in the Spring, Summer and Fall must pass at least ten miles over land from the ocean before they reach Soquel, which is protected on the northwest by Santa Cruz Point.

**Artesian Wells:**

[\(The City of Oakland eyes Alvarado Water\)](#)

The flowing artesian wells of Alvarado are one of the features of our county. The town is supplied with them and so are all of the prominent farmers in the adjacent country. The town of Alvarado

is supplied with artesian water from a well bored by a joint stock company, and there is one at the American Exchange Hotel, to which the public has access.

The flowing well of Captain Barron is one of the most remarkable in the state. It discharges a volume of water at least ten inches square and equaling about 100 gallons a minute. The Captain having no more than domestic use for it, the water flows up and makes a lake of four or five acres in extent, whence it flows into the bay. The depth of this well is 185 feet.

E. H. Dyer's flowing well, about a half a mile from the town, is 273 feet in depth, and yields an abundant amount of water, although there are several others in the immediate vicinity, two of which are on the property of the beet sugar mill.

Eb Farley, whose property is on the south side of the creek from Mr. Dyer's, has just sunk a new well going to a depth of 283 feet, and striking a stream of pure, soft water.

John Hall, a prominent farmer and stock raiser, has three flowing wells on his farm, and those of Mr. Crane, Mr. Ingalls, and Mr. Nelson are remarkable for their abundant yield.

The deepest of these wells, is Mr. Farley's, just sunk, which goes to a depth of 283 feet, and that of the least depth belongs to Mr. Hall, which requires a pipe of only 78 feet.

The possession of this abundant supply of pure, fresh water, gives Alvarado an advantage over some of the neighboring localities, enabling its inhabitants to grow fruit and vegetables abundantly, and its farmers to produce green feed, such as alfalfa, for their cattle.

Any establishment requiring an abundance of water would do well to consider the advantages of Alvarado. Were we ([the City of Oakland](#)) to continue the present shortcomings of Oakland without the prospect of speedy relief ([such as Alvarado's water](#)), we could do no better than lay a line of pipe to the flowing wells of our first county seat.

This annual ball was a great success financially and it is to be hoped they will come to pass regularly, for the good of some worthy object. The net proceeds were donated to the Trustees of the Hall Association of Alvarado, for the procuring of more conveniences for their hall.

#### **Hops:**

Messrs. Benedict & Shirk have been cultivating hops the past two years on a valuable spot of ground of about twenty-five acres near Alvarado. It is on the road of John Whipple's land on the old road from Alvarado to Decoto ([today's Alvarado-Niles Road](#)). The work of picking has kept them busy for nearly five weeks, with a gang of 150 Chinamen in their employ, and they have

just finished the heaviest part of their labors. They have already baled 65,000 pounds of hops, and have about 5,000 pounds more to bale yet, making this year's crop amount in all to 70,000 pounds. Last year the yield was only about 31,000 pounds so that they have more than doubled that amount this year, actually averaging 2,800 to the acre; which is certainly a very extraordinary yield anywhere. As these gentlemen are men of means, they are not forced to put their crop upon the market at once, and take what they can get just now, while prices are low. They will store away their hops in safety, and await a better market.

### **Plummer's Salt Works:**

A visit to the Crystal Salt Works near Alvarado this week has enabled us to father a few items of interest to our readers concerning the manufacture of this article. Some time we gave an account of Quigley's Salt Works, and then declared our purpose, as soon as possible, to gain and give further information about other salt works in our county.

These Crystal Salt Works were first started in the year 1864 by J.A. Plummer. Only three hundred tons were made that year, as the whole matter was new, and the experiment a venture for the owner. In 1865 the labor began in real earnest, improvements were established, and the enterprise began to assume all the characteristics of a permanent and profitable undertaking. Since that year the manufacture has been steadily advancing in activity and success, until it now stands equal, and probably superior, to any salt manufactory in the Bay.

The present year not less than two thousand tons of choice packing salt will be manufactured by this establishment, and this kind of salt meets with ready sale among the beef and pork packers of San Francisco and elsewhere.

There are two separate branches of this enterprise, one under the charge of J.A. Plummer, Jr., and one under the direction of C.A. Plummer, while the general business is managed in San Francisco by J.A. Plummer, Sr.

The quantity of salt required for family use is far beyond what those unacquainted with the business would anticipate. Thus, this establishment grinds twenty-four tons of table salt, twenty-five tons of dairy salt and fifty tons of pork-packing salt weekly. And a double gang of men is employed, so that the work may go on by night as well as by day in the mill and drying-house. A steam engine and regular driers are connected with the works. The salt is put into large bags when ground, and shipped to the packinghouse in San Francisco, where it is repacked in small sacks and baled for market.

There are nine vats, all built of Oregon pine, in the branch under J.A. Plummer, Jr. Only lumber is used, and that of the best kind, there being no earth divisions between vats, and for them no less than 150,000 feet of the above lumber were found necessary. There are six warehouses for storing the salt, and a tramway connects them with the landing, where there is also a large storehouse as well as coal sheds.

The branch established under Charles A. Plummer is called the Turk's Island Salt Works, and is situated about a mile directly west of the town of Alvarado. Here there are five vats, which have also turned out this season 1,000 tons of choice rock salt. These vats, too, are built exclusively of Oregon pine, which experience shows to be the best material for the purpose. A tramway connects these works also with the landing, running a distance of about 1,500 feet. Only park-packing salt is ground here, and 300 tons have been ground thus far this season. A schooner of fifty-five tons burden belongs to the company, and is kept constantly running to San Francisco to transport the salt from both of these branches. The latter Salt Works were first started by Plummer & Sons in 1868.

Thirty men are kept constantly at work during the busy season, that is, the salt making season, which is during the hot and dry weather. Wooden and steel hoes are used to rake up the salt, which is first drawn into windrows, then into piles and in straight rows. A portable track is laid down between the piles, upon which a car is placed, and the salt put into it and then run down to the shore, where it is washed and stored. In washing, ammonia, nitric acid and limejuice are employed, after which the salt is considered ready for use in the market, or for sale. To show the purity of the article, as here manufactured, we may mention that the State Chemist, Mr. Hewston, analyzed it, and found the salt stood at 97 per cent, or only three per cent below absolute perfection or free from the admixture of all foreign substances.

Truly these Salt Works furnish abundant evidence of what an important and extensive industry has grown up along our Bay shore from very small beginning, an industry that is still further capable of almost indefinite expansion and enlargement.

**Flood:**

The Alameda *Independent* says: "The continuous fall of rain in the forepart of this week caused all the creeks and streams to rise rapidly, and some of them to overflow their banks to no small degree in various parts of the county. Thus the Alameda Creek rose very high at Niles, and below there spread its waters over a large expanse of level country, below Decoto, and near Mt. Eden and Alvarado. The plains that extend from these last two named places towards the bay, looked more like one vast inland sea, than the productive stretches of land, interspersed with cultivated farms and gardens, as they are in fact no inconsiderable extent."

**Alvarado Drowning:**

A man named William Davis, a native of Liverpool, England, aged about thirty years, and a member of Metropolitan Lodge No. 27, IOOF, of Leavenworth Kansas, was drowned in Alameda Creek near Alvarado on Thursday afternoon last. Davis and a sixteen-year-old Alvarado boy named Henry Vandenakker were sailing down the river when the boat capsized. Both clung to the boat for some time, but finally Davis struck out to swim ashore, when he was seized with cramps and went down to rise no more. The boy was rescued off the foundry wharf, where the body of Davis was fished out on Friday morning.

**Another Flood:**

For the sixth time this winter the Alameda Creek overflowed its banks last Friday, and has been flowing about the valley in the vicinity of Alvarado, Centerville and Mt. Eden all this week. The other day a number of girls, accompanied by two or three gallants, went out for a boat ride over the plain. It was "bully fun" going down with the current, but when they turned back the boat went under instead of up. One of the young men took to a fence (and may be there yet for all we know), while the girls, like cousin Sally Dillard, just gathered up their dry goods and waded back home. The boys couldn't tell whether they wore barber pole stockings or not, as the water was muddy and came above the point where the stocking are supposed to terminate.

**Mt. Eden Road:**

Mr. Overacker introduced the following to the State Legislature:

*Whereas*, a petition has been presented to the Legislative Delegation from Alameda County, proposing that an Act be passed by the State Legislature authorizing Alameda County to expend \$10,000 for the purpose of constructing a road from Mt. Eden to Centerville ([via Alvarado](#)) in said county, therefore be it

*Resolved*, We do hereby recommend the passage of said act, and request such delegation to use their influence for the passage of the same.

It was discussed and voted upon and failed to pass.

**Remarkable Coincidences:**

A few years ago there resided at Mission San Jose, in Alameda County, two young ladies, between whom, although not of kin, a strong friendship existed. They were married at the same time at the same service. Then they took up their residences, one at Haywards and the other at Alvarado. In the course of time they gave birth to children on the same day, the birth of one preceding that of the other by two hours. Three weeks later both children died on the same day, the oldest dying just two hours before the other. Three weeks after the death of the children both mothers died on the same day.

**E.H. Dyer:**

Tuesday, as Mr. & Mrs. E.H. Dyer, of Alvarado, in Alameda County, were standing on the corner of Clay and Montgomery Streets, San Francisco, talking with a friend, their twin boys ([Hugh & Guy](#)), little fellows, were stolen. It could not have been but a few minutes that their attention was away from the children, but when they turned to look for them they were gone. The parents are nearly distracted. Detectives are scouring the city, but up to late in the afternoon no information had been received of their whereabouts or of their strange disappearance.

**Pound Master Corrals Calves:**

A suit has been brought before Justice Smith at Niles by Williams against Nauert, both gentlemen living in or near Alvarado. It seems that Nauert is Pound Master of the district around Alvarado, and had impounded two of Williams' calves for being where they shouldn't have been. Now Williams claims that the pound is not a legal pound, because it was not definitely by order of the Supervisors at a special place, and hence putting his stock in an illegal pound is an illegal act, and the Pound Master is liable for all damages caused by such wrongful act. The Justice decides the matter today we believe, and probably the case will be appealed not matter how he decides.

**Large Land Purchases in Washington Township:**

By looking at the real estate transaction in today's issue, our readers will see that very large purchases of land recently been made in Washington Township, and all in the name of one man, and that man is the Treasurer and also the President of our new Narrow Gauge Railroad Co., the incorporation of which was published by us last week. This does not look much as though the Company was likely to prove a future. Our own people, and the skeptics of San Jose and Santa Clara will do well to note the fact. More than four thousands acres of land in different parts of our township have been sold to Mr. ([Hog](#)) Davis, of the wealthy parties whom he represents, and the

purchase money amount to over a quarter of a million of dollars. A very good beginning for spring work in our neighborhood most certainly.

NOTE: These land purchases were made in the name of the Pacific Land Investment Company for the benefit of their railroad, the South Pacific Coast Railroad, which was to run from Oakland to Santa Cruz. It would go through Alvarado (and would later become the Southern Pacific Railroad). The Principals in this case were "Slippery Jim" Fair and "Hog Davis." James Fair started this railroad to spite Mark Hopkins, Leland Stanford, and other owners of the Central Pacific Railroad. Today's Casa Verde tract is the original "Fair Ranch," and Fair Ranch Road was named because at one time it ran east from the Alvarado Centerville Road to the Alameda Creek through the middle of the Fair Ranch. There was another large landholding by the Pacific Land Investment Company in Alvarado and it was located north of Lowry Road. And finally, Jim Fair bought the land at Newark and started selling town lots that gave birth to Newark.

### **Splendid Roads:**

"Ida," the Alvarado correspondent of the *Washington Corners* (Irvington) *Independent*, writes to that paper as follows, under the date of Wednesday last, "'Our roads are in splendid condition now for driving out for a ride, and all that is lacking here to help us enjoy this beautiful season is about twenty-three horses and buggies and the same number of good looking young men, and I do not mean schoolboys nor old bachelors either, for this is leap-year!'"

### **A Splendid Spring:**

The Portuguese in and about Harrisburg ([Warm Springs](#)) are hauling peas in large quantities to the station, and it is to be hoped that this succulent vegetable will soon be within reach of all hungry sinners.

Business seems to be lively in and around Alvarado. Merchants, mechanics and farmers alike wear smiling faces, and we doubt not that the present year will be a most prosperous one for all out people.

Everywhere throughout the central and southern parts of our county, wherever we have been, the appearances indicate one of the finest seasons for crops of grain and fruit, as well as hay and vegetables that people have ever seen around here. The trees are covered with fine blossoms and the growth of the fields are well advanced.

The Odd Fellows are going to celebrate their anniversary on the 26<sup>th</sup> at San Lorenzo by a grand gathering of the brethren of different lodges in Alameda County. The lodges of Oakland, Alvarado, Haywards, San Leandro and Livermore (and possibly other places), will unite with the lodge of San Lorenzo in having a good time on that occasion.

**Pacific Land Investment Company:**

The Pacific Land Investment Company of San Francisco is formed with \$1,000,000 in capital. The driving force behind the company is James Fair and Alfred Davis. It is their intention to run a narrow gauge railroad from Hayward through Alvarado, Newark, Alviso (Santa Clara County) and then onto Santa Cruz. On the north it will connect Oakland to San Francisco via a ferry. This will be a boon to farmers and merchants on the west side of Washington Township where no railroad now exists. We learn that it is in contemplation at Alvarado to get up a social entertainment for the Fourth of July.  
*The Oakland Tribune, June 19, 1876*

**Alvarado Celebrates the Fourth:**

As was customary everywhere near San Francisco, people went there on Monday to witness the sham battle, but on Tuesday the residents of Alvarado and vicinity assembled at Dry Creek near Decoto, where it had been advertised that Judge Hamilton of Oakland, would orate, and the County Superintendent, Rev. W. F. B. Lynch, would read the Declaration of Independence. About 1 o'clock p.m., Judge Hamilton having not arrived, Mr. Lynch read the Declaration in beautiful style after which, by special request, he recited "Drake's Address to the American Flag," which was rendered in fine style. There were but a few hundred people present most of who were young, and the day was spent in dancing and pleasant conversation with friends. A cordial invitation was extended to all to come to Alvarado in the evening and witness the display of fireworks, after which a social dance in the hall would be in order. Long before 9 o'clock p.m. (the

hour at which the pyrotechnic display was to start) crowds of people came pouring into town, and so large a number had ever been seen in the place before. The fireworks were a success in every particular and all were highly pleased with them. At 9:30 o'clock dancing commenced in the hall and was kept up until 2:30 o'clock a. m. During the first two hours the hall was literally jammed with people, but after that nearly all the old folks enjoyed themselves from that time forward. There was no brass band on hand, but Griffin and Lattin with their violins afforded all the music wanted.

### **Badly Burned:**

At Alvarado on the Fourth a man was severely burned with powder from sheer carelessness on his part from firing an anvil. The anvil had been fired quite a number of times when one of the attendants, James Cameron, carelessly poured some powder on the anvil, which ignited from an unseen spark and the can burst in his hands and burnt both of his hands and face in a most shocking manner. It was at first supposed that he would die from his injuries and in any event that he would lose his eyesight, but we are pleased to learn that the injuries are less serious than were at first supposed, and that his eyes have not been injured. He was delirious during the following night, but yesterday had come to his senses, realized his condition and conversed with his friends, and seemed to think that he would be all right shortly. His physician pronounces him out of danger.

### **China Wedding:**

[\(This newspaper account is from St. Joseph, Michigan and recalls former residents which have relocated to our area\)](#)

The following is of a "China Wedding" which came off in Alvarado California. The old residents [\(of St. Joseph\)](#) will recognize every name, for they were former citizens of this vicinity and have many friends and relatives here.

On Monday, August 15<sup>th</sup>, we had what is styled a "China Wedding." Abel W. Gragg and his wife, of the American Exchange Hotel, concluded some months ago that on the twentieth anniversary of their marriage they would give a "Chinese Wedding," and to that end invited all their relatives in accessible distant, nearly of whom were present, including Socrates Huff and wife, Lucien Huff, N. B. Smith and family of Martinez, Captain Edward Smith of Livermore, Eli Emlay and family of Gilroy, E. Farley of Alvarado and N. L. Hastings also of Alvarado. The dinner was a splendid affair; innumerable gifts were given them, and all genuinely had a good time. In the evening we got up a little dance in the rooms of the hotel, and enjoyed tripping to the light fantastics, etc., till about 12 o'clock when we returned to our homes, much pleased with the pleasures of the day and night.

### **News Notes:**

In the farms around Alvarado we notice an abundance of a superior quality of potatoes, averaging about 200 bushels to the acre. They are not speckled nor infected in any way so as to impair or destroy their usefulness, as is the case in many other parts of the state.

The anniversary ball of the Odd Fellows at Alvarado last Friday night was a splendid and successful affair. There were about seventy-five couples present, fine music, an abundance of refreshments of excellent quality, and dancing to the satisfaction of the most ardent admirers of the art.

### **Railroad Schedule:**

In order to accommodate the people of San Leandro, San Lorenzo, Haywards, Centerville and Washington Corners (Irvington), the railroad company will put on extra trains on and after next Monday.

*The Oakland Tribune, November 20, 1876*

**Railroad Schedule:**

It is stated that next Monday an extra train will commence running between Oakland, San Leandro, Haywards, Alvarado, Centerville, etc. If this be true, only one thing more is needed to make the accommodations complete, and that is to reduce the price by one third or one half the present rates.

**School Districts:**

Alvarado District: The clerk of this district is Mr. Joseph McKeown. There are 138 census children in this district, 108 are enrolled on the school registers. There are two schools in the district, one first grade and the other third grade. The district has suitable accommodations for all pupils who may wish to attend school. School was maintained ten months in the year, and was taught by one male and one female teacher. The total expenditures were \$1,571.12, while the receipts were in excess of amount by \$200.

Alviso District: Dr. S.A. Buteau clerk, with post office address at Alvarado. There are 121 census children, 97 of whom attend school during the year. School was maintained nine months, at a cost of \$989.29 for salaries. Building improvements brought the expenditures up to \$2,777.23. The value of school property in the district amounts to \$4,175.

For the entire county there are 11,084 children within her boundaries. 10,987 of these are white, 87 are Negro, 13 are Indian and 412 Mongolian (Asian).

### **Fire:**

At 6:15 p.m. on Tuesday night a fire was discovered in the barn of Hellwig & Co., butchers. Two employees had left the barn at 6:00 o'clock, who say there had been no smoking in the barn nor light of a lantern. Forty tons of baled hay and seven horses were consumed; four horses and one wagon were saved. Loss about \$2,500, no insurance. The country is full of men crazed by the incendiary articles published by some of our newspapers. These men have the insane idea that by burning property they will increase the demand for labor, and reduce all to the same level. One

such was arrested last Monday night near Alvarado, who had become a raving maniac, and imagined that his head had been cut off by the Vigilance Committee.

**S.P.C.R.R. Distances:**

Distances from San Francisco:

The South Pacific Coast R.R. (narrow gauge) furnished the following schedule of distances on its line from San Francisco. To Alameda Point (by fast steamer) 5 miles; Alameda, 10; West San Leandro, 10; West San Lorenzo, 17; Mt. Eden, 21; Alvarado, 24; Hall's, 25; Newark, 30; Mowry's, 31; Alviso, 38 ([Santa Clara County](#)); Agnew, 41; Santa Clara, 44; San Jose, 46; Lovelady's, 51; Los Gatos, 56; Alma, 58. This is the shortest and quickest railroad line from San Francisco to San Jose, and in several respects the pleasantest. It is also rapidly increasing in freight and passenger traffic and general popularity.

**Sugar:**

The Alvarado Sugar Factory is to be revived. We are glad to notice that there is an organized effort on foot to start a new beet sugar factory at Alvarado. The first thing to be done is to start the cultivation of the beets. The nature of the soil and climate and the moisture of the earth about Alvarado are admirably adapted to this cultivation. EB. H. Dyer is acting as agent for the new company that is organized; and their plan is to put 1,000 acres in cultivation. The yield of the beet in that vicinity is astonishingly great, and the price paid for the same, delivered at the factory, is \$4 per ton, they furnish the seed at first, but then deducts its price when receiving the beets. We understand that about 600 acres are already leased to parties intending to cultivate this vegetable.

**Sugar:**

The machinery for the Alvarado beet sugar establishment makes 30 carloads. Eight teams are engaged in hauling it from Decoto to the mill, about three miles distant. A large portion has been hauled, but a considerable time will be required to complete the job. When the apparatus is put in place the large building will be filled from ground to roof. Of the 1,000 acres of beets contracted by for the company, about 700 acres are already sown.

**Sugar:**

I have visited every beet sugar factory, which has been in existence in California; I have conversed with many people who have been directly and indirectly interested in them, and have thus been able to form an opinion, which, I think, is pretty nearly correct.

I know, in giving this opinion to the public, I run the risk of stepping on some gentlemen's sensibilities, and will therefore apologize beforehand, being unavoidable in order to adhere strictly to the truth. Any beet sugar factory established in California, or in any other State of the Union, if the same had been erected in the same style, with the same machinery, in any country where the beet sugar industry flourishes, and could not have existed there, it could not have been expected to turn out anything else than a failure here. Any man who would not be entrusted with the erection and construction of beet sugar works in a country, which offers every facility for establishing beet sugar works, ought not to have been entrusted with it in a country where the beet sugar industry is new and has to overcome many obstacles unknown in old sugar districts.

To establish beet sugar works with reasonable certainty that they will pay, four things are indispensable. These are: beets, money, fuel and water. Of each of these four it requires a liberal supply; if either of them is wanting or but scantily supplied, failure certainly will be the result. Besides a liberal supply of these four articles, all of which exist in great abundance in California, it requires men who understand the business and also the English language, and know the country well enough to avail themselves of the great many advantages which the United States offer to the beet sugar industry.

The sugar factories, which so far have been the representatives of this industry in California, have been: Alvarado, Soquel, Sacramento and Isleton. Neither of these factories started on a sound basis, neither had money enough, which the first had a supply of fuel, which was worse than questionable. In 1871, the two first named factories were started, the one in Alvarado, under the management of a German on the centrifugal system, the other one at Sacramento under the management of a French count. Alvarado started a little earlier, and was estimated to cost \$75,000, while Sacramento was to cost \$15,000. No sooner did it become known that the French count could (or, better, would) build a beet sugar factory for so small a sum, displeasure and discontent were manifested by the others that they had entered into a contract requiring five times as much money. There is very little doubt, had a change to the "French" plan been still possible, it would have been made, but though that was impossible, the seed of discontent once sown grows as luxuriant as the beets, which is saying a great deal.

The Alvarado Sugar Works worked well the first year and cleared a profit of from \$15,000 to \$18,000, while the Sacramento factory failed to make any sugar at all. The French count taking French leave has never been heard from since. The authorities are conflicting as to the system on which this factory was to work; the probability is it had no system at all.

The success at the Alvarado works undoubtedly encouraged the Sacramento Beet Sugar Company, they engaged an expert beet sugar manufacturer in Germany, and imported a lot of machinery to take a new departure in the diffusion system. The machinery was badly proportioned and worse arranged. The various changes made by the seven different technical managers made only a bad thing worse, the expert sugar manufacturers were turned out, and others took the place, who understood little of the business, to be turned out again to make the place for worse ones still. The places as foremen, machinist, etc., etc., were sold by those who managed the finances, the whole undertaking from beginning to end was a combination of imbecility, dishonesty and folly, which would have ruined any other business, however, profitable and simple.

Although the factory at Alvarado worked with a profit the first year, the discord amongst the owners prevented it ever afterwards, and caused the breaking up of the works and the removal of the machinery to Soquel, where it has existed for five years longer. It is intended to work but a few months this year, and that for the last time, after which it will be removed again. During the last season (the factory worked from August till March) the sheriffs had possession of it, which does not tell well for profit; but these beet sugar factories have a peculiar "inwardness," which is next to impossible for outsiders, who are not in the "ring" to understand. The same parties, who placed the sugar works in the hands of the sheriffs, work it this year for their own joint account.

To complete this little sketch, it remains to refer to the beet sugar works at Isleton. This factory had been built on the diffusion principle, and the main part is constructed very well. The capacity of the works is, under the best of circumstances, 30 tons of beets per day. The troubles of this company began before the machinery arrived, which was embargoed in New York. This factory, like the one at Sacramento, had a great number of technical managers in a wonderfully short time. Had the works been finished in proper time, and began sugar making when finished, the company could still have done well. The beets raised on the island where the factory is located are of a very rich quality, and the crops always large and safe. But when the factory at last did begin to work, it had been in operation but a short time when a flood came, swamping the harvested beets, the beet fields which had not yet been harvested, and with it the company. The sugar made at Isleton has been of a superior quality, the trouble lying in the finances and the peculiar organization. The factory does not work this year, but the company hopes to reorganize.

The machinery once at Sacramento has been transferred to the buildings at Alvarado, and such changes are intended as are required to make it in all its appointments, a first class beet sugar factory of a European model. The factory is to begin sugar making by the first day of September, and the beet crop promises to be an extra large one, probably from 20,000 to 25,000 tons.

It is to be hoped that the company has learned wisdom from former failures, and will not commit the same follies over again. The unqualified success of the Standard Sugar Manufacturing Co. would give new life and a new start to this industry in California. But few people have a conception of the magnitude of this industry in Europe. The sugar industry, either from cane or beets, is at present the largest industry in the world, and yields larger and safer profits than any other; and a great reason for this is that it cannot be done with small sums of money or by anybody who understands nothing of it, and this is also the reason that the demand for gold and sugar has been, for the last ten years, greater than the supply, while every other industry has been languishing.

### **Ebenezer Farley Dies:**

On Friday, August 8<sup>th</sup>, Ebenezer Farley was found dead in the orchard he loved to tend. Born in Canada in 1811, he lived in the St. Joseph area of Michigan before moving to Alvarado. In 1840

he married Eliza Smith. Mr. Farley was an Alvarado pioneer and devoted much of his time to the politics and well being of the town. He was 68 years old.

**Sugar:**

E.T. Gennert, in the *Boston Cultivator*: W.F. Emery, of Alvarado Cal., is a farmer who owns a farm containing eight (whole) acres. On these he has an orchard, besides he raises mostly beans, potatoes and carrots. This he calls his homestead, and although he is a carpenter by trade, he has no house on his homestead, as he hires land as best he can, this year having hired from different parties 52 acres in all, including a small dwelling on it for which he pays a cash rent of \$750 per annum, and of which land he has 50 acres in sugar beets. He owns three good working horses, and has hired most the time till the crop was all in three more, for which he paid each fifty cents per day in cash, he finding the harness, tools and driver. He plowed first very shallow, then 14 inches deep, with three horses, then, shortly before planting, shallow again, doing all the planting by team and at fifteen inches apart. The thinning and cultivating he contracted for at \$1.25 per ton, which includes digging, and he thinks the beet fields will leave enough profit after rent of land and money to pay for thinning and cultivating has been taken out, to enable him to build a house on his homestead farm, and this at the rate of \$4 per ton for beets delivered at the factory.

**Sugar:**

For the first time we find in the United States four beet sugar factories in operations, and what is more important than that mere fact, is they are in successful operation and are paying establishments. The sugar works at Soquel, have run this year, their sixth season since their removal from Alvarado, and we are glad to hear that they are making money.

EDITORS PRESS:

Can the genuine sugar beet seed, the same as cultivated this year around Alvarado, Alameda County, be had in this State, if so, at what place? Please answer in the next issue of the Press. F. Leininger, Ione Valley, Amador County, Cal.

**Sugar:**

Mr. E.T. Gennert writes from Los Angeles to the *Rural Press* referring to the raising of beets and the varied manufactures in operations in this State.

In Soquel California is the oldest beet sugar factory in the United States; from it 45 to 55 barrels of white granulated sugar are turned out daily with as much regularity as a baker turns out his rolls. In Alvarado California from 30 to 35 barrels of white sugar are made daily, and beet sugar prices are regularly quoted in the San Francisco market. The beet sugar factory at Isleton California, though complete, stands idle, but there is little doubt that it will work next year to its full capacity. A new sugar factory will be built in Los Angeles County, and begin work by next July; the beets for the same will be mostly planted before the expiration of the present year.

#### **Sugar:**

There are three beet sugar factories in California. One is at Isleton, Sacramento County, but has been idle for some time now. Another is a Soquel, in Santa Cruz County, which only made a short run of two months this year and is closing up. Dr. Morse says that the property is valued at \$200,000 but is considered dead property and would be sold for \$20,000 if a buyer could be found. The third factory is at Alvarado, and its future is not any brighter than the other two.

#### **South Pacific Coast Railroad:**

The South Pacific Coast Railroad ([narrow gauge](#)) is nearly completed. It runs from Alameda to Santa Cruz along the tidal flats on the east side of the bay. Its route takes passengers by ferry to Oakland where the S.P.C.R.R. runs its route through San Leandro, Haywards, Alvarado, Newark, Alviso ([Santa Clara County](#)), San Jose, and over the mountains into Santa Cruz.

#### **Flood:**

The levee at Crandall's Slough broke this morning, giving vent to a large body of water from the Alameda Creek. Where it crosses the country road Alvarado and Centerville it is five feet deep, and a large amount of grain will be a total loss. About a thousand acres are under water. The track of the South Pacific Coast Railroad ([forerunner to SP](#)) for nearly three miles commencing at Hall's Station is under water and some of the track is said to be washed away. A handcar with seven men started to cross but have not yet been heard of.

#### **Sugar:**

The sugar factory at Alvarado stopped running for the season. After finishing the beets two weeks since, some work was done on the syrup, which, was brought from Sacramento with the machinery a year ago. About 300 barrels have remained waiting for the close of the season. A few days ago the lot was sold to the Pacific Distillery for making into alcohol. Work will begin again when the next crop of beets is ready.

**Unknown Dead:**

The body of an unknown man was found in Alvarado today. The flesh had been eaten from the face, and the skull had been broken with some sharp instrument. There were cuts on the right hand. The shirt studs and sleeve buttons indicate a man in good circumstances. The body had been washed out on high ground by high water.

**Sugar:**

Mr. E. Th. Gennert writes to the *Press* from Los Angeles that the sugar mill at Soquel suffered losses this year (1879-1880), the second three months of that season due to rotten, frozen and sprouted beets. Mr. Gennert goes on to explain the great importance to drying the beets by solar heat, which, when once properly dried, will preserve them unimpaired for a number of years.

Mr. Eb. H. Dyer, of Alvarado, gives very tardy, but appropriate credit to Mr. Gennert on the importance of properly drying sugar beets by solar heat.

**Sugar:**

*The Grocer*, of San Francisco makes an interesting statement concerning the production of beet sugar in California in 1880. This source of supply has been an important one the last year, as will be seen by the following:

Standard Sugar Refinery (At Alvarado)	lbs.	lbs.
Stock on hand Jan 1, 1880		219,120
Standard Refinery product, 1880	1,574,233	
Isleton Factory product 1880	298,427	
Soquel Factory (estimate) 1880	<u>300,000</u>	
		<u>2,172,660</u>
Beet Sugar for Distribution		<u><u>2,391,780</u></u>

These figures are official, with the exception of those relating to the production of the Soquel factory, which is estimated by the agent of the company. The only sugarie now in operation on this coast is the Standard Sugar Refinery at Alvarado, but this one has already made a good record, and has a bright prospect for the future.

**Sugar:**

The beet sugar works at Alvarado had an average season's work, and a fair supply of beets at a moderate price. The machinery employed is of a promiscuous nature, partly made in Europe and remodeled here, and partly made here in the first place. The quality of the beets is good, and the only apparent drawback appears to be the difficulty of keeping the beets for a sufficiently long winter campaign. If the beets are placed in silos, as is the general custom in Europe, they will heat and sprout in a wonderful short time, and if it is placed within easy reach of the factory, they are apt to suffer from frost at night and warm sunshine during the following day. This prevents the season to be carried into the spring, as it would be most desirable to ensure financial success.

Boiler Explosion at Alvarado:

Yesterday morning, at about six o'clock, the beet sugar factory at Alvarado was blown to atoms by the explosion of one of the boilers. The foreman, George Smith, discovered that the water in the boiler was very low. He then proceeded to pump cold water into the boiler, when it suddenly exploded. Smith was hurled with frightful force against and into an ash pile. The steam and hot water followed him, drenching him from head to foot. He got down on hands and knees and commenced crawling away, the flesh of his head, face, arms, hands, neck and chest being literally cooked and peeling off. He also contracted a severe cut on the forehead. Late yesterday afternoon Smith was suffering intense agony. His recovery is considered doubtful.

One of the boilers was shattered to atoms, and the other was damaged to such an extent as to render it useless. The roof of the boiler-room was scattered in every direction. The main building caught fire from the burning embers from the furnace. A force of men was promptly on hand, and after considerable exertion the flames were extinguished. The amount of damages cannot be estimated at present.

### **Gunfire in Alvarado:**

This afternoon about 5 o'clock, Constable Southwick of Alvarado, was painfully wounded through the right arm by a Chinaman whom he was trying arrest for burglary. The Chinaman fired five shots, only one taking effect. The Constable tried his luck four times, but failed to hit the Chinaman.

### **Slickens Debris Case:**

(Editor: [The Slickens Debris lawsuit is of no interest here, but the testimony given by F.B. Granger on the Alameda Creek lends some light on early boat traffic on the Alameda Creek.](#))

F.B. Granger was sworn in for the defense. He lives in Alameda County, and has for 25 years, near Alameda ([Alvarado?](#)) town. Mr. Granger knows Alameda Creek. In 1853 a large steamer regularly went up to Alvarado, and up higher schooners went. Now the stream is smaller, it is filled up, and skiffs can scarcely come up now. The creek heads in Santa Clara County ([east of Mt. Hamilton](#)). It runs through an agricultural region. It began to fill up 17 or 18 years ago. In places the sediment has covered land as high as fences, in other but little has been deposited. Several thousand acres near Alvarado has more or less sediment. A small steamer manages to work up to Union City. The swampland at the mouth of the creek has largely been made fit for cultivation by the filling in from the creek deposits. The best of this made land is worth from \$250 to \$300 an acre. San Leandro and San Lorenzo creeks have filled, washed much dirt and filled in lands.

Cross-Examination: Alvarado is on an estuary and Alvarado creek empties into it; it is the mouth of the creek. Most of the freight business there is done by rail now. The wash comes mostly from the hills. The deposits there make good soil. The country has there been extensively cultivated since 1849, and the soil has been thoroughly pulverized. Potatoes, sugar beets, onions, etc., are largely raised about there. The deposits of these creeks are a benefit. Cultivation of the hills to the tops has aided the wash and deposit. The rainfall there averages twenty-two inches a year. When there is no freshet the waters of Alameda Creek are clear. Alameda Creek is about seventy-five miles long. It easily carries the sediment, some of which is so fine that it used as molding sand.

**Sugar:**

California may claim the distinction of having a beet sugarie, which has been running for three years in succession. Three consecutive years is a long life for a beet sugar enterprise in the United States, if we may judge of the history of this industry. The California establishment, too, has a promise of a much greater lease of life, for the report of the superintendent shows that there is a profit in its operation. The *Sugar Beet*, a Philadelphia publication, has secured from Mr. (Eb) Dyer, the superintendent, a review of the third year of the Standard Sugar Company's establishment at Alvarado, from which we shall quote certain points. The year ended May 10, 1882:

**NET PROFIT: \$ 44,935.85**

The editor of the *Sugar Beet* comments upon the above statement in an interesting way. He says Mr. (Eb) Dyer has written him time and again that it is impossible, under existing circumstances, to work as economically as if the entire establishment has been built strictly in accordance with scientific principles. In other words, with the most improved machinery placed in a building adequate to the requirements, the profits would have been, under the same management, even greater than for the third campaign, shown above. The cost of working per ton would then have been less, etc., and it is evident that, when steam is to be used, the distance it must be carried from the boiler should be at a minimum to prevent condensation, which conditions are seldom, if ever, realized where the plans of piping are not determined in advance. The 11,229 tons used by the Alvarado factory cost \$47,553, or \$4.23 a ton. As the average yield to the acre was nearly 15 tons, the returns from the same were \$63.45 per acre, which evidently leaves a handsome profit to the tiller.

Garnered from a glossary of California names are the following definitions:

Alameda: Grove of elms, hence any grove with walks.

Alvarado: The white road, a proper road.

**Sugar:**

Eb. H. Dyer has recently returned from Europe and is more convinced than ever that the investment in beet sugar factories is a wise investment. He also observed the Europeans feeding refuse beet pulp as feed for cattle. It is his intent to start such an operation Alvarado and already has placed an advertisement in the newspaper for stockmen to use his operation as a beef cattle fattening feedlot.

**Alvarado's Fair Maidens of the Marshes:**

*(Originally printed in the Vallejo Chronicle)*

A solitary sportsman, roaming over the Alvarado marshes last Sunday in pursuit of the ducks, which were few and far between, bethought himself of an artesian well in the distance where he might slake his thirst. When he reached the desired spot he saw two girls seated on the margin, dressed in a peculiar and striking costume. They wore tunics extended to the knees, long rubber boots, hunting coats and caps, and were provided with an excellent brace of breech loading shotguns. Beside them lay a pile of teal, widgeon and rail, ample testimony to their skill in the use of their weapons. The hunter raised his hat, and, presuming on the fraternity of the sport, inquired if the ladies were having any good luck. They pointed triumphantly to their pile of birds, and then glanced sympathetically at their interrogator's flaccid game bag. Both were unusually pretty girls, their cheeks brown from exposure, showing that it was not their first excursion, and the hands with which they dabbed their heated faces were white and dimpled. They confess that the oddity of their costume made them shun the male hunter, though the sportsman confessed he had never believed that rubber boots could look so cunning.

Just then a bunch of teal came down the wind with lightning speed, and both girls squatted on the marsh in a moment. Along swept the birds, bang went both guns, and three birds fell to the ground. They picked them up and, with great generosity altogether unknown to the sportsman, offered him a brace of the birds, as he had the courtesy to allow them to do the shooting.

They explained how they came to be hunters. One was extremely delicate, and, after graduating from a well-known Seminary in Alameda County, was recommended outdoor exercise by her doctor as the only escape from consumption. Tired of objectless strolling, the girl, under the tutoring of her uncle, learned to shoot, converted a companion to the sport, and both are now passionately attached to hunting. They visit the best passes in Alameda County hunting snipe, quail and seldom return without generous bags.

At 8:30 o'clock yesterday morning Capt. Douglass left this city (San Francisco) in company with two Chinamen to arrest a Chinese woman for defrauding her creditors. She was found at Alvarado, the warrant served, and the proper bail put up, the left for Decoto, a town four miles distant, with his two Chinese guides, to take an early train back to San Francisco. No sooner had the reached Decoto than a Deputy Sheriff informed the Captain that he wanted the two Chinamen. As he had not warrant for their apprehension, Douglass protected them against the Deputy. In about an hour and a half the Deputy Sheriff returned from Alvarado, this time with a warrant charging both the Chinese with burglary.

"What time was this burglary committed," asked Douglass.

"At ten o'clock this (Monday) morning."

The Celestials were given into custody, but the question arises how could they have committed a burglary and be in the company of such an official as Captain Douglass at the same time?

**Sugar:**

The beet sugar made in the United States during the seasons 1883-1884 was all manufactured at Alvarado, Cal. Beet sugar manufacturing has been attempted in Illinois, Wisconsin, California, Delaware, Massachusetts and Maine. In all these states those who have embarked in the business have been overtaken by financial failure. In Sacramento County and other portions of California, hundreds of thousands of dollars have been sunk in the beet sugar business. These failures are entirely owing to the processes employed, and not to the industry itself. The beet sugar factory in Alvarado is the only one in operation in the United States.

**Sugar:**

It rather begins to look as though, if the manufacture of sugar in this country, outside of the true cane district, is to succeed, California must demonstrate the fact. Beet sugar at the East has been a disastrous failure wherever tried, and, except at the Alvarado factory in Alameda County, there is no beet sugar profitably made in this country.

*The Pacific Rural Press, San Francisco, December 6, 1884*

**Sugar:**

By an improvement recently made in the process of manufacture, the percentage of sugar obtained from beets has been greatly increased, while at the same time the cost of production per pound is lessened. The cost at the Alvarado works is now about five and quarter cents a pound. At this rate, beet sugar may be produced at a profit, in competition with the cane sugar imported duty free from the Sandwich Islands ([Hawaii](#)). The price now ruling in our markets, something over eight cents a pound, gives a very large net profit. The perseverance and energy with which the managers of the establishment at Alvarado have pushed their enterprise, together with the knowledge and skill which have been gained by study and experience, have resulted in a far greater success than could have been anticipated.

**Sugar:**

The experience of the last five years has shown that the Pacific States are best suited to the sugar beet industry. The continued success of the factory at Alvarado, Cal., is very gratifying evidence that the Pacific States have climate and soil suitable to their own sugar production. This factory, during the campaign now in progress, has received more than 20,000 tons of beets, an amount far greater than the capacity of the machinery. These beets gave a yield per ton, which will compare favorably with the average yield of beets in Europe. At present the California factory ([Alvarado](#)) is the only one in operation in the United States.

*Haywards Journal:* For a number of years the Alvarado beet sugar factory has been in operation at Alvarado. It has proved so successful that a new company has lately been formed with a capital of \$1,000,000. The incorporators are: John L. Howard, Henry T. Scott, E.H. Dyer, J.P. Price, William Morris, James Ralph and Oscar T. Sewall. The new company proposes to make extensive additions to the present capacity of the factory, which is only 80 tons of beets a day. It is proposed to erect a frame factory, covered with corrugated iron, for cheapness of construction and to secure low insurance. Its capacity will be 200 tons of beets per day; that should yield 20 tons of refined white sugar. The season should last 150 days, making a total of 3,000 tons, or 6,000,000 pounds. The chemist and mechanical engineer has been for months at work in the best appointed beet sugar factory in Germany, studying the most approved methods of manufacture and obtaining plans of the modern arrangements and machinery. Such plant as may have to be imported will be selected by them, and the new factory will be ready for successful operation by the beginning of the beet harvest, August 1, 1887. The cost of the new factory is \$200,000.

Wreck of the Alvarado Beet Works – Engineer injured.

Yesterday morning, at 2:30 o'clock, a terrific explosion occurred at the works of the Standard Sugar Refinery at Alvarado, completely demolishing the boiler house and wrecking the surrounding buildings. The steam for the refinery is supplied by seven fifty-inch Buckeye tubular boilers, fifteen feet long, set in three pairs and one singly.

At the commencement of the year's run they had been overhauled and tested by expert James Hamilton, of the Union Iron Works. It was the left boiler of the middle pair, which exploded, damaging the other six, as they cannot be used without extensive repairs.

The factory had just finished grinding the last beets at 4 o'clock yesterday afternoon, and would have completed all work by Monday next. The refinery is still full of semi-refined juice and sugar, which it will be impossible to save.

The scene of the disaster is one of wreck and ruin. Where a house 50 by 80 feet once stood, is now but a pile of kindling wood.

At the time of the explosion the fireman, Gabriel Dennis, was alone in the boiler room. He states that he was carrying the usual amount of steam, sixty-five pounds. The water was foaming badly, making it hard to tell just how much there was in the boilers, but he thinks there were two gauges. He was standing near the exploded boiler, when he suddenly felt himself lifted in the air and thrown on his face to the ground. Assistant Engineer Blood quickly rescued the wounded man from the flames, which were then raging fiercely.

The refinery is situated near the narrow gauge depot, and has a capacity for working 100 tons of beets per day. It is valued at \$175,000. The damage sustained is estimated at from \$10,000 to \$15,000, being principally loss of boilers and semi-refined juice undergoing process of manufacture.

There were seventeen men at work in various parts of the factory cleaning up preparatory to shutting down for the season, but all escaped without serious injury except the fireman.

The boiler, which had burst had been in use at the works of the Sacramento Sugar Refining Company, and at the time this factory started was taken out and placed in position there.

**Sugar:**

We are glad to learn that arrangements are advancing to rebuild and re-equip the beet sugar factory at Alvarado. The trouble in the old establishment was settled by legal methods, and Mr. E.H. Dyer has become owner of the old plant at a valuation of \$125,000. He has organized a new company, which has just incorporated under the name of the Pacific Coast Sugar Company, in which there will be put in funds equivalent to Mr. Dyer's possession, making the whole capital a quarter of a million. It is announced that they company will at once begin the construction of a new mill, on which \$75,000 will be spent, leaving a working capital of \$50,000. The mill will be ready for work for the season commencing in August 1888. The new mill will be much more scientifically constructed than the old, which was built up from time to time as additions were needed, and was consequently in great measure a patchwork affair. The most improved European and American machinery will be used, but it will all, or nearly all, be made on this coast, and probably by the Union Iron Works of San Francisco.

**Sugar:**

Letter to the Editor ([excerpt](#)):

Dear Sir:

The wonderful progress of the beet sugar industry in Europe, the successful experiment in the cultivation of the sugar beets and manufacture of sugar at Alvarado California under somewhat unfavorable conditions, and even the experience gained in the eastern states and Canada, have fully demonstrated that all the sugar consumed in this country, to the value of \$125,000,000 could easily be produced from our own soil, if the farmers would turn their attention to the cultivation of sugar beets, a crop that is four times more profitable than corn or wheat, but requiring much more care and intelligent labor...

Yours Respectfully,

Mr. A. J. La Vallee, Beet Sugar Expert

### **C.J. Stevens Dies:**

Calvin J. Stevens, aged 59 years, was thrown from a buggy at Livermore Tuesday evening, and within an hour was dead from the injury received. The deceased settled at Union City, now Alvarado, Alameda County, in 1852. There he built the first flourmill ever erected in California. In 1858 he transferred his merchandise business to Centerville. In 1869 he moved his flouring mills and his residence to Livermore, where he has since resided, conducting his milling business, purchasing grain and directing his large land interests. He entered also largely into agricultural pursuits, owning much farming property as well as land of value in the city of Oakland. Only once was Mr. Stevens an occupant of a public office. In 1874-75 he served Alameda County as tax collector.

### **Ducks:**

Two market hunters who hold forth at Alvarado have, for the sum of \$200 a year, leased from Mr. Poorman all his marsh east of Alvarado for gunning purposes. These parties and the Pacific Life Gun Club now hold all the marsh available for duck hunting in that vicinity, and warning signs can be seen all along the boundaries. Sheriff Hale has, by request, appointed a special deputy to guard these preserves, of course without any expense to the county.

**Ducks:**

The enclosing of marshland around Alvarado into "preserves" is naturally rough on the hunters not in the combination. Two crack shots of Mt. Eden went gunning near that burg. The ducks were flying thick. The nimrods occupied the county road so that the keeper could not arrest them. When the ducks sailed over them their guns did wonderful execution, and the keeper was nearly wild as he charged up and down the fence, to capture any ducks that fell inside the enclosure. After getting a bag full they returned home, not forgetting to thank the keeper for his extreme kindness.

**Sugar:**

Beet sugar has not been produced in the U.S. to any extent during 1887, the Standard Sugar Refinery at Alvarado having been interrupted by a boiler explosion early in the year, and being now engaged in rebuilding and enlarging its works from its former capacity of 80 to 200 tons of beets daily. When completed they expect to turn out 6,500,000 pounds of white refined sugar in a campaign of 160 days. Beets are already engaged and it is proposed to commence operations next August. Besides the Alvarado plant there is now in the course of construction another factory of about the same capacity at Watsonville, which expects to be in operation this coming fall.

**Newark Barbecue:**

The mixed sporting entertainment given at Newark yesterday as a benefit to John Dugan was a success and liberally patronized. The affair was arranged under the combined patronage of all the coursing clubs and Mr. Dugan's many sporting friends in general. The features of the day's events were (dog) coursing, sparring exhibitions, country baseball, a barbecue and dancing in Dugan's Park Pavilion.

While the coursing was in progress a game of baseball was played between Alvarado and Newark. The game was conducted on the go-as-you-please plan, and was a very creditable exhibition of rural awkwardness. The contest lasted four hours and resulted in a victory for the Alvarado boys by a score of 20 to 5.

#### **Joseph McKeown:**

Assemblyman McKeown has been a blacksmith at Alvarado for twenty years. Somehow the report gained circulation that Mr. McKeown was a schoolmaster. He never taught, but was a member of the board of education. He said today, "I have not yet any bill to introduce. I have been looking at some of the laws and I think that those on the books are pretty good, if people would only obey them. I have not had an application for a position from anybody in my district and I have not had a request for any legislation. I shall examine the bills introduced and vote as I deem best on each one.

Mr. McKeown is a happy man. Having no application for appointments, no request for assistance to pass bills, he may carefully examine all bills introduced and vote as he deems proper. Happy Mr. McKeown. He was appointed a member on the Committee of Indian Affairs and his jocose colleagues told him that he would have to take a trip to the lava beds, drop a nickel into a crevice in the rocks and see if a squaw pops up one hundred yards away.

#### **Sugar:**

Among the few holders of property along the Alameda Creek who are contesting the condemnation suits of the Spring Valley Water Co., which seeks to divert the water of the creek for the use of the San Francisco public, is the Pacific Coast Sugar Company. The latter claims that for the past 19 years it has been engaged in manufacturing sugar from beets, having its plant at Alvarado, on the banks of the creek. The factory, with machinery, etc., is valued at \$250,000. The company has taken from the creek for the use the factory a volume of water equal to about 200 miner's inches. The use of the same is absolutely necessary for manufacturing, and without it the factory would necessarily be abandoned, unless other water should be obtained at a great expense. No other can be obtained for the use of the factory so as to be profitable unless by the sinking of artesian wells, which would be experimental, and problematical, with the chances largely against success.

### **Sugar:**

The Pacific Coast Sugar Company, better known as the Alvarado Beet Sugar Works, which has just been sold, was the property of E. H. Dyer, et al., and has been running for several years, but not successfully, chiefly owing to the fact that the machinery was out of date. The dividends paid have been unsatisfactory, and January 28<sup>th</sup> last an assessment of \$5 per share was levied on the stock. Since then a notice of the sale of delinquent stock has been published to take place on April 2<sup>nd</sup>. The bulk of the stock was held by E.H. Dyer, J.L. Howard, O.T. Sewell, Charles Montgomery, Moses Hopkins, J.L. Fossett, T.C. Van Ness and Henry T. Scott. On February 20<sup>th</sup>

the papers gave notice of the incorporation of the Alameda Sugar Company, which was organized to deal in and manufacture sugar, with a capital stock of \$250,000 in 10,000 shares, of which only \$565 was subscribed. The directors of the new company are: L.C. Marschutz, W.F. Man, T.G. Cantrell, E.C. Burr and J.B. Browning. This is the new company that has purchased the old Alvarado beet factory of Mr. E.H. Dyer, et al. It is their intention to try and operate the old factory as a more profitable business, and management will be in the hands of E.C. Burr, who until recently occupied the position of superintendent of the American Sugar Refinery.

Fred Wiegman has built a new barn on his place by the Creek.

Mrs. M. J. Peach has been on a visit to her sister, Mrs. R. H. Taylor of San Leandro.

Jonathan Miller, Mrs. E. A. Seaman's father, started for his old homestead in Michigan.

G. F. Wissman has gone to Auburn again. The climate here is too harsh for him at the moment.

Joe Dunn, the engineer at the foundry is not able to walk on the foot he sprained.

Some grain has been injured by the lice and has been plowed up and sugar beets planted.

Mrs. C. R. Nauert has been sick with pneumonia for the last three weeks, but is able to be out bed again.

All the farmers are busy getting their land ready for beets. There will be a greater acreage planted than every before.

#### **Salt:**

The most important mineral industry in Alameda County is the recovery of salt from the water of San Francisco Bay. This business is carried on extensively upon the east shore of the Bay, in the neighborhood of Alvarado and Mt. Eden. At the former place, Messrs. Plummer, Barton, Quigley and others have their work; at Mt. Eden are the works of P. Marsicano and the Union Pacific. Two methods are employed in Alameda County for the recovery of salt from seawater. One is by complete natural evaporation and gathering the residue, the other by allowing tanks of seawater to evaporate until a saturated solution is obtained, from which the salt is recovered as it crystallizes.

The first process is in use in the salt-ponds of John Quigley of Alvarado. At these works a pond covering 400 acres and surrounded by a levee, is filled with seawater at spring tide. This pond is divided into tanks. There are three tanks side by side, covering an area of 400 acres. As the density of the water in the tanks increases by evaporation, it is pumped by windmills from the two outside tanks to the middle one until it is filled with strong brine. This brine is then pumped into a reservoir of 30 to 40 acres in extent, which is filled to a depth of 12 to 13 inches.

Here the density of the liquid increases, and the salt commences to crystallize. When a crust one and a half inches in thickness has formed upon the floor of the pond, the salt is scraped up. After gathering the salt, whatever mother liquor (bittern) remains is run off, no effort being made to recover any of the elements it may contain. The best and whitest salt is obtained in warm, windy weather, the wind forming ripples in the solution. It takes about three years for a pond to get into a suitable condition for the production of salt. In that time a peculiar "skin" grows over the bottom, this protecting the solution from contamination by earthy matter. These works have been running for twenty years. Their output has been from 2,500 to 3,000 tons per annum. The second process is in use at the California and Union Pacific Salt Works.

The works of the California Salt Company are situated about half a mile southwest from Mt. Eden railroad depot. The plant consists of 50 salt ponds, which are arranged in "schools" (rows), together with several large reservoirs, one of which is three miles in circumference, the whole covering 2,000 acres of land. The seawater is let into the larger reservoirs, and from there pumped by windmills into the smaller ponds, and from one pond into another, each increasing in the density of its solution. When a saturated solution has been attained the salt crystallizes upon the surface; it then fall to the bottom of the liquid, where is accumulates. When it has collected to a depth of three for four inches, it is raked out and piled on platforms to dry. The crude material thus obtained is shipped from these works to San Francisco, where it is manufactured into the finer grades of salt by the American Salt Co.

In their works the salt is placed in galvanized iron driers, heated by steam, each drier having a capacity of 22 tons per day. When thoroughly dried it is ground in burr-mills to various degrees of fineness, for dairy and household use. The capacity of the California Salt Works is 15,000 tons per annum, that of the mills of the American Salt Co. in San Francisco is 1,200 tons per month.

**Sugar:**

The Alameda Sugar Company's works at Alvarado is being fitted up for the handling of the present season's crop. The machinery has been much improved since last year. This season about 55 men will be employed in two shifts, on the consumption of 200 tons of beets daily, as against 80 men on a consumption of 90 tons daily last season. From \$20,000 to \$30,000 will be expended upon improvements, and the plant will be put in first-class condition. It is calculated that the works can be operated upon a larger scale to greater profit, and probably the plant will be enlarged another year.

**A Visit to Historic Alvarado:**

(Originally published in the *Haywards Journal*)

During our short sojourn (in Alvarado) we could not leave town without paying our respects to the dispenser of justice in this section of the township, Judge Richmond, who is likewise Postmaster. We found Mr. Richmond enjoying good health and speaking most hopefully of the change for the better taking place in the town.

Another thing that causes a person to speak well of the ex-county seat is the way the new Road Overseer is doing his duty. Many a time we have driven between the post office and Granger's, and had our teeth nearly shaken out in trying to skim over the big chuck holes. Now it is as level as any road in the county and is sprinkled every day. The sprinkler also does its good work through the principal streets to the stove works. Road Overseer F.B. Granger Jr. is the boy for the position, and the traveling public can well afford to bless him, as the road throughout his district are well attended to.

Alvarado enjoys the proud distinction of having an Assemblyman, Rep. Joseph McKeown, who has for years successfully conducted an agricultural works here. He is a wealthy bachelor. Now it seems to us that such a model gentleman, not at all bad looking, should fight so shy of the matrimonial halter. Alvarado has any number of handsome maidens, and there is no more eligible bachelor than Rep. J. McKeown.

**Around Town:**

Miss Annie Smithers was in town Sunday.

Last Saturday night Miss Flora Harvey held her musical at the home of Mr. A. Ross.

Miss Mary Riley of Newark spent Saturday at the "Riverside Hotel" with her sister.

The **Misses Annie and Alice Drennan** of Oakland spent the greater part of their vacation with last week with their sister, **Miss Kate Riley**.

Miss Annie Howell of Alviso School sent up a substitute while she remained in Oakland to take the teachers examination last week.

The "Alvarado Tramping Club," consisting of Harold Dyer, **Hugh Dyer**, Peter Decoto, Edward Harvey and Henry May returned home after a two-week tramp. No crowd ever had such a good time, and no one ever felt prouder than Ed Harvey did over his first deerskin.

Last Thursday evening **Miss Riley** had a few friends up to the Riverside Hotel. Among those present were: **Miss Kate Riley, Misses Annie & Alice Drennan**, Miss Nellie Beebe, Miss Sue Harvey, Miss Bertha May, Miss Mollie Cossi, Miss Blanche Ingalls, Miss Annie Ralph, Farley Granger, **Hugh Dyer**, Mr. Burr, Mr. Walker, Mr. Scribner, Mr. Jones and Mr. Atkinson.

**Recalling the Old Days of Alvarado:**

In the year 1853, Alameda County, by an act of the legislature, was formed out of the territory taken from the counties of Contra Costa and Santa Clara. New Haven or Alvarado was the first county seat. **Judge A.M. Crane** was the first County Judge of the county, who, as such, under the law as it then existed, held what was then called the Court of Sessions, which transacted the business of the county now performed by the Board Supervisors. There were also associated with him two Justices of the Peace, more ornamental than useful. The Honorable A.M. Church was the first County Clerk and Recorder, both offices then being held by the same person, and served a term in the Legislature.

Mr. Coombs, known as "**Black Hawk Coombs**," was the first District Attorney; Captain J.S. Marston was the first County Treasurer, and Andrew H. Broder, called "Tom Snooks," was the first Sheriff, whose duty it was to also collect taxes.

Sol Hopkins, a one armed man residing at Alvarado, was Justice of the Peace, and as a sample of how justice was administered in those days, I will relate an incident that occurred in his court in 1873. Hamilton & Coombs, lawyers, had their office in one corner of the room used for a district courtroom and in important cases also by the Justice of the Peace. There was a case being tried

before Judge Hopkins and a jury. Hamilton & Coombs were on one side and **W.C. Pease** on the other side. In the midst of the trial a box of champagne, sent to Hamilton & Coombs by J.J. Vallejo, who had just received news of the granting of his patent ([legalizing his Spanish Land Grant](#)), was brought into the courtroom.

The Justice immediately adjourned court for five minutes, as he said, for the purpose of ascertaining what the basket contained, thereupon it was opened and one half of the bottles were disposed of, the court, jury, parties, witnesses and attorneys on both sides of the case assisting in the operation, after which the case proceeded. A reasonable time having elapsed, another adjournment was had, when the remaining bottles were sampled, and disposed of as before. It is needless to say that Hamilton & Coombs won the case.

In 1853 **Henry C. Smith**, an early pioneer, who came to California, I think, in 1846, made money and returned to the State, and induced a number of his friends and neighbors to come out to California with him. He was in the Legislature at the time, and was instrumental in procuring the passage of the act of the Legislature organizing Alameda County.

Lyman Beard and John. M. Horner, who resided at or near the Ex-Mission San Jose, was the leading and most wealthy citizens of the county. Beard and Horner had located upon, and subsequently purchased the grant of the lands of the Ex-Mission of San Jose, containing about 30,000 acres, and had portions of it, as well as portions of the Rancho de Los Cerritos under cultivation.

The latter rancho was granted by the Mexican Government to Tomas Pacheco and Augustin Alviso, the father of Valentin Alviso, the latter of whom is now a prosperous farmer in the Livermore Valley, having served a term in the Legislature and held an honorable position in the Custom House. These lands were covered with Spanish or wild cattle, attended by vaqueros, but as the lands were brought under cultivation by settlers called squatters, who took them up under what was the possessory law, and commenced farming operations, producing immense crops of wheat, barley, potatoes and onions, for which they received fabulous prices, cattle became a huge nuisance. Mssrs. Beard and **Horner** cultivated some of the lands near Alvarado in 1852, in potatoes and onions, from the proceeds of which they realized large fortunes, potatoes finding ready buyers at 12½ cents a pound.

Of course, under such conditions the herds of cattle being in the way, commenced to thin out, and many found their way without knowledge of, or consultation with owners, to the slaughterhouses of and beef marts of San Francisco.

Don Jose de Jesus Vallejo had a grant from the Mexican government for the Rancho Arroyo de la Alameda, containing upwards of 17,000 acres, lying on the north side of the Alameda Creek, which formed the northern boundary of the lands of the ex-mission aforesaid and of the Cerritos Rancho, all being bounded on the west by San Francisco Bay.

Niles and Mt. Eden were on the Vallejo Rancho, and there was upon his land, he claimed in 1853, 9,000 head of horned cattle, besides several hundred head of horses. When the settlers commenced to go upon his land these cattle commenced to disappear. Many of them found their way, or rather many ways, by and through the agencies from abroad with or without the connivance of the "vaqueros" on board vessels of various capacity to the marts of San Francisco. So much so, that Vallejo estimated his losses at \$50,000. He sought other pastures for the residue of his cattle in Sonoma County and Monterey, but the same elements were at work there, and he received meager returns for his cattle.

True the law forbade this sort of thing, but what is law in a community when the majority makes no effort for its enforcement. But after the disappearance of the cattle of the Mexican Californians, and parties acquired cattle of their own, the law was enforced with more vigor, so much so that the

owners of the cattle were ready to hang, and sometimes did hang, without jury or judges persons who failed to recognize the property of the owners of cattle and horses.

The towns of Alvarado and Union City were located upon the Arroyo de la Alameda on Cerritos Rancho and soon became noted placed all over the state. A steamer owned by **John M. Horner** plied regularly twice or thrice a week carrying passengers and produce from both Alvarado and Union City to San Francisco, and bringing back supplies of goods for said towns and country surrounding.

There was a large settlement about Alvarado from Berrien County, Michigan; prominent among them were **Henry C. Smith**, A.M. Church, Socrates Huff (now our distinguished and obliging County Treasurer), his brother L.B. Huff, General John S. Chipmen, Ebenezer Farley, C.J. Stevens, Mario Chancy, and many others whose names I have forgotten.

Besides these there were from various states, William Patterson, a wealthy farmer near Alvarado, Mr. A.M. Vesey, who afterward became our County Clerk, Joseph Coombs, "Black Hawk" Coombs, Tom Coombs, his brother, who served a term in the Legislature; **Hon. A.M. Crane**, afterwards a judge in the Superior Court; **W.C. Pease**, a careful and able lawyer; W. H. Chamberlain, Benjamin Williams, a lawyer now residing in Haywards; Red Horner, Joseph Ralph, Dr. Frans, P.E. Edmondson, J.A. Trefry, William Hayes, Benjamin Marston, R.S. Farrelly, George Simpson, Joseph Black, ?. Munyan and Jerry Reedy, the last of whom kept a livery stable and had the best team and training roadster ever known, also George and Justin Moore, J. McCormick, James Dubois, and others whose names have escaped my memory, most of whom have crossed over the dark river.

In the early part of 1853 **Red Horner**, who had recently married a young wife, built a large hotel in Union City, to which all hands resorted of nights and Sundays to drink whisky and play poker, as such were about the only amusements that were practical, as there was but few ladies there at the time to form other society, and a new comer had a choice of four things, that is, to drink, to gamble, to smoke or get out. But for the advent of Dr. Morrow, a faithful Methodist minister of the old school, who made his appearance on Sunday twice a month at the hotel, and held services in the dance hall, just above the barroom where the drinking and sporting were going on, it is doubtful if many would have remembered when, if at all, Sunday came.

It was not an uncommon thing in the midst of religious services overhead to hear the jingle of coins in the barroom below, and it was not small coins either, but California made eight-sided \$50 slugs that were more common than \$10 pieces are now. Everything was push; everybody had money, and if not could easily get it. One man squatted on a 100-acres of land of Vallejo in 1852 and put in potatoes. Before it was time to take them from the ground he sold them to the owner of the land for \$7,000, rushed to San Francisco, and in the building on the corner of Washington & Kearney Streets, called the "Eldorado," at the game "faro," which was openly played, in a few hours had not a dollar left. When he was leaving the building he met a friend just entering it with a bag of slugs, who desired him to return and assist him to buck off the \$8,000 he had just received for his crop. That night or so much of it as was left they spent sleep upon the billiard table, not having money to procure lodgings elsewhere.

Once in a while the ladies, the few that were at Union City and Alvarado, would get up a party at the Horner Hotel, at which the whole country would turn out and dance until daylight in the morning. The ladies being but few men never lacked for partners, and comparatively few of the men could even get one for a dance.

### **August Heyer Dies:**

August Heyer, the genial old-timer of Alvarado, who is well known throughout this valley, was suddenly taken from his wife and children at the age of 65 years last Wednesday evening. Mr. Heyer was a native of Hanover, Germany and first settled in Alvarado in 1855 after spending time

in San Francisco and in the gold fields. He first arrived in the U. S. in 1852 and a year later he was married to Hattie Goldsmith, to whom he was engaged to in Europe. Mr. Heyer at that time owned some of the most valuable lots in San Francisco, and sold the lots where Platt's Hall now stands for \$500. He went to the Frazier River, lost all of his money, and came to Alvarado in 1855. He then sent for his youngest brother, Julius Heyer, who afterwards died at Haywards. He was most happily married and leaves a wife and two children, Charles Heyer, being bookkeeper in the German Bank in San Francisco and his daughter is the wife of C. R. Nauert, superintendent of the Alvarado Stove Foundry (Geo. Tay & Co.), besides three nephews, Charles, Julius and William Heyer, all of Haywards.

### **Flood:**

The levee above Granger's Hotel ([The Riverside Hotel](#)) in Alvarado broke yesterday, and the entire district between Hall's Station and Mt. Eden is flooded. Six inches of rain has fallen since this storm has begun, 13.5 inches since the start of the season. Yesterday an inch fell between 8:00 a.m. and 10:00 a.m. The town has been flooded since Saturday, and today the streets are navigable for boats. A few houses stand on islands, but most are surrounded by water. In Chinatown the water stands one to two feet inside the houses.

### **Sugar:**

The Alvarado Sugarie: All the beets for the sugar factory at Alvarado, but some 300 tons, were secured before this last long storm began. The factory is reported to be still running under full head, though the beets are nearly all worked up, and work will close about Christmas. While the crop this year was below the average in quantity, the yield in sugar has been large and the season's run highly satisfactory. The buildings are to be enlarged next year and the capacity of the works doubled.

### **The Astonishing Results of an Incautious Question:**

Fowler ([Farley](#)) B. Granger sat on the front stoop during the big storm at Alvarado alternately contemplating the flood that lipped and lapped the steps and the length of his legs as a possible measure of the high water mark, pondering the difficulties of running a hotel in a long legged town as he broke into the popular lament:

"Down went Granger to the bottom they say.  
And he must be very wet,  
for they haven't found him yet.  
But they say his ghost comes round  
the docks before the break of day,  
dressed in his best suit of clothes."

In fact, the town was in the soup, and the involuntary amphibians of the place were steadfastly cursing in chorus the weather and the signal service.

"Is it wet enough for your Deacon?" Deacon Wamsley, it seems, had just waded over from the Corners ([Irvington?](#)), and, as you may suppose, was not to be downed by a question like that.

"Oh, this is only a shower," he remarked, as he shook himself like a rotary sprinkler. "I remember a storm when the rain began to fall about half-past six in the evening. I remember the hour because I glanced at my watch when the first drop fell. At 7 o'clock great sheets of water were falling from the sky and at nine o'clock the wind began to blow. Huge trees, torn from their roots by the gale, were tossed on mountains of foam. Huge rocks were dashed against great cities, crushing strong built houses like eggshells. I saw a fifty-ton rock lifted on a streak of water and hurled by the flood against a church. In an instant that church was gone. Nothing could resist the torrents or the waves that leaned over each other like lions play. Whole towns and cities were

washed away, and high above the shriek of the winds could be heard the cries of drowning humanity, prayers and lamentations of those hurled to watery grave. Still the rain descended with remorseless fury. The drops were like leaden bullets and cut men down like sheep. I was the only thing on each that was able to resist the elements, and once or twice I almost gave up in despair. For days and nights the rain continued. The greatest cities were submerged and the highest mountaintops were covered with water. A great stillness came over the world, and as I floated around on a plank I wondered if I was the only person in our part of the country. But I found one living. He, too, was floating on a plank."

"And who was he?"

"Noah!"

"He's dead now, poor fellow," continued the Deacon, as he dropped a tear in the flood, "but we were like brothers as long as he lived. Alas, the mill will never grind with the water that is past."

"Poor Noah was a fine musician, and as you know, he was quite fond of animals. Why, sir, he had a pet crawfish down to his place that would sit up on his tail and beat time with his claws while Noah played 'Yankee Doodle' on the horn. It was a very sensitive little thing, that crawfish, and never recovered the shock it got one frosty day when the old man had been to a funeral where he played the trombone in the brass band. When he got home he stood up the instrument in the corner near the fire, and directly it got thawed out and it started in on the 'Dead March in Saul' and rendered that magnificent composition without the slightest assistance, sir. But after that the poor crawfish pined away and died."

"You can't skeer me with water," went on the Deacon. "You see I used to live in the swamps. Dy'veer see any of them racer snakes that live in the swamps. No? Well, sir, they're dangerous. They ain't poizin snakes, you know, but they're worse. A racer will stand on his head and just flog you to death with its tail, if you let him. I was crossing a swamp back East one day, when, if you believe me, I stepped right into a nest of them snakes. In the twinkling of a tail a dozen of them were standing on their heads ready to whip me into strips. Was I frightened? No sir, I just took hold of the nearest tail, and with a quick jerk snapped off the reptiles head, and then using the balance of the like a cowhide, I just flailed the whole family into three inch pieces, which I sold for the finest Bologna sausages."

"Its everything in knowing just how to do those things, Deacon," said Brother Granger. "I guess you never heard how my boy Fowler ([Farley Jr.](#)) broke up the whole town of Stockton. I thought not. Well, sir, Fowler ketched a buzzard out on the San Joaquin plains, and as he had no use for the thing he just fastened a white shirt around the bird under his wings, and tied an old sun bonnet of his head. Then he turned him loose with a bell round his neck, and then the people of Stockton saw this extraordinary female flopping around over their heads in such a really improper fashion and making a frightful clatter with every flop, the citizens gathered in the plaza to be judged. Senator Langford addressed the meeting. With his usual sagacity he pointed out that this could not be the Angel Gabriel, because he was no lady. It was evidently the reporter of a New York paper making a trip around the world in eighty days with a limited wardrobe. He moved that a committee of the Board of Trade be appointed to wait on the lady and invite her to inspect the beauties and advantages of "our fair city." The motion was carried unanimously, but the lady had flown. You see, Deacon, most anything will pass for a lady in Stockton."

"Brother Granger, it's my treat."

**Oh, Stoic Alvarado:**

Amid all these moving accidents of **flood** and field, which make the burden of the story of the day, Alvarado stands placidly smiling over the waste of waters, a modern Venice for the nonce, serenely figuring the depth of the mud which will be deposited on her lands, rich with the promise of big crops, caring little for the present discomfort, for her legs are long, if wooden. It may not be as handsome as its prototype, where the famous gondola takes its course, but the lands around are as rich as those of the delta of the Nile, and the cause is very much the same.

**Flood:**

A Centerville dispatch says: The damage from Friday night's storm is just beginning to make itself known. The Alameda Creek is the highest that the oldest pioneers have seen it. In some places at Crandall's Slough ([between Newark & Alvarado](#)) the water is running through with great swiftness. It is going over the bridge and around each side. There is some danger of it being carried away. The road between this bridge and Alvarado is one sheet of water, axle deep, and the current is quite strong, making travel in both hard and dangerous. The Bell Ranch Bridge is

reported as unsafe, and it may have very large driftwood floats against it and the bridge may wash away. Cattle, fence rails and posts have been seen coming down the stream. On the lowlands the farmers are working hard drowning squirrels and gophers.

### **Union Clawiter Howe Dies:**

Mrs. Converse Howe, nee Union Augusta Clawiter, aged 39 years, of Pomona, California died on January 29, 1890. She leaves a husband and four sons, ranging in age from 9 years to 19 years. She was the first white child to be born in Union City California on August 7, 1851.

The Pomona Progress, in its account of her death writes, " She was universally esteemed as a lady of noble character. She was of a quiet, unassuming disposition, possessed of a kind heart, and was at all times ready to lend a helping hand to the distressed, and to smooth the pillow of the afflicted, yet all her good deeds were done without ostentation. The rule of right was her guide in all the relations of life, both social and domestic, and from that rule she never swerved. In fact, she was possessed of all those attributes of true womanhood that endeared her to all who knew her."

Locally she leaves a brother, Edward Clawiter, of Mt. Eden.

### **Sugar:**

A suit was commenced in the Superior Court, this afternoon, by the Alameda Sugar Company against the Spring Valley Water Company, to restrain the latter from diverting the waters of the Alameda Creek. The suit promises to be a very important one. The plaintiff asserts that it is the owner of 78 acres of land near Alvarado on which buildings and machinery have been erected at a cost of \$350,000. The land is favorably adapted for the cultivation of the sugar beet and needs considerable water. The growth and productions of the sugar beets in the district of land surrounding and adjacent to the factory, is not, and never has been profitable to the producers thereof except for the sale hereof to the plaintiff for the use of the factory, and for that reason the farmers and producers within an accessible distance to the factory never have produced, and will not grow the sugar beet in any considerable quantity sufficient to warrant the operation of the factory, without having first obtained contracts for the production and delivery of the same. For the benefit of the soil, and to render it fit for cultivation, it is, and always has been imperatively necessary that the waters of the Alameda Creek should flow undisturbed. The plaintiff charges that the waters have been diverted by the defendant, and asks for a permanent injunction.

### **Around Town:**

Several of the farmers in the vicinity are running short of hay.

Our Roadmaster, Farley Granger, has commenced scraping the roads.

Mr. Burr, the Superintendent of the Alameda County Refinery, is at present in Europe.

After two weeks delay on account of the rain, school opened last Monday.

The sugar company has already contracted for all the beets they need for the next run, about 1,500 acres.

Miss Annie Howell, the former teacher at Alviso, is substituting in one of the Oakland schools.

Alviso School opened last Monday with Mr. Kingsbury as school principal and Miss Kline of San Francisco as assistant teacher.

Two new bridges will soon be put on the road from the station to Alvarado. This will prevent the road from being washed away.

Alviso District has lost her new schoolhouse. At the election held last Saturday the votes stood twelve for and twenty-five against issuing bonds for a new building.

Mr. Incell was found in a very feeble condition last week and word was sent to his folks in San Francisco. They came up and took him home with them. It is reported that he and his son are to go into business together.

**Bad Roads:**

([Communication to the Board of Supervisors, received on February 25, 1890](#))

Gentlemen:

The undersigned petitioners and owners of the Turk Island Salt Works, east of Alvarado, are and have been for many winters, cut off from their manufactory by reason of deep gullies in the county road running east from the Alvarado lower county road. These gullies are all within two miles of Alvarado, and during the summer tides flow over a considerable part of this section of the road. These gullies, during a flood and a high tide, are dangerous to ford, and being without bridges cannot, at flood periods cannot be crossed.

Late Roadmaster Franz, some two years ago threw up a section of this road, running through the Samuel Poorman tract, which, being sandy and having no culverts has, from the immense body of water bearing against it been broken, and a cut, very deep and wide is the result. The petitioners pray for your assistance in the matter as the only way during an ordinary rise to reach their works is to pass over the lands of the John Hall Estate, these lands being flooded also, place the petitioners at a great disadvantage. Hoping your attention will be early called to this matter, we remain, Plummer Bros.

This communication was referred to the committee of the whole.

**Sugar:**

The expense account of the beet sugar factory at Alvarado, Cal., for 1889 was \$105,416.48. Of this amount \$41,893.50 was paid directly to farmers for beets, \$27,790.52 directly for wages in the factory and salaries. The other expenses, such as limestone and fuel, went for wages paid indirectly to labor.

Not only California, but other States with not half her varied and rich resources can be dotted and embellished with beet sugar factories, paying like relative amounts of their expenditures to farmers and diffusing prosperity everywhere. Must an industry be able to supply the home consumption before it is entitled to protection? It is asserted the beet sugar industry has not done this.

[\*\(The Irvington Express\)\*](#)

According to report F. B. Granger of Alvarado is contemplating putting into operation a scheme to supply the City of Oakland with water from the artesian wells on his property near Alvarado.

[\*\(The Haywards Journal\)\*](#)

F. B. Granger, Monday, made a most satisfactory trial as to the amount of water stored in the artesian belt around Alvarado, by boring a well down to the depth of 170 feet and struck a stream of water that shot up a five foot flow over the top of the pipe. It looked like a young river rushing over the pipe.

We found extensive improvements were under way that will double the capacity of the mill, turning out between 250 to 300 tons of beets daily when completed. New machinery will be put in and then twelve boilers will be necessary to run the mill. Over 1,500 feet of beet sheds will be built. The present company only hires white men, and this year will pay out \$120,000 for beets alone.

**1890 Census Results:**

The figures obtainable from the recent census from this section make pleasant reading for our people. They show, for the Township, a population of 5,502 persons of which, 2,889 reside in Alvarado, Centerville, Newark and the surrounding area, which comprises census district number 24. Census District number 25, which comprises Decoto, Niles, Mission San Jose, Irvington and Warm Springs, shows a total of 2,613 persons. This latter district has among its resident's 27 veteran soldiers and widows of deceased soldiers.

During the past year, in this section of 2,613 persons, we have no paupers or indigents among us, and but a nominal ratio of deafness and blindness. In the past year this section has had but eleven deaths. Of these 6 were children who died at childbirth or soon thereafter, 4 were children who died of different diseases, and the remaining one person was an adult that was killed by falling tree.

Alameda wants that honor to go to northern Alameda County this time while Murray Township is insisting that it should go to southern Alameda County.

#### **Artesian Well:**

A few months ago F.B. Granger, proprietor of the Riverside Hotel at Alvarado, Alameda County, commenced boring a seven-inch artesian well on a piece of land owned by him about a mile and a half northwest of Alvarado. At the depth of 170 feet an abundant current of clear water was tapped, so strong in volume that when the auger was withdrawn the water, instead of overflowing as is customary with wells of this kind, rose to a height of twenty feet above the orifice. A solid seven-inch stream thrown twenty feet in the air is so remarkable that the well has attracted widespread attention in the surrounding country. Mr. Granger states that he believes that by sinking wells and tapping the same current a sufficient supply of pure water might be obtained to supply Alameda city, or possibly Oakland. Such a remarkable supply of artesian water is certainly a valuable discovery.

**Sugar:**

Down in the southern corner of Alameda County, surrounded by fertile fields and beautiful gardens, lies the peaceful village of Alvarado. At one time the county seat of this pioneer agricultural county, it was left behind in the march of commerce to the sea, and, though ever putting a brave foot forward, it can never regain from Oakland the lead that the city has taken from it.

But Alvarado does not strive to do this. She is contented to strengthen the things that remain, and, for several reasons, she has an importance entirely her own that will not soon be wrested from her.

Just now Alvarado is the scene of busy activity, for here is located the first beet sugar factory ever erected in this country. Not only is it the pioneer of its kind, but also it is the largest and the only one in the country manufacturing fine granulated sugar complete and ready for market. This it does without the use of bone black, beef's blood, or the various other adjuncts to the usual "refining process."

The roads leading to the quaint little town are just now dotted with teams, hauling great loads of the sugar beets that are so largely grown in this section to the factory. The season is at its height, and the beets are utilized at once, as they are useless just as soon as they begin to sprout, the germinating process seeming to use up all the sugar. The sugar beet is longer than the table beet, white in color and coarser in texture. It is much sweeter to the taste, and acts very unpleasantly upon the stomach if eaten. The vegetable needs a light sedimentary soil, such as abounds here. So entirely dependent upon the nature of the soil is the quality of the sugar that specimens of the soil of every farmer growing the beets is analyzed in the factory laboratory several times a year, and the beets are tested each season before the crop is bought.

The beets are hauled to the factory in sacks and stored in long sheds, whence they are carried to the factory by water running through a long flume. From the flume they tumble into a huge receptacle filled with water, where in is a machine that washes them thoroughly and tosses them into an elevator, by which they are carried up to the next floor and dropped into the cutter, a large vat-like structure, in which is a series of grooved knives, revolving on a horizontal plane. These quickly shred the beets into short, small, round pieces about the length and thickness of parlor matches. In this shape they go down again to the lower floor, where the next process in their evolution to pure granulated sugar is that of the diffusion battery, a series of pipes and cells connected with a water main, in which the shredded beets are thoroughly macerated and the sugar contained in them leached out. Onward, then, the whole pulpy mass is hurried to a press, where it subjected to a squeezing that the crushed beets with hardly the most infinitesimal fractional part of their remaining in their fibers, to be carried to stretchers outside to the silos, whence it is sold for cattle feed, and excellent feed it is.

What remains, the sweetish, dark-colored foamy liquor, is carried through pipes to the heater and measuring tank, and afterward to the vats, where it is treated with milk of lime in the proportion about 15 per cent by volume. By the action of carbolic acid gas the lime is afterward precipitated in a white, flocculent mass, carrying down with it the various impurities in the liquid. Upstairs again, the latter travels, still steaming hot from the processes it has been submitted to, to the filters, a series of plates, with sheeting and burlap between them, and through which the liquor is forced, and from it filtered the last remaining traces of lime and other impurities. After this it is again treated with milk of lime and carbon dioxide in lesser quantity, when it goes to the evaporator, where, in the course of its travels through five miles of brass tubing, it is made ready for the vacuum pans. The steam from the first evaporator boils the second, and so on, in quadruple effect, with ever-increasing vacuum and a correspondingly decreasing temperature.

Through the glass in the sides of the great machines the boiling liquor can be seen, heaving like a dark troubled sea, gradually changing from the thin, sweetish liquid first obtained to a thick syrup, in which state it is conveyed to the vacuum pan, in the very top of the building, where, under a continued boiling, the seething mass begins slowly to grain. When a portion of the liquid drawn off through a faucet in the great cauldron shows thick with the grains of sugar it is ready for the centrifugal machine, or separator. This is a series of baskets of strong wire gauze, revolving so rapidly that they appear to stand still. These are stopped and a quantity of the slow-moving, grainy, dark brown mass is allowed to run into each. Then the conveyor is closed, and the baskets are set in motion. Centrifugal force drives the syrup through the sides of the baskets, while the grains of sugar mass themselves against the screen. When all the syrup is driven off the revolution is stopped and the sugar scraped off and allowed to run down a chute to the ground floor, where it appears as white, glistening grains, all ready to be packed in the familiar blue-

paper lined barrels, and sent to market. The syrup flows down into huge vats, where it stands a few days, until it also begins to crystallize, when it is resubjected to the whole process. The syrup that then remains must stand for several weeks before it can be sugar. Any residue is worthless for sugar making, as it can only be boiled three times, but it is utilized in make a fine quality of vinegar.

The Alvarado sugar factory will use this year about 25,000 tons of beets. This is by no means all it could obtain, but about all it can, with its present working capacity, utilize before (without the intervention of cold storage, which would not now pay) the beets would spoil for sugar making. Mr. J.W. Atkinson, the genial and scholarly foreman, who showed *THE CALL* representative through, said, in the course of the tour, that another year the capacity of the plant, which now represents an investment of nearly half a million, will be increased, so that a much larger amount can be utilized, an announcement which the farmers of the locality will receive with satisfaction. Mr. Atkinson spoke of the benefit the industry will receive from the McKinley bill; it will not, he said, make any difference in the price of sugar to the consumer, but will enable the manufacturer to handle a much larger output without loss. The cost to the manufacturer of producing a pound of sugar in this is 4 cents or a trifle over. He sells it for 6 cents. Owing to differences in the cost of labor, the French or German manufacturer can produce the same article at 3 cents, a small difference that, without the protective tariff, would render him a dangerous foe on American soil, to the American manufacturer and the American workman.

The Alvarado factory employs about seventy men during the season, and expects next year to require a still larger force.

#### **Republican Rally at Alvarado:**

"His name is Farley B. Granger, Jr., and he knows just how to manage a meeting." That is what all the candidates and their friends said last night about the gentleman whose ruling and guiding hand was seen in everything connected with the successful management of the meeting at Alvarado. Certainly a more successful and a more enthusiastic political meeting has not taken place in this county during the campaign. The people for miles around poured into Alvarado and the Odd Fellows Hall, where the meeting was held, was crowded almost to suffocation. The applause too, was frequent and spontaneous and of that kind which stimulates the candidates to their very best efforts. In short, it was a regular old "whoop-up" and it augured well for the success of the entire Republican ticket in that portion of Alameda County.

**Party at the Behrmann's:**

Last Saturday evening a number of friends, among whom was the Triangle Club of San Francisco, paid a visit to Mr. & Mrs. Henry Behrmann of Alvarado and ascertained that the following day was the birthday of the hostess, the party concluded to remain over Sunday and celebrate the occasion in a becoming manner. Dancing and then games were indulged in until midnight, when supper was partaken of, and recitations and songs agreeably occupied the time until 2 o'clock, when all retired. On Sunday the party enjoyed a ride through the neighboring country. Among those in attendance from Alvarado were: Mr. & Mrs. Henry Behrmann, Miss Tina Berhmann, Miss Annie Behrmann, Frank Behrmann and Henry Behrmann Jr.

**Sugar:**

According to the *Salinas Weekly Index*, a recent address before the local board of trade was made by E. H. Dyer, for many years connected with the Alvarado beet sugar factory who said: "I am also informed that you have secured a site for a factory where a good supply of water can be obtained, which is accessible by rail and wagon. All your conditions are favorable as at Alvarado, except for coal. This will cost you some more than it does us, but you can obtain limestone for less. In manufacturing of sugar from beets it is only necessary that you provide sufficient capital to erect suitable sugar works to enable you to manufacture sugar to the most commercial manner, with the hearty cooperation of your landowners and farmers, and that they fully realize the great importance and benefit it is to them to have a beet sugar factory located in their immediate vicinity. If you provide the sufficient capital to erect a suitable sugar works, and your farmers will furnish a full supply of good beets, a financial failure is impossible unless the management is wrong." This fits Davenport's case exactly!

**Steamship Grace Barton:**

There was quite a lively scene at Jackson Street Wharf (SF) yesterday, between two deputy Fish Commissioners and the officers of the steamer, *Grace Barton*, which runs between here (SF) and Alvarado.

It appears that yesterday morning the *Grace Barton* picked up a large Chinese fishing junk on the Alameda flats. It was drifting with the tide and had no occupants. It was no sooner made fast to the steamer than the Deputy Fish Commissioners came out in boats and demanded that the junk be given up to them. They claimed they had arrested the occupants for illegal fishing, and before leaving for the shore had let go of the anchor.

The deputies insinuated that the captain had hoisted the anchor of the junk and was stealing their prize. The captain denied this and despite their protests towed the junk to this side of the Bay. The deputies followed and renewed their demand on the dock, but without avail. The *Barton* will hold the derelict for salvage.

The members of this firm have spent many months in the largest beet sugar factories of Europe, studying the details of German and French methods of manufacturing sugar from beets, and also at works of the leading manufactories of beet sugar machinery. Having had many years' experience in manufacturing sugar from beets in California, and having fully demonstrated the feasibility of producing sugar from beets in this country in almost unlimited quantities, and in successful competition with cane sugar imported from foreign countries, we are prepared to furnish designs for factories, plans and drawings of the latest improved machinery now in use in Europe and this country. Can also furnish skilled engineers to superintend the construction of factories and the necessary technical skill to operate the works successfully when completed. Will make personal examination of localities with regard to their fitness for the production of beet sugar, free of expense, except traveling expenses. Successful results are guaranteed when the conditions are considered favorable.

**Sugar:**

(Reprinted from *The Pleasanton Times*)

The success of the Alvarado sugar factory has prompted the editor of the local paper, *The Times*, to urge upon our farmers the desirability of planting sugar beets. If they can be raised and a factory successfully operated here, ’twere “a consummation devoutly to be wished,” but of all industries that of raising the sugar beet should be carefully considered, and not gone into blindly. The soil on which the beet is grown must first be submitted to a chemical analysis to determine whether it contains the necessary adjuncts to the development of saccharine matter in the

vegetable. If it does not, sugar makers will refuse to accept the beets grown on it. Not is this analysis made once and for all, but it must be repeated every year, and, oftentimes, soil that one year produces good, workable beets, will next year bring forth an article that sugar makers will not look at. At Alvarado there are many instances of pieces of land lying side by side, one that will grow sugar beets, while the other will not. A number of experiments should be made, and the actual sugar-producing land definitely known before much talking is done about a beet sugar factory in this vicinity.

Last Friday afternoon as John Olson was busily engaged in putting out a fire on the roof of the stove foundry, he accidentally stepped through a skylight. He had the presence of mind enough, however, to stretch out both arms and brace himself against the roof, and managed to sustain himself in that position until someone came to his assistance. As the distance was thirty feet, had he fallen he would have been instantly killed, as the floor was covered at this time of day with heavy iron castings.

**Sugar:**

The affairs of the Alameda Sugar Company were considered at a meeting of the stockholders at San Francisco. The company owns the mill at Alvarado. Profits for the last years were \$27,000, all of which was reinvested in company operations. Indebtness remains at \$35,000 while \$15,000 in cash and seeds is on hand.

President Hecht thought it discouraging that an enterprise as legitimate and of such promise should be barren of returns for the capital invested and the risks taken. He hoped, but was not certain, that the immediate future would be more satisfactory. On account of a probable shortage in the sugar beet crop the directors have advanced the price of beets from \$4.50 a ton to \$5.00 a ton.

But in a note of caution mentioned that the plant's remaining in Alvarado has been put in jeopardy by the Spring Valley Water Company of Niles who have diverted the Alameda Creek flow from the sugar mill. The sugar mill must have water to remain open.

### **The Alameda Creek:**

The Alameda Creek nears Alvarado after flowing past the Bell Ranch Bridge ([Decoto Road and the Alameda Creek](#)), beyond which it flows through Alvarado whence it becomes the Union City slough and merged into the San Francisco Bay. Some of its prettiest bits, however, are about Alvarado, and it is here the sportsman and fisherman loves it. There are some facts about this section, which should be borne in mind when San Francisco and Oakland shall have exhausted the capacities of their present water supplies. That time will one day come and the city fathers will have to cast about for further resources. It is believed by good authorities that there is here a broad and apparently inexhaustible artesian belt, a fact indicated by the number of flowing wells near here now discharging million of gallons of pure, clear water.

An artesian lake was formed by the sinking in of the earth at the bottom of a well. The flow from these wells is so steady and powerful that engineers have arrived at the conclusion that a river flows through this section at a depth of about 175 feet under the surface.

### **Sugar:**

At a meeting of the stockholders of the Alameda Sugar Company, held in San Francisco this week, President Isaac Hecht reported that the books showed a profit for the year, 1890-1891 of \$21,000, which, with the profit of the year previous year of about \$6,000 makes a net balance for the two seasons of \$27,000. This money has been applied in part payment for the permanent improvements, leaving the company still in debt \$35,000, against which there is on hand \$15,100 in seed, material and molasses. To cover the indebtedness and put the company on a solid financial basis, an assessment of \$4 a share has been ordered. The President thought it discouraging that an enterprise so legitimate and of so much promise should be barren of returns for the capital invested and the risk involved. He hoped, but was not certain, that the immediate future would be more satisfactory. On account of a probable shortage in the sugar beet crop, the directors have advanced the price of beets from \$4.50 to \$5 a ton. The President also referred to the probably necessity of removing the company's works from Alvarado, because the Spring Valley Water Company is diverting the waters of Alameda Creek from their regular course to the

refinery. "The beet sugar industry," said Mr. Hecht in conclusion, "must in time become one of first importance to the State and country. The income last year from 1,320 acres in beets averaged about \$100 an acre, while \$25 an acres for wheat land is considered very good."

### **A Ride on the Train:**

A charming ride in the valley is reached in a little over two hours through one of the most fertile and charming valleys of the State. Leaving the San Leandro marshes the train crosses a wide stretch of low pastureland, which merges after a few miles by gentle undulations into broad and cultivated acres, attesting by their lush vegetation the extreme richness of the soil. The towns along the route are small and sleepy looking, but waving fields of wheat and barley, with now and then a peach or cherry orchard, greet the eye on every side. You are whirled through Alvarado at the rate of fifty miles an hour and get a faint idea of a station building and a sugar refinery. Newark is passed, with its one-horse car track, where the grass grows green, its atmosphere of lethargy and car manufactory. One gets the impression of historic old Alviso ([Santa Clara County](#)), but may catch a glimpse at the next station of a tall, forbidding looking structure of brick standing about 400 yards to left of the track; the Agnews State Insane Asylum. On through Santa Clara and San Jose, fresh and prosperous looking, with broad orchards, green vineyards and beautiful flowers and a wealth of landscape not found in the lower valley...

### **Our Soil:**

In Union City nothing but grain is grown for an income, yet here and there a few scattered homes of the early settlers still have heavily laden fruit trees about their houses, which, one should think, would be example enough to warrant planting orchards. At Union City, or Alvarado (the two towns being so near together as to be almost one), the soil is particularly adapted to vegetables

and berries, being low, moist and sandy. The farmers are just now planting acres upon acres to sugar beets. The soil is here similar to that just north of San Jose, near the Bay Shore sandy and moist, producing berries and vegetables to perfection.

There is another noticeable point of resemblance; flowing artesian wells are numerous in both places. One in Alvarado, belonging to Mr. Granger, is so near the Bay that it is on the very edge of the marshland. It is one of the finest on the Coast, and sends out a steady stream large enough to nearly supple a city of the size of Oakland with water; indeed, the subject of purchasing the well for Oakland's water supply was seriously considered not more than a year ago, and it may be considered again.

**Sugar:**

The litigation between the Alameda Sugar Company and the Spring Valley Water Works still progresses in the Superior Court, with little chance of a compromise. The former is demanding a large sum for damages, claiming that by reason of the diversion of the waters in Alameda Creek their business and property have been greatly damaged. The sugar Company's works are located near the town of Alvarado. Today the Water Company made a reply to the complaint, and assert that the dam complained of is built at a point nine miles above the works of the plaintiff; that it was constructed before the plaintiff acquired the property claimed to be damaged; and that the company has a right to divert a portion of the waters of the creek in order to supply the inhabitants of San Francisco with water. The defendant further claims that the action is barred by certain provisions of the Code of Civil Procedure. The issues in the case have now been joined, and it will soon be tried before Judge Ellsworth. The suit is one in which the people are much interested who own land bordering on the creek this side of the dam.

**Washington Union High School:**

It looked like for a time there was going to be trouble in Washington Township over a proposed Union High School. A petition was sent out to the County Supervisor of Schools, signed by the residents of Centerville, Irvington, Decoto, Newark, Lincoln and Alviso School Districts. They prayed that an election be called for the establishment of a High School.

People of Alvarado, Niles and Mission San Jose being in the same township commenced to object when they found that they had been left out in the cold, and a consultation of war was held. It was pretty certain that the three districts couldn't form a High School by themselves, and the only thing left to do was to get "aboard" with the other districts. The election had been called for the 29<sup>th</sup>, but it has been agreed that it shall be postponed in order to allow the other three districts to "get in." But as a matter of fact the trouble in this township has just begun. It is now cropping up as each district is scratching around looking for a location the school in their district. It will be a fight to the finish, Niles wants the school and so does Irvington. Mission San Jose people proclaim they are entitled to it and Decoto makes a bid for it. Alvarado demands it and Centerville will claim it. So it would appear there will be a little ill feeling over the location of the High School.

If, however, Miss Riley does not

secure the position in Livermore she will be out in the cold as she has resigned her present position.

A few nights ago at midnight he went out into his cornfield, and when someone spoke to him he said he wanted to see how his corn was getting along before he died. Then he returned to his house and kept running out every five minutes. Last night he tore all his clothes to pieces and became a terror in general.

**Alvarado Wants It:**

The only subject discussed is the proposed electric road to Alvarado. It will be a glorious thing for Alvarado and vicinity, and our prayers go out to the Board of Supervisors to grant the company a franchise. It will be the means of infusing new life into the sugar beet industry, for we will then be able to transport beets from every point of the compass, and in fact every industry in our midst. Alvarado has too long hid its light under a bushel, as it were, but with the electric road to open up to settlement the most fertile valley in the state, Alvarado will, as in the balmy days of yore, be the queen city of Washington Township, for we will have two roads besides the finest water communications.

Both of these devices are objectionable because they interfere with the free movement of the horse's shoulders. This is especially the case in track-work, where it is desirable to give the horse the freest possible movement in order to increase the stride and the speed at which he can travel. In this invention both these devices are dispensed with and the horse's shoulders and front part of his body are left entirely unimpeded.

The beets could be grown, for nature took care of that, but they could not be made into sugar cheaply enough to compete with cane sugar, especially with the duty free sugar which came in under the Hawaiian reciprocity treaty.

**Water:**

Alvarado is a pretty little village of perhaps 700 population. Once upon a time it bade fair to become a great city. When Oakland was a tiny hamlet, Alvarado, then called Union City was already a thriving burg. The first steam flourmill ever built in this State was erected there by John M. Horner, who afterward laid out Horner's Addition to the city of San Francisco, became involved in financial difficulties thereby and finally went to the islands to redeem his shattered fortunes by manufacturing sugar for the United States trade.

A navigable creek ran from the Bay way up to the town, and large side-wheeled steamers used to ply up and down the stream, which is now wholly filled up by the wash from the hills. Nothing remains but a tulle swamp. The rotting timbers of the old wharves lie exposed to view like the bones of some great monster. They are, in fact, the decaying bones of a dead commerce. The planking has long since disappeared, and only the piles and heavy braces remain. A skiff could not now force its way where once great steamers floated free. Cattle graze where once immense warehouses stood, haystacks have taken the places of business blocks, geese wander where once the busy merchant trod, and tradition only remains of the old embarcadero that was once one of the liveliest on the coast.

A *San Francisco Call* reporter visited the place a few days since to see the wonderful artesian wells that are located there on the property of Colonel F.B. Granger, one of the earlier pioneers of the place, who has lived there for the past 39 years, and during 20 of these years has been familiar with the almost incredible capacities of this underground water supply. A company has lately been formed for the purpose of piping water from these wells to supply the city of Alameda, at the other end of the county. A supply of 6,000,000 gallons daily will be easily obtainable here, and a reservoir is also to be constructed on the hills back of Alvarado, in which the surplus supply of the wells will be pumped and stored. A gang of men are already at work there, building a flume, sinking other wells and getting things in shape for the erection of the pumping-house and other apparatus.

Colonel Granger took the reporter over to the scene of operations from the hotel at Alvarado. Four wells are already down along the line of the flume. Some of these have been in operation for years. The colonel drew rein near a group of men who were driving a 10-inch well, the largest yet put down. Nearby was another well, consisting of a 4½-inch pipe sunk in the earth. Like the others, it was closed, the only use for them at the present being for the purposes of irrigation. At Colonel Granger's request, however, one of the men turned the water on, and immediately such a stream rushed out as the reporter had never before dreamed could flow from a pipe. Out it poured, tumbling over itself in its hurry, and flowed along a deep ditch that carried it off across the fields. With such an irrigation system as that those fields ought to be converted into veritable gardens of Irene. This was originally a 7-inch well, but the stream proving unmanageable for the purposes for which it was desired, a smaller pipe was substituted, about three years ago. After watching it for some time the colonel prepared to drive on. "Just let it run today," he called to the man. "You surely don't mean to let that water run all day, colonel?" gasped the reporter. "Why that pipe will send out 100,000 gallons before night."

"Nearer a million," was the careless response, and the colonel drove on to the next one, pointing out the remains of the old embarcadero, and chatting of olden times as he went.

"It don't seem possible, does it," he exclaimed, gazing across the green expanse where once the creek ran, "that large steamers and ships once came up here? Yet I have seen them lying here loading grain, and unloading all sorts of merchandise."

What little water remains is almost fresh, the great artesian supply having nearly conquered the saltiness of the seawater.

A peculiar feature of the landscape near here is any number of great white piles that at a little distance resemble huge white buildings. The reporter learned with surprise that they are piles of salt, which is procured by evaporating the seawater in great tanks, raking up the salt, which is then shipped to the city. A very simple process, that, but nature seems to have rendered all processes simple in that section. Where once was a vast expanse of almost worthless marshland the wash from the surrounding hills of earth loosened by the agricultural operations of the past score of years has produced a rich alluvial soil. It literally rains farms down there during the rainy season. The water to irrigate these farms lies all along under the soil, and the time must come when Alvarado left behind in the march of mercantile progress, will become one of the richest and most productive agricultural sections around the Bay.

Near the head of the creek, not far from the old wharves, is a low, picturesque-looking house that was at one time one of the beautiful homes of the county. An early history of the section gives a picture of it, in beautiful order, the embarcadero scene of busy life and a big sidewheeler tied up near the front door. The big steamer could not get within many a mile of it now. In the yard of this place is a seven-inch well that has been flowing for years. So great is the force of the water that it has been necessary to enclose the pipe in a strong iron casing, and even this has been so forced that a series of little streams flow from its joints into the cement basin below. The overflow from the well has formed a large lake in the rear of the house and transformed what was once a commonplace farm dooryard into a retreat of sylvan loveliness. All around the lake grow willows and other trees. In the center is a little island shaded by a drooping willow and covered with a growth of green. Pond lilies grow all along the edges, fish swim in the cool water and an unused boat floats on its surface. "The place once fitted up for a fish-hatchery and the abandoned ponds and nurseries still remain; but the place is deserted and still, a pathetic reminder of bygone days. One might while away a summer vacation in that sylvan retreat nor sigh for anything lovelier.

The salt works and the artesian wells are not the only attraction or industry at Alvarado. The old flourmill has been transformed into a large foundry; the pioneer beet-sugar factory is located there, and the growing of sugar beets is an important feature of its agricultural enterprise. The Alameda (Creek), here, is a deep, placid river in the summer, albeit it rages in the winter, so that

heavy bulkheads are necessary along the banks to protect the town from its invasion. The Riverside Hotel, of which Colonel Granger is the proprietor, stands in the midst of one of the finest natural groves in California, and the entire surrounding of the little town are so entirely beautiful that the reporter wondered that it was not thronged with city people. The railroad runs a slow, disagreeable little narrow-gauge train up there, but that is the only discomfort about the place. All else is a dream of sylvan loveliness, but 'tis a great pity some of that glorious water could not be brought to San Francisco and Oakland.

**Sugar:**

The three large beet sugar manufacturers at Alvarado, Chino and Watsonville are tallying up their estimates of production for the coming year. Under the McKinley Sugar Bill the beet mills will receive a 2¢ per pound bounty for all the sugar they refine. This year's estimate is 37,000,000 pounds or \$740,000 in revenue from the bounty (above regular sugar profits). This subsidy makes good sense for Americans who can buy American Sugar, and for American farmers who grow crops locally.

**Sugar:**

It may not be generally known that Nebraska has one third of all the beet sugar factories in the United States. Here is the list: The Alvarado Sugar Co., Alvarado California, was the first built in 1879, and is still operated by E. H. Dyer; the second is that of Claus Spreckels of Watsonville California, built in 1887; the third was built Henry T. Oxnard, at Grand Island Nebraska; the fourth was also built by Henry T. Oxnard, at Norfolk Nebraska; the fifth is at Chino California and the sixth has just been completed at Lehi Utah. Thus it will be seen that there are six beet sugar factories in the United States at this time.

**Old County Record Book Found:**

The book containing the records of the formation of Alameda County was discovered in a forgotten pigeonhole of the County Recorders Office the other day by one of the deputies. It had been lost for long time and had been frequently looked for vainly.

The minutes show what many of the older inhabitants still remember, that Joseph S. Watkins, James B. Larue and J.S. Marston were in Alvarado in April 1853, as commissioners appointed under an act to create the county of Alameda, defining its boundaries and establishing a seat of justice. They called for an election in the same month, the polling places being located at private houses throughout the county, for the most part, and some of the judges of the election being the candidates themselves.

Addison M. Crane was chosen as the first County Judge, William H. Coombs District Attorney, Andrew H. Broder Sheriff, and A.M. Church County Clerk.

**Water:**

Yesterday afternoon the Mayor, members of the City Council and a number of prominent citizens visited Alvarado, the source of the artesian water supply, by invitation of W.J. Dingee, the promoter of the scheme to supply Oakland with pure water. The capacity of one well was stated by W.T. Boardman, the well known engineer, to be upward of 3,500,000 gallons per day, which is just about that supplied to the City of Oakland by the Contra Costa Water Company. Another well a few yards away is stated to be able to supply 1,500,000 gallons per day, and this without diminishing the flow of the other one. Mr. Dingee's proposition is to be shortly discussed in council.

Water for Oakland:

Oakland is promised an abundant supply of pure water from the Alvarado artesian wells before the close of the year. W.J. Dingee, who is at the head of the enterprise, has employed engineer Boardman, and the first work will be the construction of a circular reservoir 60 feet in diameter and 15 feet in depth, near the old steamer landing (at Union City). Within a radius of 300 yards of this point there are now four flowing wells, which, tapped ten feet below the surface, will supply more than enough water, according the engineers estimates, than the city needs. The main from Alvarado to Oakland will be 30 inches in diameter with the capacity of supplying 7,000,000 gallons every twenty-four hours, a quantity double the present consumption of this city (Oakland). The length of the main will be eighteen or twenty miles and the pumping will be done by a 500 horsepower engine.

### **Water:**

Future City of Oakland water supply:

Within one mile of Alvarado are six artesian wells, from which flow enough water to supply every home and business house in Oakland; yes, every place in Alameda County. It is delicious, pure water, coming from 150 feet below the surface, water flowing from an underground river that

geologists say has its source in the mountains ([actually its source is the Niles gravel beds](#)); a seemingly inexhaustible supply that will last as long as snow and rain fall on the hills.

For some time the City Council ([of Oakland](#)) has been considering the advisability of doing away with contractors in this matter of water, but the subject has been kept sub rosa. *The Call*, always awake to the interests of the people, is now able to announce that the first steps are to be taken toward the desired end.

It is believed that the water from these artesian wells could be pumped from Alvarado through mains for the benefit of the people of Oakland.

***The San Francisco Call, August 29, 1893***

### **Sugar:**

The Alvarado beet sugar factory is well at work and is making a larger output than ever before. From 71,000 to 75,000 pounds of sugar are being refined daily. It is reported that a quarter of a million beets are being received each day and 125 men are employed in day and night shifts. This is, of course, small business as compared with Chino ([sugar factory](#)), but it is good in its way. They seem also to be doing better in growing beets, for the report is that heretofore the average production of beets to the acre has been from 15 to 18 tons. This year the average has not fallen below 20 tons, and has gone as high as 23 tons.

### **Rebekah's:**

The Rebekah's of Alvarado had a well-attended public reception last Friday evening.

***The San Francisco Call, October 16, 1893***

### **Sugar:**

Each day the Alameda Refinery of Alvarado consumes 210 tons of sugar beets. The beets require no attention after they have once been planted, and the price paid the farmers is such as to make their growing and marketing profitable. Besides, there is an assured sale for all the beets that can be grown. The bounty ([Government subsidy](#)) that the Alameda Sugar Company will collect for the season's run will amount to \$120,000. The factory has turned out over 1,300,000 pounds of sugar in a little more than a month's time. The daily average is about 55,000 pounds, and fully 6,000,000 pounds will have been turned out before the factory closes. A Deputy Internal Revenue Inspector is kept on duty constantly to watch the output, on which the Government pays a bounty ([2¢ a pound for refined sugar](#)). The factory will probably shut down the latter part of this month, but it is expected that after the commencement of next season the refinery will have a longer run, as the supply of beets will be larger than it was this year.

***The Pacific Rural Press, San Francisco, December 23, 1893***

### **Water:**

W.J. Dingee, for the recently organized Oakland Water Company, which has secured control of the Alvarado wells, will in a few weeks let the contract for laying the great main to tap the wells and convey the water to Oakland. Gangs of men will be put to work at the Alvarado end, the Oakland end and probably midway, and just as soon as it is possible the water will be brought to this city, probably within the next six months, and within the year it is expected that the Alvarado water will be piped all over Oakland.

***The San Francisco Call, January 4, 1894***

### **Water:**

It has been believed for years that the artesian wells at Alvarado, belonging to the Granger's and recently purchased by the City of Oakland, have had their source of supplies from the mountains about Mount Hamilton. But since the successful boring of the wells on the oyster banks, there is a general belief that the wells are all fed from the same source, and that is the Santa Cruz Mountains.

***The San Francisco Call, January 22, 1894***

**Flood:**

On Monday night the water came down from the foothills in torrents and covered the whole country about Alvarado and as far south as Newark. The banks of Alameda Creek were too full to hold the great flow, and the great volume of water washed out the railroad in many places. At one point just below Hall's station, between Alvarado and Newark, 200 yards of track were washed away entirely from the roadbed and carried over against a fence 30 feet away. The ties and rails held together, but the roadbed was cleaned out entirely, and a perfect torrent of water swept under and over the track.

*The San Francisco Call, February 23, 1894*

**Sugar:**

The wrong that will be done to the beet raising industry by the removal of the bounty is illustrated by the position of the Alameda Company at Alvarado. It has entered into contracts with farmers to supply beets from 3,000 acres, or 500 acres more than were planted last year. This was done before the tariff legislation took shape, and the price to be paid is \$5 per ton. The effect of cutting off the bounty cannot but prove disastrous to the whole industry. If farmers do not obtain a price that rewards their labor they will have to turn to some other crop, and the manufacturer must be a loser on his capital in buildings and machines.

**Water:**

W.J. Dingee's concern, the Oakland Water Company, has completed the work of making a contract for the construction and laying of the great main pipe from Alvarado to Oakland. The papers were filed yesterday. Francis Smith, the San Francisco pipe maker, has secured the contract.

It is now understood that the pipes will be constructed in San Francisco instead of San Leandro, as was originally the design. The pipe will be 30 inches in diameter from Alvarado to East Oakland, whence the water will be conducted to Oak Street in two 20-inch and several 8-inch pipes.

**Water:**

The Samuel Poorman well at Alvarado, which has been running a river of water for fourteen years, is still running as freely as ever, despite the efforts of the new company to control it. It was found impossible to stop the flow by plugging, and the experiment of sinking another well alongside to diminish the flow was tried, with the result that the new well started in on the first day with a flow of 750,000 gallons and has kept it up ever since, but strange to say the old well's big flow has in nowise diminished.

**Alvarado Suicide:**

An unknown man jumped from the iron bridge, which spans Alameda Creek at Alvarado and was drowned on Thursday afternoon. A teamster named Manuel George saw the fellow leap to his death, and from his description the man was a middle aged German. When George saw the leap he called to a blacksmith nearby and together they ran to the center of the bridge and cast a rope to the suicide. He would not grasp it, however, and drawing it up again they threw it over his head. But the man was determined to die, and freeing himself sank again and arose no more.

Acting Coroner Judge E.A. Richmond held the inquest yesterday afternoon. Several witnesses had seen the unknown a few hours before he committed suicide chasing around the fields after birds. When approached he would run away, saying that people were trying to kill him. The verdict of the jury was that he committed suicide while insane.

### **Alvarado Roads:**

The roads in the southwestern part of Alameda County in the neighborhood of Alvarado are in a most dreadful condition. Nearly, if not quite, \$10,000 has been spent this last summer in putting them in repair, and hardly a vestige of the work remains. As the sugar mill and the Oakland Water Company's works are both located in or near Alvarado, an immense amount of heavy teaming for the past four months had cut the roads up so badly that they were in prime condition to be washed away by the heavy floods, which the continuous storms of the past month have sent to the busy little town. Alameda Creek, which is fed by a dozen or more good-sized tributaries, flows from Niles Canyon through the valley, having its outlet into the Bay, near Alvarado. The lowlands thereabout are as rich as any in the county, and have been cultivated longer than any other in the State.

*The San Francisco Call, January 21, 1895*

### **Benson Road:**

C. R. and O. P. Nauert, J. C. Whipple and others have petitioned the board to close Benson Road, leading from the westerly side of 17<sup>th</sup> St ([Bulmer](#)) to the easterly side of 10<sup>th</sup> St ([Veasy St.](#)), near the old Barron's Landing at Union City. They claim that it is not necessary, because the points referred to are connected by a much better road.

*The Oakland Tribune, December 31, 1894*

### **Closure of Benson Road:**

The County Board of Supervisors heard testimony from the petitioners and the protestants on the issue of closing Benson Road in the Union City district of Alvarado. Speaking for the petitioners was Mr. E. Nussbaumer, and representing the protestants was Mr. W. Whitmore.

The following persons were sworn in and testified in favor of the Benson Road closure: W. F. Boardman, F. B. Granger, J. C. Whipple, Samuel Poorman, C. R. Nauert and Edwin Whipple.

The following persons were sworn in and testified in favor of keeping Benson Road open: John Quigley, Antone Lee, Edward E. Foley, Patrick Mathews, R. Gibbon, George Althausser, Frank Behrmann and Daniel Riley. The testimony was taken into advisement for future consideration.

**Electric Road:**

An application was filed this morning with the Board of Supervisors for a franchise for an electric road from Hayward to Mt. Eden Landing. The application is presented by H. L. Petermann and Daniel Chisholm who state they desire to build the road.

It is proposed to capture the freight business in the Eden and Washington Township. The new road will be used principally in that interest so that shipment may be made by way of Mt. Eden Landing, which is owned by Mr. Petermann. Mrs. Chisholm owns the electric plant at Hayward and he proposed to supply the power.

Felix Chappellet is also in on the deal. He already has a franchise from Hayward to the Half Way House, to Alvarado, to Centerville, to Mission San Jose, to Niles and then back to Hayward. It is proposed to build this road in connection with the Petermann-Chisholm system.

F. B. Granger, Jr., who is familiar with all the points, says he believes that the great country loop will be established here before long. The men interested, he says, are looking over the ground this afternoon.

**Mt. Eden – Alvarado Road:**

Upon the motion of the Board of Supervisors of Alameda County it was resolved to visit and inspect the Alvarado Road and to investigate the complaints made concerning damages done by the laying of pipes of the Oakland Water Company and the clerk was instructed to notify W. Boardman, engineer of the company to be present on Friday, when such investigation will be conducted.

*The Oakland Tribune, April 6, 1895*

**Oakland Water Company:**

The Board of Supervisors took into consideration the matter of the obstruction to the water of the Alameda Creek by the pipe of the Oakland Water Company near Alvarado. Engineer Boardman said that he could remove the cause of this annoyance by the expenditure of \$100 in changing a short turn of the creek on the property of a man named May, and that his company would make the outlay. Supervisor Talcott said that May would allow no changes to be made in the direction of the water flow.

*The Oakland Tribune, April 9, 1895*

**Oakland Water Company:**

Mayor Davie of Oakland comments on his city being served by two aggressive water companies, the Contra Costa Water Company and the upstart Oakland Water Company. The Contra Costa Water Co. owns vast reservoirs (catchment basins) while the Oakland Water Co. presently obtains their water from Artesian wells in Alvarado. Comments the mayor on who will survive:

“As mayor of this city I do not care to be quoted, but there ought not to be much trouble for you to make a correct surmise. One company must maintain a large catchment basin and withstand the criticisms of the expert with the microscope and the analysis of the chemist. Read your own paper for the week past and see what is found in the water. In addition to this it is burdened with an Indebtness of something like \$1,690,000 on which it must pay interest. The other company is modern in every respect. Its source of water supply **are those inexhaustible wells at Alvarado** and anyone who knows anything about the difference between Artesian water and catchment water knows that the former is pure and the latter is...well, read the scientific analysis in the Tribune last Friday...”

Editors note: In the above quote the mayor is referring to the Contra Costa Water Co. as the company with catchment basin water supply and the Oakland Water Co. as the owners of the Alvarado Artesian wells. Note that Oakland thinks Alvarado has an inexhaustible supply of water, this proves to be untrue as you will read about in later years.

*The Oakland Tribune, April 15, 1895*

**Oakland Water Company:**

Mr. Boardman, Engineer for the Oakland Water Company, addressing the Board of Supervisors concerning the Alvarado Road matter and presented a map showing the course of the Alameda Creek, and how the evils of the complaint could be remedied. Upon motion of the chairman of the board, a representative was empowered to see Mr. May and ascertain whether he would close the gap and prevent water from flowing out of the original channel, or whether he would allow Mr. Boardman for the water company to do so.

**Alvarado Water:**

Professor E. W. Hilgard of the Experimental Agricultural Department of the State University at Berkeley in an open letter attested to the softness and purity of the water from the Artesian wells at Alvarado delivered to customers of the Oakland Water Company. He completely refutes the allegations initiated by the Contra Costa Water Co. made against the Oakland Water Co.

**SP Puts in New Track:**

The Southern Pacific Railroad Company is building a new piece of road in the central portion of the county to accommodate the beet-sugar industry that flourishes in Alvarado. The section will be standard gauge and run from Alvarado on the narrow gauge to a point near Decoto on the broad gauge, a distance of about two miles.

The beet-sugar raisers bought the right of way for about \$5,000 and presented it to the company. By the new line the sugar beets can be more cheaply transported from the farms where they are raised to the factory, and the product of the factory can also be much more cheaply transported into the interior. It is expected that the line will be in operation within sixty days.

### **Sabotage at Alvarado Artesian Wells:**

The Oakland Water Company, which pumps water to the city from the artesian wells at Alvarado, delivered salt water to its customers for an hour or two on Tuesday, to the surprise of everybody who had occasion to drink the saline mixture. The cause of the trouble was soon discovered. A wooden pipe from one of the newly dug wells crosses a small salt slough on its way to the pumping works. Somebody, who is yet undiscovered, cut a hole in the pipe and the salt water was sucked up by the pumps. The break was easily remedied. The company has offered a large reward for the detection of the offender.

**Water:****Headlines:****CALLED A DASTARDLY OUTRAGE****THE CONTRA COSTA (WATER CO.) PILLORIED****ALVARADO WATER ROBBERY DENOUNCED WITH FERVOR**

Twenty-six pre-eminent citizens of Oakland California visited the Oakland Water Company Pumping Plant in Alvarado. Here they witnessed the Contra Costa's effort to bankrupt the Oakland Water Co. by pumping clean fresh water into the marshes and Bay.

From George W. Baker, prominent Oakland attorney, "It is a dastardly outrage that the opposition to the Oakland Water Co. (by the much larger Contra Costa Water Co.) has proceeded to this extremity."

Mr. Baker explains: "I went to Alvarado yesterday not only free of all bias favorable to the Oakland Co. and devoid of prejudice against the Contra Costa Co., but utterly disbelieving the newspaper reports concerning the actions of the latter company and the allegation that their agents were endeavoring to deplete their rivals water supply by pumping from wells tapping the same source and running the water obtained wastefully and wantonly into the marshes. I say that I did not believe, for I considered such methods too contemptible for honest men and beneath the dignity of businessmen under any stress of business rivalry."

All the businessmen agreed they saw evidence that millions of gallons of water had been pumped from wells within several hundred yards of the Oakland Water Company wells and the output of these wells were diverted into the marshes and eventually into the bay by a series of channels and flumes.

No citizen cognizant of the condition affairs in Alvarado is more earnest in his indignant censure of the perpetrators of the outrage than Christian Schreiber ([Oakland](#)).

"Like the others who went with me to Alvarado I could not believe anybody could be guilty of the acts we saw committed there," he said in an interview yesterday. "I cannot find the words strong enough to express my opinion of the men who would assist in such a dastardly waste of pure water as those people are pouring over the marshes of Alvarado."

"I am a patron of the Oakland Water Co. I prefer the fresh pure water of these Artesian wells to the filthy compound that the Contra Costa Water Company serves to its patrons. My neighbors prefer the Oakland Water Company and are using it. And because we refuse to patronize the Contra Costa Company an effort is being made to deprive us of this supply is outrageous."

### **Sugar:**

The Alameda Sugar Company and the Spring Valley Water Company have settled their difficulty over their rights to the water from the Alameda Creek on the formers land at Alvarado. The sugar people have agreed to withdraw all their claims and dismiss all their suits against the water company touching the question of ownership of the riparian rights in the creek and its tributaries and feeders on the sugar company's land.

The litigation and disputes over the property have been amicably adjusted and compromised. In return for the release of all claims against the water company the sugar company has accepted \$1,423. They have in the same connection deeded to the water company all their riparian rights in the creek on the seventy-two acre tract of land at Alvarado through which it runs. By the term of the deed the Spring Valley Company is given the right to dam the creek in such a way as it may see fit.

This will give the water company an opportunity to divert a larger volume of water to its source supply of the big feed pipes that run from Alvarado across the bay and furnish water for a portion of San Francisco. The difficulty over that portion of the creek has been of long standing and its settlement is probably a gain for both parties.

#### **Comprehensive Review:**

(Taken from The Woodland Daily Democrat)

With the price of wheat and barley suffering from production outside of the United States, various crops were discussed and those most seriously considered and which, promised the best results for the high and low lands, respectively, were flax and sugar beets. As very little was known about the latter, it was decided to send a delegation to Alvarado and Watsonville, the greatest beet growing regions in Northern California with instructions to ascertain as much as possible about the cultivation of the beet and its adaptability to our soil and climate. The committee selected consisted of R. J. Curry, O. O. Agee, Judge John Currey and A. L. Henry, and they were given power to add to their number.

A start was made on Thursday, the 24<sup>th</sup>. Alvarado, a town on the narrow gauge railway about twenty miles from Oakland, and the location of the Alameda Sugar Company's works, was the first place visited. We were fortunate to find in the proprietor of the local hotel, F.B. Granger, the pioneer beet grower of the state. To Mr. Granger and his son the committee is indebted for much valuable information. Nine or ten years ago, Mr. Granger was engaged in the growing of chicory for a company in which Claus Spreckels was interested. The business was not lucrative and Mr. Spreckels, who was then as he is now, largely interested in the sugar business, suggested that he

try the experiment of raising sugar beets as the soil was very similar to that to be found in Germany. The beets grew fairly well and a sufficient number of farmers were induced to go into the business to warrant the erection of a factory. For several years both the yield and percentage of sugar was very low on account of a lack of knowledge as to how the beets should be cultivated and the factory, although an expensive affair was of crude construction as compared to the present institution. A great deal of money was lost by the stockholders before the beets reached their proper degree of development in saccharine matter and improved machinery had been devised by which a paying amount of sugar could be extracted. Within the past four or five years, however, both the factory and the surrounding district have been highly prosperous. The farmers are contented, the factory owners are receiving a good return on their investment and the best of feeling prevails between the two.

The country in the vicinity of Alvarado is a fine fruit and vegetable district. Apples, strawberries, blackberries, tomatoes, rhubarb, potatoes, etc., attain to rare perfection and flavor, yet we heard much complaint from the farmers in regard to low prices of these commodities and from careful inquiry we concluded that beets, while not realizing the fabulous profits derived from fruit and vegetables in time of scarcity elsewhere, was the crop on which farmers placed their main reliance. Enabled to make his contracts a year in advance at a practically uniform price the grower is relieved from the anxiety of attending a constantly fluctuating market and pursues his farming operations with the confidence of a sure crop, as by the methods of growing beets now in vogue a failure is impossible, and with the realization that he will receive his money as soon as the crop is delivered. With reasonable care there need be no loss in harvesting and there is no danger of his product rotting in the ground. The price is practically established, varying but little from year to year and it allows a fair and certain profit.

The soil in the vicinity of Alvarado varies greatly. It ranges from the light sandy loam, subject to annual overflow, to black adobe on the highest land. There is, however, a middle ground of alluvial soil with a considerable mixture of sand, which bears a strong resemblance to what is called in Northern Solano, Dixon ridge land. On the lower lands the quantity of beets is perhaps greater than on higher lands alluded to above but on the latter the beets have a greater degree of saccharine matter. The product of beets varies greatly. There are numerous instances of a yield of 26 tons and over but the average yield is about 14 tons on the higher lands to about 15 or 16 tons on the lower. The percentage of sugar runs in an inverse ratio being about 14 for the higher and 13 for beets grown on the lower lands. Many beets are brought to the mill in which the polarization runs as low as 8 or 10 percent but it is hardly profitable. It is a noteworthy fact that as the farmer becomes more skillful in the cultivation of this crop, both his yield and saccharine average increases steadily until it reaches the maximum. There is thus every encouragement for scientific farming and we noticed very little slipshod methods in the beet district, which are only too often the rule in grain-growing communities. Close attention is paid not only to the cultivation of the soil, but also to its preservation. Subsoiling, manuring and rotation of crops are there reduced to a science while as yet with us they are comparatively unknown. Beets require the most thorough cultivation of which the land is capable. The earth must be mellow and moist and the whole season through and must be completely free from weeds. After the crop is removed, the tops, which are cut from the beets, are left on the ground for manure and the most careful farmers add further to the soil by compost composed of bone dust and guano. Rotation of crops is a necessity although there many instances where successive crops of beets have been raised on the same land. At Alvarado a crop of barley always follows a crop of beets. At Watsonville there is still great variety. The order there is a crop of potatoes, a crop of beets and a crop of barley. In this way the soil is not left to deteriorate in the least. Some authorities claim that beets do not exhaust the soil, but it is scarcely likely that a crop can be grown on the same soil year after year without appreciable loss.

Two varieties of beets are grown, one white and the other reddish in hue. The former grows best on the higher lands and the latter grows best on overflowed lands. There is no apparent difference in the sugar-bearing qualities.

In planting, the ground is plowed thoroughly to a depth of 12 inches, then replowed and pulverized. The seed is planted with a special drill, with forced feed, in rows from 18 to 20 inches apart, which allows for horse cultivating. Planting is done after the heavy winter rains but the exact time varies with the seasons and soil conditions extending from March to June. The seed is imported from Germany and is selected with the greatest of care. It is furnished by the factory at a cost of about \$1 an acre.

When the beets are well above ground they are thinned until about six inches apart. This insures a beet, which is not too large. The factory will not receive beets weighing above five pounds and prefer those weighing between one and two pounds. The beets are cultivated according to the condition of the soil and the growth of the weeds. The beets are ready for harvest when the lower leaves begin to turn. This will be in July or August on the higher lands and later on the lower lands. The beets are plowed out with a single plow of special construction, drawn by three horses. They are then topped off by cutting off the green tops and that portion of the beet extending above the ground. There is no sugar in this portion, and it is imperative that this portion is removed. The beets are thrown into heaps in the field whence they are hauled to the factory and weighed. The allowed the net weight, less a slight deduction on account of dirt and sunburned tops. They are then piled into huge bins and the farmer's contract is fulfilled.

Through the courtesy of the Superintendent, J. W. Atkinson, we were permitted to inspect the beet factory, which is owned by the Alameda Sugar Co. The factory is the pioneer in the sugar manufacturing business, having been established ten years. The factory is considerably smaller than those at Watsonville and Chino, but it has been remodeled in the past few years and is now a very complete mill, admirably managed, and turning out a high grade of sugar. This is the only factory in the state producing the white sugar of commerce from the beet under the same roof. The mill consumes about 350 tons of sugar beets a day and produces from 35 to 40 tons of sugar in the same time. The process of extracting sugar is very complicated. A full description would doubtless be of interest but it is scarcely within the province of this report and we will be compelled to reserve it until some future occasion. The original machinery was of German manufacture, but much has been replaced with American machinery, which is lighter and does better work with less cost for labor. The total cost of this factory was \$500,000 but Superintendent Atkinson informs us that a factory could now be built for the same money, which would have a much larger capacity. A good supply of water is essential to a sugar factory and is derived mainly from artesian wells, although the factories are generally located near a stream, the water of which is utilized to a considerable extent. Lime is another important item, about 15 tons a day is being consumed at Alvarado. It is derived from lime stone quarried in Santa Cruz County and is burned in kilns at the factory. The fuel used is Welch coal, burned with a forced draught and 30 to 35 tons are used daily.

E. C. Burr, the manager, was at the factory on the occasion of our visit and gave us a great deal of valuable information concerning beet cultures. He informed us that the tidy sum of \$1,400 a day was being disbursed during the season, September 1<sup>st</sup> to December 15<sup>th</sup>, to the farmers, besides the wages paid to 125 hands employed in and about the factory. He further said that he believed the farming community to be in a highly prosperous condition, due mainly to the growing of beets. When the factory was first opened the company was compelled to advance the money necessary to pay the expenses of growing. Now the farmers are entirely independent of the company in this respect, although they were still making advances to a number of farmers who have lately embarked in the business. A great many of the farmers in the neighborhood are Portuguese. Mr. Burr explained the reason for this from the fact that beet-growing, like gardening, is laborious work and is peculiarly adapted to the Portuguese, who are a thrifty class, and secure the best results from the land. The American farmers could do the work as well but as they own the land they found it more profitable to rent it on shares or for cash, securing from \$10 to \$20 an acre. There are however, many of the pioneer residents of the neighborhood who have been actively engaged in raising beets for four or five years past and their prosperity is apparent

in fine residences and handsome equipment. The value of the land ranges from \$250 to \$350 an acre. While the proximity to San Francisco and its value as fruit land have something to do in setting the price, it is evident that the beet culture is the main consideration as there have been no depreciation whatever during the financial depression, while sections nearer to the city (SF) have suffered greatly in the same time. Mr. Burr admitted that he is not familiar with the Northern Solano section but said that there are thousands of acres of good beet land in the Sacramento valley and he had no doubt that could be grown successfully in this section. He thought the plan of experimentation was a good one and offered to make any tests required to give the farmers the benefit of the prevailing price, less the freight charges. He also tendered the use a drill for planting. As might be expected he could give us no encouragement in the matter of establishing a factory but he believed if we demonstrated our ability to raise good beets and secure a large enough territory in the neighborhood, which was adapted to their culture, capitalists could be induced to erect the necessary works. Several thousand acres of beets are required to run an ordinary sized factory and only one-half or less can be utilized each year.

(Such is the report brought back to Northern Solano County by the committee to investigate the beet culture in Alvarado and Watsonville)

**Sugar:**

An interesting feature of the season's management of the beet sugar works at Alvarado, which will close next week, has been the disposition of the pulp after the sugar has been extracted. The company has a dairy ranch, which it leases to parties, who keep 150 head of cows, but this number of animals can devour only a fraction of the immense quantity of the pulp produced, and an effort has been made to sell the residue. Farmers are generally not informed about the value of the pulp of the beet for cattle food, and have been slow to recognize it, even at the low figure of 50 cents per ton. The company has been giving away the material to any dairyman who would go for it, and the manager states that he has seen as many as twenty-six farmers' wagons in line at 6 o'clock in the morning waiting their turn to pass under the chute and obtain a load.

President Howard, of the Alameda Sugar Company, believes that this year's experimenting will satisfy the farmers that the food has a value and that next year there will be a demand for it. In Europe the question of the nutritious and milk-producing power of the beet food has been exhaustively studied and the verdict is in its favor.

*The San Francisco Call, December 3, 1895*

**Sugar:**

The exact number of pounds of sugar produced at the mill at Alvarado this season was 5,400,263 pounds, from 27,385 tons of beets. From Pleasanton 445 cars, or 8,500 tons were received. The balance was raised about the factory. There were 1,548 acres of beets around Washington Township. Pleasanton had 853 acres planted. One hundred and twenty four men were employed in the factory during the campaign, and about \$25,000 was paid out as wages. The pulp or leavings after the sugar had been extracted was given away this year, and farmers for miles around came to carry it home to feed to cattle. Last season a charge of 50 cents per ton was made for this pulp. An average of fifteen tons of beets to the acre was raised this year, for which the farmer received \$4 per ton, delivered at the mill. The company has a great deal of this season's product stored in their warehouse, owing to the low price of silver.

**I O O F:**

Mr. Farley B. Granger, Jr., addressed the body of the meeting on the topic of the 36<sup>th</sup> anniversary of the founding of Crusade Lodge, No. 1695. The date the lodge was founded was November 26, 1859 and the impetus behind the creation was Charles S. Eigenbrodt; farmer, civic leader, Captain of the famous "Alvarado Hundred," and Civil War Hero who died in battle in the Shenandoah Valley.

Before the inception of the Alvarado Lodge, Capt. Eigenbrodt was a member of the Templar Lodge, IOOF, in San Francisco. When locals balked at belonging to a lodge so distant it was decided to establish an Alvarado IOOF. This was spearheaded by Capt. Eigenbrodt and brought to fruition on November 26, 1859. Some of the early members included: Capt. Eigenbrodt, Joseph Hawley, William Hayes, A. E. Crane, R. J. Horner, W. M. Liston, W. H. Hawthorne and George Simpson.

### **Alvarado School District Boundary:**

Alvarado School Trustees, Emery, Proniz and Ralph and a number of residents of Alvarado have asked for change in the boundary of the school district as follows:

Leaving the old line at the SW corner of the land of I. B. Haines, following easterly to the line between I. B. Haines and Wm. Meeks to the westerly line of the land of John Whipple, thence southerly following the line between the said John Whipple and W. Meeks to the county road leading from Alvarado to Niles, thence easterly along said road to the NE corner of the land formerly owned J. B. Sherk, thence southerly along the eastern line of said land of J. B. Sherk to the center of Alameda Creek; thence down said creek to the northerly corner of S. P. Harvey's land on the southerly side, then to follow the old line of the creek.

These boundaries include a district, the children of which have always attended the Alvarado School, instead of the Decoto School; of which the district territory referred to is a part. It is desired by the change that the territory be made part of the Alvarado district. The petition was endorsed by the Superintendent of School, J. P. Garlick, provided no objection is made to it by the trustees of the Decoto District. The matter was laid for one week.

#### **Salt:**

One of the most exciting public sales of property that has taken place in this city ([Oakland](#)) for some time occurred at the front entrance to the Court House this morning. It attracted about 200 interested spectators. The property involved is some 200 acres of salt marsh near Alvarado, in this county, and is known as the Union City Salt claim. It has been operated by E. P. Kerrison, Mrs. Maria Webber, Osgood Putnam and P. Marsicano. The land is valued at \$18,000 and a spirited bidding war soon erupted between Marsicano and Putnam. When Putnam bid \$12,000, Marsicano withdrew. Putnam was elated over the sales price.

#### **The Angler:**

The late rains have very materially interfered with the sport of anglers. Excepting the small streams, which empty into the creeks that usually afford good fishing at this season of the year, the prospects for respectable catches of trout are not by any means favorable for tomorrow.

Previous to the recent downpour the creeks that have generally afforded good sport to local anglers contained large numbers of trout, and the outlook for a very successful opening of the season truly excellent, but King Pluvius put a damper on the expectations of the knights of the rod, and as a result the future prospects for good fishing are decidedly problematical.

Frank Hoffling of Haywards has discovered a new fishing ground, which gives promise of being well patronized by midwinter fishermen who sit and wait for results. Mr. Hoffling came to this City ([S.F.](#)) yesterday purposely to purchase strong rods and tackle, which he contends are unquestionably necessary to successfully handle and capture the big steelheads that are loafing in a lagoon, which is within a short walk of the town of Alvarado.

"I was shooting robin snipe near Alvarado last week," said Mr. Hoffling, "when I met a country fellow tramping along the marsh with a willow pole in his hand."

"I was inquisitive enough to ask him what he was after", and the fellow answered, "salmon." I could not help smiling at the idea of a person catching salmon in a slough near Alvarado, but

when he invited me to accompany him to the happy salmon fishing grounds, I thought that there might possibly be something in it, and off we started for the prospective angling waters.

"Here is the spot, sir," said my friend, "where I landed two big fellows yesterday and got cleaned out by a third." I watched him straighten out his line, which was strong enough to hold a shark. He then impaled six large ground worms on a No. 6 hook, and an awkward cast was made into the pool, which was, I guess, five or six feet in depth.

We did not have to wait long for results. A three pounder had taken a good hold of the baited hook, and as it was making off with the prize the rustic angler struck quickly, and then a yanking match between man and fish followed which would have made the great and only Frank Dolliver blush for shame.

The steelhead, or salmon, so called by the country fellows, was conquered in less than ten seconds, and then I realized for the first time that my newly formed acquaintance informed correctly as regards steelhead fishing in the Alvarado lagoon. Before I took my departure I witnessed the capture of two beautiful fish all about the same in size and weight. Unless it rains between now and Sunday I will be in for some grand sport.

**Alvarado Water Works:**

Here is a brief synopsis of the visit of the Oakland Merchants Exchange (some 70 people) to the Alvarado Water Works:

The Oakland merchants disembarked at the Southern Pacific Train Depot in Alvarado where they found conveyances ready to take them to the water works on the Union City side of town about one mile from the train depot. The drive was made in a short space of time although some of the merchants decided to walk instead. The day was beautiful, there was a breeze blowing from the Bay, the keenness of which was modified and given rather a bracing and inspiring effect by the genial warmth of the sun.

As the visitors passed through Alvarado they were greeted by the merchants of the place, a compliment of which was also intended for the projector of the works which had done so much to bring the name of the little town into prominence.

At the entrance to the grounds W. J. Dingee stood and shook hands with his friends and welcomed them to the work. The guests then divided themselves into several parties and under the conduct of Mr. Dingee, Frank Moffitt and W. F. Boardman, respectively; the last mentioned the engineer who is in charge of the works inspected all features of the facility.

The guides had little to tell, because everything is visible to the naked eye and its own story in more satisfactory terms than could have been detailed in words.

**Miss Dora Joyce** is visiting her sister, Mrs. Laufer in San Francisco.

***The Hayward Review, July 3, 1896***

### **Water:**

The Oakland Water Company is not anxious for a repetition of the "demonstration" made on their main pipe at Alvarado last Fourth of July. On that occasion, a section of pipe was blown up at Alvarado, where it crossed the marsh, and the salt water got into the main and caused much trouble and unpleasantness. Today President Dargie employed twenty men to patrol along the line of the trestle to protect against a similar piece of vandalism.

***The San Francisco Call, July 4, 1896***

**Contra Costa Water Co:**

"The Contra Costa Water Co. has started its pumps again in the old glue factory." This was the message, which came over the phone to Wm. Dingee, President of the Oakland Water Co. An investigation proved this to be true.

As is understood the Oakland Water Company obtains its water from a system of Artesian wells near the town of Alvarado. These wells have been flowing for a third of a century and the quality of the water they furnish for softness and purity is unsurpassed in America. The Contra Costa Water Company, the desperate and vicious water monopoly from Oakland, in an effort to undermine and bankrupt its new rival set up pumps at the old glue factory in Alvarado and pumped pure water into the marshes and the Bay night and day for months. Billions of gallons of clear soft water were wasted by their effort. Last August a public outcry was heard and the Contra Costa Company stopped their wastefulness. But now they are back it again, pumping pure Alvarado Artesian water into marshes.

### **Sugar:**

A canvass of the political feelings of the men employed at the **sugar mill** here was made yesterday with remarkable results. There are 140 men employed now that the mill is in full swing, and out of this number McKinley is the favorite of 140.

"This result is not surprising," said Superintendent Atkinson, "because without protection, every one of these men would be thrown out of employment. We could not run these mills if we had to endure four years of such policy as Bryan has outlined. The expression of our men is certainly a practical one."

***The San Francisco Call, October 2, 1896***

### **News Notes:**

Ed Weston, of Irvington, will take the place of Ed Farley on the Alvarado butcher wagon. It is said that Ed is planning to go to Oregon.

### **Game Warden Report:**

SAN LEANDRO, SEPTEMBER 29, 1896

Sporting Editor: Sir, while traveling through the county performing the duties of my office I will say, for the benefit of hunters, it appears to me that quail will be very plentiful in Alameda County this year, and if hunters continue to respect the law as they have been doing they will be amply rewarded when the season opens. There also seems to be an unusually large amount of young ducks around the marshes, especially in the vicinity of Mt. Eden and Alvarado.

I have just stocked the Alameda Creek above the forks of the Calaveras and Alameda Creeks with 50,000 lake trout. During the month of September I arrested three violators of the fish law. They were convicted and fined \$50, \$20 and \$20 respectively. Yours respectfully,

J. L. Donovan

Fish & Game Warden, Alameda County

### **Oldest Odd Fellow in the U.S.:**

Some time ago *The Tribune* discovered in Oakland a gentleman who claimed that he was the oldest Odd Fellow in the United States. Since then the gentlemen in question has gone to his reward. Now Alameda County and California comes to the front a second time and claims the distinction of having within their borders the oldest member of this well-known order. By a singular coincidence he is a resident of Decoto, in Alameda County, where, on Wednesday next the cornerstone of the Masonic Widow's and Orphan's Home is to be laid with imposing ceremony. The claimant is James W. Hawley. He asserts that there is no Odd Fellow in this state older than himself and that he makes the statement after having looked into the matter with a great deal of care. He is now 74 years old and says that he has been a member for 53 years. He was born in Orange, New Jersey in 1822. He joined the Odd Fellow Lodge at that place in 1843, remaining there until 1848. He came to California in 1849 and joined the Templar Lodge. In 1859 he helped found the Crusade Lodge at Alvarado, in this county, being one of five persons to contribute \$10 each for that purpose. Alvarado Lodge is one of the oldest lodges in the state of California. Mr. Hawley has been through all the chairs twice, and having been the recipient of all these honors contents himself with occupying the senior seat

### **Alvarado-Centerville Road:**

The County Board of Supervisors has passed a resolution to have the road between Alvarado and Centerville raised, macadamized and improved.

*The Oakland Tribune, October 17, 1896*

### **Spring Valley Water Co.:**

The Spring Valley Water Company has brought a condemnation suit against the lands of Jesse L. and Elizabeth Beard for water rights to some 3,000 feet of Alameda Creek water flow. The plaintiffs argue they supply water to the City & County of San Francisco and growth in that city requires a greater volume of water. The Beard's acknowledge a gradual growth in San Francisco but claims that Spring Valley does not need their water. The land in question is about 203 acres formerly known as the Beard Homestead Tract.

### **Marriage:**

Harley Albert Postlewaite, 43, of Alvarado; and Louise C. DeWitt, 26, a resident of Oakland.

*The Oakland Tribune, November 2, 1896*

### **Election:**

The election is passing very quietly in Alvarado although the keenest interest is being taken in the results. The town will undoubtedly go Republican with a big majority. Nearly all the votes have been polled already.

*The Oakland Tribune, November 3, 1896*

### **Ducks:**

The duck and quail hunters have been kept busy this week. Birds are reported plentiful on the Alvarado and Sonoma marshes. While in the lower part of the county, quail are numerous, although somewhat shy. At the clubhouses and on the preserves, there are many hunters, while the several parks are also well peopled. Teal, mallard and canvasbacks are coming in well, while snipe and rail are more plentiful this year than for many previous seasons.

*The Hayward Review, December 18, 1896*

**Sugar:**

The first sugar beet refinery to be established in the United States was erected in Alvarado in 1876. It is owned by the Alameda Sugar Company and was organized on a small scale, from which it has grown each year by year until it has come to be recognized as one of the thoroughly successful industries of the State.

This growth was made against seemingly overwhelming obstacles, each obstacle being met and overcome as it arose, and the result is a monument to what perseverance may accomplish.

This year the factory is making one of its longest runs it has ever known. It will not finish the season's crop before the end of January, the crop this year being an enormous one. There is still something like 10,000 tons of beets to work.

This year the sugar being turned out by the Alameda Sugar Company at Alvarado is extremely fine. The beets contain a larger percentage of sugar and the quality pronounced by sugar experts to be of an unusually superior grade. One Hawaiian cane planter who visited Alvarado a short time ago gave us an opinion that the sugar given to him for examination could not be excelled by any cane sugar anywhere in the world. Unlike the Spreckels factories, the Alvarado plant refines the sugar it makes.

*The Oakland Tribune, December 23, 1896*

#### **Stove Foundry:**

The stove works owned by George Tay & Co. at Alvarado intends to double its present capacity at the beginning of the year. The factory has been closed this week, during which time its capacity will be doubled ready for the reopening. Superintendent Charles Nauert said today that the increase of business is due to the election of McKinley, which has restored confidence, increased the demand and compelled the works to enlarge their business.

#### **Chinese Wedding:**

Society in Alvarado will be treated tomorrow to a first class oriental wedding on the American plan, because Hing Ball, a prosperous young merchant will lead to the altar or more properly the forum, for Justice Richmond has been retained to tie the knot between Hing Ball and the pretty Si Ying. The groom, accompanied by the justice and Howard Tong, a friend, dropped into the County Clerk's Office this morning and Hing informed Deputy Ewing the "like cathch'em lisansey." The paper was made out and, at the request of the groom, a picture of himself and wife were

attached thereto. By special invitation Clerk Ewing agreed to pass a week with the young couple, and Hing, with his face wreathed in smiles, departed.

The groom with his three brothers conduct a store under the name of Sun Kee Company at Alvarado and the firm has made money. Miss Si is 24 years of age, or six years the junior of her prospective lord and master. She came from China about four years ago to visit her brother at Alvarado and suitors were numerous, for the girl is, according to oriental ideas, bright and pretty. She finally decided to give her hand to the young merchant.

*The Oakland Tribune, February 1, 1897*

#### **Flood:**

Alvarado was visited today by the heaviest flood that has been known here since 1871. The heavy rain that fell during the night gradually overspread the swampy side surrounding the town until there was two or three feet of water upon many square miles of land in that vicinity.

About 9 o'clock the water rose suddenly, and two houses lying of the outskirts of the town were washed out and their inmates were forced to retire to higher ground in a boat. Up to noon the water continued to rise and rushed toward the creek, which was altogether inadequate to carry it into the Bay.

About 1 o'clock the cry was raised that a young lady was drowning in the creek. A rescuing party started for the spot and found the little son of Mrs. Young battling for life in the turbulent waters. Several men rushed in and by the aid of a raft consisting of some logs of wood they succeeded in rescuing the boy and bringing him to land, although he was very nearly drowned before he was restored to his excited mother, who had been screaming from the bank during the whole time her child was being saved.

Miss Anne Wilson, a milliner, also had an equally narrow escape. She was making her way along the edge of the creek when she was swept off by the flood and carried into the water. At that point the water only came up to her waist and she was able to prevent being swept toward the Bay until assistance reached her. With the exception of a wetting and a very acute fright, Miss Wilson did not suffer any serious injury.

Postmaster E.A. Richmond said tonight that the flood is greater than has been known for twenty-five years. It came up more suddenly than any previous flood and passed over to the Bay so quickly that less damage was done than on many occasions when the flood was not so severe. The Santa Cruz train was able to go through at 4 o'clock, and by 6 o'clock the waters had subsided and there was no more danger.

#### **Flood:**

Alameda Creek is rising steadily. The banks have been completely overflowed and the water has entered many cellars. The ground floor of the home of George Lang is six inches under water. No other property has been destroyed. Residents do not anticipate any damage.

*The Oakland Tribune, February 5, 1897*

#### **Flood:**

The rainfall at Alvarado has been so heavy that the place has been flooded. The street looked more like small creeks than thoroughfares and the people have had a merry time getting about. Two or three houses near the creek were washed away and it is said that some people had narrow escapes from drowning. The flood was greater than any seen in the last twenty-five years.

#### **Around Town:**

Mrs. Beebe's new house is nearing completion.

Very rank shows were held in town Tuesday and Wednesday evenings.

There is not a vacant house in town. Four new ones are soon to be built and are already rented. Wm. Atwood, of Oregon, is visiting Dr. C. A. Hauber. Mr. Atwood is a student at Toland Medical College.

Judge Richmond has been confined to his bed the greater part of this week, but is now up and doing nicely.

The Goodall family who have lived near the sugar mill the past two years, moved into the Schmidt house this week.

H. Henzen, O. C. Keller and C. W. Heyer of the German Savings & Loan Society spent Sunday with Gus Nauert.

Mrs. E. A. Wagner has invited a number of her friends to her home Thursday to meet Mrs. White of Oakland, who is her guest.

The Christian Endeavor meeting Sunday evening at 8:30 o'clock will be lead by Mrs. J. M. Scribner. Sunday School will be held at 1:15 p.m. and church services at 2:30 p.m. A cordial invitation is extended to all.

Dr. Geo. F. Vanderlip of San Rafael will be at the Riverside Hotel the 20<sup>th</sup>. All needing any dental work should give the Doctor a call as he comes highly recommended.

It is authoritatively reported that at least three couples will be joined in the holy bonds matrimony. If it keeps up as it has been there will be no "maids" left in this town.

Fritz Zeesmeengees of Bremen, Germany, is being entertained by the family of his uncle, Mr. Adolph Muller of Alvarado. He is delighted with our glorious country and intends to stay many months rather than just a few days as he had originally planned.

Lodges are booming in Alvarado, especially the AOUW Nineteen applications were received at their last meeting. A special meeting will be held for the purpose of initiating the new candidates this Friday evening. The Pacific Drill Team from Oakland will be on hand to help.

A masquerade ball will be given by the Misses Paul, teachers of dancing, in the IOOF Hall Monday evening, February 22, 1897. Admission, including supper, is \$1. The dances given by these young ladies are very pleasant.

### **Flood:**

For the first time in many years the hills around Alvarado are covered with snow. During the past two days snow has fallen at intervals and although it melted quickly in the lowlands there is a thick covering on the hills that was added to this morning.

On account of there being so much snow and hail with the storm, there is not as much flooding as in the storm two weeks ago. In the district where the Chinese live, which is very low land, there are several feet of water in some of the huts and the inhabitants are moving to higher ground.

Much of the scanty household furniture of the Chinese was washed out into the creek and the poor fellows spent hours in trying to save it. One of the Chinamen nearly lost his life trying to save a soaked straw filled mattress.

### **Snow at Alvarado:**

At Alvarado much snow has fallen, and for the first time in years, the hills are white almost to their base. On account of there being so much snow and hail with the storm there is not so much flooding at the salt marshes as there was two weeks ago. The Chinese district is overflowed and many of the inhabitants have been forced to move to higher lands after having their furniture destroyed.

### **Sugar:**

The large building used as a sugar mill at Alvarado is being remodeled. A large force of carpenters is making great changes in the looks and the size of the building. It will take several months to make the contemplated changes and place new machinery for the increased capacity. The machinery will all be housed in one big building instead of two or three as in the past. The output of the mill will almost be doubled when the changes are completed, and in the neighborhood of 1,000 tons of beets per 24 hours will be converted to sugar.

**Hattie Parish Harassed by Tramps:**

Mr. Parish, one of the oldest ranchers near Alvarado, is anxious to run across three tramps that intercepted his daughter a few days ago while she walking from the ranch into town. The farmer declares that he will have use for his gun should he meet these gentlemen.

Last Thursday afternoon Miss Hattie Parish, sister of the schoolteacher at Centerville, was on her way to Alvarado from her home. When about halfway between the two places, she was met by three tramps. One of them accosted her and continued the conversation for a few minutes, trying to make it appear that he had met Miss Parish at a mask ball recently given in Alvarado. The other fellow kept on behind and finally the first one asked her if she were going into town to make purchases, and suggested that such a journey would necessitate the use of money.

Miss Parish had several dollars in her purse, and when her companion reached this point in the conversation the other two started to close in around her. Frightened to death, she jumped off the railroad track on which she had been walking and started back toward her home. The tramps ran after her, but she was so frightened that she succeeded in leaving them behind until they came to a plowed field in which was about two feet of mud. Without hesitating a moment Miss Parish started to cross the field, every step she took landing her in mud up to her knees. One of the tramps followed her half way across, but then gave up the chase.

The young lady arrived home a few minutes later in a highly nervous condition and has since been suffering from prostration. Her father started out with his gun and, procuring the aid of the constable, went in search of the tramps. As that part of the country is at present all under water they could not travel very fast and the band of villains have not yet been captured.

Miss Parish is very popular at Centerville, and it will go hard with the men who intercepted her should any of her friends run across them

#### **Sugar:**

The Napa Board of trade is hard at work at the beet sugar interest. As a result of correspondence, J.W. Atkinson, Superintendent of the Alvarado sugar factory, went up to Napa last week and made a tour of inspection with Messrs. E.H. Winship, E.D. Beard and W.F. Ingalls. President Winship furnished the rig and entered with spirit into the matter of enlightening Mr. Atkinson concerning the quality of the soil and the advantages generally presented along beet sugar lines. Mr. Atkinson was favorably impressed with what he saw and heard, and said much to encourage the effort now being made to induce the planting of 300 or more acres this season to sugar beets. He proposes to furnish seed at 12 cents per pound, and the sower used in planting it, also the plow used in pulling beets. The grower will be paid \$4 per ton for his beets delivered at the Alvarado factory, less \$1 freight. It is proposed to secure signers to a contract in sufficient numbers to guarantee the 300 acres wanted, as a test in Napa Valley, at once, and farmers as far north as Oakville will be considered eligible as planters under it. In Contra Costa County they have for a number of years been raising beets on the terms proposed, and each year increased the acreage until this year will plant 1,000 acres and get the benefit of an 85 cent freight rate. The beets are milled at Alvarado.

### **Sack of Flour:**

The State Board of Trade has now the first sack of flour manufactured in California. The flour is in a sack of white satin, upon which is a label setting forth that the contents were milled at Horner's Mill in Union City, California from the wheat crop of 1850. A certificate is also attached to the sack stating that it was exhibited in 1853 and awarded a prize of \$100. If we are not mistaken the mill was in Alameda County, as there was a Union City near Alvarado where some manufacturing plants were operated.

### **Sugar:**

The editor of the *Santa Ana Blade* is facetious at times and evidently believes the editor is worthy of his hire. The latest proof of this is:

"The Alameda Sugar Company has kindly forwarded the editor of this paper a blank petition asking the repeal of the reciprocity treaty now existing between this country and the Sandwich Islands ([Hawaii](#)). With the petition comes instructions to circulate the same for signatures of the voters of Orange County, after which, it is to be forwarded to Washington. The Alameda Sugar Company has our hearty thanks for thus giving the editor of the *Blade*, who of course, has nothing else better to do for the next two or three weeks. When the task is completed to the entire satisfaction of the company we hope to get another job."

### **Around Town:**

Miss Kathryn Owen of Oakland is visiting with relatives.

La Mar Fleischner and Riley Jury each purchased a tandem this week.

Wisteria Parlor, No. 127, **NSGW**, initiated four new candidates this week. After a month's visit in San Francisco Miss Kate Mathews is again home in Alvarado. Miss Frances Mathews of San Francisco is visiting her parents, Mr. & Mrs. Mathews. Miss Emma Dellwig of San Francisco is being entertained by Mrs. S. Beebe of Alvarado. Mrs. A. Charvoz and son Elton of San Francisco are visiting the formers mother, Mrs. K Ralph. E. A. Richmond has returned from San Francisco where he attended the Grand Lodge of AOUW. E. L. Haines will represent Wisteria Parlor, **NSGW**, at the Grand Parlor in Redwood City. The election for supplying the pulpit of the Presbyterian Church took place in the church last week. It was decided to give Mr. Shyer the call. Edwin Huff, Proprietor of the Alvarado Bus Company, contemplates purchasing a fine stage. Four spirited horses are to draw the above-mentioned stage. It is also reported that he will in the near future conduct a livery stable. Talk about "booming" no town in the county can compete with Alvarado. The two old Lattin buildings are being raised and the interiors are being newly remodeled and plastered. A new front will also be added to their beauty. Mrs. Faig's new hotel will also be a great improvement and will have 25 rooms. The Machado house, occupied by H. Henrickson, has been moved where it stood to the extreme east end of the lot. The house just finished on the same lot, owned by **S. Beebe**, is now occupied by Mr. E. Weston and family. The new sugar mill building is progressing rapidly. The foundation of Dr. Hauber's cottage is being laid. Mrs. Bryden has had lumber hauled for the construction of a neat little cottage. Among those who will build shortly are W. Richmond, O. J. Emery, P. Sutherland, F. B. Granger, Jr., **S. Beebe**, J. M. Scribner, H. Goodall and B. H. Ford. All of these houses will be built on the Granger tract with the exception of Beebe and Scribner's.

**Sugar:**

A gentlemen very closely allied with the Sugar Trust stated to a representative of this journal that the Sugar Trust regarded the growth of the sugar beet with more concern than any other for of competition. The reason for this condition was the fact that the beets could be grown and the sugar refined sufficiently to do immediately into consumption in the adjacent territory without being subject to the freight charges from the seaboard or from the South that competing sugar would necessarily be subject to. The question that confronted the sugar refiners, according to the gentleman in question, was whether the refiners, by entering upon beet growing in an extensive scale, by selecting land especially suited for the best development of the beet and by erecting an extensive refinery, could compete favorably with the growers and secure a profit at prices that the growers could not.

**Around Town:**

Miss Amy Gregory of Centerville met with quite a painful accident while out tandem riding with Arthur Ralph of Alvarado. When near Alvarado their wheel struck a rut in the road, causing one of the hind pedals to strike the ground and break it off. This threw the couple to the ground quite heavily. Miss Gregory's left arm was fractured and her face was somewhat hurt.

Building is rapidly going on. Mrs. Bryden's cottage, Mrs. Faig's Hotel, and Ralph's flat stores are about completed. F. B. Granger's Jr., Dr. Hauber's and John Scribner's are under good headway. Work on more houses will commence next week.

After a month of intense suffering Mrs. Hart passed quietly to rest on Tuesday. Although everything that money and surgical skill and trained nursing could do proved to be of no avail. She was born in Denmark thirty-two years ago, and for the past six months has resided here with her husband, where she made many friends among her countrymen.

Wisteria Parlor, No. 127, NSGW, will give its 9<sup>th</sup> anniversary dance in the IOOF Hall Friday evening, May 14<sup>th</sup>.

### **Sugar:**

Work on enlarging the beet sugar mill at Alvarado is being hurried in order to be ready for the start of the season's crop. The capacity will be increased from 500 to 1,000 tons of sugar beets processed daily. Instead of five boilers in the engine room there will be eleven. A large beet shed will soon be in the course of construction and a construction gang will at once commence laying a new track through the sheds. Presently the crop of sugar beets is light in our area owing to the spell of continued dry weather, but the yield at Pleasanton will be quite heavy.

**Local Dairy Inspection:**

The inspectors of the Board of Health have invaded the domain of the Alameda County dairyman, but will probably be compelled to retreat without accomplishing as much as they expected to. It is not threats of the law that daunt them, however, but the swarms of mosquitoes that attack them every time they venture out of doors and the difficulty of breathing the odors of the beet pulp on which the bovines are fed.

Dutton & Wright, the Alvarado dairymen, made no objection when the San Francisco inspectors called and announced their intention of testing the 180 cows of the establishment, for they desired to know themselves whether their cattle were afflicted with the dread tuberculosis, but the pests of the marsh were not so kind, and before the inspectors had been at work ten minutes they saw that they had something worse than injunctions to right. Mosquitoes came in squads and platoons and settled on every inch of exposed flesh that they could see.

The bored and bit until the inspectors were well nigh frantic, and they finally went indoors and held a consultation, deciding to finish that herd, if possible, and then quit.

Ben Davis came over yesterday with his head badly swelled from the effects of the bites, and said that all who were left behind were suffering intensely from the pests. Chief Food Inspector Dockery went over last evening to take charge, and carried a quantity of a lotion guaranteed to kill mosquitoes on sight.

*The San Francisco Call, August 1, 1897*

**Local Dairy Inspection:**

As a result of their investigations of the Alvarado dairy of Dutton & Wright the inspectors of the Board of Health found twenty out of fifty-nine cows affected with tuberculosis. The sick bovines will be brought to San Francisco and killed.

**Tramps:**

A band of tramps, fifty strong, has pitched its camp on the outskirts of Alvarado, and from this point of operation is terrorizing the contiguous country. The camp is on the line of the Southern Pacific Narrow Gauge R.R.. Last Monday night a freight train was boarded by several of the desperadoes and relieved of considerable burden. They three off cases of ham, eggs, boxes of flour and coffee, and then jumped off themselves to rake up the scattered booty. On Wednesday night the deed was repeated. The gang makes a regular practice of traveling between Alvarado and Roberts Landing. Southern Pacific authorities are at work on the case.

**Wm J. Tilley Dies:**

William J. Tilley, aged 76 years, died in San Francisco on January 21<sup>st</sup>. Mr. Tilley first came and settled in Alvarado, then moved to Grass Valley, Sacramento and finally settled in San Francisco. Mr. Tilley was an early Alvarado settler.  
*The Oakland Tribune, January 24, 1898*

**Tramps:**

Those tramps who terrorized residents around Alvarado ought to be rounded up and given a good term on the rock pile. It is no punishment to gather them in as vagrants and give them three meals a day, a warm room to sleep in and nothing to do. They couldn't expect much more comfort than that anyhow, and it is farcical to call it a penalty.

**Sugar:**

A valuable ledge of lime rock has been found on D. Culp's place ([Hayward](#)) outside of town. About a year ago the rock was tested at the Alvarado Sugar Mill and found to be the best yet used, and as large quantities of lime rock are used in a sugar mill, the importance of this find is readily understood. The sugar mill has been using Santa Cruz lime rock that does not begin to compare with the Culp rock already tested. Mr. Culp is now developing a quarry site for lime rock in anticipation of supplying the Alvarado mill.

### **Alvarado Road District Improvements:**

In the Alvarado Road District the road between Mt. Eden and Alvarado there has been a great deal of filling in and graveling done. This is probably one of the most substantial improvements in the district as this is a most important and highly traveled road. The people are well pleased with the results.

One thousand four hundred and eighty feet of replanking has been done on the long bridge near Alvarado and 650 feet of the same work has been done on the three bridges to Centerville on the same road.

A very important improvement has been the putting and construction of 350 feet of bulkhead on the same road, by which the highway will be saved from serious washouts, which have resulted in the past owing to the winter floods.

Another very important and satisfactory improvement has been the covering with red rock of about 1,000 feet of County Road No. 653, known as the Marsh Road.

Another substantial improvement has been the covering of 1,800 feet of the road from the railroad depot at Alvarado towards Centerville with crushed rock. These improvement in the Alvarado district where there is a great deal of travel, have greatly improved the highways.

### **Fishing:**

For some weeks prior to the late storm the residents of Alvarado have been catching large steelheads in the tidewaters of Alameda Creek by means of nets and spears. The attention of the Fish Commissioners was called to this fact and Deputy Cross paid a visit to a slough near Alvarado, where the fishes were lodged in deep pools. He discovered that nets had been used for the capture of the fishes, and before leaving the deputy notified the people who were fishing unlawfully that if they persisted in netting or spearing steelheads the commissioners would make their sport cost them more than they bargained for.

*The San Francisco Call, September 4, 1898*

### **Sugar:**

The Alameda Sugar Company started its annual run last week, says the *Pleasanton Bulletin*. For a week or more they have been engaged in working up some of the low-grade syrup left over from last season, but from now on the work will go steadily forward on the new crop of beets. While the acreage is larger this year than it was last, it is not expected that the yield will be larger, as the drought has affected the beets severely. For ten days or more beets have been coming in and stored in the sheds. Most of these were from the Livermore Valley, those from Pleasanton always being the first received. Now, however, the local crop is being harvested, and shipments will come in from other places.

Work is progressing on the new storage sheds, and in a month these should be completed. It is not uncommon sight to see a trainload of beets passing on the railroad route to the Alvarado factory. The plant gives work to a large number of people and places a big sum of money in circulation each year.

*The Oakland Tribune, September 28, 1898*

#### **Right of Way in Alvarado:**

A deed filed late yesterday afternoon with the county recorder partially discloses the mystery that has surrounded recent operations in the Alvarado artesian well belt. The indenture gives to the Investors and Promoters, a corporation, headed by Orestes Pierce of Oakland, valuable right-of-way privileges for pipe lines out of the Alvarado District.

The deed also gives intelligence that the new pumping plant erected at Alvarado belongs to the same corporation. The deed provides that the corporation may at all times have free access to the land for the purpose of putting down new water mains. These mains have extended to Mt. Eden, and survey stakes have been set for some distance this side of that point.

*The Oakland Tribune, October 17, 1898*

#### **Queer Changes in Alvarado:**

There is a big change taking place in the low-lying lands in that section of the county near Alvarado, through which the San Leandro (Alameda?) Creek flows. A tract of land from twelve to fifteen thousand acres is being reclaimed by nature, and in a few years, the geological work now going slowly on the property will be completed, and many acres of valuable land will be added to this section of the county.

The land level, which was almost always submerged, is a swamp no more, owing to the deposits left on the marsh, which have lifted the land higher and higher each season. Instead of the mud the soil is hard, and thus it would have been possible to use the lands for beet producing. There is

a large beet factory at Alvarado, and this newly acquired land used for growing beets will add greatly to the interests of the district.

The Alvarado marshes have been a favorite resort for duck hunters, and many gun clubs have houses on some part of the marsh. It will not be long before they will have to locate in some other place if they wish to shoot ducks. An old resident of Alvarado proved that a fence, which in 1868 was five feet high, is now almost covered by land deposits.

**Liquor License:**

Jose Silveira Amaral of Alvarado has filed an application for a saloon license, accompanied by the necessary bond. Eighteen residents of the Alvarado School District protested against the granting of a license to Amaral, saying that he had bought a lot near the school house with the intention of opening a saloon there, much to the detriment of the of the morals of the children. A hearing was set for next Monday.

*The Hayward Review, November 25, 1898*

**Sugar:**

The Alameda Sugar Works at Alvarado closed down Saturday after a short but successful run. The last shipment of beets was received on Tuesday, and the balance of the week was used to clean up. The company had about 600 acres of beets contracted for, but owing to the drought much of this did not yield a ton of beets. Under normal circumstances this acreage would have yielded 80,000 tons of beets, but only 36,000 were secured this year. They very best of the beets were from the low country around the sugar mill.

**Application for Relief:**

(The following is a report to the Board of Supervisors on the Application for Relief from an Alvarado resident.)

Supervisor Wells reported on the Application of Relief of John Monesse of Alvarado as follows:

"I find this man has a large family and he also has a cow running loose on the roads. The Pound master attempted to arrest the cow and the man's son took the animal away from the pound man. The pound man sued Monesse, who employed a lawyer and won. If he is able to employ an attorney he is able to take care of himself, and I, therefore move the application be denied."

#### **Water:**

Considerable excitement was caused in Oakland tonight by the announcement that the stock of the Contra Costa Water Company had taken a sudden jump from \$50 to \$65 per share, and \$63 was refused. Last Friday the stock could not be sold for \$50. It was openly stated that the Contra Costa had absorbed the Oakland or Dingee (Water) Company, and that henceforth there was to be no competition.

The Contra Costa Company has been forced to open an immense pumping plant at Alvarado, and this has cost it nearly one fourth of its entire bonded indebtedness. Both companies fully realize that their combined plants are necessary to tide Oakland over in a dry year, and they also realize that for the protection of their stockholders they must come under one general management.

**Water:**

The Oakland Water Company plant at Alvarado, which was recently consolidated with the Contra Costa Water Co., is one of the marvels of this township. Located out on the low marshland adjoining the salt plants, it furnishes millions of gallons of water each day to Oakland and suburbs. The water is the purest artesian, right from the depths of the earth.

There are now 31 wells, with depths of 197 to 1,000 feet and diameters of 4" to 10". These wells all flow steadily and are worthy of a visit. They are scattered over a 500 acre tract and are all connected with reservoirs at the pumping plant. The daily capacity of the wells is 10,000,000 gallons, although less than 5,000,000 gallons a day are being pumped.

*The Oakland Tribune, July 27, 1899*

#### **Sugar:**

California is giving not only example but skill to the building up of the beet sugar interest in other States. The latest gift of this sort is the acceptance of the superintendency of the new beet sugar factory at Grand Junction, Colorado, by Hubert Dyer, nephew of the pioneer beet sugar man at Alvarado, E.H. Dyer. Mr. Dyer is well fitted for his work by tradition, education and commercial experience. Recently he has acted as fruit purchasing agent of the Cutting Packing Co., but he was trained in beet sugar lines and the services thereunto pertaining, and has now probably found his field for a life work.

#### **Buried Treasure in Alvarado:**

\$10,000 in gold coin (1899 pricing, over \$200,000 at today's value) lies buried in downtown Alvarado. It was buried years ago by a tight fisted miser, George Simpson, who despised his wife and made sure she would never come across it. He did make a map of the treasure and entrusted it to two close friends before his death. The two persons that inherited the map are William Kent, a well-known Alvarado liquor man, and John Aylward of Livermore. No record has ever been found that shows they located the buried treasure (in an oyster can) which means that it must still be there for the taking.

The location of the site? Lot 7, Block 35, on the corner of Levee Street and Maiden Lane.

#### **Sugar:**

Peter G. Grindell, who is working in the engine department of the Alvarado Sugar Mill, had a narrow escape from losing his right arm last Saturday night. He became entangled in the machinery, and in a second more his right arm would have been cut off. As it is he has a few black and blue spots to remind him of what might have been.  
*The Hayward Review, October 20, 1899*

**Bicycle Accident:**

James Munyan of Alvarado met with a serious accident last Tuesday morning. He rode to Hayward on his wheel. While turning the corner of B and Castro Streets he ran into a team. He made an effort to save himself by letting go of his wheel and grabbing for the wagon tongue. Luckily the driver of the team had control of his horses and quickly brought them to a standstill before Munyan was trampled. He was somewhat bruised, however, and received a severe gash over his eye. The wound was sewed up and his injuries dressed by Dr. Browning.

Alvarado was well represented at the Haywards Theater Saturday night when Nancy O'Neill placed.

The true reason for the rise in the price of beef, according to the National Provisioner, is the gradual rise in the price of livestock. The increase in the price of the herd has been brought about by the general shortage for slaughter purposes, and the increased cost of producing hand (stall fed) beef, because of the shortage of feed and the increased cost of getting it.

**Dr. Hauber** and family entertained friends from San Francisco Saturday.

Mrs. S. Harvey and Miss Lizzy McKeown and the Misses Lowrie and James Logan took the Sunday school census Friday.

Mrs. George Lowrie and daughter of Centerville visited with relatives in town last Saturday.

Miss Ethel Ralph of Centerville spent Friday and Saturday in town.

Louis Smith spent Friday in San Francisco.

The initial dance of Alvarado Camp No. 429 of the Woodmen of the World was a decided success both socially and financially. The neighboring towns were well represented, as was Oakland, San Francisco and San Jose. At 9:30 p.m. the Grand March was led by Mr. & Mrs. John Scribner, followed by ninety couples. From that time to the wee small hours the merry throng tripped to the light fantastic. Barney's Orchestra furnished the music. The committee in charge of this successful affair was: **Dr. C. A. Hauber**, O. P. Nauert and A. N. Lindsey.

While on the way to the W of W dance in Alvarado, Mr. & Mrs. Blacow of Irvington and Mr. Rathbun of Mowry's Landing had a runaway horse that might have turned into something very serious, but they fortunately ended up with only a severe shaking. The runaway was caused by going over a pile of gravel in the middle of the road. It was very dark and the gravel could not be seen. The road overseers should attend to such matters. By the placing of a lantern on the pile this accident might have been averted. As it was, it is a wonder that no one was more seriously injured.

**Around Town:**

Christmas comes on Monday this year.

After a four-month visit in Alvarado Mr. & Mrs. Ray Kitchner returned to their home in Oakland last week.

Mr. & Mrs. Hellwig spent several days of last week in San Francisco.

Eggs are higher this fall than a year ago and were higher last fall than they were the year before. An observing Alvarado farmer accounts for it by the fact that people are raising more fancy poultry. He says the new kind are so high bred and so lazy that they have to be lifted to their roosts at night and they are too lazy to lay eggs.

If the weather permits, Alvarado will be well represented at the dance in Mt. Eden put on by the Woodmen.

Mrs. B. H. Ford and daughter spent last Thursday in San Francisco visiting friends and relatives. Alvarado was well represented at the Masquerade Ball given in Newark Saturday evening by the Degree of Honor of A. O. U. W.

After a week's visit with Mrs. E. A. Richmond, Mrs. J. Brook returned to her home in San Francisco.

Every Saturday and Sunday the town is packed with hunters from San Francisco, Oakland, Berkeley and other places. The large string of game they bring home is evidence that they have had a successful trip.

According to the predictions of astronomers the people of this vicinity, especially those that don't go to sleep with the chickens, will be treated to a display of aerial fireworks during the nights of the 14<sup>th</sup> and 15<sup>th</sup>.

Mrs. Faig and daughter, Alice spent Saturday in San Francisco.

It is said that turkeys are unusually large this year; and that prices will run low, so prepare for Thanksgiving. It will be two weeks from next Thursday.

Miss Edith Dyer of Oakland is being visited by her cousin, Miss Nina Dyer of Alvarado.

Our young girls may be seen early in the morning with their baskets in their hands going out mushroom hunting. Beware of toadstools. There is one sure way of telling toadstools from mushrooms; the stem of mushrooms is generally shorter and thicker and the center is solid, while the stems of toadstool are hollow.

*The Oakland Tribune, November 14, 1899*

**The Backing Horse:**

A young man from Alvarado put on quite a show in Hayward the other day. It seems as though try as he may, the horse would not go forward. Even after a genius experimented by drawing a rope rapidly across the horse's forelegs and started him going, the brute stopped short after about fifty yards. The horse's specialty was backing up, and this he did to the queen's taste backing and falling in all directions at once. At last the young man from the sugar city had a happy thought. He turned the horse's head towards Hayward, the rear of the buggy towards Alvarado, and plied the whip vigorously. The horse resumed his backing tactics, and when last seen was backing down the Alvarado road at a two mile gait, more or less.

*The San Francisco Call, December 7, 1899*

#### **Trivial Court Case:**

Attorney F. I. Lemos of Hayward was busy this last week. But of all his cases the most remarkable is that of a young Alvarado boy. The little boy was playing with his pigeon when it flew off to a neighbor's shed. The child started after his pet, and when climbing the fence was pushed down by the neighbor. The boy's mother appeared and ordered her young son home, remarking with elegant irony, that perhaps the neighbor in question could be in need of some meat and that therefore she can have the pigeon. The other lady waxed exceedingly wroth at such a reflection and swore out a warrant for the arrest of the boy and his mother on the charge of using vile and obscene language. Legal talent was secured from Centerville and Oakland to assist in the prosecution. After serious and grave deliberations the defendant was discharged, the Justice who swore out the warrant remarking that such trivial matters should not be allowed to be brought before and disturb the gravity of the court.

### **Reclaiming Tideland:**

*The Oakland Enquirer:* The Contra Costa Water Co. has commenced work on reclaiming 460 acres of tideland adjacent to Alvarado. A levy is to be constructed around the land with the aid of a big dredger. It is to be 20 feet thick at the base, 6 feet high and 8 feet across on top. A drainage canal will be cut through the land, with feeders, the earth thus secured to be used in making the levee. Sluice gates will put in so that the land may get the fresh water floods, with their alluvium deposits.

After the deposit has become settled the water will be drained from it. Steam plows will then break it up as soon as the ground is dry, and then it will be ready to receive another alluvial

flood. After the land has been reclaimed it will be a valuable tract for farming purposes. There will be no danger of drought, as one of the water company's big artesian wells can be pumped on to it at any time, flooding it in a day.

*The Pacific Rural Press, San Francisco, February 24, 1900*

### **Alvarado Improvement Club:**

On Friday evening, March 16, the Alvarado Improvement Club will present a grand musical and dramatic entertainment and dance. *The Hayward Review, March 9, 1900*

### **Alvarado's Pride:**

One of the busiest industries in the interior of Alameda County is the stove foundry at Alvarado, of which **Mr. C. R. Nauert** is manager. From early morning until night there is the continuous ring of metal and belching smoke, denoting that all is life and activity within. This year has been particularly favorable. Orders are coming in steadily from all parts of the country.

The payroll includes about twenty-five workers, each of whom is drawing good wages and is well satisfied. Alvarado may well congratulate itself on such a progressive and valuable industry.

*The Hayward Review, March 9, 1900*

### **Sugar:**

*(From The Oxnard Carrier)*

Although slow in its beginnings, the beet sugar industry in the United States has of late taken a start, which is surprising. It may be said that the real beginning of the industry dates from the establishment of the Alvarado, Cal. Factory and thirty years have elapsed since it's founding. All former enterprises proved to be failures, and either the discouragement of these failures or other unfavorable circumstances resulted in neglect of the industry, which gave such substantial results at Alvarado. For a long time Americans failed to grasp the possibilities of the business.

Nearly twenty years the Alvarado continued as the sole representative of its class in the United States before its success started to attract the attention of others and new factories were gradually established.

**Althauser Barn Burns Down:**

The immense barn of George Althauser, adjoining the railroad depot and Granger's Riverside Hotel was completely destroyed by fire last Saturday night.

The structure was burned to the ground. Its contents, 4,000 bales of straw, were destroyed as was four flat cars of the Southern Pacific Railroad, which stood on the track beside the barn were reduced to ashes.

The barn was 40 feet wide, 200 feet long and 20 feet high. It cost about \$2,000. The straw was valued at \$1,000, and the flat cars at \$6,000, making the loss \$9,000. The fire was supposedly caused by tramps. The amount of insurance held by Mr. Althauser was not known.  
*The Oakland Tribune, June 11, 1900*

**Salt:**

P. Marsicano, an Alvarado salt dealer, has commenced a suit against Sophia Johanna Droste to restrain her from maintaining floodgates in a canal that passes through the properties of both parties. He also \$5,000 damages on account of injury already sustained to his business. Marsicano alleges that he and John Johnson, whose properties adjoin, constructed the canal for the purpose of manufacturing salt by evaporation. Both were to have free use of the canal. Johnson died about three years ago and his property was distributed to Sophia J. Droste as heir. Marsicano now objects that the maintaining of a floodgate in the canal is in violation of the original agreement and his rights.  
*The Oakland Tribune, June 13, 1900*

**Downtown Fire:**

A fire, which for a time threatened to destroy the town of Alvarado, was discovered about 2 o'clock this morning in the rear of A.L. Fitzell's drug store. Before the flames were extinguished by the volunteers who answered the alarm, the buildings belonging to the Ralph estate and occupied by the drug store, I.V. Ralph's furniture store and a restaurant were destroyed. One of the burned buildings was formerly the Alvarado Methodist Church, but had been remodeled a number of years ago.

That the entire town was not burned down was due to the fact that the wind was blowing from the southeast. As it was the Alvarado Hotel and Thomas Fostino's building had a narrow escape. Both of these buildings were badly scorched. The loss is about \$5,000. The cause of the fire is unknown.

The Alvarado Improvement Club, which has been comparatively quiet for some time, elected two new officers this week. They are **W. B. Straub**, President and Duncan Buchanan, Treasurer. The club has begun construction of a sidewalk to the depot, which was one of the main objects in view when the organization was started. Several highly successful entertainments have already been given by the Club and another is being planned in the near future.

**W. B. Straub** returned last week from a week's vacation trip

The deadly firebug, the only blight on this beautiful village, has been quiet for some time.

Altogether there have been four fires all of which have taken place in the last four months, which were of incendiary origin. The chances the scoundrel would be caught are very slim. The county would probably not be burdened by the expense of a trial.

*The Hayward Review, July 13, 1900*

**Sugar:**

*The Niles Herald:* The Alameda Sugar Works at Alvarado is looking forward to a very good season, if one should judge by the improvements under way. The old beet sheds have been torn out and 4,000 feet of new trestle has been erected similar to that put in last year, where the trains are run up and the beets are dumped from the cars direct into runs. The agents report about 5,000 acres contracted. The outlook for a crop is very good at present, considerable more so than a month ago, when it was feared a pest was destroying young plants.

### **Disastrous Fire:**

A disastrous fire broke out at 11:35 o'clock last night in the rear portion of the Hellwig block, occupied by the butcher shop on P. Hellwig and Company. The building was totally destroyed and also the residence of Samuel Foster, which was next to the block where the fire originated. On the other side of the Hellwig block was the saloon and shoemaker's shop belonging to Manuel de Sequeira, and this was also destroyed.

Alvarado has no fire department, and what opposition the flames met was furnished by the citizens of the town. Early reports place the loss at \$12,000, but these figures are probably too high, and it is thought that \$3,000 will cover all the damage done. The amount of insurance has not yet been made known, but it is slight.

*The Oakland Tribune, September 5, 1900*

### **Alvarado Wedding:**

A wedding, which has a certain interest for many Hayward people, took place in Alvarado yesterday. The connecting parties were Eddie Patterson of Hayward and Miss Anderson of Alvarado. Rev. G. W. Lyons performed the ceremony.

The groom is well known here and in Alvarado, his high-class ability as a melodeon manipulator having endeared him to many. He formerly furnished the music for Dale's Dance Academy. The bride is one of Alvarado's popular young ladies.

*The Hayward Review, September 7, 1900*

#### **Alvarado Fire:**

Alvarado was visited by another disastrous fire last night. The Hellwig Block, Foster residence and the shoe shop of Manuel de Sequeira were destroyed. The losses are estimated at \$5,000 to \$12,000, with small insurance. The fire was of incendiary origin, and it was rumored yesterday that pretty strong proof centered on a well-known citizen of that place. The firebug has appeared there frequently and with the results that insurance rates are very high and some insurance companies refuse to take the risk at all.

*The Hayward Review, September 7, 1900*

#### **Road Improvement Contract:**

Alvarado precinct, which shall consist of that portion of Washington Township, bounded as follows:

Beginning where the northerly line of Washington Township intersects the west line of County Road (No. 214 or 314?); thence westerly along the northerly line of said township to the westerly line of Alameda County; thence southerly along the western boundary of Alameda County to Beard's Creek as shown on map of Alameda County; thence up the center of Beard's Creek to the northwesterly line of County Road No. 250 (?) (known as the Bell Ranch Road\*) at Mayhew's Landing; thence northeasterly along the northwesterly line of said Bell Ranch Road to the center of Alameda Creek; thence northwesterly along the center line of Alameda Creek to the line dividing the land of the estate of William Meek and lands of E.H. Dyer; thence northerly along the west line of the land of the Meek estate and lands of I.B. Haines to the southwest corner of the lands of Rosa; thence westerly to the southeast corner of the lands of William Hayes; thence northerly along the land of William Hayes to the northeast corner thereof; thence westerly along

the northerly boundary of the lands of Hayes to the west line of County Road (No. 214 or 314?) and thence northerly along said line of said road to the place of beginning.

\*Bell Ranch Road would appear to be Jarvis/Decoto Road. Hence from Mayhews Landing to the Center of Alameda Creek would put that from Mayhews Landing in the west to just east of the intersection of today's Paseo Padre Parkway and Decoto Road.

#### **Mt. Eden Sniping:**

"There is quite an epidemic of bad colds and accompanying sore throats going around Mt. Eden.

This is not to be wondered at when one considers the condition of the atmosphere. It is only surprising that something more fatal does not visit this community as upon the start of the sugar making season at the Alvarado mill, with the south wind, we get the benefit of the aroma that arises from the refuse of that mill and the stench is at times unbearable. People are compelled to keep their houses all closed in order to keep the smell out."

**Salt:**

The Federal Salt Company, according to the *Chronicle*, has acquired complete control of the salt industry in Alameda County and of the entire output west of the Rocky Mountains. The headquarters of the company will be in San Francisco and one of the first acts was the issuance of a list quoting the price of salt to the trade at about double former rates.

"This should not increase the cost to the consumer," said on of the firm, "for it represents only about one-half of the retailers' profits. Heretofore we have made nothing and the retailers have made it all; now we will be in a position to divide with them. Everything will be consolidated and operated by the Federal Salt Company. As that company is subsidiary to the National Salt Company, the salt output of the United States will be controlled, practically, by one management."

The production of salt is one of the principal industries of Alameda County and the works extend all along the Bayshore from Mt. Eden to Newark. The Union Pacific Salt Works, controlling 1,100 acres of salt lands in the vicinity of Alvarado, was organized in 1872 and produces about 14,000 tons of salt annually. Fifty men are employed.

#### **Salt:**

*Niles Herald*, Jan 18<sup>th</sup>: A new company has been incorporated and is actively engaged in extending operations along the Bayshore in this township. An officer of the corporation says: "The company at present is employing a big force of men at work erecting an extensive new plant near Alvarado, with a capacity for producing 40,000 tons of salt annually. A new \$20,000 refinery is also being erected, which will turn out 100 tons of table salt per day. One great advantage, which we have over the trust, is in our convenient location with regard to the railroad. A survey for a sidetrack to our works was made two years ago and the line will soon be built, as it can be constructed at very slight expense. Of the twenty-three salt makers and seven refineries, which stretch up and down, the marshes from Russels to Newark, none beside ours connect with the railroad without great expense for embankments and fills.

### **To The Editor:**

I was instructed by the President of the "Alvarado Athletic & Social Club" to ask you to kindly correct a statement, which appeared in the Alvarado items section of your issue of May 11<sup>th</sup>.

The club is named the "Alvarado Athletic & Social Club" and not the "Andrade" as stated in your newspaper. Your correspondent for here is unknown to us, and certainly our "doings" are unknown to him or her. It would be a wise plan for such a correspondent to be better posted, as on this occasion the boys are not given a square write-up.

Thanking you in advance for this, allow me to remain,  
Very Respectfully Yours,

Arthur A. Peralta, Secretary  
Alvarado Athletic & Social Club

**Turkey Fight:**

A rather unusual case came up before City Justice Stetson ([Oakland](#)) this afternoon, when the suit of Fred Walters against the Continental Salt and Chemical Company was called. The suit was ostensibly for a lot of turkeys sold to the company, but in reality it was the result of the fight between the two rival salt companies.

The trouble dates back to the time when H.C. Coward was manager for the Continental Company. Last Christmas Coward, as manager, gave each of the employees a turkey, and those who did not receive a bird got the equivalent in cash. The bill for the turkeys, which amounted to \$11.50, was presented by Merriam & Co., but when Coward withdrew and became manager of the California Salt Company, the Continental Company refused to pay it. Merriam then assigned the claim to Walters, who brought suit.

Coward enjoys the distinction of owning stock in each of the rival salt companies and he is manager of the California Salt Co. He says it is usual to give turkeys to the employees and that the only reason the company refused to pay Merriam was its animosity toward him. The two companies occupy adjoining offices.

**Salt:**

In view the extensive salt works at Alvarado, Alameda County is very much interested in all the talk that is going the rounds about a mammoth trust that is "to control the salt of the earth." To show how ridiculous such a proposition is, some statistics have been collected on the subject, and as meager as they are they are sufficient to prove that the possibility of such an octopus is so remote as to be not even within reason.

In the first place, nearly all saline lands, such as those in the Alvarado district, can be converted into salt preserves, thus practically throwing the entire coast line open for competition in the event of an hour of need. In addition to this limitless resource, many of the states contain vast deposits of salt so pure that about all that is necessary to cut and market it.

**Japanese Couple Beaten:**

Clarence Kerr was arraigned before Justice Richmond today on a charge of having assaulted J. Sanon and wife, proprietors of a Japanese restaurant. The assault took place Thursday. Kerr and a companion entered the Japanese restaurant and went through the building to the rear, where Sanon and his wife were. Sanon says Kerr offered an insult to his wife. Sanon ejected Kerr from the room. A moment later Kerr returned with a knife in his hand. Sanon, with the assistance of another Japanese, succeeded in disarming Kerr. The latter went into an adjoining room and returned a moment later with a heavy club. With this weapon he gave Sanon and his wife a severe beating and then left the place.

Yesterday Kerr offered to plead guilty to a charge of battery, but Assistant District Attorney Samuels, who appeared for the prosecution, had a complaint issued charging the defendant with assault with a deadly weapon.

### **Ducks:**

The open season for duck and quail was ushered in auspiciously yesterday by a great throng of sportsmen although the results were not up to expectations. Throughout the length of the marsh line from above Suisun to Alviso ([Santa Clara County](#)) on the south the glistening barrels of shotguns reflected the too ardent rays of the sun. The sport was fairly good on the Alvarado marsh. Everyone is getting some birds. Few secured the limit of birds, however. The bags were made up of teal, curlew, rail, snipe, sprig and spoonbills. A number of sportsmen returned with well-filled game bags last night and reported that many more remained over to try the sport this morning.

*The Oakland Tribune, October 2, 1901*

### **Sugar:**

Few people around here realize how much interest is attached to the manufacture of sugar as it is carried on in the big refinery at Alvarado. This probably is because the factory is so near to us, for it is part of human nature to make eternally true the old saw that distance lends enchantment. But there is much entertainment and instruction to be derived from watching a tough and dirty beet run through the various processes until from a huge funnel it pours, a snowy cataract of as fine sugar as ever made business for dentists. But to you who would go, just one word of advice. In your journey to and fro while you tarry there, be prepared for the most variegated bunch of the vilest smells that ever committed an assault upon the olfactory nerve of man.

*The Hayward Review, October 4, 1901*

**Tangles in Japanese Business and Society:**

A Japanese feud that has been raging around Alvarado culminated yesterday in two Japanese being held to answer for trial before the Superior Court for extortion and another Japanese being arrested for criminal libel.

S. Takamoto, who runs a Japanese restaurant in Alvarado, accused K. Miyogawa, who is the editor of the Japanese Tribune in San Francisco, and M. Furukawa, his clerk, of trying to extort \$150 from him under the threat of arrest. The two men got \$20, it is charged, which was all the restaurant man had. The two who were held to answer swore that they were paid the \$20 for interpreting work for the restaurant man and they assert that they were interested in the moral welfare of the Japanese community and knew that the restaurant man was not keeping those morals up to the high standard necessary.

Justice E. A. Richmond held the men to answer upon the showing made by Deputy District Attorney Phil M. Walsh.

On the way to the courtroom T. Tanabe, another Japanese, asked anxiously: "who wins?"

"You win," replied the constable, at that moment serving a warrant upon Tanabe for criminal libel sworn out in San Francisco by the Japanese editor. Tanabe gave an interview in a Japanese paper calling the editor all kinds of hard names. The editor forthwith swore a warrant for libel.

#### **Ducks:**

Last Saturday evening Game Warden S. B. Vandervoort of Irvington arrested Dr. Cranz of Alameda, L. C. Williams of Williams, Belcher & Co., and W. A. Tilley, three members of the Swan Gun Club at their headquarters on the Alvarado marshes charging them with a violation of that clause of the bird law that prohibits the shooting of game from one-hour after sunset and one-hour before sunrise. The gentlemen arrested were taken before Judge Richmond of Alvarado where they gave their names as John Doe, Richard Roe, and John Rock, pleaded not guilty and demanded a jury trial. They were released upon their own recognizance and must appear before Judge Richmond next Saturday at 4:00 pm.

Members of the Swan Gun Club, which is composed of men of the highest standing, assert that this arrest is a piece of spite work, instigated by Jack Ahern of Alvarado, who was arrested at their insistence on November 10<sup>th</sup> for trespass and vulgar language. Ahern went off swearing vengeance, and is said to have brought Vandervoort to the place. The single duck seized by the deputy from one of the gentlemen's pockets they state was shot at 4:00 p.m. that day and was the only game in their possession as they had observed the law conscientiously.

#### **Grand Ball:**

Miss Myrtle and Alice Vandervoort of Alvarado attended the Grand Ball of the Native Daughters at the Nevis Pavilion in Pleasanton on Thanksgiving Eve.

*The Oakland Tribune, November 30, 1901*

#### **Ducks:**

Game wardens are determined to put a stop to the shooting of ducks on the Alvarado marshes after sunset and before sunrise. Some days since a doctor and two of his guests were arrested for participating in the unlawful sport. The fine for persons convicted of violating this section of the game law is \$25. As the game wardens receive half of this for each conviction their interest is

considerably sharpened. The sportsmen, who would not think of taking advantage of the moonlight shooting, naturally object to men who do take this advantage and return with big strings of birds. It means a slaughter of ducks, as under good conditions a great many can be bagged. The flash of the shotguns has the tendency to scare away a lot of birds and in the long run makes for bad shooting.

### **New Presbyterian Church:**

Rather than spend money for repairs to their pioneer church edifice the Presbyterians of Alvarado have decided to erect a new house of worship to take the place of one, which for forty years has been used in the service of God. With enthusiasm the project has met favor among the church people. They have pressed forward so successfully that already \$1,500 has been pledged toward the cost of the edifice.

The movement to supplant the structure, which has stood at Alvarado since 1859 began only a few weeks ago. There was such ready response that plans have been completed, working drawings made and the trustees are now ready to receive bids at Alvarado.

The new church will be of composite architecture, ornate and fully equipped with all the convenience for worship, Sunday school and other meetings. The interior will be finished in open timbering of dark redwood.

The old church was built of lumber that was brought around the Horn. The congregation formed in 1853 by the late W.W. Brier and has since been in existence. For many years the Presbyterian Pastor stationed at Centerville has occupied the pulpit. The present Pastor, the Rev. W.C. Gunn, has been very successful in his ministrations.

### **Around Town:**

The Ladies Aid Society held its annual bazaar of the organization at the IOOF Hall on Saturday. The affair was a success in every way with \$300 over expenses taken in.

The inclement weather of the past week has made duck shooting good and the crack of the shotguns on the marshes near Alvarado is heard during the night as well as the day. Many good bags have been gotten lately, and there seems to be plenty of game for everyone.

Miss Florence Vandervoort, who is now a teacher at the San Jose Normal School, spent several days last week as the guest of her relatives in Alvarado.

Mrs. George Harvey of Oakland was the guest of her relatives here Saturday and Sunday.

Miss Belle Hayes of Santa Cruz is the guest of Miss Nauert at her home here.

**Chinese Highwayman:**

George Hoosen figured in a holdup last Tuesday night, while driving three men from San Francisco to the Brigg's place below Alvarado. When just out of the latter town a Chinaman, brandishing a big beet knife, blocked the road. George whipped up his horses and rushed past. One the return trip the same highwayman was met, but this time with a lantern. As he ran for the horses, George, who was ready for him this time, used his pistol with great effect, shattering the lantern. The Chinaman turned and ran. George thinks he was more a dangerous lunatic than dangerous highwaymen.

### **Society Event:**

A large gathering of society people of San Francisco and Oakland was entertained at the handsomely decorated home of Miss Elsie Bennet on Oak Street yesterday afternoon. The brilliant assemblage at the informal "At Home" of Miss Bennet was a notable one. The many brightly hued gowns of women, blended artistically with the softened glow of red candelabra and holiday effects of bright foliage. An orchestra was in attendance.

Miss Nina Ingalls Dyer of Alvarado was one of a corps of ladies that assisted Miss Bennet in the reception of well over one hundred ladies from throughout the Bay Area. Also included from Alvarado were Mrs. E. Willard Burr and Mrs. E.H. Dyer.

### **Alvarado to Get New Bank:**

The much-needed bank for Washington Township is at last to materialize and is to be located at Alvarado as a result of the energy and enterprise of the citizens of that place.

It is the to have a State bank with 600 shares of \$100 each, most of which will be local capital. The subscription paper had the names of W.H. Layson, I.V. Ralph, F.B. Granger, F.P. Hellwig and Mrs. P. Hellwig Wednesday night for \$2,500 each and it is expected that the balance will be subscribed today.

The subscribers have been notified to meet tonight for the purpose of organizing and preparing for incorporation. The plan is to have 20 percent of each subscription payable on demand and at once erect a suitable brick structure with a fire and burglarproof vault. If all goes well the bank will be in operation in season to handle money for this year's crops.

Those who going into this enterprise deserve the greatest encouragement and commendation, as it means much for the valley. It is regretted that the bank could not be more centrally located, but the enterprise of Alvarado has won for it the prize and all must accommodate themselves to the location and use it as a place of deposit instead of going to Haywards, Oakland or San Francisco.

***The Oakland Tribune, January 25, 1902***

**Sugar:**

*Niles Herald:* The Alameda Sugar Company at Alvarado has completed the season's run and it has proved to be one of the best it has ever had. During the year just closed the mill has used about 67,000 tons of sugar beets and produced about 14,500,000 pounds of sugar. Taking cars of 30 tons capacity it would require over 2,223 cars or 49 trains of 45 cars each and one of 28 to handle the beets alone. Then about 483 cars, or 10 trains of 45 cars and one of 33 cars to handle the manufactured product. The railroad company has received in round figures over \$75,000 as freight charges. The price of beets for several years has been \$4.50 per ton delivered at the mill and this item alone the past season has run over \$301,000. Next season the price will be \$4.75 a ton.

#### **Around Town:**

The Alvarado Camp, Woodmen of the World, will give a musical and dramatical entertainment in the IOOF Hall next Friday evening. A fine program has been arranged, and a one-act comedy entitled "Freezing a Mother-in-law," will be presented by a fine cast of characters. Dancing will follow the program.

The dance given by the Alvarado Whist Club at the IOOF Hall Friday evening was a success. The hall was a complete bower of palms and peppers, with red hearts at intervals, while hearts festooned the ceiling. Although it was a stormy night, fully seventy-five couples accepted the hospitality of the club, people being present from the neighboring towns, and many from Oakland, San Francisco, Berkeley and Alameda. The Jacobus Orchestra furnished the music. The "Moonlight Dance," a novelty introduced, was a great surprise and enjoyed by all fortunate enough to be present. Taken all in all, it was one of the most pleasant and successful affairs ever given in Alvarado.

Rev. W. Chalmers Gunn, pastor the Presbyterian Church, is taking a month's vacation, which he will spend in his old home in Washington. The pulpit will be supplied each Sunday in his absence. Miss Edna Shuey of Oakland is being entertained by Mrs. E. Beebe.

#### **Asparagus:**

This writer went looking for the place where they pack asparagus, but it could not be found. The four syllable asparagus is an unknown word down by the railroad tracks, and "grass" has taken its place. It takes much less time to pronounce, and minutes are valuable. The Meek Estate has gone into the "grass" shipping business on a scale never attempted here, and the experiment has been highly successful. Car after car of asparagus, grown near Alvarado and Milpitas, has been sent out, and every bunch has commanded a good price. About 100 people, mostly girls, have been employed this season. Their duties are to arrange the "grass" into bunches; tie it with a species of seaweed, and slice off the stem end, and place the completed bunches into boxes. Miss Annie Grey, daughter of George Grey, is the bookkeeper and timekeeper of this department. The packinghouse has been doubled in size this season, and next year will probably see a further increase in capacity.

### **Baseball:**

The most interesting and by far the best game of baseball that has taken place in Haywards for some time was the recent contest between the Alvarados and P&H's of Haywards. The game was played at Athletic Park and was witnessed by more than 400 people. The P&H's won their first game of the season and in a manner that again has established their reputation as one of the finest amateur teams in the State. From the opening of the game to the finish, P&H's proved their superiority, although the score was only 3-2. It was a close fight, the equal of which will not be witnessed here for some time, unless it is when the return game is played. which will be in about three weeks. The loss for the Alvarados was the first of the season, which adds to the glory of the P&H's victory. After the game there was a discussion of starting a league comprising Hayward, Alvarado, Centerville and Newark.

### **Around Town:**

Mrs. Adeline Hayes, one of the oldest settlers of this township, died at her home on Monday. She had been in poor health for the past year and the last few months she has been confined to her bed, so death was not unexpected. The deceased was 84 years old and a native of New Hampshire, but had resided in Alvarado for fifty years. Her husband passed away five years ago. She leaves behind an adopted son and daughter.

Alvarado was almost deserted Sunday. Many people went to Haywards to witness the baseball game between Alvarado and P&H's of Haywards. The score was 3 to 2 in favor of the Haywards, but the Alvarado boys claim that the score should have been 3 to 1 in favor of Alvarado.

Mrs. Hemelrout is being entertained by Mrs. E.M. Foley

**Baseball League:**

The three managers of the P&H's of Haywards, Alvarado and Newark baseball teams met Sunday at Newark and discussed the proposition of forming a minor league for the purpose of increasing public interest in the baseball contests. Manager Zambresky of Haywards, Cahill of Newark and LaGrave of Alvarado are the managers who are working up the league question. They are very enthusiastic over the proposition and all that is needed to constitute the league is adding another team. For the purpose of forming another team to compete the league the three managers will shortly visit San Leandro to seek cooperation of that town.

**Salt:**

A misunderstanding has arisen in the Continental Salt and Chemical Co., the only salt company near Alvarado that is not controlled by the Salt Trust, and yet the trust claims to own a majority of the stock issued by the company and also has possession of the mill of the concern at Alvarado.

H.C. Coward, of Oakland, one of the newly elected directors, and chosen manager of the new board, went to Alvarado last Saturday evening to take possession of the mill and the salt marsh lands belonging to the company. He was accompanied by his brother R.W. Coward, but they found J.C. Symons, Frank McMahon and Vincent Brink in charge. They did not attempt to interfere with possession of the plant. Mr. Coward has been associated with the company since its incipency, and knows the situation thoroughly.

Mr. Coward explains the situation as follows:

"There are 400,000 shares of capital stock, of the par value of fifty-cents a share in the Continental Salt and Chemical Company. Of this number 168,500 have been issued and the balance is treasury stock. Of the issued stock, L.R. Eilert, L.A. Bertelling and John Lackman owned 83,300 shares. Eilert is dead; Bertelling is in South America and Mr. Lackman, like his former associates has sold out the trust, which was represented on the Board of Directors by a number of clerks. This whole affair was a job. The attempt to hold a meeting of the board immediately after the interests of the three men I have named had been sold out was a failure. This was in March last. Between that time and June 24<sup>th</sup>, the minutes were distorted to make it appear that the meeting adjourned temporarily only, and at a pretended adjourned meeting the dummies of the Salt Trust were elected directors. Of the 168,500 shares, the trust controls just 150 shares over the half; but the stock was not at Saturday's meeting, and so the shareholders chose William J. Dingee, William G. Henshaw, Oscar T. Weber, Francis J. Heney and myself."

#### **Fire on the Marshes:**

A fire is reported on the lonely marshes of Alvarado. Last year the "Spoonbill Club" lost its grounds near Alvarado to another club, and now its new clubhouse in the same locality has gone up in smoke to the accompaniment of popping shells.

Anticipating a glorious duck hunt on the first day of the season, the members shipped a "wide awake" hunter down to the clubhouse with instructions to paint the decoys and give the house a general burnishing for the reception of its owners. The wide-awake hunter worked hard at the decoys and painted them in a way that the worldliest duck would regard with favor. Then, on Sunday afternoon, he started at the house with a tar bucket to give the outside a weatherly coat. In his haste he allowed the fire to connect with the tar, and shortly there was nothing left of the house and the decoys but a heap of hot ashes. The ammunition that was stored within kept up such a lively fusillade that the amateur painter did not dare stay close enough to throw water on the flames, and members of the club now insist that the exploding shells frightened away all the birds in the neighborhood. This leaves them with blinds and ponds, but minus house, ammunition, decoys and ducks.

A feud that has run a long time among the sportsmen who spend their holidays on the Alvarado marshes had its sequel today in the Police Court, where F.J. Horn, a San Francisco liquor merchant, was on trial for battery upon Dr. L.F. Cranz of Alameda, a former member of the State Board of Dental Examiners. The trouble all grew out of a contention over the boundaries of the Swan Gun Club at Alvarado. The gun club has had a lot of trouble with poachers lately, and one day when Horn got into the preserve in his quest for game some one took a shot at him. Horn claimed that he was shinnying on his own side, and that it was a shame to shoot at him. Every time the sides to the controversy have met lately they have managed to get into a row.

The last time Cranz and Horn met was a week ago at First & Webster Streets, where they were waiting for the train to take them to the unhappy hunting grounds. They had words first, and then fists. Cranz was hit on the head with a cane, and he had Horn arrested. When the case came up today Judge Smith's courtroom was filled with sportsmen ready to testify, among whom were C.G. Gould, a Deputy Game Commissioner and president of the Swan Gun Club. The upshot of it all was that Horn was found guilty of assault and made to pay a fine of \$50.

**Gruesome Find in Alameda Creek:**

The dead body of an infant girl, concealed in a common dry goods box, was found today floating down Alameda Creek between Decoto and Alvarado. To all appearances the box and its gruesome contents had been in the water about a month. The body of the babe was in a bad state of decomposition and the features were unrecognizable.

The body had been carefully wrapped in its shroud and then placed in the box. Pains had been taken to nail on the cover securely. Then the box and its human freight were set adrift. Judging by the state of the body and the marks on the box made by the action of water, it is thought by officials at Centerville that the atrocious deed was committed by some person above Sunol.

The box was found by Manuel Silveira, who was hunting for driftwood. The discovery was made on ranch near Alvarado.

#### **Sugar:**

In financial circles the belief prevails that the Alameda Sugar Company is going into the sugar trust. That a deal is being made in the stock of the company is openly announced but an effort is being made by the brokers having the transaction in charge to conceal the identity of those interested. Sutro & Company has been commissioned to gather in the outstanding stock and have already secured 14,500 shares.

About the company: The Alameda Sugar Company has been in operation since about 1892 and in that time has paid over 200% in dividends. It is a comparatively small concern, employing about 200 workers. In the last year its sales have been between \$900,000 and \$1,000,000. The sugar interests are to be advanced in the fall of this year by reason of the agreement reached at the Brussels Conference last year, and this fact is supposed to account for the extraordinary activity being displayed by the sugar trust in reaching out for independent plants.

*The Oakland Tribune, March 28, 1903*

#### **Sugar:**

An important deal in the stock of the Alameda Sugar Co. has been made. It is rumored that the Sugar Trust will absorb the plant. Col. George Macfarlane, one of the stockholders in the sugar refinery, said last evening that letters he had received recently from San Francisco were to the effect that the absorption of the refinery by the Trust was imminent and it was no surprise to him that the deal had been affected. About two years ago Col. Macfarlane acquired about \$15,000 worth of stock in the refinery, \$5,000 of which was sold to Joseph Marsden, formerly of Honolulu, and interests were acquired by John Fowler & Co., of London, whose steam plows Col Macfarlane has succeeded in placing upon many beet sugar lands in California. Col. Macfarlane said that when he took the stock it was with the feeling that sooner or later the refinery would be absorbed by the Trust. He expects to see the trust absorb the beet sugar factories of Colorado, Utah and other states in the near future. The stock was a good dividend payer, the investment averaging about 13 per cent per annum in dividends.

#### **The Gypsy & John Buchannan:**

John Buchannan, a resident of Alvarado for over 30 years was seduced into giving up gold pieces to a lovely young Gypsy temptress for the telling of his fortune. When he told his friends they told him that he had been duped. The young lady, from a bank of itinerant Gypsy's was arrested and posted \$50 bail. When the trial date came she didn't appear, the court was \$50 richer and John Buchannan was \$20 poorer.

#### **Sugar:**

The Sugar Trust has now complete control of the Alameda Sugar Co., which means that the Trust is all-powerful on the Coast. The annual meeting of the stockholders of the Alameda Sugar Company was held today, when the Board of Directors were elected to serve for the ensuing year. The election resulted as follows: John L. Howard, President; James Coffin, Secretary; E.C. Burr, Joseph Hyman, M. H. Hecht, Charles Sutro and Andrew Welch.

With the exception of Andrew Welch, the personality of the board remains unchanged. Mr. Welch took the place of Joseph Marsden of Honolulu, but as to whose place he took is immaterial. Mr. Welch is on hand to represent the Eastern purchasers, who succeeded in acquiring one-half of the stock, and perhaps a little more. The Eastern purchasers are supposed to be the Trust, and the supposition is more than well founded. The hand of the Trust was seen in the closing down of the California-Hawaiian refinery at Crockett after Ritter and Spreckels had been fighting each other for years.

Not a single employee is to be found at Crockett, and the works are closed tighter than a drum. The directors of the Alameda Sugar Company, with the addition of Mr. Welch, are satisfactory to the Trust.

The price of refined sugar has been raised in the East within the past few days, and the Coast follows the East. The price is now 6 cents per pound. There has been a falling off of price of the raw material, which is natural when the Trust is in the saddle. The aim of the Trust is to buy raw material low and sell the refined product high.

#### **Mail Carrier Injured:**

The horse of mail carrier Huff ran away at the station last Wednesday afternoon. Mr. Huff was thrown to the ground and dragged some distance, the wheels of the vehicle running over him. Those who witnessed the accident ran to his assistance, and it first it was feared he was seriously hurt, but luckily, he escaped with a few bruises. He will, however, be confined to bed for several days.

**Alvarado:**

As described in the Oakland Tribune Special Edition of cities and towns of Alameda County:

Alvarado is situated on the Southern Pacific Railroad Line nineteen miles south of Oakland. It was the first capital ([county seat](#)) of Alameda County. The capital was taken away by San Leandro and Oakland took it away from San Leandro.

Alvarado is rich in her salt lands, salt marshes, and her artesian flow of water, her sugar beet lands, her farmlands and her great sugar works. The pumping works of the Contra Costa Water Company are located in Alvarado. At the mouth of the Alameda Creek there are a number of salt works varying in capacity, some of them capable of producing 7,000 tons a year.

The beet sugar factory, which is owned by the Alameda Sugar Company, was established by E. H. Dyer and is the pioneer institution of its kind in the United States. The company raises beets itself near Pleasanton and the surrounding country and buys sugar beets from farmers, paying out annually \$250,000 in this way. During the beet season at the mill, 200 well-paid men are employed. Sixty thousand tons of sugar beets are ground each year and over 600 tons of sugar is produced each year.

Alvarado has several large stove works, a compact business district, and adult population of about 1,200 persons and a school population of about 200 students. They have the following fraternal orders: Native Sons, Native Daughters, U. P. E. C., Odd Fellows and Rebekah's.

### **Water Rights:**

E.H. Dyer of Alvarado has notified Mayor Olney that he proposes to bring suit against the Contra Costa Water Company to prevent further appropriation of water from the Alvarado artesian wells, from which a portion of Oakland's supply is derived.

Oakland Mayor Warren Olney received the following letter:

ALVARADO, February 1, 1904

To The Honorable Warren Foley, Mayor of the City of Oakland:

Dear Sir:

I see by the report of the City Council's committee on water supply that they have reported in favor of leasing or buying the Contra Costa's water plant. In view of the recent decision of the Supreme Court in the Katz-Wolkinshaw case there seems to be no other available water supply for your city. As the pumping plant at Alvarado, which furnished a large portion of your water sold to your city by the Contra Costa Water Company is governed by this same decision and as many of the wells in this vicinity have been rendered almost useless by the operating of the pumping plant, I thought it proper to inform you that it is the intention of the owners of these wells to take legal steps to stop the appropriation of this water by said company. I am,

Yours truly,

E. H. Dyer.

**Sugar:**

(From the *Evening Modesto News*)

It has been rumored, although there is no authority for a definite statement as yet, that the Alameda Beet Sugar Refinery Company is contemplating the use of Modesto for the raising of sugar beets. George Gray, a representative for the company was in Modesto yesterday, and is sending specimens of the soil in this region to the chemist of the company's factory at Alvarado for analysis.

The raising of sugar beet here seems, at first sight, to be feasible. Beets of this variety were raised this summer by C. N. Whitmore. The experimental crop was good in quantity, and the

analysis showed a percentage of 15 percent saccharine matter, which is 3 percent higher than the standard required for the manufacture of sugar. If the soil is found suitable and the beets will mature at the proper time, it is possible that the Alvarado company will buy or lease a large tract of land here.

#### **Quarrel Over Duck Ponds:**

A row over certain duck ponds between Mt. Eden and Alvarado has been taken into the courts and this morning G. W. Emmons was granted a temporary restraining order against Sebastian Liguori and his wife to keep them from allowing and inviting their friends to shoot over the land in question. In his complaint Emmons states that he in company with J. A. Leonard secured a lease of 120 acres of land near the San Francisco Bay from Liguori in 1898 for a term of ten years.

They were to sink an artesian well upon the land for the purpose of making fresh water ponds that the ducks would be attracted by them and were to build certain levees and dykes. He says that he has made these improvements but that during the last year Liguori has invited H.

Crocker, William Gall and John Brown of Mt. Eden onto the place and allowed them to shoot on the ponds. Upon the showing made, Judge Melvin issued a temporary restraining order.

### **Alvarado Fire:**

A conflagration which destroyed five buildings valued at about \$15,000 broke out here Saturday evening, and owing to a lack of water it had full sway until a building was torn down and the spread of the flames stayed. The loss is partially covered by insurance. The fire started in an upper room of the Davilla Building, which was occupied by two Portuguese who were using a gasoline stove to cook their supper. An explosion of the gasoline spread the burning gas over the entire room and its contents and severely injured both occupants before they could escape.

The fire quickly consumed the Davilla Building, in which was a saloon, and then attacked and consumed in rapid succession the barbershop of Frank Dabrovich, the residence of Harm Lees, an old church building which has been used for some time as a public meeting hall, and the drug store of Charles Wenkle. These buildings were completely gutted by the flames and the buildings and contents destroyed. The further progress of the flames were stopped by tearing down a building next to the Lee's residence, and the burned out area was bounded on the side of Davilla saloon by an empty lot.

George Cronin is under arrest in Livermore for having robbed Percy Calvin of a gold watch, but while Sheriff Barnet, who has been working on the case for nearly a week, is holding him on the robbery charge, the Sheriff is firmly convinced that the fellow is a firebug of the worst type, and he is responsible for the burning of Peter McKearney's barn and Chris Akers' stable (both in [Livermore](#)) within the last two weeks. Not only does the Sheriff believe that Cronin burned these two places in Livermore, but that he made seven attempts, several of which were successful, to burn places in Alvarado last winter.

Cronin becomes possessed of a wild desire to see a fire whenever he gets drunk. In addition he had been working for Chris Akers, and when he was discharged he is believed to have set the fire to the barn in revenge.

Cronin was working in Alvarado for Hellwig & May, butchers, at the time that seven fires were set on seven consecutive Tuesday nights. There was an attempt upon Smith's house, an attempt upon Hellwig's & May's shop, an attempt upon a blacksmith shop, an attempt upon Hellwig's barn, the burning of a store belonging to I.V. Ralph, the burning of a sausage shop belonging to Hellwig & May, and the wiping out of a block of stores one night.

**Sugar:**

George Gray, a representative of the Alameda Sugar Company, spent Friday in Yolo County. Accompanied by David Balfour he visited a number of farmers between Woodland and Davisville. The purpose of his visit was to investigate soil and climatic conditions with a view of ascertaining whether or not Yolo County can produce a good quality sugar beet. Mr. Gray is favorably impressed with Yolo County. He got a promise from a number of farmers who will plant from one to five acres of beets this season as an experiment. The company will furnish the seed free of

charge, also the necessary implements for seeding and cultivating. There is no doubt among residents of long experience here that there is plenty of land in the county that is well adapted to the successful cultivation of sugar beets. Nevertheless, the results of this experiment undertaken by Mr. Gray will be carefully watched.

**Ducks:**

Sunday was the last day of the duck-hunting season. The marshes were crowded with sportsmen, but most came to close up their respective gun clubhouses rather than to shoot birds. The sport has been unusually poor this season.

*The Oakland Tribune, February 14, 1906*

**Sugar:**

*(From The Woodland Daily Democrat)*

Simmons and Webb are in receipt of a letter from George Gray, agricultural agent of the Alameda Sugar Refinery at Alvarado, notifying them that there has been shipped to their address five sacks of sugar-beet seed, also a beet seeder and a deep tilling plow.

Mr. Gray also writes that he is going to put in some beets at the Bower place near Davisville. He is also anxious to experiment with the land east of Woodland. The soil is too wet at present, but operations will be commenced as soon as the ground is dry enough.

Farmers should bear in mind that Mr. Gray and the company he represents will not only pay them rent for so much of their land as they may use in experimenting, but they will also pay for the cultivation.

This is an opportunity that the farmers cannot neglect. They should write to Messrs. Simmons and Webb for seed and for further information.

**Damage Report on Earthquake – Alvarado 1906**

Report on Earthquake Investigations at Alvarado, by: F.E. Matthes  
Alvarado May 7<sup>th</sup>:

The plant of the Alameda Sugar Company was the chief sufferer. The main buildings are of wood, substantially constructed and were not damaged, but the fitting and accessory structures were injured in numerous places. An old limekiln showed diagonal cracks in the brickwork, several of the small arches above the fire holes opened and let bricks fall out. A 6" cast iron water pipe attached vertically to the main building broke transversely about 30 feet above the ground. The water in the tanks on the roof splashed heavily as to raise and break the wooden covers. The water seems to have splashed mostly to east.

The two great platforms carrying the syrup tanks, supported by numerous vertical props 10-feet 10-inches high, resting on concrete foundations fell down altogether, the northern one to the

north and the southern to the south, these directions being probably determined by the original inclination of the supports. The tanks were all damaged and over one million pounds of syrup flowed away (much of this, according to the superintendent will be recovered). Total weight on the south platform, was 1,072,891 pounds. Photographs of these collapsed platforms will be forwarded to the Commission by the superintendent.

At the time of the visit, much of the debris had been cleared away and no photograph was therefore taken of the ruins. In the engine room, the vertical steam pipes cracked next to the flanges by the racking motion of the ceiling through which they extend. The shock appears to have had a north-south direction according to the position of the breaks in these water pipes.

The mill stands on flat, alluvial ground, a hundred feet north of Alameda Creek. Along the banks of the latter a large number of cracks extend, roughly parallel with the stream. Considerable masses next to the streambed slumped towards the same, leaving gaping cracks a foot to two feet wide, and carrying with them small outlying buildings, notably the fire engine house which moved bodily, concrete foundation and all, two feet south toward the creek. A small railroad trestle S.W. of the mill moved 4" south on both of its abutments, probably owing to slumping of loose ground on north side of the creek.

A 2" water pipe laid under the ground some 60 feet north of the creek and almost parallel with the same, shows indication of having been submitted first to tension, causing rupture at one of the joints, then sudden compression causing it to be jammed together with violence.

Cracks in the ground may be found as far as 250 feet from the creek. They were nearly all closed at the time of my visit (May 7<sup>th</sup>), but were easily traced by the streaks of bluish gray sand which had issued from them together with considerable quantities of water. According to the Chinese cook of the superintendent, the cracks nearest to his dwelling were seen to open and close several (?) times in succession during the quake, large volume of mud laden water gushing from them, and splashing up some ten feet in the air at each closing.

A large crack of this kind opened under the N.W. corner of the dwelling, and the superintendent estimates that fully 500 gallons of water gushed from the same, the flow continuing with decreasing volume for about an hour. The fence in front of the house shows that the ground there has been raised into a low hump. The sewer pipe leading west to the creek was detached from the house by a space of 22". A chimney near the N.E. corner of the house was thrown to the east, with sufficient violence to throw the farthest bricks 35 feet east of the house. (The top of the chimney was only 20 feet above the ground originally).

In the roadway south of the mill water oozed out in a number of places without the production of visible cracks. The water pipes and hydrants in this vicinity were crunched in several places. The accompanying table ([I have not included this](#)) gives heights of water in a number of wells about the mill. These wells were observed daily before and after the earthquake. In most of them the water suddenly rose. In a few cases the readings show that the water rose from one to two feet. In one case a well, which used to be considered as nearly dry, has shown daily fluctuations since the quake, overflowing early every morning up to the time of my visit.

At the Alvarado Water Works, the brick buildings suffered considerable damage, the walls cracking in several places. Nothing could be learnt regarding the behavior of the wells of this plant. The frame dwelling of the superintendent was damaged by the collapse of its underpinning. A similar fate was that of the Alvarado Hotel. Both houses were being put back in place at date of visit. At the schoolhouse the water tank fell owing to the collapse of its supports.

Nearly all the brick chimneys in the village fell, the directions varying. A few cracks opened across the street, but these had been filled at the date of my visit. The consensus of opinion was the shock had a north-south direction with intensity of 7+. Report by Francois E. Matthes.

### **Sugar:**

*(From The Woodland Daily Democrat)*

George Gray, the agricultural manager of the Alameda Sugar Company, returned to Alvarado this morning. The company has seventy acres of sugar beets in Yolo County, which were planted for experimental purposes. Not long ago a sample of these beets was shipped to the factory and Mr. Gray was well satisfied with the test. He shipped another sample on Thursday.

Mr. Gray says the company's beets in this county are doing well. The soil was not so well cultivated as he desired, on account of the difficulty he had in procuring teams. If further experiments are made next season Mr. Gray will provide his own teams and rely on a force of experienced men. Wheat farmers, as a rule, are not familiar with the best methods of cultivating the sugar beet. It is necessary that the soil be stirred frequently, as baking the soil seriously retards the growth of the beet. The beets in this county will be ready about the first of September. They are of fair size and good quality.

### **Around Town:**

Fred Lassen, who met with an accident on his motorcycle and who was burned severely some time ago, is doing as well as can be expected. It will be months before he will be able to be about, and it is considered miraculous that he escaped with his life.

A gloom was cast over this town when the announcement was made of the sudden death Wednesday morning of Mrs. J. L. Olson of Decoto. As Mary Joyce, she was well known much beloved by the people of Alvarado. Most of her life was spent in Alvarado and it seems but a few years since she was led to the altar by John L. Olson, one of the Alvarado boys. The funeral was held at her late home Friday at 10 o'clock, thence to the Catholic Church in Centerville. The

deceased was born in Connecticut thirty-three years ago and leaves besides her husband, her mother, Mrs. H. Joyce, two sisters, Mrs. L. Aurich of San Francisco and Miss Harriet Joyce of Decoto.

The Ladies Aid Society will meet with Mrs. Churchman at her home near here Thursday. These ladies will hold an ice cream festival in the near future. Much good is done by the society and without a doubt their party will be a success.

The improvements to the Catholic Church are a great addition to Alvarado. Another fair will be given in the near future when it is hoped enough money will be raised to pay for the improvements.

Mr. A. B. Nauert has returned to his work in San Francisco after spending two weeks vacation with his parents here.

Miss Kathryn Nauert accompanied by Miss Elsie Jacobs of San Francisco spent Sunday at the home of the former.

### **Republican Candidates:**

Judge W. T. Harris, who has lived the greater part of his life in the lower part of the county, was tendered an ovation at Alvarado last night at the Republican Rally held there. When the popular jurist took platform to address the meeting, the residents in attendance in some instances stood on their feet and cheered, while the entire meeting for some moments continued to clap for the down county lawyer and member of the bench now before the people for election. All of the candidates were well received and the addresses of the evening were listened with attention. The Elks Quartet and a brass band contributed to the occasion. The meeting was in charge of Farley B. Granger Jr. of Alvarado.

*The Oakland Tribune, October 5, 1906*

### **Sugar:**

E. A. Vickroy of Alvarado, Alameda County, has been in town ([Woodland](#)) the last two weeks with a crew of twenty-five men and 10 teams digging and shipping 40 acres of sugar beets for the Alameda Sugar Beet Company. The beets were raised on the ranches of L. D. Stephens and Ed Archer. He completed the work today and left with his men for the Diggs Ranch, near Woodland, where he has 30 acres to harvest. Mr. Vickroy reports that the percentage of saccharine is satisfactory.

**William Faig Dies:**

Alvarado was shocked to hear of the sudden death of William Faig Thursday. On November 15<sup>th</sup> he fell from a building in Oakland where he was doing some electrical work, and while it was not thought that he was seriously injured he died a few hours later. He was born in Alvarado and attended our school. About a year ago his family moved to Hayward, from which place the funeral was held. He was held in high esteem by a large circle of friends and acquaintances. He was but sixteen years of age. He leaves a mother, Mrs. John (Faig) Flowers; and a sister, Miss Alice Faig, to mourn his loss.

### **Sugar:**

(From *The Woodland Daily Democrat*)

E.A. Vickroy, the Alameda Sugar Company's man, informs us that he expects to be here the first of the week. He has been kept quite busy superintending the work of preparing the land of the 240-acres that the company has leased and is preparing to plant. When seen on Wednesday he said he had three eight team horses plowing and had arranged for two or three more. He also said that from now on until the middle of April will be the proper time to plant sugar beets, depending upon the quality of the soil and the distance from the surface moisture. Mr. Vickroy assures us that his company means business and is in the field for the purchase of lands with the ultimate proposition of locating a beet sugar factory in Yolo County.

All this will depend nearly entirely upon the manner in which the farmers take hold of the beet growing and the adaptability of the soil. Of the soil Mr. Vickroy has little doubt. He says there are many thousands of acres of rich lands in Yolo County that will be ideal for the successful growing of sugar beets.

### **Sugar:**

For several months two big beet sugar companies have been active in our area ([Woodland](#)) promoting the cultivation of the sugar beet in Yolo County. One of these, the Alvarado Company, has been operating in Yolo County for two years and has fully demonstrated the fact that Yolo County soil will produce as good of beets as can be grown in California. The Alvarado Company

now has a resident representative, Mr. E. A. Vickroy, who makes his home in Woodland. He has been quite successful in encouraging the industry in this part of the state. So far has yet to be disclosed, the object is to increase the source of supply for the Alvarado plant.

A few weeks ago a representative of the Hamilton plant spent several days in Yolo County and he was assisted by the Woodland Chamber of Commerce. He made contracts with farmers for the planting of 400 acres of beets, the product to be shipped to Hamilton this season.

There is a current rumor that the operations in this county are in the nature of an experiment and that if the results are satisfactory Mr. Vickroy will in the near future establish a big beet sugar factory in Yolo County.

E. C. Burr, one of the stockholders in the Alameda Sugar Company, and George Gray, agricultural agent for the corporation, were in Woodland Friday and E.A. Vickroy, the local field agent, took them for a drive in the Cache Creek district. They are both well pleased with the result of one season's operation in Yolo County. They say the crop is as large as it is in any other county in the state and the quality is excellent. The success this season will make it comparatively easy to materially increase the area that will be planted to beets next season. The farmers have been furnished with conclusive evidence that beets are a surer crop than wheat and also more profitable.

**Milking Machines:**

(A letter to Baker & Hamilton, a very large San Francisco retailer of farm equipment, buggy's, household equipment, etc.)

Alvarado, August 3, 1907

Messrs. Baker & Hamilton, San Francisco  
Gentlemen:

You favor of the 31<sup>st</sup> is at hand. You ask what results we have had with the Burrell-Lawrence-Kennedy Milking Machine and whether they have given satisfaction.

We commenced using the machines last November. Owing to the fact that we occasionally meet some one who asserts that cows on which the machines have been used during an entire lactation period would have a diminished flow of milk after freshening again (although these assertions are mere rumors, in no case coming from a person having experience or knowledge of such effect), we had not intended to express our views until we had used the machines a full year. That we have little fear of bad results was shown when, after using five machines five months, we ordered five more, all of which are now in operation.

Almost all of the cows milk as well, and many of them better, with the use of machine than with hand milking. When first using the machines the cows are more or less nervous and do not let their milk all down, necessitating hand stripping. With patience and gentle treatment this is soon overcome, and a majority of the cows will be stripped out cleaner than by the average hand milker. The machines are a decided advantage in the breaking of heifers. With them results have been satisfactory in every case.

The men take kindly to the machines, and most of them soon become experts in their use. Where two men with machines do the same work as three with hand milking, the latter become jealous because of the easier work of the others. We think the proper allowance of work in the use of the machines would be five strings, 150 cows, for three men. While the reduction of the number of help required is a partial offset to the cost of the plant, we consider the chief advantage in the use of the milking machine is, that of having the milk free from dirt, which is not possible, however great the care in hand milking. In view of the exactions of health boards, which in many localities could not be complied with, the machines seem to us a necessity when furnishing milk for use in cities.

Yours very truly,  
Wiegman and Poorman

George Gray, agricultural agent of the Alameda Sugar Company, and his local manager, E.A. Vickroy are making active preparations to ship this season's crop to the refinery at Alvarado. They have two hundred and fifty acres in the vicinity of the Langenour switch and will begin digging beets tomorrow.

The Alameda Sugar Company that four beet wagons of particular construction have been received from the factory. The V-shaped bed is on a running gear equipped with broad-tire wheels, all of which were made entirely for this business. A net is spread on the bed; the beets load in and then lifted out by a derrick into the railroad car. This method is not only a saving in time and labor but it leaves the beets in better condition.

### **Sugar:**

*(From The Woodland Daily Democrat)*

George Gray of the Alameda Sugar Co. has just returned from a trip over the southern part of the state, where he visited all the sugar beet plants. He says the outlook in Yolo County is as good as any other part of the state. The Union ([Sugar](#)) people in Santa Barbara County will have a very small crop. The conditions about Salinas are no better. Indeed, it seems to be a very peculiar season all over the state. The trouble is that in many instances, since the seed was planted, there has not been enough rain to start a growth.

### **24-Hour Endurance Race:**

The first car in the first twenty-four hour endurance race ever held in California took off at 3:00 p.m. this afternoon from Estudillo House in San Leandro. Sixteen cars were entered, but one was scratched. The circuit of the course is 47.5 miles.

The general course to be followed by the endurance contestants is a sort of enlarged triangle, starting at San Leandro and traversing the road that runs through Tank Corners, Mt. Eden, Alvarado, Centerville, Irvington, Warm Springs and then back through Mission San Jose, Niles, Hayward and then to San Leandro. The circuit must be made 12 times for a total distance of 570 miles to be covered in the twenty-four hours.

Nine of the fifteen entrants ended up with perfect scores and each won a silver cup.

[Note: This was an endurance race, not a speed race. All applicable speed limits were observed.](#)

### **County Roads:**

Supervisor Horner on maintaining roads in the south county:

"It is my ambition for my district to have the foundation of a permanent system of roadways that can hereafter be maintained at comparatively little cost. But this is no easy task, for aside from the canyons into and out of the Livermore Valley, there are many miles of road on the western portion of this county that are very difficult to maintain. In the Alvarado section there are miles of marshy land to be maintained. This is an enormous expense, yet they must be maintained because this is the main thoroughfare between Oakland and San Jose."

**Chinaman Loses Wife:**

Qui Chan Kai, who lives at Alvarado, has instituted habeas corpus proceedings to regain possession of his wife, Chew Lang, 17 years old, and Wom Mun Yick, 1 year old, who, he says, are his wife and child. The girl and the baby are at the home of the Presbyterian Mission for Chinese women, and Qui Chan Kai asserts that they are imprisoned there and restrained of their liberty. According to his story he married the girl in January 1907, when she was leading an immoral life. Some time ago she left her home at Alvarado and came to San Francisco. Qui Chan Kai says she visited a house of ill fame and then was taken by the Presbyterian mission.

Miss Donaldina Cameron, head of the mission, has refused to give Chew Lang and the baby back to the man, charging that he bought her for \$3,000 from a slave dealer who brought her from China and then delivered her to Jow Lai, who placed her in a house of ill fame. The child was taken from Qui Chan Kai's house at Alvarado by officers of the mission. The matter will be thrashed out before Judge Graham on Wednesday.

**Sugar:**

*(From The Oxnard Courier)*

In California the slicing of sugar beets is underway. Early reports show that the Chino factory started slicing in late July from 10,000 acres under cultivation. The Corcoran plant is not running this year, the beets there being shipped down to Visalia where one of the largest factories in California is located. The factory at Hamilton is running at about two thirds of capacity owing to slow delivery of beets. At Alvarado and Betteravia both factories are going full blast. The big Spreckels plant is making a late start this year.

*The Oakland Tribune, January 24, 1909*

### **Sugar:**

*(From The Woodland Daily Democrat)*

George Gray, of the Alameda Sugar Company, is not inclined to take a pessimistic view of flood conditions. He says the outlook is for a good season for sugar beets is very favorable. Last year the first beet seed were planted by the company in Yolo County of the 14<sup>th</sup> of February and the last were planted on the 24<sup>th</sup> of June. The rainfall, however, was insufficient to mature good crops in all instances. There is ample time for most of the low land now flooded to be free of water before the planting season is over. The ground is so thoroughly soaked that but little more rain will be necessary after the seed is once in the ground.

**Oriental Liquor Licenses:**

Some of the licensed white hotel and saloon men in this town are strenuously complaining because of the alleged invasions of the county's license ordinance by Japanese who are able to import "wet" goods by the barrel and retail the same not only their own countrymen, but also to Caucasians. Alvarado and vicinity has a large Japanese population, largely owing to the employment of Jap labor in the local beet sugar mill and the beet fields hereabout. It also happens that Japanese tradesmen are tenants of many buildings in the older section of town, which buildings are owned by local financiers, who look pained whenever anything is said reflecting upon their tenants. So it stated that though the local constabulary has been complained to regard the asserted violations of county license ordinance by the Japanese, no arrests have been made.

Now it is understood that an appeal will be made in the near future to the District Attorney's office for an investigation of the matter. Incidentally, it may also embrace an investigation of the "compound" maintained by the Orientals in one section of their quarter, wherein it is said that a number of Chinese, Japanese and an occasional Caucasian girl are kept immured for immoral purposes.

**Sugar:**

(From *The Woodland Daily Democrat*)

The Alameda Sugar Company started its big steam plows on the Nelson Ranch Tuesday morning, and made the initial shipment of one carload of beets to the Alvarado factory on the evening of the same day. The next day the shipments were increased materially, and on Thursday they aggregated 200 tons. From today to the rest of the season, the shipments will average 300 tons a day. They could easily be made much larger, but there are other districts contributing to the plant and in making provision for the regular run all are considered equal.

The sugar company is using the new steam powered beet plowing plant, which cost \$25,000 and is operated by means of cables and stationary engines. An engine of sixty-horse power is stationed at each end of the rows. The plows are hauled back and forth across the field by means of cables. They dig six rows at a time and the daily capacity is about 20 acres. The work is done clean and effectively. It is not necessary to go over the same ground twice.

The great power of the engines and the peculiar design of the plows enables them to go to depths of twelve or fourteen inches if necessary, and for this reason the method is a great improvement over hand plowing. The lower part of the beet contains the most sugar. With the steam plow it is possible to get the entire beet, but in hand plowing much of the best part of the beet is lost.

**Auto Wreck Near Alvarado:**

An automobile party with a badly dilapidated machine was towed into Hayward about 10 o'clock last evening, and told of a thrilling auto accident that took place near Alvarado about two hours earlier. The machine, which was nearly a wreck, is said to have run off the grade and smashed into a telegraph pole, throwing out the occupants. The machine then continued on its mad flight, crashing through the pipeline of the People's Water Company that is alongside the road for some distance out there.

The machine contained five passengers from San Francisco and all were more or less maimed and bruised, but only one had a bone broken it is stated.

**Historic Alvarado:**

Alvarado is the historic town of Alameda County. It was the first county seat and is a peaceful and thriving town of about 900 people. It is situated on the eastern shore of San Francisco Bay midway between Oakland and San Jose. It has a public grammar school, with an excellent corps

of teachers, Presbyterian and Roman Catholic Churches. There are three stores doing a thriving business and prosperous business in the town.

On the shores of the bay near Alvarado are salt works, where hundreds of thousands of tons of salt are annually made. The People's Water Company, originally started by William Dingee of Oakland, is making many improvements and additions to its plant, and is now pumping and delivering between five and six million gallons of water daily to the people of Oakland.

The Bank of Alvarado has had a prosperous year. The institution has now reached a dividend basis and by its careful judgment and conservative management has obtained a reputation among financial centers second to none in the county.

The one principal industry of the town is the **sugar mill**, which gives employment to many at the mill, as well as creating a market for the products of the farmers by the raising of beets.

#### **Sugar:**

The capacity of the **Sugar Mill** at Alvarado is 700 tons of sugar a day and the yearly output is from 5,000 to 8,000 tons annually. The land in many sections of Alameda County is especially adapted to the production of sugar beets. From 15 to 25 tons to the acre is the equal yield, although some farmers have produced as high as 32 tons to the acre. The company pays a flat rate of five dollars a ton and at this rate raising sugar beets is a profitable enterprise.

### **Lady Aeronauts Land in the Marshes:**

Two daring women aeronauts in hot air balloons had a thrilling experience and nearly lost their lives in the final balloon race of the series for the silver cup donated by the Portola Festival Committee. The aero clubs of Oakland and San Francisco each had a balloon entered and the flights would be without particularly sensational features had it not been for the calamitous landings made in the salt marshes of the southern shores of the about 5 o'clock in the evening near Alvarado.

The balloons left San Francisco about 3:10 p.m., rose to 400 feet and headed towards Goat Island ([Yerba Buena Island today](#)), they both headed towards San Jose and began losing altitude. About 5:00 p.m. they hit the waters of the bay and were drug onto land ([mud](#)) of the marshes. One balloon came down in the salt flats near Baumberg and the other in the salt flats of Alvarado. The Oakland balloon was determined to be the winner as it had flown the farthest.

**Sugar:**

*(From The Woodland Daily Democrat)*

There will be no more shipments from Yolo County to the Sacramento Valley Company's plant at Hamilton this season as the plant has been shut down, but the Alameda Sugar Company will continue to ship to Alvarado for two or three more weeks. It has about 4,000 more tons yet in Yolo County fields but anticipates no trouble in future shipments on account of rainy weather. All long hauls and the product of low grounds have already been disposed of. What still remains to be harvested is on high grounds and the haul will be short. Even if there should be unusual rains it will only be a question of putting on more teams.

Alex Simas, the well-known rancher, found himself in a predicament Tuesday afternoon in front of the post office, as a rim of a wheel from his wagon came off, but fortunately a smithy's shop was only a half block distant, whither the vehicle was taken for repairs.

Postmaster Richmond reports a very brisk run during the holidays, his office having been kept quite busy since the first of the week. The Japanese colony, which, by the way, celebrate the nativity day in true American style, has been mailing hundreds of fancy postal cards to the land of the Mikado, which has materially increased the sale of stamps.

The members of the **Alvarado Aerie, No. 1695**, are planning to hold a grand masquerade ball on the 22<sup>nd</sup> of the month. Owing to the severity of the weather the dance scheduled for December 4<sup>th</sup> was postponed and in place of the ordinary dance a masquerade has been decided upon. Prizes will be given and a good time is in store for all who attend.

Manuel Duarte, who was run over by a **sugar mill** team, the load on the wagon weighing three tons, a month ago, was sitting up Thursday and had Thanksgiving Dinner with his family. This is quite a remarkable case as Mr. Duarte had five ribs on the right side and four ribs on the left side fractured, the lungs on both sides being penetrated and his recovery speaks well for the skill of Dr. Morrison, who attended him.

The little Harvey child, who was accidentally shot by his father while the latter was cleaning a gun, is improving steadily and his ultimate recovery is looked for. The delicate drain tubes in the child's abdomen have been removed and if no complications set in the little tot will enjoy Christmas at home.

M. Allguire of North Dakota is the guest of his brother, J. R. Allguire. This is Allguire's first visit to this coast, and he is very much impressed with our rapid growth and delightful climate. The two brothers had not seen each other for thirty-eight years, when both were mere boys, and their meeting was not only a surprise, but also a time of recalling the frolicsome days of their youth.

Miss Well was an attentive visitor with friends last Tuesday.

A case of diphtheria has made its appearance in town, Manuel Rogers, a six-year-old boy, being the victim.

The Alameda **Sugar Company mill** closed down for the season on Tuesday. Active operations will not commence again until the fall of 1910.

John Buchanan Sr. has recently received an unfavorable report as to his son John's heart condition. He is afflicted with heart disease and the doctors hold little hope for his recovery.

Mrs. Magill of Fruitvale is visiting her sister, Mrs. A. Amaral.

Mrs. J. F. Silva of Newark is visiting her mother, Mrs. I. Foster.

Mr. A. J. Rutherford, the genial station agent, has returned from his vacation.

E. M. Tainton underwent a painful operation on one of his fingers one day this week.

**Savant Seized As Bloodthirsty Thug:**

Professor George C. Edwards of the University of California at Berkeley alighted from a San Jose train at 6 p.m. tonight to be seized by a squad of patrolmen and deputy sheriffs. One pinioned his arms from behind, another shoved a revolver against his waistband, a third inverted his pocket linings, while a whole detachment formed a cordon around the prisoner.

"That's the man," shouted Deputy Sheriff Mattos, as he ran up in breathless excitement. "He's the yegg that blew the Alvarado safe all right. Hold on to him boys."

"But I'm Professor Edwards and I live in Berkeley," explained the savant, as he tried to side step the iron muzzle. The gun creased the professor's coat menacingly and he halted. A crowd collected. An extra squad with a delegation of plain-clothes detectives dashed up in an auto.

"But I must go to Berkeley," insisted the crack mathematician of the state college.

"You shut up and stand still or you'll go to hell," replied the man behind the gun.

Another police auto shot around the corner. Out jumped Sheriff Barnet, ready to take his man dead or alive. He broke through the excited crowd. He looked at the prisoner and then with outstretched arms he embraced the captive.

"Why, Professor Edwards, what's all this about?"

Explanations followed. The crowd laughed. The patrolmen apologized. Edwards caught his car to Berkeley.

Deputy Sheriff Mattos had boarded the train at Niles. His eye lit upon Edwards. On the instant he recognized the bloodthirsty thug who tried to dynamite the Southern Pacific safe at Alvarado. He never took his eyes off his man. At Hayward he telephoned to have the police and a sheriff's posse at the station. As the train stopped Edwards jumped and ran for the Berkeley car. Mattos was convinced.

"Catch him, catch him," he shouted, and Edwards was nabbed.

"I'm Sorry," Mattos apologized tonight, "but I hadn't seen Edwards in ten years and he shaved his whiskers. He's a ringer for the yegg."

**Japanese May Be Murder Victim:**

A murder mystery has been uncovered by finding the body of Y. Saratani, a Japanese employee of the California Salt Works in the creek near the plant at Alvarado. The man's skull was fractured, apparently by a blow from some blunt metal weapon, and the lungs were filled with water.

In the opinion of Dr. H.E. Morrison of Niles, who performed an autopsy today, Saratani was murdered. The surgeon declared after his investigation that the laborer had been dealt a mortal blow on the head, made unconscious and thrown into the water while still breathing.

The condition of the remains would bear this out, according to Dr. Morrison, who said Saratani could in no manner have fallen so as to crush his skull as it was fractured. Against the doctor's professional opinion was the belief of Saratani's employer at the salt works that Saratani fell from a gang plank while helping to load a barge, struck his head and went senseless into the water.

Saratani, who was one of 60 Japanese laborers at the salt refinery, was missed by his companions yesterday morning. No trace of him was found until 4 o'clock in the afternoon, when his body was seen floating with the tides not far from the salt works.

It was impossible to reach the corpse until this morning when the tide had risen, and the coroner's office or the sheriff was notified of the supposed accident. This forenoon men rowed four miles out to the body, which they took to Alvarado.

**Alvarado Robbers Caught:**

In the arrest of Charles P. Tevis at Modesto, February 20<sup>th</sup>, following the robbery of the Gray Bros. Department Store in that town and the Ceres Lumber Company in the neighborhood, the sheriffs of this county, Stanislaus, believe that they have the man who is the leader of one of the most desperate and experienced bands of robbers and safe crackers which have ever operated on the West Coast.

The belief of the sheriff follows the confession of a seventeen year-old-boy, arrested with Tevis after the two robberies near Modesto, in which the boy declares that the older man deliberately killed a member of the gang called "Mac" after the latter had been wounded in a pistol duel with officers near San Jose. The dead man is believed to be the one Sheriff Barnett wounded in a duel

at Niles on the morning of December 26, 1909, following the attempted robbery of the railroad station safe at Alvarado.

**The Great Benjamin in Hayward:**

The Great Benjamin almost created a riot at his show on the grounds of B Street near the Post office in Hayward the last few nights. He threw out fistfuls of dollars, halves, and other coin without regard of amount. The show grounds were ablaze with electric lights and enormous crowds attended and are entertained royally by the best and biggest free show ever given here. In fact, we have paid 50 cents to a dollar and a half in the opera house many a time and have not seen a show half as good. Benjamin stays here for two weeks and shows every night except Sunday. The medical experts with him are under the direct of Dr. Duncan Cram, known as the great Dr. Duncan.

Benjamin was here several years ago with his experts and they have made many cures here in Hayward, San Leandro, San Lorenzo and Alvarado and vicinity of chronic and obstinate cases, which have baffled the skill of the ordinary physicians.

The officer of the Marvelous Medical Experts who are with Benjamin were the directors of the Great Dr. Duncan, the master expert and head physician and bloodless surgeon of their system of hospitals and sanitariums, are at the Hotel Villa in Hayward. A small charge of \$1 is made to keep out curiosity seekers.

The Benjamin Medical Experts positively cure; asthma, dropsy, epilepsy, St. Vitus Dance, nervous disorders, paralysis, deafness, throat-chest-lung trouble, incipient consumption, diseases of women are successfully cured without an operation. Old chronic diseases of the blood, stomach, liver and kidneys, diabetes, gravel, incipient Bright's disease, rheumatism, acute chronic muscular and sciatic problems. Hip joint disease, rupture and hernia, piles, hemorrhoids, disease of the eye, ear, nose and throat. In fact what has puzzled you and your doctor gives way to the wonderful medicine of these specialists. Cancers, tapeworms, tumors and gallstones removed, no operation, no knife, and no pain. These experts speak all languages.

### **Woman Beat in Alvarado Hotel:**

R.C. Durant, the agent here ([San Francisco](#)) for the Durant Car, won drinks on a slot machine the evening of May 6<sup>th</sup>. That was his undoing. It started a train of circumstances that ended yesterday with Mrs. Pearl Durant getting a divorce.

It was not the mere winning of the drinks that Mrs. Durant minded so much. But when her husband insisted upon swallowing all of them, the entire 90, she knew there was trouble ahead, she testified yesterday.

Durant's run of luck occurred at Alvarado, during a pause in an automobile trip to San Jose. The trip was never finished. They took a room at Alvarado and then testified the wife; Durant beat her in a brutal manner, broke two of her ribs, blackened her eyes and threatened that if he swung for it he would kill her.

A man named Charles Laphorne heard Mrs. Durant screaming and went to their room. Durant told Laphorne he had been dreaming and then whispered to him confidentially that if there were any court proceedings to tell the judge he heard Mrs. Durant using bad language.

Durant beat his wife on other occasions, according to her story, having begun his course of ill treatment within a few weeks of their marriage, which occurred at Los Angeles September 15, 1909. Mrs. Durant was granted a divorce.

**Beard Ranch Sold:**

The Beard place of Alvarado and several pieces of adjoining land have been sold to the Mortimer Realty Company of Berkeley. Much speculation is indulged as to the real purchasers. It is supposed to be a Spring Valley Water deal, although two road surveys were made in the neighborhood two years ago. One of those surveys run from Decoto to Dumbarton Point and the other through Centerville. Everybody is guessing as to the real object of the purchasers. The land purchased is in a very fertile belt and has an unusually good supply of underground water.

**The Death of Ebenezer Dyer:**

Ebenezer Herrick Dyer, father of the beet sugar industry in the United States and the first man to successfully manufacture that commodity in this country, died at his residence in Alvarado, Alameda County, early yesterday morning, aged 88 years. He leaves an estate estimated at \$1,000,000, chiefly in sugar stock and real estate holdings in Alameda and the Santa Clara valley, to be equally divided between his widow and six children.

Born in Sullivan, Maine April 17, 1822, Dyer came to California with the early rush of 1857, crossing the continent via the isthmus route. He settled in Alvarado, Alameda County, and in 1859 was elected county surveyor. In 1861 he was re-elected to that position and in the same year was appointed to the position of United States Deputy Surveyor by President Lincoln. He continued in that position for ten years, but in 1869 became interested in the beet sugar industry.

Prior to this several others had attempted to originate the industry in the United States without success. Dyer, however, took it up and in 1870 established the first beet sugar plant in the country and until 10 years ago, when his failing eyesight necessitated the passing of his business over to his sons, he remained at the active head of it. The concern is now known as the Alameda Sugar Company. Apart from his business he took an active interest in politics and in 1876 was delegate to the Republican National Convention. Later in life he engaged, in company with his

three sons, in the business of erecting beet sugar plants, and some of the biggest plants in the country were built by them.

Dyer married Marion W. Ingalls of his native town in 1857. There were three children by this union, Mrs. Abitha M. Munson of Tacoma, Ellen F. Dyer, and Edward F. Dyer of Cleveland. Mrs. Dyer died in 1863. Her twin sister, Olive Ingalls, later became Dyer's second wife. There were three children by this second marriage, Hugh T. Dyer of Ogden, Guy S. Dyer of Alvarado, and Mrs. Nina Washburn of San Francisco. Mrs. Dyer survives her husband. She was present at his bedside when he died, as were all of his children.

The funeral will be held tomorrow afternoon at 2 o'clock from the family residence at Alvarado. It will be conducted under the auspices of the Crusade Lodge No. 93, Independent Order of Odd Fellows. The interment will be in Cypress Cemetery at Decoto.

#### **News Notes:**

The People's Water Company is going to install a new ideal plant, having all modern improvements, an ideal engine and boiler room up-to-date facilities for pumping and distributing water. Plans are all perfected and work will begin immediately. This will be a big thing for Alvarado and a benefit to every business in it.

It is rumored that a large dancing and entertainment hall, with facilities for the exhibition of moving pictures, is to be erected in Alvarado. Promoters have been here negotiating for a site for the new venture. If the deal goes through, the erection of a magnificent building will begin without delay and be carried out to completion at an early date.

**Chamber of Commerce:**

The members of the six Chambers of Commerce in Washington Township are anxiously waiting for the news to come from the Alvarado Chamber of Commerce whether they are ready to join the combination and fight for the rights of the various cities in regards to improvements. When all of the chambers combine together, the next move will be to elect accredited representatives from all the organizations to meet as one and take up matters for the betterment of the entire township.

*The Oakland Tribune, February 9, 1911*

**Chamber of Commerce:**

Now that nearly every town in Washington Township has an active Chamber of Commerce, the residents of the various towns within its jurisdiction are looking forward to forming some definite plans by which they can assist the fruit shippers. One of the strongest plans under consideration by the members of the different chambers is to urge the residents and businessmen of Alvarado and Warm Springs to form a civic body immediately. After the forming of these two organizations it is planned to join all the chambers in the township into one large organization.

**Flood:**

The residents of Alvarado are considering action in regard to the overflow of the Alameda Creek, whose water for the past few months has been flooding the district. Every winter the overflow increases and unless the creek is dredged and the debris is removed damage is feared.

At the present time the cattle of the small dairy farms are standing two feet of water and the refuse of Chinatown has been washed back into the main streets of town.

Some of the residents have started to build walls around their property to protect their home. Fred Wiegman, one of the wealthier farmers in the county has called for plans for the construction of a concrete fence around his property from Alameda Bridge a mile up the creek. He has planned to spend not more than \$3,000. The sixty-acre tract of land owned by J. R. Allguire has been under water for the past two months, in some places up to four feet of water.  
*The Oakland Tribune, February 22, 1911*

**Flood:**

The recent heavy rains have once again aroused the residents of Alvarado to activity to the opinion that something must be done in a hurry to keep them from becoming driven from their homes, with the rapid rise of Alameda Creek. For the last two years the water from the creek in the wintertime has been inundating all the lands for miles around and several times the residents have been forced to remove their effects to other portions of their houses or to some other house.

To add to the discomfort of the rising of the water, during the summer months many of the residents have to cut down the trees, which line the bank of the creek, and then have allowed the branches to remain on the banks. In the wintertime these branches clog up the culverts and make it impossible for the water to escape. One plan proposed stipulates that a canal be cut from the center of town across the marshes and continue into Crandall Slough, which in turn would connect with the bay and a waterway for ships of light draught to the Bay of San Francisco.

**Burr Resigns:**

E. W. Burr, Superintendent of the Alameda Sugar Company has resigned his position and expects to sever his connection with the company effective April 1<sup>st</sup>. Taking his place will be J. W. Atkinson who presently is the plant manager.  
*The Hayward Twice a Week Review, March 7, 1911*

**Flood:**

For the past twenty-four hours part of the town of Alvarado has been under water and many of the residents have been forced to flee. Alameda Creek, which the residents of this town have been fighting for the past four years, has overflowed its banks and broken over the dams until it has carried everything before it in a wild rush up the streets. Many hundreds of acres of land are under water. Many houses have been deserted, while food and clothing float down the street.

Rowboats have been pressed into use and the work of rescuing people from their houses last night, during the worst hours of the storm, was carried on by the light of many lanterns, the lighting system being badly damaged.  
*The Oakland Tribune, March 7, 1911*

**Flood:**

The sugar beet plantation of the Alameda Sugar Company has been converted into a lake and it is feared that most of the crop will be a total failure. Throughout the town of Alvarado the scene is one of desolation. All means of travel from Oakland and San Francisco has been cut off. The Alameda Creek has burst its banks and Alvarado was only saved from being flooded or washed away by the efforts of its citizens.  
*The Oakland Tribune, March 8, 1911*

**Flood:**

It was thought last night that the recent storm has broken and would allow people to begin repairs, but through the breaking of dams in Niles Canyon, the water continues to rise downstream near Alvarado. No word can be heard from Newark, Centerville, Irvington or Alvarado. Along the Western Pacific lines (Niles) the water has washed away the roadbeds. It is reported that the Alameda Creek at Alvarado has burst its banks and has swept the town.  
*The Oakland Tribune, March 9, 1911*

**Liquor License:**

The application for a liquor license by X. Herme of Alvarado has been received by the board.

Wiegman and son Fred Wiegman, Jr., Mrs. E. Hellwig, and Mrs. V. La Grave of Hayward. Mr. Dressler is one of Hayward's wealthiest residents.

*The Oakland Tribune, June 8, 1911*

**Man Shoots Wife:**

Following a quarrel in their home a few miles from here last night John Abern, a farm hand, picked up a rifle and shot his wife as she fled from the house. The shot entered the woman's leg just below the knee.

Neighbor's hearing the shot ran to the woman's assistance and took her to Niles, where she received first aid. She was later removed to the county hospital where she is at the present time resting easily. Abern was arrested on the charge of assault with a deadly weapon and was taken before Justice of the Peace Ferrera in Decoto today.

After the shooting Abern claimed that he shot only to frighten his wife, but the woman declares that he has often made threats against her life and that she lived in mortal fear of him.

### **Suburban Motor Car Service:**

News of a proposed motorcar route to tie suburban Alameda County together has hit the planning stages. It is hoped that a suburban motorcar service is soon to be established and thereby maintain the communication between the cities. The route is laid out for a loop service working two ways, one starting at Oakland, 1<sup>st</sup> & Broadway, to Elmhurst, Mt. Eden, Alvarado, Newark, Centerville, Niles, Decoto, Hayward, San Leandro and then back to 1<sup>st</sup> & Broadway. There would be a second car running the opposite loop.

This route will allow traffic between the towns to be maintained at all times and promises to greatly assist in the up building of this section of Alameda County.

### **Post Office Break In:**

Burglars forced the door of the post office late last night and broke open the little iron safe with a pick. They found nothing of value in the safe and decamped, driving out of town in a horse and buggy belonging to Joseph Rose. It is believed that the parties had made preparations for a much larger haul either from the post office or from some other source as the telephone cable connecting to the local switchboard was severed shortly after midnight, as was the telegraph line leading from the Southern Pacific Train Depot. Postmaster J. H. Ralph said that there was not more than a few dollars worth of valuables in the office. Before daybreak the station of the Western Pacific at Hayward was looted and it was presumed by the authorities that the same parties did both jobs. Nitroglycerin was used in the Western Pacific safecracking job. Much damage was done to the office, but no money was taken.

#### **Fourth of July Celebration:**

The Washington Township Fourth of July celebration held in Centerville surpassed all expectations in point of numbers and the continual round of pleasures enjoyed by the visitors. The first special excursion train from San Francisco and Oakland brought thousands and until noon people flocked into town from every directions in autos and wagons. The main street from one end of town to the other was one mass of humanity and it difficult to clear the street for the beginning of the parade, which started at 11:30 a.m. The main street was lined on either side with concessions and booths of every description and at different points grandstands were erected from which the visitors could view the parade. The streets were a mass of flags and banners. Brass bands came from San Francisco and Oakland furnishing music during the day and the night from stands created especially for the bands.

In the parade were floats representing every fraternal organization, school, Chamber of Commerce, and many civic organizations and industrial concerns in Washington Township. Miss Mabel Mathlesen, Goddess of Liberty, was seated on a throne of white and gold, attended by cupids in white, on a float drawn by four white horses. A platoon of National Guards from Hayward, under the captaincy of J. J. Bourree, was a feature of the parade.

Prizes were awarded in various categories for parade entrants. Winners from Alvarado included: The Alvarado Eagles took first place in the best float by a fraternal organization. Best Equestrienne went to Miss Maud Perreira of Alvarado. The best industrial display went to the California Nursery at Niles, with second place going to the Alameda Sugar Company of Alvarado.

**Sugar:**

The entire acreage of the Alameda Sugar Company north of Pleasanton has been leased to Antone Goularte, a prominent rancher in the Santa Rita area. The company's machinery and other paraphernalia is being shipped to its Woodland holdings. The renting of this land and the relinquishment of all surrounding property by the company is a significant fact when considered with the reported sale of the concern's holdings at Alvarado. It is understood the reason for abandoning of the field here is due to the lack of a suitable market. Many of the company's employees have been transferred to other plants and ranches. The Alameda Sugar Company has been active in the Pleasanton area for many years and the move comes as a surprise to many.

### **Sugar:**

The Alameda Sugar Co., located at Alvarado, California, will move its refinery to Meridian California. Meridian is approximately 40 miles north of Sacramento. The company has secured options on 10,000 acres of sugar beet land, and the company's representatives have announced that the actual transfer of the plant will be completed in early 1913. The new factory will be twice the size of the old plant, and in addition the concern must construct branch railways tapping the sugar beet belt for transportation of beets to the refinery. In the neighborhood of 2,500,000 will be expended on the plant and roads.

### **Sugar:**

For some time past there has been rumors that the Alameda Sugar Company intended to move its factory from Alvarado, as its main beet supply for some time has been coming from the Sacramento Valley ([Woodland](#)). A dispatch from Meridian, Sutter County, in Monday's papers confirms this rumor and gives the following particulars:

"The Alameda Sugar Company located at Alvarado will remove its refinery to this city ([Meridian](#)). It has secured options on approximately 10,000 acres of sugar beet land, and the company's representatives have announced that the actual transfer of the plant will be completed by early 1913."

"The new factory will be twice the capacity of the old plant, and in addition the concern must construct branch railways tapping the sugar beet belt for the transportation of the beets to the refinery. In the neighborhood of \$2,500,000 will be expended on the plant and roads,"

**Oscarna Nauert:**

Miss Oscarna Preston Nauert made known her engagement to Harry D. Heitmuller at a card party at which she was the hostess at the Nauert home in Alvarado on Thursday. The affair was given in honor of Mrs. William Wallace Haley and Mrs. Leo P. Haas, school friends of Miss Nauert.

The announcement was made in a thoroughly charming manner. First cards were passed and each guest was asked who among them were engaged; much merriment was caused by the games as several engaged girls were present. The envelopes were given to all to be opened at the same time. One card with the names of the betrothed pair and decorated with tiny red hearts told the happy secret, which Miss Ruth Blair had the pleasure of reading. The attractive young girl was showered with hearty good wishes.

Miss Nauert is the daughter of Charles R. Nauert and the late Hattie Nauert and has resided in Alvarado all her life, her grandparents having settled in Washington Township in the early fifties. Mr. Heitmuller is also well known, both in the commercial and social world.

**Sugar:**

OPEN LETTER TO THE EDITOR:

Editor Tribune: The Alameda Sugar Company is located at Alvarado in Alameda County. Its factory is the oldest and at one time the only beet sugar factory in operation in the United States. The company has seen the progress and the growth of the beet sugar industry from 45,000 in 1897 to 600,000 tons in 1911.

This growth has become a menace to the Eastern refiners of duty paying, raw cane sugar, and they combined in a persistent attack on the beet sugar interests, seeking an abolition of the duty

under the cloak of serving the ultimate consumer. Their professions in this regard are insincere and their motives are purely selfish.

Our company is a member of the United States Beet Sugar Industry, which defensive organization was made necessary by the operations of the Eastern cane refiners. We enclose one its leaflets compiled from testimony recently taken by the Hardwick committee.

California produced in 1911 nearly 150,000 tons of beet sugar, nearly one quarter of our entire beet product. If your views are in line with the protection of American industries until the official authorities become satisfied that protection is no longer needed to make our country self supporting in the matter of sugar, we would be glad if you would make such comment in your columns as accord with your opinions on the subject.

If you should be in want of any information we will be glad to give it to you.

Yours truly,

John L. Howard, President

Alameda Sugar Company

**Mrs. Barton Returns:**

Mrs. John Barton and her daughter, Mrs. T. Cuyler, have returned to California after several years abroad. Mrs. Barton is the widow of John Barton, a California pioneer who made a big fortune in salt. The Barton estate still owns a big salt plant on the Alvarado marshes in Alameda County.

After her husband's death Mrs. Barton and her daughter made their home in the Palace Hotel in San Francisco, going abroad soon after the San Francisco fire.

Mrs. Barton and her daughter will now move into their Alameda estate, which has not been occupied for several years. At the time it was built it was finest home in that city. It occupies almost a block of land in the heart of the city, the barns, conservatories and other buildings being constructed on the liberal scale on which millionaires did things.

#### **Sugar:**

No class of farmers, says the *Yolo Democrat*, were better pleased with the recent rains than the men engaged in sugar beet growing. The representatives of both the big companies operating in Yolo County say they are from a month to six weeks further advanced than at the same period last year, and crop prospects are most promising. The company which for several years operated at Alvarado, Alameda County, but which recently removed its plant to Meridian, Sutter County, is said to have authorized a bond issue of a million dollars to provide funds for the erection of a big plant, the bonds to be secured by lands recently acquired by the company. The plant will be one of the largest in the country.

**Sugar:**

*(From The Woodland Daily Democrat)*

The sugar beet harvest is now in full swing. The development of sugar in the beets has been somewhat retarded by the cool nights but the ripening process is going rapidly now. Most of the beets in this vicinity will average about 19 percent sugar.

The shipments of the Alameda Sugar Company to the Alvarado factory will now average about twelve carloads a day. The company is experiencing some trouble with its (Alvarado) help. The Hindus and Mexicans are not altogether satisfactory and the Japanese help is insufficient. The daily shipments will gradually increase hereafter.

#### **Truck Falls Through Bridge:**

The large automobile truck used by the Golden West Brewing Co., went through the long bridge at Alvarado Monday evening. Mike Campbell was at the wheel of the machine, which was carrying a ton and a half of empty beer barrels. When the truck was half way over the bridge it went completely through and landed in the bottom of the creek on its side. Campbell jumped in time to avoid injury, but the damage done to the truck will be considerable. A crew from the Hayward Garage went down the next morning and towed the wreck back to Hayward.

**Beautiful Panorama:**

TO THE EDITOR OF THE TRIBUNE:

I have seen no comment anywhere on the remarkable atmospheric conditions, which prevailed on Saturday of last week. I happened to be in Piedmont on Saturday afternoon and was amazed to note the clearness with which distant hills could be distinguished.

A gentleman who was with me pointed out various peaks with which he was familiar with in the coast range and far to the south Mt. Hamilton was plainly visible. Nearer at hand the Alvarado hills ([Coyote Hills?](#)) could be seen very distinctly.

Thus from Mt. Tamalpais on the north to Mt. Hamilton in the south, the eye ranged over a vast expanse embracing at least one hundred square miles. I think people in general scarcely appreciate this marvelous panorama, which is spread before the eyes

**Bank Robbery:**

Five bandits armed with powerful searchlights and rifles stood off all interferences of the part of citizens in Alvarado at an early hour this morning, when they dynamited the vaults of the **Bank of Alameda County** in an effort to gain access to \$27,000 in gold and silver.

With the building shattered and the heavy vaults wrecked, the two men working on the inside of the institution were forced to leave with but \$19.20 in spite of the fact that the greater amount was in sight through forced steel doors. They could not move the doors, which had blown inward instead of outward and with daylight threatening and the alarm spreading into the surrounding country, they abandoned their efforts.

Constable G.G. Bontelho was held a prisoner in his home across from the bank. Three men stood guard about the building flashing their searchlights upon neighboring doors and windows

whenever a head appeared. Their threats were backed up by frequent shots from their rifles and sawed-off shotguns. Telephone wires were severed before the men commenced their operations.

From the information garnered by Sheriff Barnet, who went to the scene several hours later when he received word of the robbery, the five bandits had entered Alvarado shortly before 3 o'clock this morning.

***The Oakland Tribune, April 5, 1913***

#### **Bank Robbery:**

While yeggs ([safe-crackers](#)) held off an armed crowd from the town of Alvarado, three of their companions set off seven explosives in the vault of the **Alvarado bank**. The last explosion jammed the wrecked door of the vault where a receptacle containing \$27,000 in gold was kept. The men were only able to secure \$19 from the bank. They escaped in an auto into the hills where a posse is now hunting for them.

The robbery was the most sensational in this part of the state. The boldness of the robbers took the populace by surprise and no attempt was made to fire on them until they were leaving the city although many of the frightened citizens were armed.

***The Modesto Evening News, Modesto California, April 5, 1913***

#### **Bank Robbery:**

The bank robbers that blew up the vault of **Bank of Alameda County** in Alvarado took several precautions to gain time for an escape. The bandits cut the telephone wires into and out of town, and then went to the Southern Pacific Train Depot and cut the telegraph wires. Finally they went to the Hose House of the Fire Department and dismantled the town's general alarm.

One of the peculiar freaks in connection with the dynamiting was shown when a piece of the steel door weighing eight pounds was hurled through a bank window, cut off two branches of a nearby tree and dropped through the roof into the attic of an adjacent building.

At the time the dynamiting was going on it was raining hard and townspeople who heard the blasts stated that they could only see dim forms through the windows of the bank.

***The Oakland Tribune, April 5, 1913***

#### **Bank Robbery:**

The automobile used in the Bank of Alameda County robbery on April 5<sup>th</sup> has been found on Brokaw Road in San Jose. Found in the car were raincoats taken from the SP Depot in Alvarado and a bottle of nitroglycerin. It is theorized that at least two of the safe crackers boarded a train for San Francisco.

***The Oakland Tribune, April 6, 1913***

#### **Constable Bontelho:**

Where was Constable G. G. Bontelho of Alvarado during the early hours of Saturday morning, when five yeggmen aroused the entire town during the hour that they placed seven charges of nitroglycerin in the Bank of Alameda County's vault, the explosions shaking the country for miles around?

It is a question that puzzles Sheriff Barnett and other officials who are working on the case in an effort to apprehend the bold robbers, who finally gave up the job and drove away in an automobile, leaving \$27,000 in gold exposed in the open vault.

Constable Bontelho explained that he was asleep in a building directly across the street from the bank, and that he did not hear the explosions, although they were sufficiently powerful enough to knock down pictures on walls in adjacent buildings.

**Bank Robbery:**

In the arrest of Frank Smith, alias Lederer, alias Bryce, and an ex-convict, in Santa Rosa yesterday afternoon, Sheriff Barnett believes that he has apprehended one of the men who dynamited the safe in the Bank of Alameda County at Alvarado on April 5<sup>th</sup> last. He is charged with robbing a store on Fillmore St., San Francisco, which he and confederates entered by sawing a hole in the floor of a rooming house above the establishment. They attempted to blow the safe but failed.

In the Alvarado job, the yeggmen obtained a small amount, but were unable to reach \$27,000 in gold, which was inside an inner door they were unable to open after the explosion. Entering Alvarado in an automobile the yeggmen severed all telephone and telegraph wires, removed the fire alarm bell from the engine house and worked for two hours during a very heavy rainstorm.

***The Oakland Tribune, June 9, 1913***

#### **Sugar:**

*(From The Woodland Daily Democrat)*

It is reported that a right of way for a branch line connecting Woodland and Meridian has been obtained by the Northern Electric. The line will run through the Fair ranch ([Yolo County](#)) and district 108, and along the west side of the river to the Meridian Bridge connecting with the line soon to be opened between Marysville and Colusa. The proposed will be an important one, as it will open up a large area of fertile land that is not at the present time in direct touch with the market.

It will undoubtedly be a great boost to the sugar beet industry in that portion of the valley, as it will give growers easy access to the factory *to be built by the Alameda Sugar Company at Meridian*. When the branch is constructed the Northern Electric will have connections between Woodland and Chico on the east side of the valley, between Woodland and Colusa on the west side with connections between Colusa and Marysville in the center.

*The Oakland Tribune, September 25, 1913*

#### **Sugar:**

The reduction of the duty of sugar (2 cent bounty) with the provision for free sugar after the first of May 1916 (which legislation the Sugar Refining Trust, or cane sugar producers, was so persistent in advocating as shown in the hearings, hoping no doubt to cripple their chief competition, the beet sugar interests), strikes California particularly hard because it is recognized as the principal beet sugar producing state in the Union. The first successful sugar beet factory in the United States was established in 1879 in the town of Alvarado, Alameda County, in the State of California. We now have 13 factories in the state for there is a larger acreage adopted to the growing of sugar beets in California than found in any other state, the coast valleys being particularly being adapted as to climatic and soil conditions for the sugar beet.

There are now 13 factories in the state. Twenty-five thousand men are employed. Twenty million dollars is invested in factories, land and equipment. Last year over \$14,000,000 was spent in the state due to this industry and of this amount farmers were paid \$6,701,582 and \$3,900,000 for labor. The crippling of this industry is no small matter to California.

**Sugar:**

From the Editorial Pages of *The Oakland Tribune*:

*The San Francisco Chronicle* need waste no tears over the closing down of the Alvarado beet sugar mill. It is not a calamity. More remunerative crops can be grown on the land than sugar beets.

Closing down the mill is not an injury to Alameda County or the landowners of the vicinity. Other crops can be grown in the Alameda Creek delta to a greater benefit than beets. It is the finest market garden land lying out of doors, fertile, productive and easily cultivated.

*The Oakland Tribune, January 15, 1914*

**Sugar:**

(From *The Woodland Daily Democrat*)

The four bills are scorched and were part of an uncut sheet of bills such as the ones taken from the bank in Alvarado. The investigation has now turned to the southern part of the state based on a statement made by an Alvarado Chinese merchant that he had received these bills as payment from another Chinaman in the south. The Alvarado Chinaman had paid the bills to an Alvarado grocery man earlier.

*The Oakland Tribune, March 19, 1914*

### **Post Office Robbery:**

With scarcely a clew to go follow, the posse in pursuit of the San Lorenzo post office safecrackers is finding it difficult to get a trail on the men. It is supposed that the gang makes its headquarters in the Livermore mountains and is the same gang that operated in Irvington last week and was traced to Alvarado. Each time, on escaping, the yeggman have gone inland and this supports the theory that they have a rendezvous somewhere in the hills.

### **Robberies Increase:**

Recently there have been a large number of post office robberies in this part of the state and in the interior. Automobiles were used by the yeggmen to make their escape. A little over a year ago the Bank of Alameda County in Alvarado was dynamited, but the robbers failed to get their hands on the \$27,000 in the safe, being forced to flee after an hour's work when the town became alarmed. They had cut the telephone and telegraph wires into town and disabled the town alarm on the hose house. They left town in an automobile from which they were able to get off a volley of shots. The significant feature of the robbery in view of the late arrest is that the automobile was abandoned in Santa Clara County where all trace of the occupants was lost.

### **Bank Robbery:**

After nearly three years, one of the yeggman who on April 13 dynamited the safe in the Bank of Alameda County at Alvarado has come to grief. It is the belief of Sheriff Frank Barnett, who declared that Frank Smith, alias Lederer, who was shot at Turk and Polk Street in San Francisco last night, was the man who planned the robbery.

Smith was shot by a man who drove up to the curb in an automobile and fired at him as he was going downstairs into a café. The assailant escaped with his companion in a car. That the man who did the shooting was a former pal of Smith, who sought revenge against him, is the belief of Sheriff Barnett.

A confession obtained from Smith in Sacramento in January 1912, relates the plans made for robbing the Alvarado Bank. At that time, Smith related, he had reported to his friends that the job was impractical. But a few months later the robbery took place in exactly the way Smith had planned.

Five men entered the small town in an automobile and after cutting all communication wires, worked for more than two hours, standing off alarmed townspeople with revolvers and rifles while seven charges of dynamite were placed in the safe. A small amount of money was obtained, but the yeggman were not able to reach the \$27,000 in gold due to the inner door becoming wedged. They finally drove away under a fusillade of bullets.

Smith is known as the "Gentleman Yegg" and has a long criminal history in this country. He was generally the "mechanic" in safe cracking jobs.

### **Flood:**

While small creeks overflowed their banks in places, even the low-lying portions of Alameda County escaped extensive flooding. Rainwater collecting in the low country about the bay covered considerable areas of land near Alvarado and other bay side communities. There was, however, little damage done by the larger creeks as they were confined within their banks.

***The Oakland Tribune, January 14, 1916***

### **Board Rejects Landowners Pleas:**

The Alameda County Board of Supervisors has rejected pleas from landowners in Southern Alameda County to have the county maintain a free flowing Alameda Creek. The landowners claim that debris in creek beds builds up in dry season and leads to damming of the stream and flooding of farmer's fields. The board maintains that it is the responsibility of the landowners to maintain the creek bed and avoid flooding.

#### **Alvarado Girl to Be Quarantined:**

Barred by the hand of the law from returning to her home as the suspected carrier of the deadly bacillus of infantile paralysis (**polio**), little Ruth Hochfelder, 4 year-old daughter of J.H. Hochfelder of Alvarado will be met at 9:15 o'clock tomorrow morning by Dr. Kirby Smith, health officer of Oakland as she arrives on the Western Pacific train en route from New York and refused permission to alight from the car at the Third and Washington streets station. The only modification of this strict order will be to the effect that the child may leave the train provided that she is conveyed at once to the county infirmary under quarantine.

Ruth, who has been visiting with relations in New York City, was sent out of the danger zone that she might escape infection. So strong was the feeling of panic that no time was taken to provide for an escort for the child and she was placed in the charge of the conductor of a through tourist car. As soon as she had started a telegraphic message was sent to the parents in Alvarado that

the girl was safely on her way from the city where so many lives are being claimed daily by the dread disease.

Had word reached the California authorities in time the quarantine would have been imposed upon little Ruth at the state line without allowing her admission from Nevada, in accordance with the dictate of the state board of health. As it is she will be intercepted in Oakland on her way to the family home in Alvarado and detained under observation.

In New York City today, rain and a wave of cooler temperature failed to check materially the epidemic, which since its inception two weeks ago has claimed 238 lives in that city. During the twenty-four hours, which ended at 10:00 o'clock this morning, fourteen deaths and 103 new cases were reported.

*The Oakland Tribune, July 10, 1916*

#### **Ruth Hochfelder Coming Home:**

With no more cases of suspected infantile paralysis reported in the bay region, the health authorities of Oakland and San Francisco believe that there is no danger of an epidemic of the dread disease here. Four-year old Ruth Hochfelder, daughter of Mr. & Mrs. J.H. Hockfelder of Alvarado, is on her way home under the charge of a Western Pacific Pullman Conductor and will arrive in Hayward at 5:45 o'clock this afternoon. She will be met at the station by a doctor and a nurse and put in an isolation ward at the county infirmary where she will be kept for two weeks under observation.

### **Water:**

Arguments in the arbitration of the long-standing controversy over water rights in Alameda County between the Alameda County Water District and the Spring Valley Water Company will begin Monday before Irving Martin, A.E. Chandler and W.A. Johnstone, members of the state water commission, who have agreed to be arbitrators as to the merits of the respective contentions.

While the matter is pending before the commission the several suits and injunction proceedings arising from the three-year battle over construction by the water company of the Calaveras dam and reservoirs will be held in abeyance.

Land owners and farmers in the agricultural district between Niles, Newark and Alvarado, known to geologists and riparian experts as the Niles Cone, organized the Alameda County Water District for the preventing, if possible, the impounding of the waters of Calaveras Creek on the ground and the soil of the district would be rendered a desert by the withdrawing of the water. The wells in the district are supplied from a water-bearing stratum of gravel, which gets its supply from the seepage waters of the Alameda Creek and its tributary the Calaveras Creek.

### **Alvarado Rancher Hit:**

The authorities are today searching for a motorist who drove on without rendering assistance after severely injuring Joseph Novis, an Alvarado rancher, in a collision between an automobile and a horse and buggy at Warm Springs last night.

Novis was found by Dr. W.C. Lynch of Niles lying on the state highway, suffering from broken arms and other injuries. He was rushed to the county infirmary. The rancher, who can speak English only with difficulty, says he was driving along the state highway shortly before 11 o'clock last night when an automobile, which he could hear approach at high speed, crashed into his buggy. Novis was thrown out and the buggy was badly smashed. Without stopping to give aid the motorist continued on. Novis lay on the road for nearly an hour before assistance came. One of his arms has a compound fracture and the other multiple fractures.

#### **Wire Thieves:**

Wire thieves operated successfully last night at the Rogers ranch in Alvarado, making off with a transformer and seven pounds of copper wire. It is believed in the sheriff's office that the work is that of the same gang that for the past two months has been raiding Alameda County ranches for copper wire. The men used an automobile. Deputy Sheriff's Joe Soares and Bert Brown are working on the case.

#### **Flood:**

Alvarado, Alameda and Niles Creeks have overflowed their banks and the water has rushed over the surrounding ranch lands until nothing but mud and water is visible to the eye for miles. Paths to ranch houses a quarter of a mile away from the highway have been washed out and it is with extreme difficulty that ranchers are able to get to their homes after visiting other localities.

The Alvarado-Niles Road is reported flooded for a distance of several miles, tying up traffic and locking one of the main arteries between the two communities. Niles Creek has overflowed its banks at numerous places, but no damage is reported. The inundation from this source is said to be at its worst near Centerville.

Alameda Creek near Alvarado has topped its banks, causing a sheet of water to spread over surrounding ranch land for a distance of fifteen square miles. The levee on the Patterson ranch, near Newark, broke under pressure of extra water and the flood covered several hundred acres.

**Alameda County's Sugar Refinery:**

The first beet sugar made in the state of California, in fact, the first west of New York, was manufactured at Alvarado in 1870 by E.H. Dyer, who built the first sugar mill on the Alameda Creek, near the present site of the Alameda Sugar Company's plant. At that time the creek was open for navigation and schooners made their first landing at the sugar mill and took on cargoes of sugar.

The mill was destroyed by fire and a second plant was erected on the site of the present one, with a capacity of one hundred tons of beets per day. The plant has been changed and enlarged twice to its present capacity of 600 tons of beets or approximately fifteen hundred bags per day.

The beets are washed, sliced and treated with hot water until the cells are broken down and the sugar is dissolved. The impurities are then removed from the syrup by treating with lime and carbon dioxide, the carbonates being filtered off, leaving the sugar syrup. This is evaporated to the point of crystallization and the liquor is spun off in centrifugal machines closely resembling the extractors used in laundries. The sugar is then washed and dried and sacked ready for market. The process is all mechanical and once the beet starts on its way from the unloading bins, it is kept in constant motion until the sugar is in the sack and the pulp is in the storage bins. The pulp is fed to cattle and is a superior feed.

The regular run consists of about one hundred days, from August to January, and during that time from one hundred to two hundred men are employed.

Five thousand tons of limestone is used during a season's run. This is burned to give the quicklime and carbon dioxide used in the purification of the syrup. Three million gallons of water is used daily in the processing of beets. One well sunk in 1913 was 576 feet deep and delivers two thousand gallons of water per minute.

Beets are contracted for with the farmers at a price of six dollars per ton. During an average campaign 47,000 tons of beets will be used. Beet seed comes from Germany and Holland and during the past year has been very hard to secure, but the growing of beet seed has been taken up in several of the States, notably Colorado and Utah, and no doubt, a sufficient quantity will be grown locally.

**Salt:**

The Continental Salt Co. of Alvarado is taking out forty thousand tons of salt out of their beds this season. The salt industry of the east bay district is much larger and plays a more important part of the industrial activity of these shores than people realize. Not alone is the salt taken from the bountiful supply of these shores, but the by-products also produced from the mother product are many, such as magnesium chloride and magnesium sulfate (Epsom Salts). Other by-products include Caustic soda, chloride of lime, chlorine fluid, and muriatic acid. The Alameda County salt producers are doubling their output; such is the demand for the product.

A series of three games to decide which team is the champion one of Washington Township is to be opened Sunday at Alvarado, between Alvarado and the Newark Wedgewoods. The Alvarado team has been playing independent ball all summer, and F.W. Joyce; manager of the Alvarado team feels that his club is superior to the Wedgewoods, who were in the Mission League. There has been a standing argument as to which of the two clubs is the best, so Sunday should see the whole population of Washington Township out to witness the championship battle. "Shine" Silva and Jacinto will be the battery for Alvarado, while it will be Valencia and Snow for the Wedgewoods. The second game of the series will be played at Newark, while it will depend on the toss of a coin to determine the playing field for the third game.

**Letter From France:**

Here are few notes taken from a recent letter written by Pvt. Joseph G. Rose, 112<sup>th</sup> Supply Co., American Expeditionary Forces, who is in France. This letter was addressed to his parents, Mr. & Mrs. Joseph G. Rose, one of Alvarado's most enterprising citizens and retired farmer:

"I feel in good spirits. It is very warm here. I guess you have been reading of what we are doing to the Huns. It's like the Belgian, Italian and French soldiers say we came just in time. It's our shells, food and clothing, etc. that's the cause of our winning the war. The boys here on the firing line are hard to control. Every time they go over the top all you can hear is shouts of "Hell, Heaven or Hoboken; which is the port we will hit when we go home." Thank God we are getting plenty to eat but the water is very bad. The people here mix water and wine together. If you could see the sights I see here you would cringe. The French people are very good to us."

"Well, ma, the latest is we have the Huns on the run and we are on their heels. Pershing said, "Don't let our flag know retreat and it shall never know retreat."

"Us boys often talk of the goof times we will have when we get back to the U.S.A. with victory written across our backs.

"Gee it's like trying to hold a hound back when he is on the trail of some wild animal. Well, try to hold us boys back from the Huns now. We've got'em on the run, ma, and it would be like trying to stop a whirlwind to stop us. Just know that I am doing my part, but, gee, I would like to have some of those apples and fruit that lay on the ground that you spoke of. As long as the folks back there keep the shells, clothing and food coming we will wind'em up in great shape and be safely marching home with glory"

This young man is a specimen of our American boys who glory in sacrificing all, if necessary, to make the world safe for democracy. All they ask in return are supplies of food, shells and clothing while accomplishing their task. Now, do you know that they year that lies before us calls for more food production, more conservations than any we have hitherto made?

#### **Alvarado Raid:**

Sheriff's deputies led a squad of men to Alvarado's Chinatown early Sunday morning following a report that the settlement was being invaded by a gang of robbers. The invasion was over before the deputies arrived there, but they learned that the "robbers" were the inspectors of the State Pharmacy Board, looking for illicit narcotics.

The Chinese declared the inspectors locked them in closets and took away between \$400 and \$500 worth of jewelry and money after breaking down the doors. The raids in Alvarado were led by Angel Favott and Ronald W. MacCorkell, two of the trustworthiest inspectors of the board. The men said there was general commotion as the Chinese had barred the doors and they had to be broken, but the raid went strictly by the law.

#### **Chinese Allege Robbery:**

In view of the persistent claim of Alvarado Chinese that \$70 in cash and jewelry valued at \$135, were taken from their houses by operatives of the State Pharmacy Board during the raid for illicit narcotics Sunday morning, Sheriff Frank Barnett is continuing the investigation.

Dr. H.B. Meader, head of the Pharmacy Board, admits that two of his men comprising the squad, were agents of the board, but states the other ten were men picked up by these two to assist.

"I do not know who took the money and jewelry, or in fact that any was taken," said Sheriff Barnett. "All I have to go on is the statement of the Chinese that they were robbed during the raid, and that they believe the raiders took their belongings. It is my duty to make an investigation and I have detailed Sheriff's Deputy Joe Soares, Bert Brown and J.J. Collier for that purpose.

### **Quigley Will Contested:**

The Search for a missing will executed by John Quigley, pioneer resident of Alvarado is being instituted by Mrs. Dagmar Lundgren of Oakland. The will was executed on 1904 and names Mrs. Lundgren as beneficiary, according to Mrs. Lundgren. The estate is estimated to be valued at close to a half million dollars, although no legal appraisal has been done. Quigley, who formerly manufactured salt at Alvarado, died March 15<sup>th</sup> at age 81.

Mrs. Lundgren, formerly Dagmar Anderson, an Alvarado girl, was a friend of Quigley's. One day he was hunting in the marshes and she was with him. He went into the dense growth and became mired. She wandered away daydreaming, and for a long time did not see him. Finally she went back in the direction where he was last seen and heard faint cries for help. Rushing through the marsh she came to him and helped him out.

Some days later he showed her an enveloped, she says, and told her that there was a will inside and that someday it would make her rich. She has witnesses to whom it is claimed he said he had made a will and acknowledged to her his gratitude in a substantial way.

Two wills have been filed, one is dated 1902 and the other is dated just a few weeks before his death and names **August May** as executor. Both wills list two elderly sisters as beneficiaries. Quigley's two sisters are disputing the legality of the last will, which names **August May** as executor.

### **Warrant Refused for Alvarado Raids:**

Because of the failure of Dr. H. B. Meader of the State Pharmacy Board to produce the members of the squad that raided the Chinese settlement at Alvarado last Sunday morning, seeking illicit narcotics, nothing has come of the demand for warrants for the arrest for board participants involved in the raid. The Chinese claim that \$60 in cash and jewelry worth \$150 was taken. There was a known narcotic addict in the party, whom Dr. Meader has promised to produce for examination by the district attorney, but which he has been unable to do so. He was taken along for the knowledge he possesses.

**Two Wild Nights:**

Two wild nights in local gambling lost to Mori Shimada half of the \$2,000 he admits he took from the California Salt Company at Alvarado, according to the story police say he told them this morning. Despite the fact that it was company funds, the police were informed over the telephone from Alvarado this morning that the firm would not prosecute.

Shimada's story has, however, started an investigation into an Oakland address on Webster Street where Mr. Shimada gambled and lost nearly \$1,000 of the \$2,000 taken on successive nights of gambling. The police are investigating the address and a Mr. Ben Toy who was involved in the gambling operations in Oakland.

**Near Riot in Alvarado:**

Three Mexicans are under arrest in the Hayward jail and one is in the hospital there in serious condition from a knife wound in abdomen received during the progress of a fight that took on somewhat the nature of a riot Saturday night at Alvarado.

Sheriff Frank Barnett received a report late that trouble was brewing and went to Alvarado with Deputy Sheriff Joe Soares. Together with Constables Ramage and Rose the situation was investigated but few details ascertained as to the cause of the trouble. The fight occurred in the foreign quarter of Alvarado and it is believed the wounded man started it. The foreign quarter was originally known as Chinatown. Later it was occupied principally by the Japanese and now by the Cuban Mexicans. Those involved are of the latter nationality. The man with the cut in his abdomen may possibly die from the wounds.

*The Oakland Tribune, October 4, 1919*

**Quigley Will:**

Efforts to prove that John Quigley, Alvarado Salt Manufacturer and pioneer, was an ingrate, who would not reward kindnesses, have been made two sisters who are beneficiaries under his will. They are trying to defeat the claim of Aimee Collins of Oakland, to \$9,000 deposited, which she says he gave her in reward for her care of him the ten years prior to his death. Mrs. Collins, who says he was kind and generous, refutes the claim that Quigley was addicted to drink and that he knew no gratitude.

August May, Alvarado banker, called by the sisters, Mrs. Kate Sinclair of San Francisco and Mrs. Nickerson of Eureka, testified that he visited Quigley at the hospital prior to his death and that when the pioneer offered to make him beneficiary of his will, he declined. He then named his sisters as beneficiaries. The money in the bank, the subject of the present suit, was mentioned in the will.

A four and a quarter mile stretch of highway takes the new county highway over the Alvarado low lands, through the town of Alvarado and well on its way to Mt. Eden. The road is now completed from Warm Springs to most of the way to Mt. Eden. This will be much improved over what the road has been.

*The Oakland Tribune, November 16, 1919*

**Lower San Jose Road:**

There are two roads to San Jose from Oakland. The upper road is East 14<sup>th</sup> Street through San Leandro, Hayward, Decoto, Niles, and then to the San Jose Hiway. The other Hiway is known as the lower San Jose Road, which begins at East 14<sup>th</sup> St. to Mt. Eden ([Hesperian Blvd](#)) and goes through Mt. Eden, Alvarado, Centerville, Irvington, and Warm Springs then to the San Jose Highway ([State Hiway Route 17](#)).

There are a large number of automobile drivers that contend that the lower San Jose highway ([State Highway Route 17](#)) through Alvarado and Centerville is shorter than the route through Hayward and Niles. The Board of Supervisors recognizes that both routes are a necessity. The state will maintain the lower San Jose Road and the county will maintain the upper San Jose Road.

#### **Around Town:**

Mr. & Mrs. F.B. Granger, pioneers of Alvarado, were tendered a surprise at their beautiful home in Broadmoor (San Leandro), Friday night, December 19<sup>th</sup>, in honor of their 25<sup>th</sup> wedding anniversary. Twenty of Alvarado's "400" gave them a silver shower, presenting them with many beautiful gifts of silver. There was dancing, music and cards.

Miss Helen Granger left Wednesday last for New York to be gone for several months.

Mr. & Mrs. F.C. Harvey entertained a number of their friends and relatives at Christmas dinner. A select musical program followed the dinner.

Miss Mildred Nauert was shopping Oakland Tuesday.

Two of the numbers on the Christmas program at the Presbyterian Church last Sunday evening were those of little Miss Clarabelle Logan and little "Teddy" Logan.

Mrs. C.F. Fox of Los Angeles is here, having been called by the serious illness of her mother, Mrs. Joseph Rose. Mrs. Rose is showing a slight improvement.

R.T. Haines has purchased a Fordson tractor. This tractor has been used in plowing on several Alvarado farms and it is highly spoken of by those who have witnessed its performances.

Clyde Shepardson is in Woodland this week.

Miss N.M. Kembler is awaiting the delivery of her new car.

### **When Stealing is not Stealing:**

Failure to prove that Martin Ruiz entered the store of Hock King in Alvarado on October 28<sup>th</sup> with the intent of stealing resulted in him being acquitted on a charge of burglary. While it was firmly established that Ruiz had taken a purse containing \$14 from the store during a momentary absence of Hock King, it could not be proved that he entered the store with the intent to steal. So the offense constituted only larceny.

### **The Autobiography of a Duck:**

I am Quack Quack, a Mallard duck. I lived on the marsh near Alvarado with a big flock of ducks until one day some boys were out shooting and one of them shot me through my wing. Then I fell to the ground and could fly no more. A big dog named Jerry came after me and carried me to his master who took me home, bound my wound and made a nest for me in a box until I got well enough to waddle. I found that I could fly but very little, and not very high, so there was nothing else to do but stay with my newfound friends. I soon loved them all because they were very good to me.

I stayed on this farm about two years until one day a boy came to visit there. We soon became very good friends, and when it was time to go home my friend said that he might take me with him. So he put me into a sack and put a hole for my head to go through so I could breathe. He put me in an automobile and took me to his home in Oakland.

He made a good pond for me to swim or bathe in and gave me plenty to eat. I know him so well that I sometimes eat out of his hand, and when he speaks to me I say "quack, quack." I am so tame that you would never think that I was ever a wild duck from the marshes except for my feathers.

### **Sugar:**

*(From Modesto Evening News)*

Beet hauling in Tracy is done by Fageols: Hauling sugar beets to the railroads or the sugar mill has been a hard task for trucks to solve. The method of loading in the field and hauling right

through the soft ground has proven too much of a task for the average truck to overcome. However, a fleet of six 5-6 ton compound equipped Fageols are hauling beets for the Alameda Sugar Company for the second season. These same Fageols 72,321 tons last year and did it so successfully that they are back on the same job again this year.

"We had a hard time to convince the engineers of the company that ours was not an ordinary motor truck," states F. Weber of Modesto, who sold these trucks. "Beet fields are different in that, when the time for gathering beets is due, tractors plow the beets out of the ground so the pickers can gather them up easily. This leaves the ground soft and with deep furrows. The trucks have to follow the beet rows and the beets are gathered and thrown into the truck, it is not possible for the driver to choose his own road. The Fageols would drop into low compound during this operation. This gear turns the wheels two and one half times slower than the ordinary lowest gear at the same motor speed. It consequently has two and a half times the driving power and greatly increased traction. When loaded and back on solid roads, the operator shifts back to his regular gears and travels to the unloading point at normal speed. This flexibility made it possible for us to demonstrate to the company that Fageol trucks would solve their hauling problem. It is sometimes advantageous to go slow as well as fast."

### Bank Robbery:

Armed with shotguns and revolvers, three masked bandits entered the Bank of Alameda County, Alvarado Branch, at noon today, shot and seriously wounded Bank President August May, and escaped with an estimated \$50,000 in cash.

The men ransacked the institution after dragging May into the vault and locked him up with Mrs. Anderson, Ass't Cashier, and Ted Lydecker an employee of the bank, and then shut them in the vault.

When one of the men entered the bank with drawn revolver, May sprang at him and knocked him down. The bandit recovered his weapon and shot May twice, once in the throat and once in the shoulder.

The robbers worked fast and fled from the scene in a few minutes. A passerby heard the imprisoned bank officials knocking on the vault door and went to their rescue. Following shouted instructions, he opened the vault and released them.

The wounded Bank President was placed in an automobile and rushed to a hospital in Hayward, from which place District Attorney Ezra Decoto (May's brother-in-law) took him to Merritt Hospital in Oakland.

*The Oakland Tribune, October 13, 1920*

### **Bank Robbery:**

There were made public today three developments in the manhunt that has followed since the robbery of the Bank of Alameda County at Alvarado yesterday at noon.

The first was the discovery at 4:15 a.m. of the automobile in which the three bandits made away from San Lorenzo after ditching the big green car in which they roared out of Alvarado. The second is the questioning of John Sullivan, who says the big green car was stolen from him, and who is being held in the county jail. The third, which was a result of the first, was a conference between Sheriff Frank Barnett and District Attorney Ezra Decoto, who is the brother-in-law of the wounded bank President August May.

In the meantime, Mr. May continues to fight for his life in the Merritt Hospital, but hope is gaining as he spent a peaceful night last night. His wounds appeared fatal initially, but Mr. May is putting up a good fight and there appears to be hope for his life.

*The Oakland Tribune, October 14, 1920*

### **Bank Robbery:**

East Bay authorities were at work today on the meager clues in the hunt for the robbers of the Bank of Alameda County at Alvarado on Wednesday, when President August May was shot and seriously wounded. Sheriff Barnett says that he has information that may lead to the arrest of the bank robbers. The information was obtained, it is said, through tracing the identity of the owners of the hats found in the tonneau of the machine that was used in the getaway which the robbers abandoned a short distance outside of Alvarado when the robbers exchanged vehicles. The hats were purchased in a San Francisco store.

### **Water:**

QUICK! MORE STEAM PRESSURE

If you should look in on E. Foley, fireman at the great oil burning, steam pumping plant at Alvarado, you might think his job is monotonous and uninteresting.

But suddenly there is a change in the constant "push - pull - push - pull" of giant pumps, which transport 10 million gallons of water each 24 hours, to the next relay pumping station. Perhaps a dozen fire engines have begun to suck water from the mains. Or there's a break in the pipes or a broken relay down relay pump. Foley must act quickly or there will be more trouble.

His trained ears tell by the sound of the pumps what should be done. Even before orders can be telephoned from headquarters, he has adjusted the steam pressure.

E. Foley and the night man, P. Juhl, as well as 55 other engineers, firemen and motormen in 16 other steam and electric pumping plants are on the job constantly. 24 hours of the day, 365 days in the year, watching, waiting, listening that you may not be deprived of water at your faucet for a single moment.

### **Bank Robbery:**

James Carey and W. Curley were arrested last night in San Francisco as suspects in the recent Alvarado bank robbery. They were only partially identified as participants in the robbery. Theodore Lydecker, bank clerk, identified Carey as one of the robbers; Mrs. Christina Anderson said neither of the men was involved in the robbery. Mr. May said neither was the man that shot him.

*The Oakland Tribune, October 26, 1920*

**Sugar:**

Upwards of 7,000 tons of beets from the new east bay districts passed through Oakland during the week on route to the big sugar refinery at Alvarado, where they are to be converted into sugar to help reduce the shortage and bring that commodity to normal prices.

**Ducks:**

Large flocks of ducks flew today from the more exposed portions of the bay at the Golden Gate to Alameda and down to shores of the bay from Alvarado to Newark and Alviso seeking protection.

*The Oakland Tribune, November 17, 1920*

**Noon Closing:**

Country banks are being urged by the State Bankers Association to close their doors for the noon hour and permit all employees to lunch simultaneously. The plan is in the interest of discouraging bank robbers. It has been found that the robbers have watched for the noon hour when part of the bank staff leaves for lunch and then they strike. In the recent Alvarado robbery the bandits attacked while Cashier Blacow was absent.

*The Oakland Tribune, November 27, 1920*

**Sugar:**

The Alameda Sugar Company at Alvarado completed its 100<sup>th</sup> day run this season on Tuesday, November 23<sup>rd</sup>, which includes continuous work by day and night shifts without a single shutdown being made by any cause. This remarkable performance is attributed to the efficiency of the management and the harmonious working force in general.

**Bicyclist Killed:**

A decision is expected this afternoon from Justice of the Harry W. Pulcifer, whether Joseph Vargas, a partner in the firm of Pratt, Richmond & Vargas shall be held to Superior Court because his machine struck and killed Marius Anderson, an Alvarado salt worker, on the Niles Road near Hayward some weeks ago as Anderson rode a bicycle in the dark.

*The Oakland Tribune, December 1, 1920*

**Alameda Man Dies at Hall Station Crossing:**

Confused in the darkness, Samuel P. Mesick of Alameda, stopped his vehicle and then, according to the story told by two companions to F. S. Bontelho, deputy coroner at Centerville, started it

again and drove head-on into a fast running Southern Pacific train at Hall Station. The accident occurred a mile south of Alvarado at 7 o'clock last night. Mr. Mesick was killed immediately upon impact.

Charles Shein and J. H. Poyzer, who were riding with him, saw Mesick's predicament too late to warn him but in time to leap from car to save their lives, they said. They were not hurt.

#### **Bank Robbery:**

Three men captured in Marysville have been brought to Alvarado for identification in the Bank of Alameda County robbery. One, Jack Beebe, alias Cady, was positively identified as one of the participants in the robbery. The other two men, Clarence Dye and Arthur Floyd, were also implicated in the robbery by several eyewitnesses although the identification was not as positive as it was with Jack Beebe.

*The Oakland Tribune, January 22, 1921*

#### **Bank Robbery:**

Two of the three men captured in Marysville and brought to Alvarado for identification in the October bank robbery will probably be bound over for trial. The positive identifications of Jack Beebe and Clarence Dye by witnesses at the scene is enough to hold them for trial. Arthur Flood could not be positively identified but is being held for the robbery of a watch from John Lee.

*The Oakland Tribune, February 14, 1921*

**Bank Robbery:**

Two new developments in the Alvarado bank robbery case came up today. The first was the return to Alameda County of Larry Fitzgerald, re-arrested in San Diego on the order of county authorities. The second was the arraignment at Centerville this afternoon of Mrs. Jack Flemming, alias Hazel Kirk, charged with being an accomplice in planning the Alvarado bank robbery, and Prescott Rea who with his wife were arrested and charged with receiving stolen property.  
*The Oakland Tribune, February 16, 1921*

**Bank Robbery:**

Reports that Larry Fitzgerald, Alvarado bank robbery suspect, has "snitched" on his pals were circulated at the courthouse today, when after a conference with District Attorney Decoto and Deputy Frank Shay, a stenographer was called in by the prosecutors.

Fitzgerald was then taken by the secret Grand Jury passage to an automobile and was spirited away to Alvarado by the district attorney and Deputy Sheriff Jack Collier.

Fitzgerald was brought here from San Diego by Deputy Collier and County Detective George Helms when letters and other evidence found at the headquarters of the "Thirty Strong" gang connected him with the Alvarado robbery. He had been arrested previously but was released because of insufficient evidence.

**Safe Crackers:**

Four yeggs caught in the act of blowing the safe at the general store of Matsumoto, padrone of the Japanese residents of this district, fought a pistol battle at an early hour this morning with Night Marshal Andrew Anderson and then fled with half of the town aroused by the fusillade of bullets.

Marshal Anderson saw the four men working at the safe and they discovered him at about the same moment. Covering him with a pistol they compelled him to stand as they continued to work. Opportunity offered and Sheriff Anderson escaped to a clump of bushes from which he opened fire. The yeggs returned fire trading him four shots to his three. Antone Mello, who has the store next to Matsumoto's and lives above it was awakened by the gunshots and went to his window to look out. He was quickly covered by one of the gang and told to stay where he was.

By this time the whole town was aroused and the yeggs beat a hasty retreat. It is believed they escaped by means of an automobile. No trace has been found of them yet.

**Bank Robbery:**

With four members of the "Thirty Strong" gang in San Quentin, three others having pleaded guilty and two more scheduled for trial this week, the capture of "Little Goog" Rossi, who is alleged to have shot down Bank President August May, and "Lefty Foley," another of the suspected bank robbers, has completed the destruction of the biggest robber clique that ever operated in Oakland, according to District Attorney Decoto.

"Little Goog" has been accused by the gangsters who have "squealed" as the man who shot August May on October 13<sup>th</sup>, when May is said to have knocked a revolver from Foley's hands and floored him with a punch to the face during the Alvarado bank robbery.

Both men, who have been captured in the East, were indicted secretly some time ago by the Alameda County Grand Jury. Foley's name came out in the Sullivan trial, but "Little Goog's" identity was never revealed until the police picked him up in Sioux Falls, South Dakota. Foley was picked up in St. Paul Minnesota.

*The Oakland Tribune, May 27, 1921*

#### **Sugar:**

Sugar beet production in the new districts at Lisbon and West Sacramento for the coming season will be approximately 27 ton to the acre, according to the estimate of H. M. Springer of the Alvarado sugar refinery, which has contracted for the entire output. The total yield to be converted into beet sugar at the Alvarado plant from this district alone, according to Springer, will be in the neighborhood of 30,000 tons.

Springer cruised the new beet fields for the growers and the San Francisco and Sacramento railroads in order to make proper estimates for freight cars to handle the big crop. On account of

the increase in the crop it will be necessary to supply fifteen cars a day during the harvesting season and the railroad company is now extending its tracks at Jefferson Station in order to accommodate the cars. The loading will begin in September.

#### **Bank Robbery:**

Machinations of the "inner convict rings" at San Quentin and Folsom Penitentiaries allied with the efforts of underworld criminals, are responsible for the hard fight that is being made by the "Thirty Strong Gang" to save "Lefty" Foley and "Little Goog" Rossi from serving terms in prison for the Alvarado bank robbery, according to Chief Deputy District Attorney Frank M. Shay.

"Some powerful, sinister influence or master mind, either in San Francisco or in one of the prisons, has organized this fight to free Foley and Alberton and eventually get the other members of the "Thirty Strong Gang" out of prison," charges Shay. "We have been forced to keep William Kirk, who turned state's evidence, under cover to save him from being killed"

"The Alvarado bank robbery was directed by a master crack who has never been discovered and who is now marshalling all the forces of the underworld to free these gangsters."

Mr. Bassett of the Loma Prieta Lumber Co. of Santa Cruz was in town Tuesday. Bassett was here in the interest of the Garden City Gun Club of which he is secretary. The various sportsmen expect a good duck season, and are making extensive improvement to their grounds.

Miss Beryl Farley, who has been teaching in Alvarado School as a substitute for **Mrs. Hodgson** during her recent illness, will leave for Needles next Friday to resume her position as a teacher of that place.

Dr. Gray of Alvarado intends on leaving for Baltimore in the near future, to be absent for three or four months. He is going to attend John Hopkins University, one of the largest medical schools in the country, to take postgraduate work in surgery.

Clarence Williams, son of Joe Williams, rancher, has taken a position with the Sunset Lumber Co. Clarence is a recent graduate of the Union High School at Centerville.

The (Washington) Union High School football team played the Fremont High (Mountain View) team at Centerville to a 0-0 tie.

The sugar beet yield is far better than expected by the average grower of the vicinity, and the sugar beet rates high in quality of sugar.

**Mrs. Hodgson** will resume her post as teacher at the school on Monday.

**Ducks:**

Beginning early in the morning, a continuous line of automobiles conveying parties of duck hunters to the marshes of this vicinity passed through Alvarado today intending to be ready for the opening of duck hunting season. Scores of hunters have arrived and are either taking up quarters at some of the numerous preserves or at the Alvarado or Newark Hotels. Old hunters of this section say that more ducks are in the flats this year than for nearly a dozen years past.

*The Oakland Tribune, September 30, 1921*

**Ducks:**

Once more duck hunters are swarming the preserves of the Alvarado-Newark marshes in the hopes that the low fog or clouds will bring the ducks down to shooting distance. While the opening of the season here was not marked by heavy bags, the shooting has improved during the week and many limit bags are expected Sunday.

*The Oakland Tribune, October 9, 1921*

**Ducks:**

When Mrs. C.L. Johnson, wife of superintendent of the Turk Island Salt Works, wants ducks she doesn't go after them with a shotgun. Instead she takes a sack full of wheat and a camera and as a result of it there are ducks all over the place. There are mallards on the kitchen steps when she gets up in the morning; there are sprig in the woodshed and teal on the lawn out in front. Like a pup picked up on the street, they refuse to be lost or driven away.

At the present time she has a flock of fifty odd mallards and it is her word that they are as intelligent as a setter dog and fully as affectionate. They climb into her lap and upon her shoulder while she is feeding them and they quack their way into her kitchen to see what's detaining her if she happens to be a few minutes late on the breakfast schedule.

With the duck season open they are serving as very effective decoys for a duck club that has a preserve neat the salt works, of which Superintendent Johnson is a member.

#### **Alvarado Raided by Vice Squad:**

Sheriff Frank Barnett lead the Vice Squad to Alvarado where operatives had secured evidence against the proprietors of immoral houses in the "old Chinatown district," which are said to rival the worst haunts of vice on the old Barbary Coast ([San Francisco](#)). Peter Adelano, alleged proprietor of a brothel, was arrested and will be arraigned today before Judge Frank Mitchell of Hayward.

At the same time a girl giving the name of Jesse Miller was arrested as an inmate, and today was arraigned on a charge of vagrancy in order that this action might be taken to quickly rid the county of her.

At another resort, Anita Garcia, a Spanish girl, was arrested and brought to the county jail, where she was charged with vagrancy as well.

A number of other denizens of the red light houses were ordered to dress and leave the county immediately or face the pain of arrest.  
*The Oakland Tribune, October 24, 1921*

#### **Old Chinatown:**

The "old Chinatown quarter" of Alvarado, which was said by police officers to be one of the worst vice spots in the county, is silent and almost deserted today as a result of the raids Saturday night when a poolroom operator was arrested and several women of the underworld were placed under arrest and others ordered to leave the vicinity.

Since the raid shutters have been drawn, frequenters of the row of shacks are few and far between and the Mexican habitués of the quarter have left for out-of-town ranches.  
*The Oakland Tribune, October 26, 1921*

#### **Errant Bullet Near School:**

Mothers of children attending the Alvarado School today are indignantly discussing the narrow escape from death of two young boys when a bullet fired from the gun in the hands of an irate Chinese passed between the heads of two youths as they were walking arm in arm from the school last Friday afternoon.

The boys, Bliss Lawrence, 14, and Harold Hamilton, 11, had been playing in the schoolyard. As they left they locked arms. Suddenly, five shots rang out and the swish and whistle of a bullet startled them. The wind from the bullet fanned their cheeks. The bullet struck and embedded itself in a tree a few feet behind the boys.

Investigation developed the fact it was said today, that a Chinese truck gardener near the schoolyard had been the victim of Mexican tomato thieves and that when the Mexicans entered his field that afternoon he secured a rifle and started firing at them. It is said one of the bullets passed through the hat of one of the Mexicans.

When the story of the narrow escape of the youths was told about Alvarado, indignation ran high, but so far no action has been taken.

#### **Around Town:**

All roadwork in the vicinity of Alvarado was suspended last Friday by order of the Road Master Tony George in respect for the memory of the late Supervisor Daniel J. Murphy. Murphy was born in Alvarado and had hundreds of warm friends in this vicinity. His death was a shock to the entire community.

An automobile belonging to Frank Sequeira, a local rancher, is undergoing repairs today as the result of its collision with a truck on the highway near here Sunday night. Sequeira escaped without injury.

Hundreds of people from all parts of Washington Township were at the bullfight and celebration given at the **Riverside Hotel Park** Sunday. Manuel Mendez, a toreador of Spain, entertained with a tussle with the bull, which, however failed to appreciate the spirit of the occasion and refused to fight. Dancing was one of the entertainments provided for the guests.

Postmaster Albert Norris is confined to his home suffering from a severe cold, which has made his condition serious. He has not been able to be at the Post Office for the past week.

The two young children of **T. Lydecker** were taken to Oakland Hospital for serum treatments for whooping cough.

Tony Vargas, who recently purchased two lots from the Granger estate, has given the contract for building his new home to Silva and White, Centerville contractors.

**T. Lydecker**, of the Alvarado Branch of the Bank of Alameda County, is having a new garage built at his home.

*The Oakland Tribune, October 26, 1921*

#### **Bull Fighting:**

The charge is made that bullfights are being held in a stockade near Alvarado almost every week. Last Sunday a big crowd witnessed an exhibition near Alvarado in a stockade near the **Riverside Hotel**, it is charged in a letter to the District Attorney, which also declares that women of the underworld have not yet abandoned all the small towns.

**Church Bazaar:**

All is ready today for the opening of the annual benefit bazaar of St. Anne's Parish tomorrow night. With a half score of daintily decorated booths and with the most choice articles ever offered for sale the parishioners declare that Alvarado's bazaar this year will eclipse all others in success. As the money collected is going to the building of a new church it has given added impetus to make the bazaar a huge success.

**Salt:**

W. A. Plummer of the Crystal Salt Works was a visitor in Alvarado Wednesday, bringing news that extensive improvements and additions are being made at his salt plant.

*The Oakland Tribune, October 28, 1921*

**Sugar:**

Sugar beet shipments from Lisbon and Jefferson were cleared up during the week, a total of 1,500 tons having been shipped from Jefferson and 3,500 tons from Lisbon in the Holland land district. All of the shipments were consigned to the Alameda Sugar Company at Alvarado. The shipments were the heaviest ever sent out from these new districts, the increase being nearly 3,000 tons over last year.

*The Oakland Tribune, October 28, 1921*

**Ducks:**

Oakland duck hunters are scratching their heads. Many duck hunters have left their blinds in Alvarado and returned to Oakland and see their first ducks of the day in Lake Merritt. Some hunters are beginning to believe that the duck migrate to Lake Merritt on the opening day of duck season where they are fed and do not have to fear shooters.

*The Oakland Tribune, October 30, 1921*

**Large Alvarado Landowner Shot:**

Henry Patterson, wealthy Alvarado land owner and grower, was shot and severely wounded this afternoon by one of two Mexican farm laborers with whom he had become involved with in an argument over a lease. The shooting occurred two miles south of Alvarado on land Patterson leased to the Mexicans. The argument began over financial arrangements on the leased land. One of the Mexicans shot Patterson in the leg and he went down. The men armed themselves with shotguns and fled. A posse was soon formed and was in pursuit of the men. When the pursuit got too hot the men barricaded themselves in a cabin on the Hall Ranch. While they were preparing to resist their pursuers another posse broke into the rear of the cabin and overpowered them. They were taken into custody; Mr. Patterson's condition is not serious.

**Sugar:**

The harvest of sugar beets of the Alvarado section will come to an end within three weeks, and the work of the Alameda Sugar Company will be over within one month, it was said today by H. M. Springer of the company's staff at Alvarado.

Over 80,000 tons of beets have been sliced at the Alvarado mill this season, and although the beet crop fell thousands of tons short of early season estimates, Springer says the quality of the beets have been unusually high.

Fully 20,000 more tons will be handled at the mill before it closes down for the winter. Ranchers who grow beets are receiving an average of \$10 a ton it was said.

A full crew of men has been working steadily at the mill for the past two months, 225 being at the mill proper, and fifty more working at outside stations.

**Around Town:**

The necktie and apron party given last night in the IOOF Hall last night by the Altar Society of St. Anne's Church was a success and a large crowd of dancers was present to enjoy the novelties. Money obtained through the admissions to the party is to be placed into the building fund of St. Anne's new church.

J. McElroy of the San Jose Lumber Co. was a visitor in Alvarado on Tuesday.

W. J. Dusenberry of Centerville spent several hours this week visiting Alvarado.

Mrs. George Hellwig, who sprained an ankle two weeks ago is recovering slowly and is still confined to her home.

Mr. A. Borghi has been making extensive improvements to his big dairy near Alvarado.

Clarence Williams, who has been ill for the past few weeks, was able to get around recently.

**Iron Wheels:**

County roads in the vicinity of Alvarado are being destroyed by farmers using overloaded iron-wheeled vehicles; reports a communication from the Alameda County Drayman's Association.

*The Oakland Tribune, November 7, 1921*

**Patterson Shooters Caught:**

Fruitoso Reveigo and Jim Rodriguez, Mexican youths, who were captured after a hunt by a posse of Alvarado citizens, led by Deputy Sheriff A. Anderson and Constable Thomas Silva, last week following the shooting of Henry Patterson, are waiting sentencing today on charges of hunting without a license.

Patterson, who was wounded slightly when one of the youths is alleged to have fired on him with a shotgun during an argument over land trespassing, had refused to swear out warrants for their arrest on the assault charge.

*The Oakland Tribune, November 8, 1921*

**Around Town:**

The potato harvest at Alvarado is below normal for the first time in many years. Farmers report that only two thirds of the crop will be harvested. Potatoes grown in Alvarado are among the best quality potatoes grown in California.

George Enos, an Alvarado farmer, is building a large barn on his ranch and nearly has it completed.

Father Casey of St. Anne's Parish in Alvarado said proceeds of the recent bazaar brought \$1,200 in for the new church building fund.

*The Oakland Tribune, November 9, 1921*

**Race War:**

A race war involving Chinese, Japanese, and Mexican residents of Alvarado's "Little Tiajuana" looms today as the result of the Chinese move to establish a pool room here. According to officers and those in touch with the Oriental quarter situation, the Japanese and Mexicans have a monopoly on such places here and the Chinese are looking for a piece of the action. The Japanese and Mexicans are bitterly opposed to the Chinese opening of pool halls and card rooms.

Threats and counter threats were flying fast today with the Chinese still determined to open the pool room and the trouble can come to a head.

*The Oakland Tribune, November 17, 1921*

**Potatoes:**

Alvarado ranchers today are amazed at the accomplishments of a recent U. C. Berkeley graduate who insisted his modern farming methods would increase potato yields. He bought a 20-acre ranch and managed to produce 200 sacks of potatoes from a single acre. On the whole he

averaged 150 sacks of potatoes per acre. L. E. Bailey credits careful analyzation of soil and replenishing nutrients that he finds lacking. He has farmers listening.

### **Alvarado Roads:**

Under the direction of Tony George, Road master, crews of men are busy this week preparing the surrounding Alvarado roads for the rainy season. The road to Union City is being scraped and the road to Niles is being graveled.

*The Oakland Tribune, November 17, 1921*

### **New Houses:**

Two new houses today are helping relieve the housing shortage, which is being keenly felt in Alvarado for the past six months. Silva and White, contractors of Centerville, completed the bungalows of A. Frates and T. Vargas this week.

*The Oakland Tribune, November 17, 1921*

### **Birthday Party:**

Charles Nauert of Alvarado today is well on his way for another big birthday party with the announced intention of enjoying himself as much next year as did this year. He celebrated his 80<sup>th</sup> birthday at the home of his daughter, Mrs. H. D. Heitmuller of Oakland.

### **Henry Patterson Shooting:**

Jim Rodriguez and Frutuoso Reviego, Mexicans, who pleaded guilty to hunting without a license, were fined \$50 each when they appeared before Justice of the Peace John G. Mattos Jr. The two men were arrested three weeks ago following the shooting of Henry Patterson, wealthy Alvarado landowner, when he remonstrated with them for trespassing on his property. It is alleged that one of them shot Patterson, wounding him slightly. The Mexicans were arrested by Constable Tom Silva and Deputy Sheriff Andy Anderson of Alvarado, but the hunting law charge was placed against them in preference to the charge involving the shooting.

*The Oakland Tribune, November 22, 1921*

### **Sugar:**

Thousands of tons of sugar beets are in the fields today undug with indications that growers in the Alvarado section will be forced to work frantically to get the remainder of the season's crop out before another rain storm comes. While the rain this week was not heavy it has held the

sugar beet growers from digging the remaining beets and with prospects of the Alameda Sugar Company's mill here closing in two weeks the outlook for the rest of the crop is poor unless the rain holds off.

*The Oakland Tribune, November 24, 1921*

#### **Ducks:**

From all localities where ducks congregate come reports that the recent rains brought in thousands of birds and the shooting improved immensely. From Alvarado, Alviso and Newark come reports of good shooting in sprig and teal this last week.

*The Oakland Tribune, November 27, 1921*

#### **Overloaded Trucks:**

In a local raid on traffic law violations, Deputy Sheriff Shay halted and arrested the drivers of a half dozen trucks in Alvarado for driving with overloads, in some cases almost twice the maximum load allowed. The intent is to send a message that traffic laws will be enforced.

The election of officers for the Farm Home Department of the Farm Bureau for Alameda County held its election of officers and has chosen Mrs. F. May Williams of Alvarado as its chairman.

*The Oakland Tribune, December 10, 1921*

#### **Little Tiajuana Deserted:**

"Little Tiajuana" near Alvarado is nearly deserted according to Deputy District Attorney Frank Shay who just returned from the place he went to direct raiding parties visiting questionable resorts in the vicinity. The regular immigration of the sugar workers to other fields has practically depopulated the region and the "For Rent" signs are gathering dust in the windows of the "Oyster Loaf" and the "Bucket of Blood" that once shone brightly and resounded with revelry.

#### **Infant Dies:**

Milk, poisoned as a result of cows eating sugar beets, today is blamed for the death of the six month-old son of Frank Goularte, an Alvarado rancher. The death is the first of its kind and the illness of the child had at first puzzled two physicians, who were called to the case. Both agreed, after an examination, that the milk given the babe had been poisoned as the result of the sugar beets fed to the cows.

*The Oakland Tribune, December 20, 1921*

#### **Ducks:**

Those who prefer wild duck for the Christmas feast and who are fortunate enough to have a membership in one of the hunting clubs owning duck ponds here, will have no difficulty in bringing down the limit of birds, according to Deputy Sheriff Andy Anderson and Chris Baird, who yesterday had excellent success on the marshes. The rain has brought in the ducks and although they are keeping close to cover, it is easy to bring them in from the ponds and rushes, say the two local sportsmen.

**Alvarado Success Story:**

With the enrollment of James Nesbitt at Heald's Business College, the fifth of five Nesbitt boys has entered his period of training for a business career. To those interested in what the young people of the bay region are doing in winning their success, the Nesbitt family of Alvarado offers an interesting story.

The father of these five young men has been a section foreman of the Southern Pacific Railroad for twenty-five years, and though he did not have the advantage of a business training, he realized, through his contact with the executive offices of the railroad company for which he worked, that the real opportunities for advancement came to those fitted by special training for positions of trust and responsibility.

Having made his selection of a school for the oldest son and being well satisfied with the success achieved by that young man, the father placed the boys, one after another, in Heald's. Four other sons followed the oldest in registering at the Oakland business college and three who have graduated are well on the road to making most successful businessmen.

Robert W. Nesbitt is a private secretary to high company official, John Nesbitt is an accountant in the general offices and James is a checking clerk, all three being employed by the Southern Pacific Company. Thomas Nesbitt found his sphere of activity outside of railroading, being sales manager for a large industrial concern. The youngest son, now attending Healds, gives every promise of equaling the success of his older brothers.

**Crandall Slough:**

Frank Bryant was awarded the contract for the construction of a concrete bridge over the Crandall Slough near Alvarado. Bryant's bid of \$5,591.80 was nearly \$1,000 less than the other eight bidders.

*The Oakland Tribune, December 27, 1921*

**Flood:**

Additional rain is compounding the flooding of last week. Fields in Alvarado are under water ranging in depth from a few inches to several feet and the ground is not absorbing the water as rapidly as before.

The boys of Alvarado will qualify as expert navigators should high water continue. The youths constructed impromptu rafts and a score of the rafts were being paddled about the flooded streets of town.

Chinatown, Alvarado's "Little Tiajuana" district, was isolated by a ring of water and long faced Chinese and Mexican proprietors of the pool halls gazed at empty chairs and unused card tables.

In other news, C. L. Johnson, Sup't of the Turk Island Salt Company, today estimated that 2,100 ducks had been taken by hunters on the Turk Island preserves in Alvarado alone.

*The Oakland Tribune, December 29, 1921*

**Sugar:**

Farmers of Alvarado who have been planting sugar beets the past several years and who will not plant this year due to the slump in sugar and the drop in prices paid for beets, are considering the

planting of barley in the majority of cases. In the low foothill land where beets are raised barley is the best substitute crop, while the flat lands around Alvarado are slightly alkaline, it is believed a profit can be made from planting barley. The price offered in contracts to growers for their sugar beets has dropped to \$5 from \$6 a ton and less than a third of the usual crop of beets will be planted in this section this year.

*The Oakland Tribune, January 12, 1922*

#### **Sugar:**

Reports that the beet growers around Alvarado are planting their acreage to grain this year are declared untimely by H.M. Springer, Office Manager of the Alameda Sugar Company, which operates the sugar refinery at Alvarado. Springer authorized this statement:

"A report of unknown origin has been published stating that the beet growers around Alvarado intended to turn to grain in 1922. I would like to state that such action is not noticeable on the part of the growers, as we are signing up a very substantial acreage this season. The report further stated that the price of beets in 1922 would be between \$5 and \$6 a ton. This statement likewise is wrong for while none of us are prophets, the price to be paid to the farmer is dependent on the final price received for our sugar and the percent of sugar in the beet. I would like to state that if the price of sugar advances as it is now apparent, that the farmer will receive relatively more for his crop 1922 crop than he did for his 1921 crop."

*The Oakland Tribune, January 16, 1922*

#### **Fresh Tomatoes in January:**

Fresh tomatoes in January is the good fortune of many Alvarado households as a result of the thrift of the women of Alvarado who have discovered that tomatoes may be kept for several months after the season ends by digging up the whole tomato vine and hanging it in a cool place. The tomatoes continue to derive nourishment from the vine and do not wilt or dry the women claim. Several women report that tomatoes kept by them in the new way are in excellent condition at the present time.

#### **Alviso Pupils to Perform at Alvarado:**

Juvenile actors of the Alviso School will repeat their recent success, "Safety First," at the Odd Fellows Hall in Alvarado on the evening of February 21<sup>st</sup>. The play was given last Saturday night before a big audience at the schoolhouse. The original cast, including Alice Duarte, Irma George, Nick Lewis, Joe Duarte, Viole Amaral, Alvin Joseph, Madeline Rose, Sam Costa and Irene George will repeat the performance. Saturday night entre-act features included a fancy dance by Esther Dolan of Hayward and a recitation by Vivian Joseph of Alviso.

#### **New High School:**

That the Centerville Lodge, Knights of Pythias, are interested in the high school situation in Washington Township is a matter of lodge record today. A committee of three knights as named by Chancellor Commander Fred Rogers to meet with the Country Club committee to aid in determining whether or not an attempt shall be made to bond the township for funds which to build a modern high school structure.

Those on the committee are: F.T. Dusterberry, Manager of the Centerville Branch, Bank of Italy; Frank Veit of Newark; and Foster Morrison, Principal of the Alvarado Grammar School.

*The Oakland Tribune, February 11, 1922*

#### **Sugar:**

Three thousand acres of land in this vicinity will be planted to sugar beets to fulfill contracts already made this year with the Alameda Sugar Company, it was announced by the company today through H.M. Springer of the local staff. At least 1,500 more acres will be planted to the beet crop, bringing the yield next fall up to normal, it is said.

The announcement by the company has been received with satisfaction by the local businessmen as it had been predicted at the end of the season last year that few beets would be planted due to the depression of the sugar market, caused by foreign importations.

The fact that the Fordney Tariff bill would probably contain a provision for a high import tax on foreign sugar will bring the producers a return of 50 cents more per hundred-weight and prices for the next crop will be as high as in the past year.

The news that sugar beet growing industry has revived from its temporary depression has led farmers here to predict a bumper crop, as land and climatic conditions are the most favorable in a number of years. The heavy rains have provided sufficient moisture to keep the land from drying before the crop matures, a condition that will affect to a great measure the success of the crop.

#### **Flood:**

Cattle, marooned by a creek ten feet wide cut by the recent floodwaters, are being fed by means of a boat, which is used to transport food across the creek, according to F.H. Borge of the California Milk Company here. According to Borge, over 30 cows were left on a high knob of land in the fields here. The hill was surrounded by the newly cut creek and the cattle refused to cross it. Consequently an improvised boat had to be used to ferry food to the stranded cows.

#### **Around Town:**

Members of the Alvarado Aerie of Eagles have delegated Joe Roderick to attend the meeting March 13<sup>th</sup>, when the matter of building a township high school is discussed by committees representing fraternal and civic orders of Washington Township. Roderick was appointed at the meeting held this week by the Eagles.

A banquet following initiation services featured the meeting of the Crusade Lodge, IOOF here last night. A number of candidates were initiated and the banquet was served in their honor. A large class of candidates will be initiated by Crusade Lodge next month, the lodge having a heavy increase in membership at present.

Manuel Enos, local dairyman, is in a Hayward Hospital, critically ill. Enos has been ill for several weeks, but his condition became so serious this week that physicians ordered his removal to the hospital.

**Around Town:**

The second degree will be conferred on twenty candidates by the Crusade Lodge, IOOF, at an initiatory meeting to be held Tuesday night. Thirteen candidates are from the Alvarado Lodge, six come from the Sycamore Lodge, Hayward and one is a member of the Mission Peak Lodge, Irvington. Under the direction of Noble Grand R.S. Stewart of the Crusade Lodge, an elaborate program is being arranged for the entertainment of the large number of Odd Fellows who will come from neighboring lodges to witness the initiatory rites.

Alvarado intends to give Centerville a close race for tomato growing honors this season, a survey of the ranches near here reveals. Scores of ranchers are planting tomatoes for the first time and it is believed that the acreage of tomatoes in the Alvarado district rival that of Centerville.

M.E. Costa, local dairyman, plans the erection of a modern home and this week is tearing down the old ranch house to make room for the new. Silva and White, Centerville contractors will begin building the new home next week. Costa, during the past six years, has been steadily adding to the improvements on his splendid ranch near Alvarado.

Miss M. Costa, Principal of the Alviso Grammar School, was a visitor in Alvarado Thursday, arranging for the play to be given in the I.O.O.F Hall here by her students.

John Ahearn of Oakland has moved to Alvarado where he intends to manage personally his large ranch. Ahearn was for years connected with an Oakland traction company.

J.G. Rose of Hayward, who has extensive property interests in Alvarado, visited here Thursday to attend to business matters.

### **Building Boom:**

The prosperity of Alvarado ranchers, due to the excellence of the season's crops and the boom in the dairy industry, is reflected in the tremendous increase in building activity in the Alvarado-Decoto section of Washington Township, according to a survey made this week by James Hamilton, manager of the Alvarado yard of the Sunset Lumber Company.

The building is not confined to houses alone, nearly every rancher in the section being engaged at present in constructing new fences, shed, barns and other ranch improvements.

E. Borge, of the California Milk Company dairy here is superintending the construction of several thousand dollars worth of improvements to the dairy property. New shed and fences are principal items of improvements.

A. Costa has under construction one of the most modern houses to be constructed here in the last six months. He is also making improvements on his large ranch near town. A new house to replace the one destroyed by fire several weeks ago is being constructed by E. Curry, who lives north of Alvarado.

A hunting lodge and new sheds and fences are the principal improvements underway at present at the Turk Island Salt Company property, according to C.L. Johnson, Superintendent.

### **Stabbing:**

One man is in critical condition, suffering from a deep knife wound in his right lung, and is confined to the county hospital at San Leandro, and two men are held by township officers pending the outcome of the victim's injuries as a result of an all night drinking bout in Alvarado's Mexican quarter.

The stabbing affray occurred when "heaving dornicks\*" failed. According to Deputy Sheriff Andy Anderson, who arrested the two men charged with the stabbing, the three men had been drinking heavily. During a dispute one of them picked up a rock and threw it at one of the others. A general rock battle followed, but without serious wounding of any of the participants. Rocks failing to decide the dispute knives were drawn.

In the melee Pedro Hernandez was stabbed, saving himself from more dangerous wounds by running into the store of Jacinto and Menezes. He was pursued by Baltasar Navirero, who is alleged to have done the stabbing, and by Jesus Sunega.

Jesse Jacinto one of the proprietors of the store, intervened and threw the two pursuers into the street, where they were taken into custody by Deputy Sheriff Anderson, who had just arrived in answer to a riot call.

Navirero is being held in the Centerville Jail and Sunega is being held in the Niles jail. They will be charged with assault with a deadly weapon.

*The Oakland Tribune, August 3, 1922*

**Around Town:**

News was received here recently of the death of I. V. Ralph of Oakland, who, until about two years ago conducted a business store in Alvarado. Ralph was a native of Alvarado and was well known around town.

The young son of J. Monger of Alvarado was painfully, although not seriously injured in an accident yesterday morning. While playing near his home he fell on a piece of glass and cut a gash in his cheek that required several stitches to close.

John Lemos, well-known rancher of this district, has sold his entire corn crop, green, to local dairymen for cattle feed. His reason for this was because he was having a hard time getting 50 cents for a sack that held seven or eight dozen ears and this does not pay them picking and shipping.

Miss Grace Johnson, a resident of San Leandro, is a guest at the home of her uncle, C. L. Johnson, Sup't of the Turk Island Salt Company. Miss Johnson plans to spend two weeks here boating and horseback riding.

Mr. & Mrs. Moldt, who have occupied the Nort cottage near the Odd Fellows Hall for the past year and a half, have rented a house on Church Street near the home of Chris Skow.

Alvarado; July 5, 1922

For years I had stomach trouble with gas, which pressed on my heart with unbearable pains. I could not walk from one side of the table to the other without stopping to catch my breath. My stomach was so bloated that I could neither eat nor lie down with comfort. My back ached fearfully and it seemed as though I continually carried a heavy load on it. My bowels never moved naturally and I suffered also from female complaints.

I consulted many doctors. They said that mine was a surgical case and that a tumor must be removed before I could get any relief. I feared and dreaded an operation. My brother, John Limas,

and his friend Mr. M. Frazer, both of whom has been cured of stomach trouble by the FONG WAN HERB SPECIALIST and advised me to try him. My brother took me down to his place at the corner of 6<sup>th</sup> and Clay Streets in Oakland. I took the herbs for four months, cooking them myself. I am now strong and well and feel splendid.

Had it not been for my brother's advice and FONG WAN'S skill, I would have been in my grave long ago.

Mrs. Julia Andrade, P. O. Box 13, Alvarado, Calif.

### **The Lost Child:**

From *The Oakland Tribune's "Aunt Elsie's Children's Page"*

Once there was a little boy. His name was Joseph. He lived in a cottage near the seashore. His parents were always busy and didn't take much notice of him.

One day he was playing in the sand on the seashore. When he was playing he had his back turned toward the ocean. The waves were coming up more and more. He was so intent on his play that he didn't notice it, but at last the waves reached his length and pulled him in.

There was a lost dog nearby. He saw the boy struggling with the waves. He swam after him and brought him safely to the shore. It was hard on the dog because the sea was rough but he managed it. He was tired from his struggle to save the boy and bring him safe to the shore, so he laid down beside the boy to rest.

Joseph was soon able to walk. He went home with the dog, and the boy's parents gave the dog a home. The child called the dog Rover.

The boy was never lost again for he always took Rover with him every place he went.

### **Liquor Served:**

Two men walked into the Alvarado Hotel recently, and upon the plea of one of them being sick, induced the proprietor, Jack Marlot, to mix him a stimulating drink. Marlot obliged, and then he returned with the drink the sick man rushed into the room that Marlot had just been in and secured the rest of the small bottle of liquor, which, according to Marlot, the man's companion drank the glass of liquor that had just been brought in. The men then announced themselves as prohibition officers and left with the evidence.

As the result of the shooting affair in Alvarado early Sunday morning when Mrs. Mary Valez was seriously wounded during a battle over a gambling game, C. R. Atelano and Joseph Delores are today charged with carrying concealed weapons and will be given a preliminary hearing before Judge Ralph Richmond in Niles.

An investigation by Under Sheriff Joseph Soares failed to determine who fired the shot that wounded Mr. Valez when she came to the house looking for her husband. The shot was fired through the door by one of the inmates who evidently believed that the police had arrived. The two men were found with weapons in their possession.

Webb, New York engineer, to obtain franchise right from Alameda County Supervisor that will permit him to construct a toll bridge across the San Francisco Bay from Little Coyote Point in San Mateo County to Alvarado, was continued last night in Irvington.

This campaign will be carried out in every town in lower Alameda County. Representatives have already attended meetings in Niles and Alvarado.

*The Oakland Tribune, November 14, 1922*

**Bay Bridge Route:**

Full power to grant the franchise necessary for the trans-Bay toll bridge, from Little Coyote Point in San Mateo County, to Alvarado in Alameda County, lies with the San Mateo Board of Supervisors, who have already endorsed the project, while the Alameda County Board is without authority in this matter, according to a letter received by the local board from an attorney representing the eastern construction companies who are seeking the franchise.

California state law expressly limits the right to grant toll bridge franchises to the supervisors on the county on the left, or descending bank of the bay, river creek, arm or slough of the see, the letter sets forth, and, it points out, this position in this instance is occupied by San Mateo County.

*The Oakland Tribune, November 18, 1922*

**Mrs. Mary Smith Dies:**

Mrs. Mary A. Smith, who came to California in 1846, and was a pioneer resident of Alameda County, died last Sunday morning at the home of her daughter in Oakland, California. She was 96 years old.

She was the widow of the late Henry C. Smith, also a pioneer of the state, who died in 1875. He was prominent in the early history of Alameda County, having been elected to the legislature from Alvarado (then in Santa Clara County), and was instrumental in forming Alameda County from Santa Clara County and Contra Costa County. The Smith's settled in Alvarado in 1852.

*The Oakland Tribune, November 21, 1922*

**Bay Bridge Route:**

The San Francisco supervisors recently voted their endorsement of the project of two eastern construction companies to build a trans-bay bridge from San Mateo to Alvarado at private expense and to operate it as a toll bridge. **Flood:**

Heavy rains in the hills carried volumes of water down into the marsh lands, deluging the Southern Pacific tracks so that early morning trains were re-routed over the old narrow gauge track between Newark and Centerville to Niles, thus cutting out the Alvarado section as well as train service to Hayward.  
*The Oakland Tribune, December 28, 1922*

**Little Tiajuana:**

With the object of closing up resorts in a district of Alvarado that has been the scene of numerous fights, shootings, and stabbing affrays, District Attorney Ezra Decoto today instituted two suits under the red light abatement law. The abatement and suits are directed against two houses known as 10 and 15 Smith Street, Alvarado. Edward L. Farley is designated as the owner of both premises, while Ramona Aldena is the reputed keep of number 10 Smith Street, and Marie Valdez is the alleged keeper of the house at 15 Smith Street.

The abatement suite contends that the houses contain numerous musical instruments, which the court is asked to have sold to defray the cost of instituting the suits. The court is asked to close the houses for a period of one year as provided in the abatement law.

**Salt Works Fire:**

The largest salt plant in the world, that of the California Salt Company near here, is a total loss after a fire of unknown origin, which raged out of control all day yesterday and most of the night. The property damage is said to be in excess of \$300,000, but is covered by insurance. All of the company's buildings, including the machine shops, together with the large salt storage houses and oil reserves were destroyed. The company's plant covered 5,000 acres west of town here, bordering on the bay.

**Oakland Needs Good Roads:**

Do you know that you cannot get into the great city of Oakland on a good road? It is true. You approach the city from the south by several roads, the one through Altamont Pass and Hayward, and the one through Alvarado or Niles and through the tunnel road if you come through the hills, and all roads become gravel paths when they enter the city limits, with the exception of San Pablo Avenue, which is macadam, but is in poor repair now.

When you enter Oakland over the East Fourteenth Street pavement you wonder why the roads are paved with concrete right up to the city limits and then they become rough and gravelly.

### **Sugar:**

*(From The Woodland Daily Democrat)*

Sixty thousand tons of sugar beets were harvested from less than 4,000 acres in the Holland Land Tract during the season now concluded, according to a report made the Alameda Sugar Company. A noteworthy aspect of the harvest was that it was concentrated into an unusually short season, running from August 15<sup>th</sup> to October 20<sup>th</sup>.

During that nine-week period, from 30 to 40 trucks and from three to five beet dumps were operating daily, with the supplementary employment of three barges, a tugboat or two, and the railroad. The beets were all shipped to the Alvarado refinery.

### **The Two Playmates:**

From *The Tribune's "Aunt Elsie Children's Page:"*

Once upon a time like all stories begin. There was a girl who was very rich. She lived in Alvarado and her name was Jane Johnson. There lived a very poor girl next to Jane. Now Jane liked the little girl. Her name was Mary Brown. Jane's parents didn't like their girl to play with a ragged girl. Then Jane was mad because she couldn't go out and play with Mary. So Jane planned to run away that night with Mary.

That night Jane went to bed. Her mother turned out the light. Jane made out she was sleeping. When everything was quiet Jane got up and got dressed. Then she quietly crept out of the window. It was twelve o'clock. She went to Mary's house and woke her up and told her to get dressed quick so they could run away. Mary didn't like to leave her mother but she did. Jane and Mary then crept out of the window. They both walked up the road towards the next town.

Mary saw a barn a little ways off. The girls said lets go over there and sleep till the morning. So they walked and walked until they reached the barn. It was an old barn, there were mice running all over the floor and the roof was nearly torn down. But Mary and Jane found a corner to sleep in.

The next day Mary and Jane started off, they were quite hungry. When they were at the next town, which was Centerville. They were walking along until they saw two nice looking boys coming towards them. When Jane and Mary got to the boys they fainted. Because they were so weak and hungry. The two boys, whose names were Jack and John, picked up Mary and Jane and took them to their house. John then asked his mother if the girls could stay with them. The mother said yes. Then Mary and Jane had a very nice supper.

Mary and Jane were very happy now for they could play together. But their parents in Alvarado wanted their daughters back. Jane's mother told Jane she would let Jane play with Mary if she would only come back again.

A few years past and Jane and Mary were big girls. So Jane married Jack and Mary married John and then they lived happily ever after.

### **Around Town:**

In spite of the dry winter, an unusually large crop of spinach is being harvested in this district. The representatives of the canneries are stationed at Alvarado, because of its central position to route their product to the various plants.

As part of general scheme to improve Alvarado, Fred Harvey, August May, **John Ralph** and P. C. Lowery have moved a complete block of houses from Vallejo Street to Watkins Street. They have completed the filling and placing of the ornamental wire fences on the property. These lots are to be placed on the market as restricted residence lots. The houses moved to Watkins Street have been entirely altered, modern conveniences installed, and painted white. Now that the garages have been built for each of these houses, and owing to the fact that Watkins Street is impassable in wet weather, a petition is soon to be presented to the county board of supervisors, asking them to take over this street.

The Alvarado Rebekah Lodge initiated eight candidates last night. Over a hundred members were present last night including visitors from Niles, Hayward, Livermore and Oakland. At the close of the ceremony, a banquet was served.

**Alvarado School:**

School opened in the new Alvarado Grammar with approximately 200 pupils and two new teachers, Miss Nathalie Burger, who teaches the first grade and part of the second grade, and Miss Gordon, who has the fifth and sixth grades. The other teachers are **Miss Charlotte Jung**, teaching the fourth grade, Miss Mary Bailey, teaching the third grade and part of the second grade and Foster Morrison, teaching the seventh and eighth grades. Andy Anderson is in charge of the building and the grounds. There were 30 children in the receiving class and several new pupils in other grades. At 9 o'clock when all the children were assembled, Morrison gave an impressive talk about the new building, the flag was saluted, and then all marched to class.

Alvarado's new \$60,000 school building is second to none in the state of the same size. It is built of brick and is steam heated throughout. One of the features is the warming bench in the main hall for the benefit of the students arriving wet and cold during the winter months. There are six classrooms, five of which are in immediate use and one to be used in case of expansion. Each room is equipped with a cloakroom and a private teachers office. There is also a large auditorium in the building, a teacher's rest room, the principal's office, two rooms for school supplies and a room for janitor's supplies. The school is built in the Spanish Mission style in the shape of a letter "U" so as to afford protection from the wind to pupils on the playground.

About fifty people attended. Mrs. August May, of Alvarado, gave the address of welcome on behalf of the club, which was responded to by Principal E. B. Hodges.

*The Oakland Tribune, October 12, 1924*

**Sugar & Salt:**

Alvarado is putting the finishing touches on two of California's greatest crops, sugar and salt. The former is near enough completed to estimate accurately, and it will be the bumper crop of the existence of the local mill, a total of more than \$2,000,000 worth of sugar at current retail sugar prices.

The salt crop harvested about the bay, for which Alvarado is considered the center, will total about \$1,250,000.

The sugar payroll is about \$250,000, most of which pours into the channel of trade in Alvarado. The salt payroll will be divided mostly between workers who live in Alvarado and Newark.

### **Dairyman Refuse to Ship Milk:**

Violence marked the milk war this morning when five dairymen from Alvarado, said to be members of the East Bay Milk Producer's Association attempted to stop a truck loaded with milk just east of San Leandro, during which one shot was fired. Milk producers are refusing to ship milk for less than 29 cents a gallon and they claim to control 30,000 of the 32,000 gallons of milk shipped daily.

*The Oakland Tribune, November 16, 1924*

### **Boy Scouts:**

Boy scouting in lower Alameda County has progressed so rapidly that there now remain only four small communities that do not boast scout troops, according to Henry L. Hopkins, county field executive. The communities are: Decoto, Alvarado, Mission San Jose and Warm Springs.

Decoto and Alvarado, states Hopkins, have positively assured the organization of troops before the end of this year. The other two communities are known to be favorably inclined to the organization.

### **Alvarado Armory (IOOF Hall):**

To halt the demolishing touch of time, the "Old Armory" at Alvarado, one of California's most treasured relics of the Civil War, has been overhauled. This is the building where, in the time of Abraham Lincoln, the flower of Alameda County's young manhood answered the call for volunteers. As result of that call, the "Alvarado Hundred" was organized and the hundred sturdy youths enlisted before the first battle of Bull Run. That group of men drilled, perfected their organization in that hall and went to war, carrying with them a large silk flag, which their sweethearts, wives and mothers had made for them.

That flag is still furled in their armory, their drill hall has changed little or none since, and though a new floor is going in, and the hall is being thoroughly renovated, its distinctive style will not be changed. Alvaradan's have spoken and orders have been given the workmen that they must not change one iota of the former hall.

The unit fought through 54 battles in the Civil War and their lead Capt. Charles S. Eigenbrodt, whose picture still smiles from its frame on the wall, fell in a battle of the Shenandoah Valley and one by one his soldiers fell.

### **Highwaymen Near Alvarado:**

Three shots were fired at C. E. Allen of Oakland by four bandits who attempted to hold him up on the highway near Alvarado early last night. Allen said he was driving a truck toward Oakland when he saw an automobile drawn up across the highway, apparently placed there to force him to stop. Four men gathered beside the road and called on him to stop. Instead, Allen said, he increased the speed of his truck and passed the blockading automobile. Three shots were fired at him, but the bandits did not try to pursue him.

### **Sugar:**

This year's sugar run at Alvarado is the heaviest yet made, owing to the gaining of possession of a new acreage of land for beet culture in the Delta district along the Sacramento and San Joaquin regions, near Stockton. It is expected that this year's campaign will total 225,000 bags or about 80,000 tons of sugar, the finished product.

The heaviest run ever made by the Alvarado mill was in October when a maximum of 1,133 tons of beets were ground. This is the record since the erection of the mill by E.H. Dyer in 1869. It has run continuously (?), gradually increasing its output with the adoption of modern equipment and the additions necessary to care for the increasing crops.

Beet sugar is one of Alvarado's chief industries, the payroll running well over a \$1,000 a day. It requires over 6,000 tons of lime to treat the crude sugar. The lime is obtained above Sacramento. After treating the sugar the carbonated lime is sold to farmers for "sweetening" the land, mostly in the San Joaquin Valley.

Another industry born of the sugar mill is the fattening of cattle nearby from the sugar beet pulp. Many of the choicest cuts of beef that are placed on Bay city tables are from herds fed on the pulp of California sugar beets.

**Alvarado School Dedication:**

Alvarado School trustees are mailing invitations to prominent educators of the Pacific Coast to be present at the dedication of Alameda County's newest educational institution, the Alvarado Grammar School. The affair is slated for Friday.

The Alvarado School replaces one of the first built in Alameda County. It was built 45 years ago when Alvarado was the center of the shipping industry with salt and sugar factories well started. The Grammar School of those days was a two-story affair, with what was the latest in teaching apparatus. This building has been moved to the rear of the school site, and could be used, if necessary, but at present it stands idle.

One of the unusual features of the school is that nature has provided a "rain-proof" playground. Nature has thrown a canopy over an area large enough to shelter about 400 children where the branches of two weeping willows cover a large stretch of ground. Here children play in security every day of the school year.

*The Oakland Tribune, March 17, 1925*

### **1861 War Flag Unfurled:**

A time-worn banner carried to war in 1861 by the "Alvarado Hundred" with the blessing of the women of Alameda County community, was the center of memorial services this week for the heroes of three wars (Civil War, Spanish-American War & the World War) just 64 years after its silken stripes had been fabricated into a war flag by the women patriots of the community.

Preserved by the community of as a reminder of the day when the youth of the town responded to Abraham Lincoln's call for volunteers. It was brought forth as a tribute to the town's soldier heroes of all conflicts.

Deeds of valor over which it had waved, tales of how "Alvarado's Hundred" three times stopped charges of Confederate Troops were told at the recent memorial exercises held in the new Alvarado School.

This flag had been made by the pioneer women of Alvarado, for the "Alvarado Hundred" as the first deputation in answer to President Lincoln's call. While their husbands and brothers drilled, wives and sweethearts met and mingled their prayers and tears as they made the battle flag.

The flag is in the possession of the IOOF Lodge, whose entire membership, almost to a man answered President Lincoln's call. They enlisted in April 1861, and the women of Alvarado, including the mother of Farley B. Granger, invited to speak here yesterday and the mother of Judge Lincoln Church, were among the women who helped sew the flag.

Granger and Church were youngsters when their mother's helped make the flag, and they remembered having watched the women work at night to sew the flag and stood on the curbing to watch the men drill.

History of the "Alvarado Hundred" is written into the action of 54 major battles. Alvarado men went out with Sherman, and then fought under Grant. Some of them were imprisoned at Libby Prison and some were imprisoned at Andersonville. But few of them returned.

Many a glowing tribute was paid the relic that has withstood these decades that have passed since the "Alvarado Hundred" marched to Alameda to embark upon the boat that carried them to participate in the Great Civil War.

Since then Alvarado has sent volunteers to the Spanish American War and the World War. The people of this community answered every Liberty drive with more than their quota. Alvarado sent out scores of young men before the draft was made for the World War and every call of the draft board was answered with young men that measured up to national standards.

And as proudly as the pioneers wrote their names in blood upon the major battlefield of the Civil War, just so did their grandsons make the supreme offering on the battlefields of France. And this was the theme of the speakers of yesterday, a theme that puts Alvarado in the first rank.

**Albert Norris:**

Local **Albert Norris**, Alvarado Postmaster and Librarian at age 74, in his early life took up the policy of following in the footsteps of Lincoln and chopping wood; he took a lot of hard knocks. To be exact, he chopped 817 cords of wood and that gave him enough money to follow his chosen calling, teaching.

Norris was born in Farmington Iowa in 1851, and in 1853 his parents placed him in a cot in a covered wagon and brought him to California. Norris says he does not remember much of the trip. A few years later, however, after hearing his father tell of the hardships of the voyage he set out to retrace his steps and see for himself if it was as hard as he had pictured. He found it was worse than that. He reached Idaho finally, and that is where he put on his wood chopping stint.

Returning to California he taught grade school at Pleasant Valley, El Dorado County for eight years. The following nine years Norris was Principal of the Colfax School. In 1898 he moved to Alvarado and had the helm of the Alvarado School for ten years.

**The Norris'** recently celebrated their 50<sup>th</sup> wedding anniversary and are as much in love today as the day they were married.

**Alvarado Girl Kidnapped:**

Search of the bay district is being made today for Carmen Moreno, a pretty 20-year old Mexican senorita and the two Mexicans who are declared to have overpowered her in Alvarado late

yesterday and abducted her in an automobile after throwing her brother, F. Torres from the running board of the auto and fracturing his arm.

One of the kidnapers is said to be Frank Zryanca, owner of the gray touring car in which the girl was abducted. It is believed he or his companion, who is unknown, is infatuated with Miss Moreno and that she was forcibly thrown into the car and taken away after she refused to accept his protestations of love and request that she marry him.

The two Mexicans were seen talking to the girl in an earnest manner on the main street of Alvarado when her brother, recently arrived from Los Angeles, approached. It was then that the two men seized the girl, and despite her screams and struggles, forced her into the machine and started to speed away. Torres jumped on the running board of the car in an attempt to rescue his sister, but was thrown off. The fall fractured his arm.

Milton Jones has returned to Berkeley, where he will resume studies at the University of California after a visit with his parents.

*The Oakland Tribune, January 3, 1926*

#### **Sugar:**

The Alameda Sugar Company, in common with other California beet sugar companies, suffered from the effects of the leaf hopper, the worst ever known in the history of the west, and from low sugar prices in 1925.

From all indications, it was said yesterday, 1926 would be another quiet year. The acreage contracted for this year is reported to be fairly large, and the growing crop has benefited from the recent rain and balmy weather that followed it.

No change was made in the list of officers at a director's meeting yesterday, and one substitution only made in the Board of Directors. C.A. Johnson, of Huntington Beach, manager of Holly Sugar Corporation succeeds H.A. Benning of Ogden, Utah (retired).

*The Oakland Tribune, January 3, 1926*

#### **Alvarado School:**

**Mrs. W. S. Robie**, Secretary of the **School Board**, anticipates greater progress in the Alvarado education program this year. Negotiations for a strip of land on which to move the old school building in line with the new, has been held up for some time, but the secretary expects the board to be in a better position soon to dispose of the matter satisfactorily. The property involved is jointly owned by the water company, the Catholic Church and K. Matsumoto. No changes in the faculty of the Alvarado School is contemplated, according to Mrs. Robie. The institution will open Monday morning.

*The Oakland Tribune, January 8, 1926*

#### **Bandits Hold Up Dance Hall:**

In approved "Wild & Woolly West" style, a dozen supposed bandits took the "Little Tiajuana" boardwalk row by storm near midnight last night. With guns drawn they forced a crowd of nearly

50 American, Mexicans, and Chinese assembled in the dancehalls to stand with hands held high while they drank and caroused.

When the authorities approached with sirens blaring the men made off in their autos towards Centerville and lost the police in a dense fog.

*The Oakland Tribune, January 8, 1926*

#### **Alvarado School:**

No change in the faculty of the Alvarado Grammar School have materialized this term, it has been announced by Mrs. W.S. Robie, secretary of the school board. The same staff of last year, including Principal T.S. Van Vleet, Miss Nathalie Burger, Mrs. Laura Orelli, Miss Helen Hughes, Miss Charlotte Jung and Miss Dorothy Gordon, returned to their class instruction duties the opening day of school. The enrollment is slightly larger than last year according to Principal Van Vleet.

#### **Deputy Constable Held on Larceny Charges:**

A preliminary hearing in the case of Deputy Constable Fred W. Wall, charged with grand larceny by Tony Points, an Alvarado farmer, will be held in Niles next Monday afternoon. Wall was arraigned before Justice J. A. Silva here yesterday and remanded to the county jail at Oakland.

Wall, who is being held in default of \$10,000 bail, protests his innocence of the charges against him and declares his arrest is a "frame up" resulting from the reported holdup-hoax at "Little Tiajuana" last Thursday night.

Two factions are at outs here over the whole matter. One group, supporting Wall, declares that the "rescue party" who were reported to have routed the bandits terrorizing the Alvarado dance hall were themselves the "bandits" who created the original disturbance. The opposing faction maintains stoutly that the rescue party from Niles came in response to a call from Alvarado, and that they did, in fact, put to flight a gang of marauders who had invaded the ball and lined patrons against the wall at the points of revolvers.

*The Oakland Tribune, January 13, 1926*

#### **St. Anne's Church:**

Archbishop Edward Hanna, of this diocese, will officiate as master of ceremonies at the dedication and the laying of the cornerstone of the nearly completed St. Anne's Catholic Church here, it was announced by Father John Casey, parish priest. Church dignitaries from many parts of California will lend color to the spectacle. The joint ceremony will likely be held on Sunday, March 7<sup>th</sup>, Father Casey said.

Construction work on the concrete building will be completed within two weeks, according to present indications. While the dedication and cornerstone laying ceremonies are not scheduled until early March, initial services in Alvarado's new house of worship will be conducted about Sunday, March 14<sup>th</sup>, the Rev. Casey said.

"Progress of the building and the workmanship displayed by the employees has far exceeded my most optimistic expectations," Father Casey declared. "Our parish will have one of the most modern, if not the most modern, church structure on the Pacific Coast."

St. Anne's Church is being erected at a cost of \$25,000 to succeed the weather-beaten structure of the same name, adjoining the new building. The old church, constructed in 1862, is the second oldest in Alameda County, outranked only by the old Mission San Jose.

**Sugar:**

The Alameda Sugar Company and the Alameda Sugar Farms Company report a deficit of \$837,039 for 1925, which ate up the previous surplus and left the profit and loss account with

\$22,797 in red ink. The consolidated balance sheet as of December 31, 1925 shows current assets of \$2,041,067, of which \$153,755 was cash. The current liabilities were \$855,554.

In explanation of the unfavorable year, President C.P. Drescher says, in part:

With a considerable increase in acreage planted in 1925 against 1924 and a favorable outlook in the early part of the season, it was necessary to prepare both factories ([Alvarado & Tracy](#)) thoroughly for the expected campaign and to provide required facilities in the field. A new pulp drier was provided at the Tracy factory and gave satisfactory results, even in the face of the unfavorable crop development.

The reduced tonnage and the way it became available prevented the factory from operating to capacity during the entire season. Notwithstanding these unfavorable conditions, the results of the factory operation proved fairly satisfactory. The extremely unfavorable market conditions, however, prevented anything like reasonable returns.

### **"Little Tiajuana" Raided:**

A dreary stillness hung over "Little Tiajuana" at Alvarado today following the first dark and dreary evening in 18 months last night.

District Attorney Earl Warren, with the aid of the deputy sheriffs, Oakland Police and Federal Immigration authorities, raided and took 10 women and 13 men to jail this morning to await legal proceedings expected to deport some of them and deprive the others of further chance to contribute to the hollow gaiety of "Little Tiajuana."

"Abatement proceedings against a score of resorts which hide behind the stretch of fence across the street from the Alvarado Grammar School and within a stone's throw of the new St. Anne's Catholic Church will be started at once," District Attorney Warren announced today.

"We are going to close up this hell hole once and for all," said Warren, "I was amazed by the brazen iniquity of the 'line' dope dens, gambling joints, and soft drink' parlors."

**"Little Tiajuana"**

Convinced that the last flame of Alvarado's "Little Tiajuana" has flickered and died, five families stole a march on District Attorney's threatened "padlock" proceedings by packing up over the weekend and abandoning their shack abodes in the night. Warren says abatement suits will be filed within 24 hours. With residents of the notorious settlement rapidly diminishing as a result of a raid by the combined county, state, and federal authorities last Wednesday, the moving of three Mexican families and two Chinese is believed by Alvarado businessmen to be the "straw that broke the camel's back." That the entire "line" of dives will be vacated within the next ten days is the consensus of opinion.

Saturday and Sunday nights were the quietest Alvarado has witnessed in the last eighteen months, residents said. Where a total of 10 to 50 automobiles lined up along the board walk over the past weekends while owners and guests made merry, resort owners this weekend refused to permit a single patron to trudge over the wooden walk leading to the 26 establishments. Though a powerful spotlight shone on "Little Tiajuana" as on other nights, the settlement might well have been "padlocked" for the amount of business transacted, the Mexican and Chinese proprietors asserted. Many operators have made known their intention of vacating the premises before April 15th when the next rents are due.

*The Oakland Tribune, April 5, 1926*

**Little Tiajuana:**

"Little Tiajuana" is a city of desolation these days. No lights are shining a welcome to the weary traveler or the idling stay-at-home. Not even a Chinese lantern glitters through a curtained window, and no elevated lights guide the feet of the stranger through the haunting mysterious way of the modern Sodom.

There's no one to put a nickel in the piano, or a even a piano to put it in, for they are locked up and deserted, says the Niles Register whose Editor went around to take a look. There's no one to be seen on the street, and peace, quiet and solemnity pervade the atmosphere.

For the first time in eighteen months there is "nothing doing" in that section of Alvarado which has been famed far and wide for bootlegging, narcotics, gambling and various vice resorts.

Wednesday afternoon twenty-three establishments in the town suddenly found themselves surrounded by a veritable army of immigration officials, prohibition officials, Oakland Police, county detectives, newspaper correspondents, photographers and what have you. There were a few shouts, a shot or two, and ten women and thirty men found themselves in custody.

District Attorney Earl Warren led the posse, which proceeded to confiscate quantities of marijuana, opium, jackass, Chinese Liquors, and gambling paraphernalia. The raid was executed quickly and thoroughly, with little opposition being encountered, though in several instances doors had to be battered down.

The raids climaxed a long series of investigations, it is said. The raiders met by plan at Mt. Eden where ten automobile loads of them swarmed into Alvarado, and quickly surrounded the Chinese quarter.

**Little Tijuana Abatement Proceedings:**

Trial of two abatement proceedings against Alvarado's "Little Tiajuana" opened today in Judge James G. Quinn's court today with spectators benches crowded with women, public welfare workers and neighbors of the district subpoenaed to testify concerning the general reputation of the boardwalk establishments where gambling, drinking and sale of contraband liquor and narcotics are alleged to have been a constant source of revenue.

Twenty owners of the rickety pool rooms and dance halls, and Edward L. Farley, owner of the land on which they are built, are defendants in the two suits. Since the passing of the narcotics abatement law at the last legislative session, this is the first instance of prosecution asking abatement for that cause in Alameda County and in the State.

The two suits designated as "The United States versus Edward Farley and others" and "The People versus Edward Farley and others," result from a raid of "Little Tiajuana" last March, when twenty-six wooden houses, connected by alleys, runways and underground tunnels, were entered by federal and county officials and wholesale arrests made.

Mrs. August May, sister of former District Attorney Ezra Decoto, was among the character witnesses summoned to testify concerning the activities of the notorious "board walk row."

*The Oakland Tribune, October 18, 1926*

**Chinese Woman Fights Abatement Proceedings:**

While state prosecutors and welfare workers join forces in their fight to have the block of "Little Tiajuana" resorts at Alvarado padlocked, **Mrs. Wo Lee**, aged Chinese woman and veteran resident of the district, has raised her voice in a wall of Oriental-tongued protest against being ousted from the place.

Abatement proceedings against the row of wooden shacks, where gambling and sale of contraband liquor and narcotics are alleged to have taken place, are being heard before Judge James G. Quinn this week. Women welfare workers have crowded the spectator's benches every day of the trial.

**Mrs. Lee** is 80 years old. For forty-two years she has lived in Alvarado, watching the inhabitants come and go, get married and die. It was a Chinese settlement entirely when she first came, but in recent years the Mexican element has grown stronger, leading to the nickname "Little Tiajuana." It is the Mexicans Mrs. Lee blames for the present trouble. She operates a small Chinese merchandise store in the section and insists that she has never done anything in violation of the law. If she is put out of her old home she will have no other place to go she says. There are now nine Chinese farmers living in the quarter, and all face difficulty if evicted, she says.

#### **Little Tiajuana:**

Twenty-seven rickety wooden houses in Alvarado's "Little Tiajuana Row" will have padlocks on their doors, following the court order today of Judge James G. Quinn commanding abatement of the entire district. The order ends a ten-month fight by District attorney Earl G. Warren to close the places.

Conviction on violating red-light laws and the liquor regulations was made in the cases of all 27 houses. In five of them convictions for violating narcotics laws were made. The close of these places marks the first instance in the State in which abatement has been ordered on the basis of the narcotic enforcement law passed at the last session of the State legislature.

Fines or small jail sentences were handed out to the 28 persons arrested in the March raids. Most of these were Chinese or Mexicans.

Suits were brought against Ed Farley, owner of most of the property on which the wooden structures were constructed. William and Joseph Avilla, owners of two pieces of property, "and others." Narrow passageways, some of them underground, connected the structures it is said.

### **Little Tiajuana Burns:**

Little Tiajuana, known for years as the toughest place in Alameda County, is no more. It was destroyed in one of the most spectacular blazes in this part of California, with five Fire Departments fighting the flames. Only by prompt and efficient efforts, did fireman prevent the fire from spreading to an adjoining lumberyard, and for a time the entire Alvarado community was threatened.

The fire is believed to have been started by a group of hoboes who camped in one of the buildings last night. The entire two blocks of buildings comprising that notorious district had been padlocked several months ago, so that aside from hoboes they were unoccupied. The frame shacks proved to be kindling wood, and within a short time they began eating toward the Catholic Church and the Alvarado School across the street.

Little Tijuana obtained its name from the Mexican city where vice is given a free reign. This district consisted of two blocks of shacks in Alvarado, where the prohibition law was openly flouted, the scene of kidnappings and holdups and the refuge of lawbreakers. Violation of the law became so flagrant that authorities finally stepped in and padlocked the entire district, at the same time starting abatement proceeding against all of the buildings.

### **Water:**

The Spring Valley Water Co. has a big year this year, the biggest for a number years and it has chosen to pay back very liberally the water loaned to it from our water district during the shortages of 1920. The East Bay Water Company, which pumps from the district's underground supply at Alvarado, is pursuing a very different course. It also has the greatest water storage for years, in fact the greatest in its history. It owns only a few hundred acres of land at Alvarado but it is draining the water from the entire 50,000 acres of fine farmland in the Alameda County Water District. Although the Alameda District has kept up the underground supply for the past ten critical years and has made it possible for the East Bay Water Company to meet the growing needs of the Eastbay cities, the company in spite of its greatly increased storage, has refused to cut down its daily pumping at the Alvarado wells.

### **Liquor Raids:**

"Mary, Mary, quite contrary."

"How does your garden grow?"

"With beer, wine & whisky too."

"In bottles all in a row."

That is the way the nursery rhyme should be brought up-to-date, according to the county dry squad and their opinion is based on a raid at the Alvarado Hotel last midnight.

There, beneath a well-kept garden marked with packages that had contained turnip, carrot, and other vegetable seeds, the officers report they found a cache of assorted liquors and now they are searching for the "gardener." The "planted" liquor was confiscated and destroyed.

And liquor was also in the vegetable kingdom at the Newark poolroom, operated by Louis Ruschin, the raiders reported. In a large basket of vegetables on the back porch they found whisky and white wine concealed, they said. Purchasers ordered turnips and got whisky they declared while an order of carrots brought forward wine. Ruschin was brought before Justice of the Peace A. J. Norris of Centerville and fined \$25.

A third cleverly concealed cache was discovered and Mrs. Catherine Pratali arrested in the Travelers Rest in Niles. When officers entered Mrs. Pratali denied having any liquor in the place but there was a long, old-fashioned hatpin lying on the kitchen table, and Mrs. Pratali had bobbed hair.

Taking the pin the sleuths began poking it into sundry holes in the wall and floor and finally a trapdoor in the floor swung open and a quantity of liquor was revealed. Mrs. Pratali was fined \$300 by Justice of the Peace J. A. Silva.

### **Mother Saves Child:**

Mrs. Brigida de Paredes, 35, of Alvarado, will suffer no permanent injuries from her successful attempt to protect her four-year old daughter, Maria from crushing when their machine overturned on the Niles Highway (today's Mission Boulevard) near Hayward. This was the report received by Constable A.J. Cunha from Alvarado. Mrs. Paredes has been confined to her home from shock, back sprain and lacerations of the face and hands. The child escaped with only a cut on the leg. Mrs. Paredes so braced herself that the slowly settling auto was prevented from resting on the body of the child. The pair was extricated by passing motorists after they had been pinned down for more than ten minutes.

#### **Alvarado Woman Dies Mysteriously:**

That Mrs. Olive White, 30, wife of Manuel White Jr., died of a general septicemia, or internal poisoned condition, the cause of which is undetermined, was the verdict of a jury sitting in inquest on the case at the Pratt Mortuary Saturday afternoon. Evidence as to whether the condition, which caused her death, was or was not due to a criminal operation was held to be inconclusive.

Dr. E.A. Ormsby of Centerville, who attended Mrs. White before her death and Doctor Edward V. Tiffany, county autopsy surgeon, testified that they found evidence that such an operation had been performed. Dr. Gertrude Moore of the Western Laboratories, who analyzed part of the autopsy material by microscope, declared there was no evidence of the operation having been performed, nor of the condition preliminary to the operation having existed.

Mrs. Margaret H. Manning, 769 Watkins Street, was held for two days in connection with the death of Mrs. White Tuesday at a local hospital, and questioned regarding the illegal operation alleged to have been performed on Mrs. White. She denied ever having known or have seen Mrs. White and denied all knowledge of such an operation. Mrs. White was released Tuesday afternoon and no evidence to warrant her being held has been produced.

By the advice of her attorney, Mr. Leo Sullivan, Mrs. Manning did not testify at the inquest. Mr. Sullivan tallied an important point when Dr. Tiffany testified that the two bags of surgical instruments taken by the officer's from Mrs. Manning's home in connection with the investigation did not contain certain instruments necessary for the operation under discussion.

Dr. Ormsby and Dr. Tiffany testified that Mrs. White was in a very grave condition, that she was suffering from pneumonia, heart disease and a generally poisoned condition of the intestinal tract. Peritonitis was also present during her stay at the hospital before her death, they said. They declared also that positive evidence of an afterbirth existed. The statement obtained by Dr. Ormsby, however, was the only evidence linking Mrs. Manning with affair produced at the inquest.

**Water:**

Farmers around the Newark area in Southern Alameda County whose wells have either gone dry or are pumping salt water are being advised by Chris Runckel, secretary of the Alameda County Water District, against going to the expense of sinking their wells deeper this summer in an attempt to reach a supply of fresh water.

Despite the release of water obtained from the Spring Valley Water Co. this summer, the water in southern Alameda County is said to be at its lowest stage in many years, and a number of farmers have lost their crops because they have no water for irrigation. The condition of the water table is said to be due to the shortage of rains last winter and the heavy pumping at Roberts Landing and Alvarado to supply the bay cities.
